
In a previous article, dk@crl.com (David A. Kaye) says:
> An attack is a personal
>defamation, such as the recent show in which the Clintons were called
>"white trash". THAT is an attack. I don't hear people who dislike
>Limbaugh calling him names.
>

I don't remember Rush using that term (although I might have missed it.)
Maybe a caller did. . .
I don't condone it in any case

Aside 1: That term has been thrown around by other local talk show
hosts using that term (or "trailer trash"). Seems they're the only
group one can insult without being "politically incorrect"

Aside 2: Rush has been called names: a "right-wing" wacko by another
national talk-show hosts, the "White Whale" by someone over on another
newsgroup, various permutations of his name in several TV shows and
plays . . . .

He never brings up any of this on his show, though, at least to my
knowledge. . .

4971. More Responsible Talk

>> 2 Nov 1994 04:41
>> charles hobbs: >Talk Radio's Effects
>>
>> Ok, and while we're at it, let's ban heavy metal music for probably
>> causing a few suicides, lets get rid of rap for causing a few kids to
>> shoot at cops, country western for making people drink to much . . .hell
>> lets trash the Internet too! We all know it's "full of perverts" :-)
>>
>> [Moderator's Note: Er, um, I might have missed something, but where in
>> Mark's post did he suggest banning Rush or any other talk radio? Bill]
>
>Well, Mr. Moderator, Hobbs also did not read what I wrote. And if he followed
>his own line of reasoning, he certainly should have no objection any time
>two men kiss on teevee in circumstances clearly designed to delineate the
>presence of a romantic relationship, with aforesaid lack of objection thereby
>distinguishing him from most other of the so-called "conservatives" out there.

I have no problem with two guys kissing on TV. I have an on-off switch and
a channel changer, and know how to use them, if anything bothers me . . .

>
>This is, of course, assuming that Hobbs is a "conservative." If he is not,
>I will accept the correction accordingly.
>

Not all "conservatives" (or any other group for that matter) can be put
into such convienent little boxes. I don't identify with the "religious
right" (the people who are mostly concerned with the aforementioned tv
episode) at all, by the way.
>>
>But there are limits even on that. Would you advocate letting a talk
>show host say "fuck," "shit," "piss" and other earthy words on a routine
>basis? After all, they are effective, they pack a punch, and they are
>understood by even the humblest listener.

Why not? Some of the stuff Howard Stern says is pretty darned close . . .

>
>Would you let your kids watch people fucking on TV? (I mean on a TV
>show, not on the TV set itself.) If any of the respondents who objected
>to my remarks object to this particular concept, then they are not
>being consistent with their self-professed philosophy, whatever it may be.
>
Letting kids watch anything on TV is up to the parents, anyway. I'm

all in favor of letting adults watch/listen to just about anything they want, though . . .
>
>Should freedom of speech extend to graffiti artists? Even if they spray
>paint all over a street sign, later causing a traffic accident because
>somebody turned the wrong way at the wrong time?

That's defacing someone else's property, and cannot be compared to expressing a verbal opinion.
>
>The bottom line is "freedom of speech" does not exist in and of itself.
>It exists within a context of other freedoms, responsibilities, and
>accountabilities.
>
Sure. You cannot say "fire" in a crowded theater in all that. But that's still a long stretch from there to blaming Rush Limbaugh for that nut that shot up the White House a few weeks ago, or whatever.

>Radio cannot exist in a vacuum. It must exist in a physical
>environment. It also must exist in a social context. Those who control the
>content of radio transmissions must be aware of that context and
>recognize that if they do something harmful to it, they are doing harm to
>themselves as well. They may not recognize the harm immediately because
>it takes time for this particular kind of feedback loop to complete.
>But it will happen.

But how do we define a consistent definition of "harm"? Rush Limbaugh? Bob Grant? Howard Stern? Bob Larson? Bruce Williams? Playing the same 500 oldies over and over and over again? All of the above?
>

4973. Need Telephone Line Patching Device

I host a talk show from 3-5 PM EDT on the Omega Radio Network. I'm in bad need of a telephone patching device. Simply put: something to patch together 1-4 phone lines so the callers can talk to each other. I'm aware that for big bucks you can get something new with bells and whistles. I don't need new; I don't need bells nor whistles, just SOMETHING THAT WORKS!

If you've got something or know where I can get it, E-Mail me at YaakovS@AOL.com. Better yet, call me at 1-800-567-4857. I'm DESPERATE!

Source record: 36729

I thought it was a terrible injustice that when 'QEW was established, PD Stan Martin didn't even think about bringing Les Davis on board. While Davis' early radio career was in jazz radio (the great WRVR, which is now WLTW), he more than proved himself capable of filling the large shoes required to walk around the "stars" of the Make-Believe Ballroom. And how ironic that Chuck Leonard, one of New York's most popular radio personalities of the 60's and 70's (WWRL, WABC-AM, WRKS-FM in later years) should be working at a standards station when you would think a man of his caliber and experience would be at WCBS-FM; he would fit into their format perfectly. I only hope that Joe McCoy, CBS-FM's esteemed Program Director (12 years) would see his way clear to getting Leonard on board.

Andrea

Wow.

All I can say is wow. I received over 100 email 'get well' cards in only one day. Geeze guys. I know that you only wanted me to get better so you could post again.

Well, I cleared pout 80-odd posts tonight. I am still VERY sore and it is hard to move around. I still am without glasses :-(. Mom is still in the Hospital. But considering what we went through, we are lucky to be alive!!!!

I WAS wearing my seat belt and it probably saved my life the other night.

Rather than tell the whole story, here is the blurb that Pat Townson placed in comp.dcom.telecom (the newsgroup he moderates)... My comments (some corrections) appear in [brackets] in his mostly factual post...

>From: telecom@eecs.nwu.edu
>Subject: Airwaves Journal Moderator in Car Crash!
>Date: Thu, 10 Nov 1994 20:00:00 CST

It was just about a week ago that Bill Pfieffer took over this journal on an emergency basis to tell you of my hospitilization, and now it is my unfortunate turn to tell you of a crisis which has visited him in the past 24 hours.

Bill resides with his mother in Springfield, Missouri. On Wednesday night, November 9 in the late evening, he and his mother were riding in their car on a narrow two-lane highway just outside of Springfield. As they rounded a curve in the darkness, they were met head-on by a motorist in the other direction [on rain slicked curved road with his brights on] . Bill swerved to miss the other car and did miss a collision only to instead drive off the road and into a very deep ditch on the embankment as he applied his brakes. [Ouch!]

Their car completely turned over a couple times, and came to a halt *upside down with Bill and his mother trapped inside*. The front window was totally smashed and they both were cut up by the flying glass. Bill's mother is 80 years old and sustained several broken bones and perhaps some internal injuries [actually, only some broken bones, a cracked pelvis and 3 broken ribs] . She is in the hospital. Bill got banged up pretty bad but after examination and treatment by emergency room personnel he was permitted to go home, with no broken bones but apparently a few sprained and torn muscles. He had a sliver of glass in his eye which the emergency room people took care of. He is resting at home.

Bill was able to get out of the car first and after getting his mother out to relative safety he then got a passing motorist to go for help at a nearby farmhouse. Calling 911 there brings the sheriff and the Volunteer Fire Rescue Squad to the location. Bill and his mother were then rushed by ambulance to the hospital.

I feel just terrible about this. Bill and I have been friends for nearly twenty years and he has had his share of problems in the past. Like my family and myself, Bill and his mom are evacuees from Chicago. Their neighborhood, like where we lived for many years had become so *awful* -- there is really no other word for it -- that they sold their house and moved as far away as they could. They've been in Springfield, Missouri now for several months -- a decent, pleasant and safe community -- and although times have been tough for him he has made it pretty well ... now this!

[Actually, we didnt flee a bad neighborhood, as much as just wanting out of the expense and crowds of the city. We didnt pick Springfield randomly, I have friends near Branson and I love the hills and countryside. Plus it is cheap to live here. I recomend it highly.]

Some of you are probably subscribers to his AIRWAVES Journal or read his efforts on Usenet in rec.radio.broadcasting. May we take a moment to wish him and his mother the best as they recover. Write him at wdp@airwaves.com to send your thoughts.

Godspeed, Bill.

PAT

==========

Thanks Pat for the nice words. And to the incredible outpouring of support and care from near strangers on this group. I am honored to be among such a group. Even some of those whose views I have come oput in opposition of are wishing me and my mom well.

Bless you all.

If you want to send any cards to my mom [a few asked about this] send them to A.L. Pfeiffer c/o PO Box 8746 Springfield Mo 65648. I already got my cards in email <grin>.

Fortunately I had comprehensive insurance on the vehicle (which is a mangeled mess of metal now) and that *should* cover the bulk of our medical bills.

Be well, and again, thanks to all...

4980. Boston Radio Watch 11-11-94

Newsgroup: rec.radio.broadcasting
Date: 1994-11-13 04:33:02 UTC
From: nhmas@gauss.med.harvard.edu
Message-ID: <3a44tu$bqa@vixen.cso.uiuc.edu>
Source record: 36735

* 68 on 68 :

ARS' All-Talk WRKO-AM 680 added yet another right wing
conservative voice to its schedule...Charles Adler whose
1-hour live call-in TV show(Larry King style) has been
airing on Boston University's WABU-TV68 for the last 4
months, began his weeknightl 3-hour radio show this past Monday(11/7).
The show is produced at Channel 68's studios in Brighton.
All callers are screened by Boston University communications
interns working for a course credit at Channel 68...
The middle hour(8-9) is simulcast on both, Channel 68 and
WRKO AM680[both stations run their own ad spots and promos during
that hour]...

WRKO's new line-up :

5:30-10a Marj Clapprod and Pat Whitley
10a-12pm Jerry Williams
12p-3pm Rush
3pm-7pm Howie Carr
7pm-10p Charles Adler
10pm-12a Bruce Williams(TalkNet)
12-5:30 Rebroadcast of Rush's and Howie Carr's shows...

* It doesn't seem likely that Gene Burns is headed back to Boston.
Those rumors coming out of NYC in the last 2 weeks were just
that...
Gene is still recovering from a major neck surgery in his NYC
apartmennt. In an interview with a Boston media scribe Gene
mentions that he has to wear an upper body cast till about January
16th...The only all-talk outlet(WRKO) here has ended putting
finishing touches on its local line-up earlier this week and
WBZ hasa top-rated Brudnoy in the evening...Of course there's
always WBUR-90.9FM...:-)

* Communicom which has an agreement to acquire Noble's 50k Watt
WSSH-AM 1510 for $1.5 million announced on Monday(11/7) that
once the FCC gives its blessing on the deal the station's
format will be all-religious which include local and syndicated
talk and music. FCC approval is expected around January '95...
Noble has leased all of 1510's broadcast time to Spanish
broadcasters until then....

There was some early speculation that 'SSH would become
Seatle's KidsRadio affiliate in the market. However, that
won't happen with 1510. Apparently, KidRadio has already

secured an unnamed station here but keeping it as a big secret
before its April launch in the Boston market...

Other KidRadio potential candidates :

Greater Media's WMEX AM 1150 - current programming: ethnic and
partial simulcasting of CW WBCS 96.FM)

WRCA AM 1330 - current programming: ethnic, some jazz and big band

ARS' WBNW AM 590 -- current programming : all-business and last
season of NHL's Bruins hockey

* David Brudnoy is expected to return to his WBZ show later in November.
He's still resting comfortably at Mass. General Hospital.
There's talk that he'll probably resume his work schedule
by telephone from his home whenever he's pronounced physically
ready to come back on the WBZ airwaves once again...

* ARS' all-70s WCGY-93.7FM is slow in filling its DJ-line-up.
The station has been on the air for almost 2 months but still
doesn't have mid-day, night-time, or overnight people.
Scott MacKay(6-10a) does the morning drive and Willie B.(3-6pm)
handles the PM drive...

The calls are expected to change in December when FCC grants its
approval on $12.5 million deal...

* These are weird times at Pyramid's CHR powerhouse WXKS-107.9FM
which has slipped quite a bit in the most recent book(most of
KISS 108's losses are attributed to a rising success of its new
duopoly sister station CHUrban WJMN 94.5FM and
ARS' Hot AC WBMX 98.5FM). WXKS' primary target audience has
always been females 18-34 and 25-54. Nobody could touch them for
years....Well, the times are changing and so is KISS' new
direction : The station which almost never allowed a male listener
to be heard on its air(well, maybe at 3am :-) now regularly lets
male listeners on its contests and requests....

-Mark

4981. North San Diego Report

Newsgroup: rec.radio.broadcasting
Date: 1994-11-13 04:33:04 UTC
From: ChrisCarm@aol.com
Message-ID: <3a44u0$bql@vixen.cso.uiuc.edu>
Source record: 36736

Here's what's happening in North County San Diego:
Nov. 11, 1994

Richie Havens will make an appearance at the back door of 95.9 KKOS, Carlsbad, next week. The 60s legend will play an "un-plugged" session for a limited audience; and broadcast live on the AAA-format leader. Havens, who made a stop prior to last summer's Woodstock, will be taking the train in from Los Angeles -- his reported favorite mode of transportation.

KKOS, coming off of a good showing in the summer books, is expanding their entertainment. Last weekend, they co-sponsored part of a film festival on AIDS, by showing the film "Philadelphia." All proceeds went to a San Diego-county based AIDS project.

KJQY (103.7 FM, 36kw) San Diego, is the only station in southern California to pick up the broadcast of Whitney Houston's South Africa concert. The show will be simulcast via pay TV's HBO on Saturday.

Bill Ballance, a fixture in San Diego radio for years, headed north to the L.A. basin. In Friday's Orange County-Register, Ballance, now heard on KRCI, 92.7 FM, expands to KGRB, 900 AM. KRCI, which is on Catalina Island, has to broadcast over 30-miles of open water before it makes landfall. [Plus, any LA/SD FM listen will tell you that the band is crowded, and a low-powered, distant station will get bumped by co-channel interference.]

Fred Wallin, formally of KABC, and KMPC Los Angeles, now is on KIEV 870 AM. The 9 -11 p.m. Sunday sports show is slated to start Nov. 27.

I've received several posts about the term "fifth estate." Could someone with an AP style guide (commonly called "The Bible for Writing") list the "Four Estates." I believe it started with an olde English background. The Fifth Estate includes radio and television professionals. The style guide has it all, so someone please post to Airwaves Journal!!

I've increased and expanded the North San Diego Radio Log. It includes the Spanish-language stations formats; along with frequency. Power and direction for AM stations south of the border are hard to come by, but am working.
For the latest edition, please e-mail me for the five page log.
[last update, Nov. 8, 1994.]

Chris Carmichael If we lean to far right,
Carlsbad, California will the ship
ChrisCarm@aol.com turn over?

I too remember Biggie as one of the kinder, nicer people in the biz.

Brad Crandall passed away here in Los Angeles about 3-4 years ago, sad to say. I remember the night he bought me my FIRST drink, in Hurley's, no less! (I ws, of course, underage, but Brad was cool about it!)

Almost 20 years after those WNBC days, in the mid-80s, I needed to hire a freelance announce for an industrial show I was producing; Brad fit the bill, and it was a true joy to be able to hire the guy who would sit and talk with me for hours, encouraging my interest in a career!

Somewhere, on one really poor quality reel, I have some Biggie and Long John airchecks, plus one of Sterling Yates on FortunePhone mentioning my name (I had caught a factual error in one of their questions, thus validating my anal-retentive life!). And, yes, I still have the record album I won from Big on the air by knowing "when we're eating breakfast here, what meal are they eating in London?" and getting through (PLaza 7-8866!)...

Great memories...

4988. Help Me Find Ira Fistell

Newsgroup: rec.radio.broadcasting
Date: 1994-11-13 04:33:19 UTC
From: JEAN44 <jean44@delphi.com>
Message-ID: <3a44uf$btd@vixen.cso.uiuc.edu>
Source record: 36743

Back in the early-to-mid '80's, I used to listen to Ira Fistell, who had a syndicated show on AM from midnight to 3:00am (in New York, at least). He was dropped by WABC, and I haven't heard of him since. Is he still out there?...I'm in the Philly area, and the talk radio really stinks here. What happened to Ira?

4989. Jazzy 100 vs. WJZW

Newsgroup: rec.radio.broadcasting
Date: 1994-11-13 04:33:20 UTC
From: Gary Luckenbaugh <luckenbg@delphi.com>
Message-ID: <3a44ug$btk@vixen.cso.uiuc.edu>
Source record: 36747

With all the discussion about Jazzy 100 vs. WJZW I decided to go to Kemp Mill records and pick up a copy of Bob Linden's "Jazzy Music Scene." I like WJZW very much and hear very little difference between WJZW and the old Jazzy 100 but it is interesting to see Bob Linden's perspective. Here are some interesting quotes:

- "Does WJZE program director Bob Linden give up the fight to brin back Jazzy 100-quality to the radio now that "Smoothie" is on the air? OF COURSE NOT!"

- "After many laboratory experiments with listener reaction, the results are back and "Jazzy 100 DNA" does NOT match "Smooth DNA". You can tell the difference."

- "I will be one of those people trying to buy WCXR and I will want the support of the community in this effort, as I already have investor support."

There is also a list of CD's and tracks that he would play on Jazzy 100 if it were still on the air. At least half of the CDs he lists are currently being played on WJZW.

The Washington station that I really miss is WBMW circa 1988. That was the station that introduced me to contemporary jazz in the first place and a lot of other interesting artists. Where else could you hear contemporary jazz along with Mary Chapin Carpenter, Shadowfax, and Ice House. Now that is a station worth being passionate about.

4990. Where's Joe Franklin

> driven talk, and "general" talk)?

Today: WLS AM right-wing hot talk
WLS FM lifestyle talk
WBBM AM news
WMAQ AM news / sports
WSCR AM sports
WMVP AM sports
WLUP FM comedy/talk/adult rock
WGN AM talk/variety
In addition, alternative rocker WCBR runs brokered talk most of the
weekend.
WCBR is 92.7 fm in Arlington Heights.

15-20 years ago (late '70's)

WIND went from AC to talk (currently spanish)
WBBM AM was all news as they are today
WGN is much as it was then
WAIT AM made a short foray into talk in between various
flavors of MOR
WMAQ AM was all country
No talk on FM (although WNIS 101.1 now Q101 tried news on the
FM for a very brief time...this station had been
soft rock and then country WJOI and became AOR WKQX
in the '80's they went AC and are now heavy rotation
alternative).
No all sports talk.
WLS AM was top 40 and WLS FM was WDAI...AOR to weird adult mix that
made little sense to hard AOR to disco to oldies intensive hot AC
(WRCK)...

Does this answer the question and tell you more than you wanted to know :)

Tom,

Thank you for the informative and well considered report on the
current staus of KMOX. I grew up in St. Louis with the voice of Rex Davis
and Jack Buck. To me, they and KMOX will ALWAYS represent what quality
Radio Broadcasting is all about. I'm very glad that KMOX is doing well
despite the recent tragedies and changes and look forward to lsitening to
KMOX when I next get back to St. Louis (this Christmas) - I have, in
fact, heaed KMOX once from out here a few years ago. It was quite a
thrill and an excellent opportunity to wallow in nostalgia....if I could
only get KPNW in Eugene off the air .... Again, thank you for the
excellent report. Good to know my favorite station is doing well. You seem
to remain on the right track.

Mark Roberts (transvox@tyrell.net) wrote:

: "The man who walks and talks at midnight," longtime KMOX overnight
: announcer John McCormick, died Saturday in the St. Louis suburb of
: Frontenac.
: McCormick was the announcer for the CBS O&O's overnight program of
: easy-listening and big-band music, bridging selections with news stories
: and other information. Often he would end a story by saying, "And now you
: knooooow via radiooooo."

And all from 1120 Skyway Drive, too.

I remember finding him one night when I was probably in my early teens (maybe younger) and worried about all the big storms passing through. I don't know exactly why, but I felt very reassured by hearing him on the radio, and became somewhat of a fan (although he was on way past my bedtime!) even though the music he played was not what others my age would have found "cool" at the time.

Somewhere up there at a new address on Skyway Drive, there's some real fine radio going on.

I think the future of all arts funding (NEA/CPB et al.) under the new congress will be determined more by the economic climate than the political. Not every Republican elected on Tuesday fits well in the Jesse Helms mold (just as every Democrat is not a clone of Ted Kennedy).

In my humble experience, I have found that the fund the arts/let the arts fend for themselves political axis is not the same as the liberal/conservative or republican/democrat axis. It will be interesting and of more than passing interest to me as a NPR chief engineer and musician to see how the new congress does handle the Arts.

The FCC Rules can be had from the Government Printing Office.

It can also be ordered from Rules Service Company, which unlike the
GPO,
updates the information every two months.

Rules Service Company and Pike & Fischer offer the Rules on diskette.
P&F also have it on CD-ROM.

There is no free lunch.

5004. ADMINISTRIVIA: Update on my accident.

Newsgroup: rec.radio.broadcasting
Date: 1994-11-14 10:44:57 UTC
From: wdp@airwaves.com
Message-ID: <3a7f39$ct6@vixen.cso.uiuc.edu>
Source record: 36659

Greetings Friends:

I say friends because the responses keep coming in to my (and my mother's) unfortunate auto accident of last Wednesday evening. I wanted to update you-all on what is happening.

For those who don't remember, I was driving my mother (80 years old going on 20) to her weekly senior dance. It was raining and the narrow roads were slick. I was confronted by a vehicle in the opposite direction with VERY bright hi-beams on. I moved to the right to be sure of avoiding a head-on, began to slip in the muddy shoulder, corrected to the left again and wound up in an uncontrollable spin into the opposing ditch, at which point my pickup flipped over at least twice and came to rest on its roof. I climbed out, attempted to assist my mom, and was taken to a nearby farmhouse by a passing motorist where they called the police and ambulance.

I was released with severe muscle trauma, bruises and many scrapes, but unbroken. My mother was hospitalized with 3 broken ribs, a fractured pelvis and similar muscle injuries as I received. Had we not been belted in, we would likely be dead. They say almost definitely be dead. The truck, sadly is a total and I lost my glasses and my 700 dollar guitar in the mess. (I now have replacement glasses).

I have recovered somewhat, in that I can now walk fairly well, although getting up and down from bed or a chair is still painful. Mom is hospitalized still and frankly it looks as though she might be in some form of hospital for several weeks maybe even a month or more. At 80, these things don't heal as well as they do at thirty-something.

I saw her today. A neighbor drove me to town to see her and get groceries (and glasses). She is in good spirits, mostly, but is in severe pain when they try to move her. I am still without a vehicle, and the insurance company is going to appraise the damage today (Monday the 14th).

My main concern now (other than her health) is getting back to work. I hope I can do that soon because savings are getting low, yet bills keep coming. I am hoping to be back at work myself within a couple weeks.

I want to, once again, thank everyone who is writing in support. It is good to know that so many strangers care enough to write. A few asked where to send 'real' get-well cards for mom, they can be sent to my PO box, which is Box 8746 Springfield Mo. 65801-8746. I can get

mail there too. I told my mom (she likes to be called 'Smiley') about
the outpouring of concern from the net and she was very happy.

If any of you are still holding submissions to the group, don't. I am
at least able to do this while recovering.

Again, thanks..

Bill

I suppose I'm committing a bit of blasphemy for saying this in a group read by many, many radio personalities, but... I for one have been greatly enjoying the lack of DJs on "The Eagle". I do not miss the patter, the inconsequential tid-bits, the "community service announcements", the incessant self-promotion, or the #1 sin of DJ radio: talking over the music. The current set-up is ideal for me: I work from roughly 10:30 to 6:30, and listen to The Eagle on my morning and evening drives, conveniently missing the slots where there's a live voice.

If I want to hear talk -- and I do, about 50% of the time -- I'll put on WBZ-AM 1030 or WEEI-AM 850. But when I want to hear music, I don't want to hear patter in-between. I don't know if this is a trend, but many of my friends that I've told about the station are quite impressed with the lack of on-air "talent".

Interesting response, Aaron. Also interesting to note that CBS-FM seems to be copying WPLJ's 70's format a bit; I hear more 70's than I did when I first started listening to the station in 1984. I dont know if they're necessarily going for a younger demographic (younger listeners) or if Rod Calarco (VP in charge of five CBS O&O's--Owned and Operated--including CBS-FM) is getting in a tizzy because CBS-FM's numbers in morning, afternoon drives and 12-plus were down in the summer book, and because the first trends should be out soon and I believe the station is down in trends.

<<To me, WJZW sounds great. Is it just like Jazzy 100? No, but it's
better than most of what I can find going up and down the dial.
Will WJZW be sold in the near future? It looks that way. But,
what the heck can I do about it? Those of you in the Washington,
D.C., area with an opinion on WJZW, please email your thoughts to
me at TOMLACKO@DELPHI.COM. Most of what I've heard on 105.9's new
sound is positive but I'd like to know your thoughts. All
responses will be forwarded to Steve Kosbau, Program Director, at
WJZW.>>

Not bad, Tom, but the mix is far broader than jazz.
I heard Philicia LeDesma one evening. Wasn't she WJZE? Also one other female announcer who I believe was at JZE, but who may have been at HUR--I can't remember who it was now. She said she was happy to return to DC.

The play list is a little too short. I keep hearing the same songs over and over. I listen all day at the office.
I would prefer to hear a little more personality. It seem the announcers are pretty much limited to giving the call letters, the promos, and giving the names of the artists and songs.
Can't get it at home here in Arnold. It stays with me from Alexandria to the edge of Annapolis. Then 105.7 out of Baltimore, an oldies station, takes over.

5012. Re: Info about "For the People"

Newsgroup: rec.radio.broadcasting
Date: 1994-11-14 10:45:13 UTC
From: talk1370@aol.com
Message-ID: <3a7f3p$cua@vixen.cso.uiuc.edu>
Source record: 36667

In article <39c8p4$ccp@vixen.cso.uiuc.edu>, kgiven@bu.edu (Karen Given) writes:

(on "for the people")

This is admittedly personal opinion, but the healthy skep-
ticism that all people in and out of the media should maintain
towards government and their own colleagues, seems to turn
into paranoia for Chuck Harder and co. on "For The People."
They may make a certain amount of sense on individual
issues (frankly I share their skepticism on recent trade treaties)
but taken in total, these people believe there is some sort of
conspiracy afoot to concentrate power in the hands of a very
few, and only they have the truth to combat this conspiracy.
Rather reminiscent of the modus operandi of the Scientologists
or the John Birch Society, IMHO, though perhaps not quite
so overheated. In fact, there are times I listen to that show on
shortwave (no local station carries it in Western NY, thank God)
and wonder if all the participants might benefit from Prozac...

Hello there. My name is Jennifer Jenkins and
I am a senior in Broadcasting with a minor in Management at Marquette
University in Milwaukee, WI. I graduate in May, and I was wondering if
any of you have any advice/connections for me since I will be interning
over the summmer at a radio station in Milwaukee (WISN, hopefully) and
will undoubtedly be looking for a job in the Fall. I would appreciate
any advice or suggestions that youall may have. Thank you very much
for your time. Hopefully you all will be tlaking about me one day! :)

Hello! I am Wayne Hoffman, News Director at radio stations KFIN/KBTM in Jonesboro, Arkansas. I'm new to the information super highway. In fact, I'm having some trouble getting out of first gear and off the exit ramp, but we're getting there. I've been in broadcasting for about 8 years (I think, its hard to remember exactly.) Anyway, I've been with KFIN for about four years, and just when I thought I had enough things to do and worry about, my boss bought another radio station (KBTM). But I'm loving the work. If you want to talk about the news industry, small market radio, etc., I'd love to hear from you. Just out of curiosity, I wonder how many news directors are hooked up to Airwaves. Let me know. Thanks.

In article <3a44v1$c09@vixen.cso.uiuc.edu>, TOMLONSON@wmich.edu writes:

(on NPR/CPB funding)

A few things may be worthwhile to note here. First, incoming
Senate Banking Committee chairman Al D'Amato has always been
a staunch supporter of public broadcasting. Second, Bob Dole got
severely burned a couple of years ago (as did Jesse Helms) when it
came out that they had maxed out their campaign contributions from
the cable industry, and their opposition to PBS/NPR looked very
suspiciously like a bought vote from the cable companies that want
to push PBS out of the way so they can have a monopoly on cultur-
al and information programming. I doubt they'll want to look so blat-
antly bought and paid for again...because you can guarantee that
the public broadcasters will remind everyone of the source of their
funding once again, and make them look like whores for the cable
industry. Not the way to retain power with a surly electorate that's
already having second thoughts about the votes they cast, as a result
of some of the wierd ideas being floated by new committee chairs
over the last few days...

Roy Fredriks, seven years with WABC radio in New York, looking to program talk station. I will paste my CV below for any interested parties. Serious Replies only please.

ROY FREDRIKS
340 East 93 Street, Apt 22-I Phone/Fax:
New York, New York 10128 (212) 410-4249
E-mail: broadway@pipeline.com

Objective
A Programming position where career experience will be maximized to positively enhance station operations and profitability.

Professional Summary
A dynamic, extremely creative professional with solid career experience in all aspects of radio broadcast entertainment operations, public relations, and media communications. Demonstrated ability to turn new ideas and concepts into reality. Proven problem solving and decision making skills with the ability to set priorities and organize facilities to generate top results. A strong team leader, committed to maintaining high standards of excellence. Excellent interpersonal and communication skills with individuals at all levels. Computer literate with expertise in the use and troubleshooting of Macintosh software.

AREAS OF EXPERTISE
* RADIO BROADCASTING * PROGRAMMING * TALENT DEVELOPMENT
* NEWSWRITING * PRODUCTION * SCHEDULING * SPECIAL EVENTS

PROFESSIONAL EXPERIENCE
WABC RADIO- New York, NY 1986-1993
Executive Producer
Identified story ideas, booked guests for talk shows, directed and formatted programs. Coordinated station's coverage of various major national news events. Wrote copy and edited tape. Discovered new talent; served as MC for all promotional events.
* Produced the highest rated afternoon drive time radio program in the NYC
metropolitan area for three consecutive years.
* Recommended and implemented innovative format change which resulted in
increased ratings for WABC's overnight and morning programs.
* Discovered morning drive and 9-11 am talent and helped establish them as
major players in the market.
* Coordinated and produced successful annual radiothons for the

Leukemia
Society.
* Only Producer during seven years with WABC to win a media award for news coverage.

WNET-TV- New York, NY 1981-1983
On-Air Announcer
Announced station breaks and fund raising spots during station Pledge Drives

ADDITIONAL EXPERIENCE
Computer Marketing Consultant 1993-Present
Involved in the development and marketing of various on-line services for consumers nationwide

Actor
Member of EQUITY, SAG AND AFTRA 1976-1984

EDUCATION
PENN STATE UNIVERSITY- STATE COLLEGE, PENNA.
B.F.A. in Theater Arts

References will be furnished upon request

In article <39pj8q$bmk@gagme.wwa.com>, calhoun@tahoma.cwu.edu (Dave Calhoun) writes:

>>Has anyone tried the Ramsey stereo FM transmitter for $50?<<

Actually, I tried it for $50 including the "costs-extra" plastic enclosure, a home-made dipole in PVC tubing, and some modifications to improve carrier stability. I put the kit together in an afternoon, and was "broadcasting" to my neighborhood by that evening.

Even without the modifications, it was an impressive unit for the price. I was able to cover an area of several blocks with a good mono signal, a block or two with decent stereo fidelity. Having been used to working with very expensive commercial broadcast equipment for most of my career, I was surprised at the overall fidelity and signal quality that one could get for under $50. And now, I hear that Ramsey has improved the kit with a crystal oscillator and several other enhancements.

If you're running a little school radio station, trying to cover a drive-in movie lot, or have other, similar mini-broadcast or over-the-air-PA applications, it's hard to do better for the money than the Ramsey kit.

If you are really serious about doing some neighborhood radio or "micro-broadcasting," I'd recommend that you put the audio input through some kind of limiter before sending it along to the transmitter. Connecting a high fidelity source, such as a CD player, causes distortion in the FM signal at high-frequency peaks. But otherwise, it is a frighteningly good unit. Not up to commercial FCC broadcast standards, of course. But the quality of the signal will fool most average listeners in the nearby vicinity. I know that from firsthand experience.

-Jim Merritt

Source record: 36689

My local radio company (we have only one, state owned and state controled)
switched a channel to fully digital equipment.
All music they have (6000 CD) is in a big juke box, all the advertisment is on
CD-R and all the rest is on harddisk.

They can mix digital, so the journalist is doing his job in front of the computer.

Everything comes out of the computer. There is a timing table which says the
diskjokey when there come an add, the computer switches over to the add, and
so on.

I found out that there is a big company in Germay that produces these big systems,
and there is a small company, that makes systems on PC (a PC System for about
50.000 USD).

I want to find out about similar systems for radio station automation in the
united states or elsewhere.

My plan is to design a full feature computer integrated Radio Station
on a Network of LINUX workstations to automate
the work and make it a lot easier (administration and production)

It should be a international development project where any operator can
participate and bring in his needs for such a beast (i got some very good ideas)
But first I want to know what is already there.

If this group is not the appropiate, please point me to the right one.

5035. FCC To Allow Unattended Stations

Newsgroup: rec.radio.broadcasting
Date: 1994-11-15 00:20:12 UTC
From: henryc@access.digex.net
Message-ID: <3a8urs$38k@vixen.cso.uiuc.edu>
Source record: 36690

The FCC announced today that it is considering allowing broadcast stations to operate without a licensed operator. It feels that modern radio technology has developed to the point that stations can run effectively without the actual presence of a license operator.

This will begin a comment period at the FCC during which the mertis will be debated by interested parties.

Any thoughts?

Newt Gingrich appeared on This Week with David Brinkley yesterday and when asked about the future of NPR, the National Endowment for the Arts and the National Endowment for the Humanities, replied that he was in favor of privatizing all three.

I may not know the nuances of meaning of NPR, but I do get:

FIRING LINE, W.F. BUCKLEY

AND

WALL STREET WEEK, LOUIS REUKEYSER (SPELLING?)

on our local (NPR?) outlet, WMFE.

I always thought I was fairly right-wing and am (hardly ever) offended by the content of thses shows.

5042. Spoken word radio, then and now.

Newsgroup: rec.radio.broadcasting
Date: 1994-11-15 00:20:30 UTC
From: directory.js@genie.geis.com
Message-ID: <3a8use$39o@vixen.cso.uiuc.edu>
Source record: 36697

In Airwaves #936, Ed Janik summarized his views -- in response to a question from Terry Fox -- of many of the Chicago "spoken word" radio stations today and those of "15-20 years ago (late '70's)".

Two very minor quibbles:

1. In the 1994 listing the most notable omissions are (a) Infinity-owned WJJD which has talk in mornings (Ed Vrdolyak and Ty Wansley recently replaced Clark Weber) and middays (Infinity-syndicated Gordon Liddy), and (b) WBEZ, the long-time public-radio affiliate which carries a great deal of spoken work programming for its small but fiercely loyal audience.

2. In the 70s listing he refers to the forerunner formats and call letters of today's WKQX (Q101) thus [in part]:

> "... although WNIS 101.1 now Q101 tried news on the FM for a very brief time...this station had been soft rock and then country WJOI and became AOR WKQX in the '80's they went AC and are now heavy rotation alternative ..."

WJOI (nee WMAQ-FM) tried a couple of contemporary shades in the mid-70s before going to the NBC all-news-on-FM format in 1975 as WNIS, but they were never country under those call letters. Ed may be thinking either of WJEZ which was country on FM before going oldies as WJMK in 1984, or he may be thinking of WNIS as a WMAQ simulcast during the final weeks of 1976 after the plug was pulled on the news format but before the aor began on New Year's Eve.

At least those are my recollections, confirmed with former NBC employees.

Jim

5046. Indianapolis RadioWatch

Newsgroup: rec.radio.broadcasting
Date: 1994-11-15 22:26:05 UTC
From: jimgrey@dorite.use.com
Message-ID: <3abcht$st6@vixen.cso.uiuc.edu>
Source record: 36602

University of Indianapolis radio station WICR-FM (88.7) has applied to double its power to 5000 watts. WICR currently rents tower space from WRTV (Channel 6) on the Northside of Indianapolis, which means that Northsiders can hear WICR more clearly than Southsiders. The tower's height and increased wattage would give WICR the equivalent of 30,000 watts, according to WICR officials, thereby improving the signal to the Southside. To prevent interference from WICR's signal, WJEL-FM (89.3), at North Central High School, would increase its power to 1,000 watts.

Talk show host Stan Solomon suffered a setback recently in his $23 million bankruptcy filing. The 6th U.S. Circuit Court of Appeals recently ruled Solomon couldn't discharge his debt because he transferred his assets to his wife, as they were divorcing, with the intent to hinder, delay, or defraud his creditors. A number of investors have filed lawsuits against Solomon, who for 19 years assembled general partnerships to buy apartment complexes around Cincinnati. Investors claim that after deals were sealed, Solomon lost interest. Solomon contends a sour real estate market caused his problems. Solomon works as a talk show host at Indianapolis-area radio stations WXLW-AM (950) and WGGR-FM (106.7), as well as W53AV-TV (Channel 53).

5047. The WOWO Listeners' Guild

Newsgroup: rec.radio.broadcasting
Date: 1994-11-15 22:26:09 UTC
From: "PETER Q. GEORGE" <PGEORGE@WELLESLEY.EDU>
Message-ID: <3abci1$stc@vixen.cso.uiuc.edu>
Source record: 36603

Folks:
It is time for a little reality. As of Friday, November 11th, WOWO (1190 kHz) in Fort Wayne , Indiana is no longer a part of Price Communications Stations. Inner City Broadcasting has entered into an agreement with Pathfinder Communications to have WOWO LMA'ed with Pathfinder operating the station. This way, Inner City would NOT have to do the day-to-day operation of the station...that would solely be Pathfinder's job. But, in any case...Inner City owns WOWO. In essence, folks......WOWO's future is now on the road to ruin. I cannot not stress the importance to the thousands of people out there who want to save the WOWO we have grown up with. Have your scorecard ready. In essence, Inner City owns WOWO....Pathfinder will eventually own it after a third party, Jacor Communications (the same people who basically own the Cinncinnati market in one way or another) will do all of the technical work to snuff out WOWO's signal in order to give WLIB/New York a free hand on taking over the 1190 frequency. Jacor in turn will get one of Pathfinder's FM's in Fort Wayne. DON'T ASK ME TO EXPLAIN FURTHER !!

WE NEED ALL OF THE SUPPORT FROM EVERYONE WHO WANTS TO SAVE WOWO !! There is safety in numbers. We need to hear from people like you to help our cause. We know outright that even if we stop the powerdown, there is NO GUARANTEE that Pathfinder might not scrap WOWO's format and go brokered at night to pay the bills. That's the risk involved. It is only a matter of time before the infamous application will be sent to the Commission. When it does arrive, the clock starts...we have 30 days to do what we have to do to stop the changes.If you truly believe in our cause, contact us immediately if not SOONER !
AND...this is important.....if anyone knows any legal firm who would be willing to help us on a "pro-bono" basis....their help will be MOST appreciated. If you dont think that one person can make a difference.....YOU NEED NOT CONTACT US. But, if you want to save a 70 year American tradition from going into the "shitter"....NOW is the time !! DON'T WAIT TO MUCH LONGER.
Don't forget the work of the WNCN Listeners' Guild. Those people were able to keep a New York City Classical FM station from dying for over 18 years. Eighteen years can be an eternity in radio. They did their BEST and I applaud them for that. If they did not care back in 1971, New York City would have lost a major contribution to the arts in that town, PREMATURELY. Because they cared, WNCN came BACK on the air for many more years. Yes, it is a different time and a different place. But, WOWO is a different type of station. It deserves better than what the future holds for it right now.

Once again, the whole idea of the Guild is NOT to belittle Inner City or WLIB. There IS an alternative to get LIB' its' nighttime service WITHOUT destroying the integrity of the WOWO night pattern. That is what we want to do. With your help and God's, we might just win. I have the utmost respect for Inner City Broadcasting, in fact I enjoy listening to 107.5/WBLS when ever I am in the Big Apple. But, destroying one of America's most beloved stations in

order to give New York City yet another AM station in an already over-radioed market is simply NOT RIGHT in any way, shape or form. WLIB can get its' nighttime service with one more tower and 2,500 watts aiming toward the City and keeping the WOWO pattern ALONE! We want to show the Commission that THATS the right way to do it. Even the current tower arrangement in New Jersey with a little "tweaking" with their phaser and powering down to 1,500 to 2,500 watts at night would cover all of New York City with a solid signal. Sure, many people like myself might be stuck with a blend of LIB'

and WOWO...especially people just outside outside of New York. But still the people beyond the local New York area will STILL have their WOWO. You Komets fans should take note. If you enjoy the games, its' time to pay for admission.

THIS COULD BE A "WIN-WIN" SITUATION. WLIB would get the nighttime servicethey need. Pathfinder could get the station that they REALLY want to own. And Jacor could get yet another station in Fort Wayne. All of this would be more cost effective than the current situation could ever show.

JOIN US ! Drop me a line at the P.O. Box or e-mail me your thoughts at the address at the end of this posting. We hope to have a new phone number to allow folks to speak their mind and offer help. The Guild is NOT going away so easily. WE will do our best.....thats all we can do. It is worth at least trying. You will feel better that you at least did so. If we don't win, so be it. But at least we will know that we tried. IT IS WORTH IT !

Pete

5049. Changes at WOWO

Newsgroup: rec.radio.broadcasting
Date: 1994-11-15 22:26:13 UTC
From: fybush@world.std.com
Message-ID: <3abci5$stp@vixen.cso.uiuc.edu>
Source record: 36605

Apparently there have been some changes at Fort Wayne's WOWO...changes that are outside the original sale contract I saw when I visited the station last August. The original contract stipulated that Price Communications would keep operating WOWO until:

a) The FCC granted approval for WOWO's sale ($2.3 million) to Inner City Broadcasting (ICBC).

b) The FCC granted approval for ICBC to sell WOWO to Pathfinder Communications for $1.6 million.

-and-

c) The FCC granted WOWO permission to reduce power and nighttime pattern, and granted ICBC's co-channel WLIB permission for night power.

Only "a" has happened so far. The FCC is still considering "b", and so far ICBC has yet to apply for "c".

That notwithstanding, Price is no longer operating WOWO. WOWO-AM continues with its oldies and talk programming, but now under an LMA by Pathfinder. Ron Gregory, PD at Pathfinder's WMEE-FM/ WQHK-AM/FM, is running WOWO as well (unclear whether from Pathfinder's 2915 Maples Rd studios or from WOWO's 203 W. Wayne studios).

The top-hour legal on WOWO now says... "Fifty thousand watts - Indiana's most powerful AM station [sf's note - WIBC in Indy is also 50kw day!] - W O W O Fort Wayne." Strange that they'd be PROMOTING their power, when it's still due to be reduced.

And, WOWO-FM is defunct after six years. The Huntington-based Class A FM on 102.9 has been LMA'd to, and is simulcasting, Taylor Broadcasting's Class A WXKE 103.9 Fort Wayne (AOR "Rock 104"). This is odd as well, because Pathfinder intended to buy WOWO-FM as well, and had done the engineering studies to show there was almost no 3.16 mV/m contour overlap between WOWO-FM and Pathfinder's WQHK-FM 105.1 Decatur-Fort Wayne. (They would have needed an FCC waiver, but that would have been easy. The overlap consisted of ONE home south of the airport!)

So to paraphrase Bob Dylan, "Something's happening, but we don't know what it is..."

All we know so far is that this deal is far from done. ICBC still wants night power for 1190-WLIB New York, and the whole reason to lose $700K on the purchase and then sale of WOWO

was to buy WOWO's reduction in contour and power. And that's still in ICBC's plans, it seems.

What does this mean to radio listeners? In the East, it means the replacement of a reliable 1190 signal over all of the East Coast with another regional channel, with nighttime 5kw or less signals out of at the very least NYC, Annapolis MD, Cobleskill NY, Bluefield VA, Hughesville PA, and the list goes on. And for all AM listeners everywhere, it sets the dangerous precedent that clear channels can be bought and sold. If you're in California, you might not care about the East Coast 1190 situation...but what happens when (just hypothetically here) KWNK Simi Valley-Los Angeles sees the precedent, buys KBOI Boise (the 50kw blaster on 670), cuts back KBOI's power and pattern, and fires up KWNK with 10 or 50 kw at night? There goes another one... Hypothetical, to be sure, but we've all seen how precedents get set in this crazy business.

What can we do, then? Nothing yet, until ICBC finally applies for the power and pattern changes at WOWO and WLIB. But in the meantime, you can let the WOWO Listeners' Guild know you're ready. Drop a line to:

WOWO Listeners Guild
PO Box 1183
Randolph MA 02368-1183

and let Peter George know where you are. When ICBC applies for the changes, the Listeners Guild will swing into action to form a unified listeners' front of opposition.

It's not an exaggeration to say that just about any clear channel that's not in a major market is at stake here. Don't let East Coast channels like 1190, 1180, 1170, etc.; or West Coast channels like 660, 670, and 1120 turn into regional-channel noisefests.

Thanks for listening,

-=Scott Fybush - fybush@world.std.com - Speaking only for myself=-

5050. Washington, D.C., Radio Watch

Newsgroup: rec.radio.broadcasting

From: TOMLACKO@delphi.com
Message-ID: <3abcic$su2@vixen.cso.uiuc.edu>
Source record: 36606

WRQX FM 107.3 (AC Mix Format) has hired a new Program Director to replace Lorrin Palagi. This summer Palagi left the station to go to Chicago after many successful years here in Washington. His replacement is Randy James formerly of WMMX FM and WONE AM in Dayton, OH.

It appears that Washington's struggling all sports station, WTEM AM 570, will soon lose afternoon talent Kevin Kiley. Kiley's contract is up at the end of the year and he apparently is getting offers locally and from out of town that WTEM can't compete with. Wherever Kiley winds up, his work for TNT/Turner Network Television will continue.

Kiley's likely departure from WTEM may not be their only change. It appears that the Redskins' contract with WTEM is up this year. Exact details of the contract aren't public but, industry insiders say they suspect that WTEM and the Redskins signed a 3 year deal about 2 and a half years ago. Several stations with much bigger wallets are drooling while waiting for that contract to expire and it's expected that WTEM will be left in the dust in that bidding war.

So what will WTEM do in the future? They say they'll continue as an all sports station. But as it is, they can't make a go of it with some of the best talent in the country on the air and one of the most popular football teams in the NFL. One wonders how anyone could expect them to survive without the 'Skins and the on air talent. Stay tuned!

In case you missed it back in Airwaves #935, WWDC FM 101.1 (Album Rock Format) is now available to you electronically. Thanks to DC 101's Paul Harris for posting the addresses himself. Here is the address list of the primary on air voices:

Paul Harris: HarrisPaul@aol.com
Dave The Predictor: DTPdc101@aol.com
Dusty Scott: Dusty101@aol.com
Bill O'Brien: BillO101@aol.com

Also back in Airwaves #935 Gary Luckenbaugh (luckenbg@delphi.com) mentioned WBMW radio and I got a few messages asking me what happened to WBMW.

Well, if I remember correctly, WBMW was known as B106 FM in the mid 80's and had a top 40 format. I don't remember their call letters during their top 40 days but after Infinity acquired the station

the calls changed to WBMW. "The Beamer" as some referred to it for a while, featured an eclectic mix of adult contemporary, jazz and new age music all blended together. One minute they'd play SHE'S GONE from Hall & Oates. Then segue to FEELS SO GOOD from Chuck Mangione. And then segue to VELOCITY OF LOVE from Suzanne Ciani. It really was a unique sounding station!

WBMW was being programmed at that time by local legend Cerphe Colwell who loved the music but, had to add Infinity's shock jock lineup. Slowly the music was whittled away as the station added Howard Stern in the morning. Then Don & Mike in the afternoons. G. Gordon Liddy to middays. And, finally, The Greaseman at night. The station then changed calls to WJFK and currently plays only contemporary jazz music and some new age cuts between midnight and 6 a.m. and on weekends. Rumor has it that current WJFK PD Jeremy Coleman is searching for a high profile voice to dominate the weekend airwaves. Colwell is now programming Infinity's WYSP in Philadelphia, PA., where he's in the process of adding new talent and turning around that struggling station.

I do miss WBMW's eclectic format but I also remember having a horrible time picking the station up. I lived in Germantown, MD., when they were popular. And Germantown is only 15 miles north of the beltway but the station could not be listened to on any of my vehicles. I could get it at home OK but, not in my cars. Now that I'm in Frederick, MD., which is 32 miles north of the beltway, I have an even worse time with WJFK's FM signal. I can get WJFK AM 1300 from Baltimore but only during the day.

WJZW FM 105.9 (Smooth Jazz Format) began airing their latest TV commercials locally last week. The spots are very eye appealing and easy on the ears too. These spots are by far better than the series which ran in the spring and summer promoting the station then know as WCXR.

From: jchamkis@bga.com
Message-ID: <3abcie$su5@vixen.cso.uiuc.edu>
Source record: 36607

Austin (TX) community broadcaster uses 4 bay Phelps-Dodge antenna that is the victim of a very bad installation some 10 years ago. Nobody at P-D remembers much about these as they went out of the antenna business in the '80s. The 4 bays are fed from an RG-11 phasing harness and are mounted directly to the tower- not stood out at all. Installers completely removed one inch of outer conductor at bottom bay (!) We're going to have to fix this with volunteers and an MFJ SWR bridge aloft. Anybody out there know:

1. Each bay is a 1.5 turn spiral in the horizontal plane, grounded in the middle and fed off-center like a dipole. Is this going to be seriously affected by being mounted directly to the tower? This seems MOST unusual.

2. Can we expect an impedance of 100 ohms at each bay? Phasing line is 109 inches of RG-11 at each bay, bays spaced 10 feet apart, freq 88.7 MHz. System fed with about 200 feet of one inch semi-rigid line, presumed 50 ohms.

Any help would be appreciated beyond description. jchamkis@bga.com (engr., KAZI Austin)

> That there #1 station for Las Vegas would be KLUC, not KLUL. There is a
> KJUL which is Big Bands/MOR (On FM even, wow!). I understand that KJUL
> does very well (Top 5 or better) so it makes and arguement for so called
> "AM" formats, like Talk and Big Bands on FM. While were at it, let's do
> CHR on AM. Wouldn't that be great?!? How about on a Clear Channel?????
> YEAH!!
>
> [Moderator's Note: Clear Channel? What's that? Bill]

KJUL is continuely the top rated station is Las Vegas ... amazing what a satellite Big Band MOR can do in the 90's. I believe it is SMN's MOR station.

Bill - I think he is refering to Clear Channel Communications, but KLUC is actually Nationwide Communications, Inc. ... I think the only company in the world who pushes corporate name on the air more then station calls!

Jon Jacobs (jonj@wizard.com)
**just an outta work dj who is moving to Denver this week (from Las Vegas) - any help *grin* .

5057. My first Leykis experience

Newsgroup: rec.radio.broadcasting
Date: 1994-11-15 22:26:35 UTC
From: rrb@deja-vu.aiss.uiuc.edu
Message-ID: <3abcir$sun@vixen.cso.uiuc.edu>

Cross-posted to: rec.radio.broadcasting,rec.video.satellite.tvro

I found the Tom Leykis show on satellite tonight (Anik E2 channel 2 7.50 narrow band audio). I must say that I like him quite a bit. I had no idea he was on 'normal' satellite frequencies (I had believed he was just digital or scpc, both of which are beyinf my capabilities).

Nice to hear someone intelligent who defies a lable. He is not 'right wing conservative' , however he did have Sen. Dornon on and they agreed on a lot.

I hope he is on regularily on this transponder so I can hear more of him. Sadly the signal on this feed is not real strong and is a bit noisy, but is very listenable.

Hi. Tom... Interesting show... (his voice reminds me of Guru Gary on Friday Night Live).

Bill

[...]
>When stations choose to air only one politically-correct side (these days
>"PC" means the Rush Limbaugh/Bob Grant axis), they do a grave disservice
>to democracy.

Regardless of what you choose to call "PC" and regardless of how
you feel about "the Rush Limbaugh/Bob Grant axis," the fact
remains that: a) there are other stations on the dial;
b) there are many other sources of information than
radio;
c) commercial stations are there to serve a market
interest so that they can continue to operate;
d) stations are not responsible for how people choose
to perform their civic duty to inform themselves
so that they can fully participate in our republic.

You seem to feel that stations need to serve a well-balanced meal
since people can't be expected to balance their own meals. If it
has really come to that, it's not the stations that are doing a
"grave disservice to democracy."

A democracy (or a democratic republic) _is_ a very difficult political
system, as you say. This is especially true for people who tend to
view "right decisions" as they ones they make and "stupid decisions"
as the ones that people who disagree with them make. For folks like
those, democracies can be downright infuriating... ;-)

This is all kind of tangental to the station under discussion, tho,
since WABC does have at least one program (the Lynn Samuels Show)
which is clearly not part of the "the Rush Limbaugh/Bob Grant axis"
and is aired seven days a week. As a result, I assume WABC wouldn't
come under the onus of doing a "grave disservice to democracy"
under the conditions you lay out above. This brings me back to the
main point of my post that you quoted. The real story of WABC is

known to the listeners and can only be hinted at by Usenet posts (either pro or con) on the subject. I just think it's kind of pointless for the original poster to try to convince people in San Francisco that WABC is the Seat of Evil when it's really the people who are giving the station its ratings that are bugging him. Somehow they just can't perceive the hatred that the poster sees so obviously oozing from every pore of the station. Go figure.

I'm surprised no one has mentioned the passing of Chicago radio icon Howard Miller last week. For those who are not familiar with Chicago-area folklore, Howard Miller was *the* prototypical Disk Jockey for over twenty years on WIND (560 AM). >From about 1947 until 1968, he had the dominant morning show in the midwest, spinning MOR records and engaging in earnest chatter. Later in his career (mid-60's), his chatter grew increasingly political and led to his being briefly suspended from WIND in 1968 after he made intemperate remarks after Dr. King's assassination.

Fueled by the magnitude of his celebrity in Chicago, he quit WIND in a huff and was courted by virtually every other station in town. At the peak of his run, according to Robert Feder in the Chicago Sun-Times, his program drew a phenomenal *58%* of the entire listening audience, or more than all other Chicago stations *combined*. Making his accomplishment all the more remarkable was that WIND was (still is) a 5kW regional station with its transmitter in Gary, Indiana. Moderator Bill pointed out to me in email correspondence that WIND's signal covers well to the north, but I know that there are a number of nulls (like my house in SW suburban Chicago) where reception is poor at best.

The suspension incident was the beginning of the end for Howard Miller and was really a sea change in the Chicago radio landscape. Miller bounced around several stations in Chicago after he left WIND (WCFL, WMAQ, WGN, and even briefly some years later, WIND again), but could never reclaim the complete domination he enjoyed for so many years. Nor could WIND; it gradually deteriorated and was briefly dark in December of 1985, and is now all-Spanish. Howard Miller went on to become a station owner, and retired from on-air work and moved to Florida where he died last week.

Time magazine said in 1957 that he was the single most influential person in record sales at that time. Amazing. Maybe the level of competition was just not that keen, or maybe he was just that good. In some ways in invented or defined what it means to be a local radio personality. I grew up listening to him, and though I rarely agreed with his conservative politics, I always admired his skill as an entertainer and salesman. They really don't make 'em like that anymore.

NYC Radio Waves 11/14/94

The NY Daily News reported Wednesday (11/9) of a rumor (and only a rumor, they say) WYNY may dump country for a dance format. The subject came up at a reunion of ex-WKTU jocks recently. One drawback to the format--not enough adult(25-54)listeners. WYNY's ratings haven't been what the station had hoped. WYNY picked up the country flag when WHN was purchased by Emmis and turned into all-sports WFAN in July, 1987. WYNY was a very successful A/C in the early 80's.

Speaking of dance music, WPLJ's Al Bandiero celebrated the first anniversary of his 70's music show on Saturday nights. A benefit showing of 'Saturday Night Fever' and a concert performance by the Trammps at the theatre.

Mix 105 Morning Man Jim Kerr was reunited with sidekick Howard the Cabdriver Friday morning as part of Mix 105's live broadcast from Times Square in celebration of 'Taxi Appreciation Week'. The event was held with Nick at Nite which featured the series 'Taxi' every night last week. Jim and Howard worked together beginning in the 70's at WPLJ.

Speaking of reunions of sorts, Jeff Foxx returned to the KISS-FM (WRKS) Wake Up Club Thursday morning. Foxx and partner Ken Webb were dumped earlier this summer from the Wake Up Club, and replaced by Wendy Williams, who stays with Foxx in the AM. Webb is now doing overnights.

Could a record contract be far behind for Lisa G of Hot 97?? She sang on-air with Barry White on 'Can't Get Enough of Your Love' Thursday morning. She does the news in AM Drive.

Regarding the NYC marathon--No time on Mr. G, but Shelli Sonstein (another ex-Jim Kerr morning cohort) finished in 4:14.

I received a few comments/responses to last week's posting-
Any comments or questions gladly accepted at SRogMix105@aol.com.

5065. RayDio Dial - Balt/DC

Newsgroup: rec.radio.broadcasting
Date: 1994-11-15 22:27:03 UTC
From: raydio@aol.com
Message-ID: <3abcjn$t0g@vixen.cso.uiuc.edu>
Source record: 36621

THE RAYDIO DIAL:

BALTIMORE/DC

I spent the week traveling between the NY/NJ area and the Baltimore, MD/Washington DC area. This gave me the chance to make the following observations:

70's stations:
- WMGK Magic 102.9FM and WBUX/1570AM in the Philadelphia are about the best I heard.

The new 104.3 FM "The Colt" (WOCT) can be better be described as a classic rock station that ignores all decades except the 70s. Tune in any hour and be prepared to hear a Lynyrd Skynyrd song.

Arrow 94.7 in Washington DC also sounds much like a classic rocker and also plays music from the 60s (i.e. The Beatles' birthday song) and the 80s (i.e. John Mellencamp after the "Cougar" was dropped). Now that WCXR is no longer, Arrow could fill the void (if there is any...DC101/WWDC 101.1 FM still sounded good).

- The Baltimore, MD/Washington DC area has no shortage of Adult Contemporary stations. Plenty of "Mix" and "Lite" stations, not one sounding any better...or any different than the next. Neither Baltimore nor DC have any Top 40 statons anymore.

MIX-MANIA:
Q107/WRQX 107.3FM (DC)
WASH-FM 97.1 (DC)
Mix 106.5 FM (Balt)
96/7 WCEI-FM (Balt)

- There is still some rock stations amongst the MIX.
DC: DC101/WWDC 101.1 FM (AOR) - the station never changes its sound, but it's a good
one.
WHFS 99.1 FM (Alternative)

BALT: 98 Rock WIYY-FM (AOR) - Sounds as great as ever. Lots of currents and a little
more mainstream/not as heavy
as it used to be.
WGRX 100.7 FM (Classic Rock) - typical cls. rocker

WRNR 103.3 FM (Progressive) - It truly is progressive.

NY Rumors:

By now, everyone has heard the rumours about Emmis (owner of Hot 97/WQHT-FM) buying Kiss 98.7 (WRKS-FM) and changing it to a 70s format. In fact, the rumor also has WPAT/93.1 changing to 70s.

Don & Mike are talking about the adition of a NYC affiliate to their network. Could they wind up on 98.7Fm after some switch? ...Just thinking aloud.

No, I recall WJEZ (first easy country, then progressive country, now oldies
under WJMK), but there DEFINITELY was a country format on WJOI, they called
themselves "Country Joy". Honest. I wasn't doing any acid... this really
happened :). All of Jim's other facts are correct. I almost forgot about
the WMAQ simulcast... do you recall in the hours before the AOR format on
WKQX when they played a loop with an announcer saying "The music starts
tonight at 6" or something like that?

Well, for my 10 Watt NCE High School station, this is GREAT!!!

I think that for 10 Watts, there should be no contest to this new rule...now, a 100,000 Watt station having this option may not be a good idea...but how many 100,000 station will actually let a non-licensed operator operate the station?

They are just catching up with what a large number of radio stations have been doing for the last several years. Lock the door at 5:00pm and go home.

>This will begin a comment period at the FCC during which the mertis will
>be debated by interested parties.

In small markets this is the only way a radio station can survive today. The cost of keeping operator on duity is prohibitive today.

>Any thoughts?
My concern is public information. Weather and other Emergencies need to be tended to on a moments notice, which can't be easily done without a person at the station.

I don't see how it's any different from today when hundreds of stations
run physically unattended. True, there's someone on the log who'll get
paged if something goes wrong, but I don't think that will change much.
No station wants to run *totally* unmonitored. Things is: will they put
the money they save into (1) higher salaries for the remaining employees
or (2) better programming? Heh...

I wish to thank Bill Krause, Chief Engineer of WABC/New York for making the most of what could have been a boring downtime to be something special. It was decent of him to try and contact the "powers-that-be" at Co-channel KKOB in New Mexico to maybe go to their daytime pattern for a brief test period so that listeners east of New Mexico could snare a rare DX catch. Unfortuantelythat was not the case and we were NOT to here KKOB. They said that any change in their power would not be in the station's interests.

That was too bad. However, I WAS able to catch HJJX (Radio Cadena Nacional) or R.C.N. from Bogota, Columbia with its' 100,000 watts and , surprise..... WWCN North Fort Myers, Florida with their 1,000 watt night pattern...and get this....AWAY FROM WABC !

Thanks again to Bill Krause at WABC, you are a true gentleman !!

Beach and Broward counties, but I don't know much aboutntheir reach into
Dade.
If you're in mid Palm Beach County north to the St. Lucie line, WJBX
(99.5) in Jupiter has a great selection of the Bands.

Try 'em. Let me know what you think.

5076. Re: Z-100 in New York

Newsgroup: rec.radio.broadcasting
Date: 1994-11-15 22:27:32 UTC
From: dmckee1041@aol.com
Message-ID: <3abckk$t2c@vixen.cso.uiuc.edu>
Source record: 36632

In article <3a7f52$cvo@vixen.cso.uiuc.edu>, humanz100@aol.com (HumanZ100)
writes:

Human,
tried to send you mail directly and I don't know if it got there or not.
Kinda new on this thing myself. Heard about a job opening with John
Landers. Can you give any info? Can I contact you directly about it?
Thanks,
Darren McKee

5077. Public Radio FAQ, 3rd draft

Newsgroup: rec.radio.broadcasting
Date: 1994-11-15 22:27:39 UTC
From: rsk@katsuru.circ.upenn.edu
Message-ID: <3abckr$t2j@vixen.cso.uiuc.edu>
Source record: 36601
Cross-posted to: rec.radio.broadcasting,rec.radio.noncomm,alt.radio.networks.npr

Originally written by Rich Kulawiec, rsk@gynko.circ.upenn.edu;
Copyright Rich Kulawiec 1994.

Note: I receive an average of 300 mail messages per day. If you want
to make sure that your update/correction/reply to this article comes
to my attention when I'm working on the next version, please send
your message as a reply to this article, i.e. make CERTAIN that you
preserve the "Subject:" line. If you don't do this, your reply may
sit in one of my numerous mail queues for months or years.

Questions answered (or at least asked!) within:

Q. What are the major NPR-carried shows and their contact info?
Q. What are the NPR affiliates around the country?
Q. How do you obtain a station list or programming schedule from NPR?
Q. What's the difference between National Public Radio, American Public Radio,
Q. How do I get my hands on general NPR info?
Q. How can I find out about books and albums mentioned on the air?
Q. How can I get my paws on some of the music I've heard on the air?
Q. Are there are books and articles about, or by NPR or NPR people?
Q. How about recordings made be NPR people? (i.e. non-broadcast material)
Q. What's the relationship of NPR to PBS?
Q. How did NPR originally come about?
Q. Can I get NPR programming outside the US?
Q. Hey -- what about Mama Stamberg's Cranberry Relish recipe?

Updates from Curt Swinehart, Esther Vail, Chuck Taggart, William Jenks,
and Ori Hoffer are pending -- look for them in the next revision.

I've alphabetized the list of shows below, which should make it a
bit easier to deal with.

Several people have commented that this list is NPR-centric; that's
not intentional. If you have information to share, NPR-related or
not, please send it along, and I'll try to incorporate it.

If you find errors, omissions, or whatnot, please drop me a line; and
remember that this is still a draft document, with lots of work to be
done on it before it's truly useful.

Q. What are the major public radio shows and their contact info?

All Things Considered

Hearts of Space
P.O. Box 31321
San Francisco, CA 94131

Playlist is a one-way mailing list, primarily for distribution
of the weekly playlists from the nationally syndicated radio
program, Music from the Hearts of Space. The list will occasionally
carry announcements about new releases on Hearts of Space Records,
updated lists of the stations that carry the program, touring
schedules of HOS artists, and other information of interest to
HOS listeners.

Hearts of Space playlists will continue to be posted in the
USENET newsgroup, rec.music.newage. Playlists and other HOS
resources are being made available at hos.com, through gopher
and the World-Wide Web.

For current information about accessing these and other HOS resources send a message to info@hos.com

subscribe to playlist, simply send the command

Whad'ya Know?
Host: Michael Feldman
Producer: Wisconsin Public Radio?
Mailing list: wyk-request@wpr.uwsuper.edu
Newsgroup: alt.radio.whadya-know

Cassette recordings of WYK? broadcasts are $15 each, and can be
ordered through The Radio Store. To order by phone, call
1-800-747-7444. Mail orders may be sent to:

The Radio Store
P.O. Box 5006
Madison, WI 53705

Shipping and handling charges will be added to your order. Be sure
to specify the program you want by its original air date.

Tickets for Madison broadcasts of WYK? are available free of charge.
Send a self-addressed, stamped envelope, along with a note
explaining when you're planning to be in Madison to:

Whad'Ya Know? Studio Audience
821 University Ave.
Madison, WI 53706

Most ticket requests are fulfilled within a week after we receive your letter. It's a good idea to ask for tickets at least six weeks in advance.

If you're planning to visit Madison, but don't have tickets ahead of time, you can always get in line on Saturday morning at 8:30 a.m. At 9:30 a.m., after all ticket holders have been seated, any remaining seats are turned over to those waiting in line. Most of those waiting in line get eventually get in.

WYK? is broadcast from the Parliamentary Room on the 4th Fl. (Terrace Level) of 821 University Ave., at the corner of University and Park.

World Cafe:
Email: worldcafe@a1.relay.upenn.edu

Need the following for each show:

E-mail addresses
Producer
Internet mailing lists/newsgroups
Phone/snail-mail address
Staff for each show
Commentators who frequently appear
Anything else relevant :-)

Q. What are the NPR/PRI/public radio stations around the country?

Probably should have frequency, call letters, etc. for each.
Probably should add other public radio stations, e.g. WXPN, Philadelphia.

There's a map called "WMPR" ("Where's My Public Radio?" that lists all NPR/APR affiliates on a map; availability info here as soon as I get it.

Alaska
Fairbanks

Q. How do you obtain a station list or programming schedule from NPR?

Q. What's the difference between National Public Radio, American Public Radio, and Public Radio International?

Steve's comments:

I think APR became PRI because it was beginning to be distributed internationally. PRI is an alternate network to NPR that is carried by some NPR stations. Marketplace, Garrison Keilor's show are PRI shows- not NPR. I think APR was originally formed when Keilor couldn't get backing from NPR. PRI now produces a number of programs.

Randall's comments:

American Public Radio has changed it's name to Public Radio International. This is a competitive organization to NPR. In the past they only distributed programming to affiliates for re-broadcast; they recently announced that they will begin producing programs as well. NPR has always produced and distributed programming.

Don Wegeng comments that PRI uses NPR's transponders for its distribution, which somewhat clouds the "competitive" comment just above.

Q. How do I get my hands on general NPR info?

To order transcripts online: telnet pac.carl.org - select Information Databases, select Journal Graphics. For more info, e-mail to npr@jgi.com. Include as much info as possible, including your credit card number and they'll e-mail you the transcript. Don't feel safe throwing your credit card number thru unsecure (insecure?! :-)) e-mail, call 202-414-3232, which is NPR's Audience Services, or send $12.50 for cassettes of TALK programs (2 hours) to NPR Tapes, 635 Massachusetts Avenue N.W. Washington, DC 20001-3753 -- please indicate the date of the broadcast. By the way, transcripts are $10.00.

In fact, anybody who wants to contact NPR should call Audience Services between 10 AM and 5 PM ET Monday through Friday. (Sorry, folks no 800 number.)

Q. How can I find out about books and albums mentioned on the air?

The booklist and album list produced by Erika Grams at WUNC is posted weekly on alt.radio.networks.npr and other appropriate news groups. They list books and albums reviewed or discussed recently on the NPR news programs. The booklists 6/93-Present are available via gopher sunsite.unc.edu under the NEWS! option or via anaonymous ftp sunsite.unc.edu (/pub/academic/literature/book-reviews).

Q. How can I get my paws on some of the music I've heard on the air?

PRMS 800 # to order music:

You can order WBFO music (and the music of many public radio stations, and music mentioned in many NPR features) through the MAIL with PRMS (Public Radio Music Source).
Order recordings (CDs & cassettes) heard on WBFO with the 800 #.

Call 1-800-75-MUSIC
That's 1-800-756-8742.
Hours are 8am -- 1am.

The # is toll free. CDs go for retail plus shipping/handling. Participating Public Radio stations, like WBFO, benefit from PRMS sales. PRMS tries to keep up-to-date with music heard on public radio as a service to public radio listeners.

Q. Are there are books and articles about, or by NPR or NPR people?

"NPR - A Cast of Characters"

Noah Adams' book

Bob Edwards' book on Red Barber

Susan Stamberg's bibliography (fragmentary, could use
help fleshing this out):

All Things Considered--10th anniversary 1981
American Women, A Political Portrait. 1982
April continental magazine 1983
The Battle of Midway 1982
The Best of All Things Considered 1985
Comedy journal 1982
A Conversation with Poet Laureate Rita D 1993
A Decade of change the world's women gat 1985
Dying, death and bereavement 1993
Eleanor Roosevelt remembered 1984
Elevators 1978
Every night at five : Susan Stamberg's 1982
Family and intergenerational relationships 1993
FDR rememberedd 1982
February continental magazine 1983
The future of aging 1993
Goodbye Saigon, hello Ho Chi Minh City 1985
How the body ages 1993
Hungary's "market socialism" 1981
Illness and disability 1993
Intellect, personality and mental health 1993
January continental magazine 1983

Q. How about recordings made be NPR people? (i.e. non-broadcast material)

Bailey White's "First Words -- Dead on the Road" is available
on cassette, and maybe CD, read by the author. Many other NPR
commentators' works are also available...including Andre
Codrescu, Tom Bodett, and Lynda Barry. I think the label
("Dove") is an offshoot of the "Windham Hill" label.

Q. What's the relationship of NPR to PBS?

Q. How did NPR originally come about?

Q. Can I get NPR programming outside the US?

NPR and PRI (Public Radio Int'l, formerly APR) can be heard overseas
via satellite...to get the info you want, e-mail to:

uspubrad@npr.org

Be sure and tell the folks there where you are writing from, they are
trying to gauge what kind of listenership NPR (and PRI) have overseas,

and what kind of interest there is in this service.

Q. Hey -- what about Mama Stamberg's Cranberry Relish recipe?

Mama Stamberg's cranberry relish

Ingredients: 2 cups cooked cranberries
1 small onion
1/2 cup sugar
3/4 cup sour cream
2 tablespoons horseradish

Grind onion and cranberries together.
Add remaining ingredients and mix well.
Put into plastic container and freeze.
Thaw in refrigerator a few hours before serving.

Makes 1 1/2 pints.

Doings in the #40 market:

*How well did stations do in ads for the recently completed election campaign? Very well,according to a story in the Nov.14 edition of Business First. Jim Meltzer,GM of Rich Communications' stations(WGR-AM & WGRF-FM, WWWS-AM & WUFX-FM)said he was stunned at the number of political ad buys on the stations,adding that ad space on WGR(NewsRadio 55)was sold out during the final days. He said that it "shows the power of talk radio. People wanted to reach our audience."
The news was just as good for Keymarket Communications,owners of WBEN-AM & WMJQ-FM,as well as WWKB-AM & WKSE-FM. WBEN-WMJQ GM Larry Levite said political ad sales were more than double what was projected. Levite added that ad time on WBEN(NewsTalk 930) and WMJQ(Q102) sold out in the last few weeks,so much so that more time slots were added to fill the demand-the first time the stations had ever done that. Levite said that he didn't think anyone saw it coming,noting that "I don't know how anyone could have forecast the amount of money that was being spent on these races." (Especially with Rochester businessman Tom Golisano spending $7.5 million on his gubernatorial campaign,which did get his party-the Independence Fusion-on the ballot for 4 years.)

*Down I-90 for a bit:The Lincoln Group,owners of WHAM(NewsRadio 1180), WVOR(Variety 100.5) and WHTK(Hot Talk 1280) have agreed to buy WPXY(97.9; 98 PXY)from Pyramid Communications. As a result,Lincoln is getting rid of its other FM,WEZO(93.3,satellite EZ)in the Avon area-because if the PXY deal goes through,it would give them 2 AMs & 3 FMs-and that's a no-no. No personnel or format changes are planned for 'PXY-beyond what they already have:
-Clarke Ingram is the new PD,coming in from WBZZ(B94,another CHR)in Pittsburgh,where he was APD and PM driver.(I can just imagine ESPN's Chris Berman doing this name-can't you? :))
-J.J.Rice,handling nights,is now its MD,replacing Cat Collins-now at WJMN in Boston.

*WGRF(96.9,97 Rock)seems to be slightly shifting itself to Arrow status. They've recently said that 97 is playing "classic rock from the 70's".

*WWKB(The Big 1520)has added Ross Perot's Sunday night syndicated show live from 8-9pm.

TTFN...

>seriously affected by being mounted directly to the tower? This seems
>MOST unusual.

Having been the unfortunate user of several of these atrocities, all I can say is that if there is any way to replace it, do so. The usual mounting technique is to mount the bays on a pole and then use standoff brackets to mount the final assembly to the tower. Mounting the bays directly to the tower will introduce many variables. Also, remember that interbay spacing is extremely critical. Moving one bay vertically so much as an inch can completely change the coverage characteristics of the antenna. And you have four bays--my condolences.

>2. Can we expect an impedance of 100 ohms at each bay? Phasing
>line is 109 inches of RG-11 at each bay, bays spaced 10 feet apart, freq
>88.7 MHz. System fed with about 200 feet of one inch semi-rigid line,
>presumed 50 ohms.

RG-11 is nominally rated at 75 ohms. The bays themselves will probably be all over the map in terms of characteristic impedance. This is a "feature" of PD antennas--unpredictable termination impedances and the resulting VSWR surprises. Also be advised that proximity to the tower will affect the impedance greatly, as, in the case of Phelps-Dodge, will temperature.

1 inch line? Could it be 1.25 or 7/8 inch? Don't believe I have ever run across 1 inch line. But since virtually all FM transmitters made in this half of the century have a 50 ohm output, it would be safe to assume that as the characteristic of the line. (I once saw an FM transmitter with a 300 ohm output, but it was made before I was born.)

Ron Cole said, about leaving a station unattended:
>My concern is public information. Weather and other Emergencies need to be
>tended to on a moments notice, which can't be easily done without a person at
>the station.

Unfortunately, Ron, a common scenario for leaving an attendant at the station doesn't adequately provide for emergency coverage, either. Lots and lots of AM/FM combos have a person in the FM booth all day, and make that person responsible for the AM while it's hooked to the satellite. Many of these stations don't have a button for the FM to cut in on the AM in such situations. I recently worked for such a combo: when tornadoes came, I was able to tell my FM listeners; but the AM listeners, isolated with Unistar's "AM Only" format, were out of luck.

This practice is dangerous, but common.

With all of the new "remote monitoring" products on the market, one would think that the FCC would have thought of this a LONG time ago. I guess it's a matter of free enterprise pushing the feds into doing something. Nothing wrong with that, but I wish the same would have happened with the AM Stereo standard as well....

I don't think this is such a big deal; computers can monitor transmitters better than most licensed operators I know. As for emergecy situations, an EBS receiver by the general manager's bed at night will do fine. He jumps out of bed, turns on his PC and dials up the station's automation system.

As to abolishing operator requirements being a threat to live local radio, it's not. Under the present rules anyone can become a licensed operator just by sending in a postcard. I've heard of situations where stations use, say the security guard at a local motel as their "licensed" operator. He doesn't have to be at the station, he only needs to be at a location known to the FCC. As long as he can do whatever it takes to keep the station operating according to the terms of its license, the FCC won't care.

Live local radio will never go away because even the latest automation equipment won't consistently sound as good as a good local announcer. If you can't afford a good announcer, though, automation makes sense because it will sound better than a mediocre announcer.

Also, automation can be used to keep a good announcer's voice on the air while he is out creating visibility for his station among listeners and advertisers. A smart broadcaster will use it not so much to eliminate jocks as to get more mileage from them.

I know of one station which runs unattended after hours and automatically
switches to the EBS receiver if it's triggered at night (sunset is the
cutoff time for the weekly EBS tests, so it's assumed that any EBS tones
coming over will be activations). The system then phones the "board op"
at home and advises him that the EBS has fired. He can then opt out of
it and to back to regular programming at will. Now, if the EBS *key*
station is also automated after hours...well then...

Source record: 36642

In article <3abci5$stp@vixen.cso.uiuc.edu>, fybush@world.std.com (Scott D Fybush) writes:

(on WOWO)

Leaving aside the fact that 1180 (WHAM Rochester) has already turned into a "noisefeast" in this (admittedly competing) broadcaster's opinion...the biggest reason for clear channels to continue to exist, is to offer unique programming to a wide variety of listeners over a large geographical range at night. There are many stations that do this well...WFAN, WABC, WCBS, WBZ, WJR, WGN, WLS, KOA, KGO, KYW, WSB, KNX and KMOX are just a few that come to mind immediately. I'm sure I'm leaving out many more.
There are other stations that would benefit the entire continent if they HAD a clear channel. It's a shame, for example, that CFRB and CHUM in Toronto have to collide with WINS and WEVD in New York, because listeners over a wide territory would probably enjoy and find useful all four of those stations, each of which has a distinct flavor unique to its community.
But what's the use of a clear channel if all you are is the 10th different audible station on someone's car radio rebroadcasting Bruce Williams or Tom Leykis, and 9 other local stations are carrying the same show? I'm sure there is a way consistent with the 1st Amendment to impose local origination requirements in all dayparts from 5 AM to 11 PM local time in order to retain a clear channel 1A designation. Back in the 1920s we even had restrictions on the amount of recorded music a station could play, as opposed to live dramatic, musical or spoken word programming, to be allowed to operate at 500 watts or more. No one successfully challenged it. Surely we can tell a station now, either originate most of your nighttime programming or accept the fact that you won't be allowed interference-free operation over a 1500-mile diameter circle any longer. If you're not going to offer a unique service to justify that huge protected territory, then give it up to someone else who will.
Bob Smith, middays WXXI/1370 Rochester NY (and yes, most of OUR nighttime programming is local)

5088. FCC Petition on EEO

Newsgroup: rec.radio.broadcasting
Date: 1994-11-17 00:24:00 UTC
From: Christopher Smallwood <csmallwood@delphi.com>
Message-ID: <3ae7r0$rk@vixen.cso.uiuc.edu>
Source record: 36643

As we all know, one of the announced goals of the new party
in control of Congress is to eliminate burdens on industries which do
not apply to the regulators themselves.
The time may be ripe for a rulemaking petition at the FCC to
eliminate the EEO rule which applies to broadcasters. There are three
reasons:
(1) The rule is unnecessary since broadcasters are already
subject to the full range of federal and state laws regarding
discrimination.
(2) The rule unfairly singles out broadcasters for special
treatment. Other federal agencies do not impose special EEO
requirements on the industries they regulate. For example, the SEC
doesn't impose EEO requirements on publicly-traded companies.
(3) The rule is unseemly because it does not apply to the
FCC.
I have represented broadcasters before the FCC since the late
1970s and I am convinced that the EEO rule imposes unnecessary
burdens on broadcasters... particularly record-keeping.
The vast majority of broadcasters are conscientious and
fair-minded. Ample sanctions exist in the case of wrong-doers.
I would like to file a petition with the FCC on the first day
in January that the new Congress takes office. I would send copies to
propriate committees in the House and
Senate.
The petition would be focused solely on the EEO rule (Section
73.2080) and would not address FCC policies favoring minority
ownership (no flames please!).
If anyone has any interest in participating, please e-mail
me.
Best regards,
Christopher Smallwood

5089. Bonneville To Reject Gambling Ads

Newsgroup: rec.radio.broadcasting
Date: 1994-11-17 00:24:01 UTC
From: Mark Roberts <transvox@tyrell.net>
Message-ID: <3ae7r1$ro@vixen.cso.uiuc.edu>
Source record: 36644

All Bonneville Broadcasting stations will reject advertising
from gambling-oriented businesses, beginning in 1995.
The policy affects all of Bonneville's 18 stations, including
Kansas City news/talk stations KCMO(AM) and KMBZ(AM), as well as
KLTH(FM) and KCMO-FM.
Local Bonneville manager Ron Carter told the Kansas City Star
that the policy will not affect news coverage or talk shows.
Carter described the policy as one that is more consistent with
the Mormon stance opposing gambling. Carter expects to lose
revenue as a result of the policy.
The Mormon church (The Church of Jesus Christ of Latter Day
Saints) owns Bonneville.
Gambling has been a hot issue in the Kansas City area, with local
municipalities in Missouri holding elections to authorize betting
on riverboats.
The Bonneville stations will reject advertising from lotteries
and racetracks (such as the Woodlands in Kansas City, Kansas) as well.

Larry Lujack, in his book SUPERJOCK, makes an interesting, albeit nameless and oblique, reference to Miller:

"Robert W. Morgan didn't make it in Chicago because his style was totally different from the style of the guy he replaced. He took the place of a notorious right-winger [Miller] who's been on Chicago radio for years and has a built-in audience no matter what station he's on. He'd get 13,000 listeners right off the bat---the entire Chicago police force."

I also have to chuckle over an incident one night after Miller replaced Dave Baum (who'd left WIND's CONTACT late-night talk show for a stint at KMOX St. Louis); one of Miller's callers began referring to elected officials as "these dudes", and Miller got hung up on the idea that anyone would use the word "dudes" in a political discussion...Chicago Eddie Schwartz also once said that he was one of the very few people at WIND to get along well with Miller...

> for being on public TV) and Barney (which has been called
> anti-Christian)?

Seriously?

> Are these all going to be replaced with reruns of the
> now politically-correct Rush Limbaugh?

I doubt that Rush could ever be called PC. PC is the creation of the left, in an effort to advance its Orwellian desire to define for the sheep which terms and philosophies are acceptable and which are not.

> And what about classical music in most areas? Is the funding for this
> going to stop completely?

In south Florida, we have had a commercial classical stration (WTMI, 93.1 mHz) for more than 20 years! And its quality (signal and programming) is much higher than that of the local PBS affiliates.

If you don't have commercial classical music in your market, maybe there's not sufficient demand for it. We support our WTMI advertisers. Are you responding to your pledge drives? Does your station carry any concert music programming?

As the voters proved Tuesday, people are realizing that often government funding is not a solution, but the start of a new problem.

"Live long and prosper -- without government interference!"

(...WYNY may dump country for a dance format. The subject came up at a reunion of ex-WKTU jocks recently. One drawback to the format--not enough adult(25-54)listeners. WYNY's ratings haven't been what the station had hoped.)

While WYNY has certainly struggled over the past year, our data is now showing that the station may be in the early stages of an upward trend. Although WYNY only received a 2.1 12+ share (and a #20 ranking) in our Summer survey, our latest weekly data shows them at a 2.8 share (and a #15 ranking) over the last four weeks. In addition, their 25-54 performance has improved, so that the station is now achieving in excess of a 3 share in this demo.

It will be interesting to see if this progress continues.

I did try out one of the Ramsey stereo transmitter kits. I don't remember
the thing costing any $50, though. Maybe they have several similar kits.

Anyway, this one used a single chip followed by a simple amplifier stage.

It worked pretty well, except that the pilot generator was not crystal
controlled (there are some which are), and there were also lots of intermod
products which were quite audible in the receive signal. A lot of this was,
I'm sure, due to coupling and leakage within the chip.

I ended up putting something together using descrete components (Mono, not
stereo) and it was much better. Again, it wasn't stereo so we're talking
much simpler circuitry.

The Ramsey kit *did* have a reasonably extensive discussion of the FCC rules
regarding emissions off of your property, power and antenna limits, and such.

Michael of Nebadon (magri@aztech.ba.md.us) wrote:

: Regardless of what you choose to call "PC" and regardless of how
: you feel about "the Rush Limbaugh/Bob Grant axis," the fact
: remains that: a) there are other stations on the dial;

So what? PDs are saying, "Hey, only conservative talk hosts get good ratings, so we can't have any liberals on." Thus, everyone is trying to follow after Limbaugh. What kind of choice is that?

: b) there are many other sources of information than
: radio;

This is a post-literate society. "More people get their news from ABC than from any other source." That's not only a slogan, unfortunately, it's a fact.

: c) commercial stations are there to serve a market
: interest so that they can continue to operate;

The Communications Act of 1934 designated the PEOPLE as owner of the airwaves and that stations be licensed to serve the public "interest, convenience, and necessity" as trustees of that public interest. To my knowledge this Act has not been cancelled and the airwaves haven't been sold to the stations (save the recent UHF 2-way channel bidding).

: d) stations are not responsible for how people choose
: to perform their civic duty to inform themselves
: so that they can fully participate in our republic.

But they can HELP people make informed choices. This is very much the philosophy of the Post-Limbaugh society: "I don't care; it's not MY responsibility." Is it not OUR society? Don't we have an obligation to protect our society?

: You seem to feel that stations need to serve a well-balanced meal
: since people can't be expected to balance their own meals.

Because, the people don't have enough facts to make good decisions on their own. The well-balanced meal is a perfect example. Left to their own, that is WITHOUT being barraged by advertising and fast-food outlets, people will tend by nature to eat a fairly balanced meal. BUT, bombard them with one-sided advertising and they'll go to McDonald's, most assuredly NOT a balanced meal. Again, given only ONE SIDE of the information, people will make bad choices.

What a perfect analogy you used. Americans are among the most malnourished people in all the Western industrialized nations. Hell, I'll

go even one better -- MEXICANS are far better nourished than Americans --
and Mexico is a poor country. (This stat comes from the LA County Health
Department, which studied health needs of newly-arrived immigrants and
found them needing less care than Americans.)

: If it
: has really come to that, it's not the stations that are doing a
: "grave disservice to democracy."

Sure it is because they are acting as trustees of the public airwaves.
This is not philosophy -- this is WRITTEN into broadcasting law.

As to knowledge of WABC, I have heard Limbaugh and I have heard Bob Grant;
he was once at KABC. Lots of New York and/or network people were
originally out here in the West -- Rush Limbaugh, Don Imus, Tom Snyder,
Roger Grimsby, Bob Grant, Tom Leykis, etc.

To Tom and others....

I remember when WBMW was playing Top 40 in the late 80's. Their mascot was the B-106 "Super Bee" - a huge inflatable bee that lurked above the stations studios in Fairfax. The "Super Bee" made the news once for some reason, I can't remember. I also remeber that around the time B-106 went, there were some allagations of sexual misconduct among some of the staff members at the station. I don't remeber all the details, since I wasn't really in tune to these things during my teenage years. I do remeber reading in the paper about the format change, but never cared since I was listening to WAVA and Q-107 (Then Washington's Top 40 stations). As Tom said, the station was very hard to pick up in Northern Montgomery County - mainly because of WWMX 106.5 FM in Baltimore which has a very strong signal. Now, WJFK has raised the tower and done some other tweaking to make the siganl audible north until you run into WWMX and WARX 106.9 FM (50 kW for Hagerstown, MD).

Anyways, when Infinity did take over WBMW and switch the format to what I called the everything station, it was pretty cool. I did listen and especially in the mornings. I remember them having Richard Belzer doing mornings for a while and during the first week he was on, he took phone calls for most of the morning about the new radio station. Very interesting to hear the people of DC talk about the new station. He lasted for a while and then moved on or was fired. After that Cerphe began to move towrds the WJFK we know now, as Tom talked about in his article.

One other thing, there was quite a controversy when Infinity applied to have the call letters of WBMW changed to WJFK. There were many groups and individuals who felt that it was wrong to use the initials of a fallen president to represent a station that would utimately carry such un-American (as it was called at the time) programming such as Howard Stern! Very interesting, it even made the evening news.

Just thought I'd give some other info. here. Hope you enjoyed it!

See ya-
Mike

>Ike and his brother Maurice started WCAP in 1951, as a 1000
>watt daytimer. Under their ownership, it became a 5000 watt
>fulltimer, the most powerful AM in the Merrimack Valley.

There was a third brother. Teddy, who was never seen at the station, but who was the Chief Operator.

WCAP, Lowell was the third WCAP, the others having been licensed to somewhere in New Jersey, and, naturally, to our nation's capital. Ike, being a former big time engineer at WHN and WMGM, was well connected. As a consequence, some big time sports announcer (either Graham Mcnamee or Ted Husing, I forget which) actually did the original sign-ons for all three WCAPs. In the PBS "RADIO" PROGRAM A few years back, a station ID for one of the former WCAPs was heard in the background at one point. Also, the first airshift at THE Cap in Lowell was done by Ray Goulding, as a favor to Ike.

There aren't many individual one station owners left. The duopolists probably didn't even notice that one of the foundations on which their soul less industry oriented towards trading radio stations like pork bellies originated.

has passed on.

Yes, Magic definitely made the right decision to change out of its former stale light AC format. Now, if we could just get rid of the *REALLY STALE* 'Star 104.5' WYXR.."Superstars Of The 80s & 90s!!" Blech!!!

> than the next. Neither Baltimore nor DC have any Top 40
> statons anymore.
>
> MIX-MANIA:
> Q107/WRQX 107.3FM (DC)

Isn't this now "Mix 107.3"...I was down that way about 2 months ago, and it seemed to be the closest thing to Top 40 that you'll find in that area (even if it is still a far cry from it!)...In the small amount of time that I listened,
the mix of music was fairly "Hot".

>NY Rumors:
>
>By now, everyone has heard the rumours about Emmis (owner of
>Hot 97/WQHT-FM) buying Kiss 98.7 (WRKS-FM) and changing it to
>a 70s format. In fact, the rumor also has WPAT/93.1 changing
>to 70s.

That would be a shame about Kiss-FM...When I was in New York about 5 months ago, I listened to them quite a bit and they seemed to have a pretty decent urban mix...not too much rap, but not too much "slow-jamming". Have their ratings slipped recently, or what? I guess, under a duopoly, it would be better if they gave Hot 97, by itself (except for the competition with WBLS!), entirely to the black listeners..and the new 98.7 to the white listeners.

I like 70s radio, but my opinion is that WPAT would be the better choice. Of course, these are just rumors too!

I wonder if there is some confusion here with Ira Blue, a long-time Bay Area personality who was one of KGO's first talkers. Show originated from the Hungy I for some time as I recall. Ira was often wrong but never in doubt.

Yes,

San Francisco's KFOG has an e-mail address for any listeners, trade people, or interested parties to send mail via the Internet.

We are also developing a list of KFOG 'Netheads who will get periodical programming notes about upcoming KFOG special programs and other assorted gossip etc. Send an e-mail proclaiming that you would like to be a part of this in order to get on it.

Thanks - and if you are ever in San Francisco tune into KFOG 104.5FM - the only station in the Bay Area where the music matters!!

Bill,

I don't think I would get a lot of argument from the Leykis faithful to say that he is definitely a liberal. Dornan is by no means a hide-bound conservative (as evidenced by his courageous and far-sighted condemnation of our now-infamous Proposition 187). People of honest intent should always find much to agree upon, especially when citing society's current ills; the difference often lies in how to address these ills.

Of course, the labels "conservative" and "liberal" are becoming increasingly irrelevant in this post-Cold War world. I see new alignments coming which would put, for example, Jack Kemp and Pat Buchanan on opposing sides (and the likes of Pete Wilson, I pray, out to pasture).

I apologize if I have strayed off the topic a bit!

>ratings, so we can't have any liberals on." Thus, everyone is trying to
>follow after Limbaugh. What kind of choice is that?

A short-term one. As you say, PD's are looking for good ratings.
When the slice gets too small for their comfort they'll try
something else. At any rate, even if a majority of big-name hosts
are of a particular slant, there are *still* hosts with other points
of view available in most markets.

>: b) there are many other sources of information than
>: radio;
>
>This is a post-literate society. "More people get their news from ABC
>than from any other source." That's not only a slogan, unfortunately,
>it's a fact.

Are they talking about ABC radio news or ABC TV news? ;-) Regardless,
they aren't talking about Rush Limbaugh. My claim wasn't that
they'll read the New York Times from front to back, it was that
radio talk shows are not the only source of information available
to them. Surely you can't be arguing with me on that point.

>: c) commercial stations are there to serve a market
>: interest so that they can continue to operate;
>
>The Communications Act of 1934 designated the PEOPLE as owner of the
>airwaves and that stations be licensed to serve the public "interest,
>convenience, and necessity" as trustees of that public interest. To my
>knowledge this Act has not been cancelled and the airwaves haven't been
>sold to the stations (save the recent UHF 2-way channel bidding).

And the last time I checked, commercial radio stations were operations
that survived based upon their ability to generate revenue. They do
that by selling advertising. They sell advertising by convincing
businesses that potential customers will hear their ads. They convince
the businesses with the ratings the station's shows bring in. They
bring in ratings by scheduling shows that some segment of the market
wants to hear. You know all this already. You know that the FCC doesn't

make the day-to-day decisions about how commercial stations serve the public interest in scheduling their programming days. What difference does it make, in this case, as to whether or not the airwaves were designated to the PEOPLE by the 1934 law? All that I've just laid out above is just as true regardless. If the FCC wants the stations to follow your vision of what serving the public "interest, convenience, and necessity" means, they should move to nationalize the stations and put you in charge of all programming. Until that time, stations are likely to continue operating as I've described above.

>: d) stations are not responsible for how people choose
>: to perform their civic duty to inform themselves
>: so that they can fully participate in our republic.
>
>But they can HELP people make informed choices. This is very much the
>philosophy of the Post-Limbaugh society: "I don't care; it's not MY
>responsibility." Is it not OUR society? Don't we have an obligation to
>protect our society?

Well, this comes back to the point of how people define HELPing based on how they view the world. It's my understanding that Limbaugh considers his show to be an attempt at balancing what he (and his listeners, presumably) perceive to be an unfair establishment media slant in some other direction. Given that, don't you think that he does believe he _is_ acting to protect our society? You may not agree with the way he goes about it, but that doesn't perforce make his way any less principled than yours, does it?

>: You seem to feel that stations need to serve a well-balanced meal
>: since people can't be expected to balance their own meals.
>
>Because, the people don't have enough facts to make good decisions on

>them with one-sided advertising and they'll go to McDonald's, most
>assuredly NOT a balanced meal. Again, given only ONE SIDE of the
>information, people will make bad choices.

Hmmmm... I tend to believe the choice has a lot more to do with how most folks' lives are organized these days. Two-income households, long work hours, wanting to relax and enjoy the free time they _do_ have to spend with their families or friends, etc. It seems a bit unfair for you to characterize them as simple folk who have been brainwashed into choosing a McDonald's meal over a well-balanced meal. It's more likely that it is a sacrifice they make for convenience. All the advertising McDonald's cranks out, IMHO, is to make sure that you will choose McDonald's over, say, Burger King when you are making that sacrifice. Saying McDonald's food is in competion with a balanced meal ignores all the other tradeoffs (price, speed, convenience, and so on) that people also use when

making a buying decision. As a matter of fact, when I do go out for lunch I almost always go for some sort of fast-food since I want to sit in my car and listen to the radio. That's not because McDonald's ads tell me I want to sit in my car and listen to the radio... I just like radio. ;-) The responsibility for the effect my dietary choices have on my health is _mine_. I'm not eating the fast-food because believe it's better for me or that there will be no price to pay, I'm eating it because the price is within a range I feel comfortable paying. You may not agree and you may make a different choice... that's perfectly okay with me (as long as we aren't going out to lunch together! ;-)).

>: If it
>: has really come to that, it's not the stations that are doing a
>: "grave disservice to democracy."
>
>Sure it is because they are acting as trustees of the public airwaves.
>This is not philosophy -- this is WRITTEN into broadcasting law.

...and your interpretation of what was WRITTEN indicates that each station should provide a smorgasbord of opinion. Fine. That is apparently not the way the FCC has interpreted it (at least based on how they are enforcing it, anyway). In any event, that does not remove the responsibility from each voter to educate themselves to the point that they can make an informed decision. If they are mentally incapable of doing that without WABC's program director doing it for them, then there is no reason to believe that they are mentally capable of using their vote properly, either. I don't accept that. They are free to use their vote however they see fit. You or I may wish they would use it differently (and we may even act in such a way as to convince them to do so), but the choice _and_ the responsibility is still theirs nonetheless.

>As to knowledge of WABC, I have heard Limbaugh and I have heard Bob Grant;
>he was once at KABC. Lots of New York and/or network people were
>originally out here in the West -- Rush Limbaugh, Don Imus, Tom Snyder,

True, true, but you don't listen to WABC and, if I'm accurately recalling your last post, your complaint was not with stations which would program Limbaugh and/or Grant, per se, but with stations which would _only_ provide shows which served only one side (for example, the "Rush Limbaugh/Bob Grant axis") of the opinion spectrum. If you were claiming that Limbaugh and Grant should not be allowed on the air, then I apologize for not seeing that in your previous post.

Hi there.

I am new to this list so I thought I would post an introduction and my background. I've been in the radio buisness for about 20 years in the capacity of announcer, morning show talent, producr, program director and some other mundane positions. I've worked in the Miami, Dallas, New York Metro and am currently in the Detroit market. Some of the more recent positions I've held are: Production Director @ WZTA Miami, Morning show talent @ KDGE Dallas, Producer for ABC Radio Networks in Dallas and am Currently the production director @ WLLZ in Detroit. My formatic background is mostly in AOR but I've also worked in modern rock, country, talk, CHR,and some other nitch formats. I even got out of the radio business for a couple of years because of the B.S. but eventually came back because I realized I hated working for a living. Well, thats the big scoop...look forward to hearing from you!

I post a list of upcoming Rockline guests and keep track of Rockline stations to the Radio Concerts Mailing List (to subscribe, send mail to radio-concerts-requests@cs.albany.edu) There, you can find out where to hear other syndicated shows like In Concert and King Biscuit.

Off the Record with Mary Turner is will end its 15 year run at the end of the year, according to an article in Newsday (Long Island's newspaper).

I don't know where the Scranton site(s) are, but in Wilkes-Barre most if not all of the stations broadcast from Electronic Heights (on Penobscot Mountain). Take I81 South from I84 through Scranton and Wilkes-Barre. Get off on 309 South and climb the mountain. Just as you reach the top, look to your right and you will see the towers. One of the stations broadcasting from there is the #1 in the market (with twice the numbers consistently of any other). It is CHR formatted WKRZ-FM (98.5) and it has a long history. It was WBRE-FM at one time and was one of the first FM stations in the country. It is very powerful and can be heard all the way to the Delaware Water Gap. If you need additional info, write or post. G3J.

Yes..I believe I read an article that talked about how WMMR wants to tweak its
format back toward more of what they played when they changed their format to
Album Rock almost 30 years ago...They want to try to rescue the former 60s
'hippies' from the Stern/DeBella/Greaseman-dominated Infinity-owned classic-
rocker WYSP. 'MMRs ratings from the past 1.5 years show that their effort
was not in vain.

I doubt that, Stern and Greaseman are the only talkers on that station.
The rest of the time, it's music.

WMMR has always seemed to 'teeter' on the alternative side (this is from
listening 1986-1990, my college years in Pennsylvania). I've heard them
toss on R.E.M., the B-52's, and Fine Young Cannibals.

I had thought of printing all the Internet discussion which I have captured and taking it to Kevin Kilbane at the FW News-Sentinel. He did have something in the paper about the sale of WOWO being approved, but it was on the inside back page of the main section. In talking to several people, I found that they had not seen it.

My outrage is that apparently Inner City is going to get away with doing whatever they please with WOWO. Money talks. I am outraged about the incident in August. WOWO hasn't really been stable since Westinghouse owned it. Price Communications has run it in the ground. I understand that they do this with stations that they buy.

I'm praying that it truly is not over. But we live in a society where tradition is not valued.....at least not over money.

5135. New EBS Rules

Newsgroup: rec.radio.broadcasting
Date: 1994-11-19 04:16:05 UTC
From: hhallika@callamer.com
Message-ID: <3aju65$fen@vixen.cso.uiuc.edu>
Source record: 36535

The FCC has adopted new EBS (EAS) rules. The news release follows. The Report and Order will be available on our fax server as soon as possible (it is not released yet).

Harold

Report No. DC-2677 ACTION IN DOCKET CASE November 10, 1994

COMMISSION REPLACES CURRENT EBS SYSTEM WITH
A NEW AND IMPROVED EMERGENCY ALERT SYSTEM
(FO DOCKETS 91-301/91-171)

Paving the way for an emergency warning system of the 21st century, the FCC today replaced the current Emergency Broadcast System (EBS) with a new Emergency Alert System (EAS). The digital EAS will work with both new and established communications technologies, including satellite, broadcast, and cable, to make the disaster warning system more effective. The new EAS emphasizes speed, reliability, and efficiency. The Commission said the new system will have the ability to alert the public more quickly and reliably than the old EBS and will reduce property damage, injuries, and deaths caused by natural and man-made disasters.

Broadcasters were required to participate in the EBS and will likewise be required to participate in the EAS. In addition, cable operators will be required to participate in the EAS, as mandated by the Cable Act of 1992. The participation of satellite and public service providers will be voluntary.

Major new features of the EAS include: (1) a digital system architecture that will allow broadcast, cable, satellite, and other services to send and receive alerting information; (2) multiple source monitoring for emergency alerts; (3) a shortened (minimum 8 second) alerting tone; (4) automated and remote control operations; (5) a weekly test that is unobtrusive to viewers and listeners, as well as a monthly on-air test; (6) ability to issue alerts in languages other than English; (7) provisions for the hearing and visually impaired; (8) prohibition of the false use of the codes and the alert signal; and (9) a mandated standard protocol for sending messages.

(over)

-2-

Radio and television broadcasters will be required to replace EBS equipment with EAS equipment by July 1, 1996. The following timetables also apply to broadcasters: (1) existing EBS decoders at broadcast stations must be modified by July 1, 1995 to be capable of decoding a shortened, eight second version of the two-tone alerting signal currently used in the EBS; (2) after July 1, 1995, stations may transmit the shortened two-tone attention signal for not less than eight seconds nor more than 25 seconds; and (3) after July 1, 1997, the two-tone signal must be used only as an audio alert signal to announce either the monthly test or actual emergency message. Class D FM and low power television stations must have decoders according to the timetable used by broadcasters, but are not required to have encoders.

Because the cable industry is new to EAS and may require more time to implement this system, the Commission granted cable systems an additional year to install EAS equipment. Cable systems must comply with the provisions of the new EAS rules by July 1, 1997.

In order to encourage rapid manufacture and deployment of the new EAS equipment, broadcasters and cable systems are authorized to purchase and install the new EAS equipment in advance of the deadlines set forth in the timetables. The Commission will permit early replacement of current technical and operating procedures on a state or local area basis. At that time, new procedures such as weekly unobtrusive tests, the use of a shortened (eight second) two-tone signal, and removal of EBS equipment can occur. Authorization for early deployment of EAS can be obtained upon written request to the FCC's EAS office after all broadcast stations in an EAS local area have installed the required EAS equipment, demonstrated representation of cable systems in their state or local emergency communications committee plans, and demonstrated compliance with certain other rules.

The Commission requested additional comment on whether the waiver standards should be extended to small cable systems. The Commission also asked for comment on whether and how certain service providers should participate in the new EAS.

Action by the Commission November 10, 1994, by Report and Order and Further Notice of Proposed Rulemaking (FCC 94-288). Chairman Hundt, Commissioners Quello, Barrett, Ness, and Chong.

5136. Major Leykis Boo-Hiss

Newsgroup: rec.radio.broadcasting
Date: 1994-11-19 04:16:06 UTC
From: rrb@deja-vu.aiss.uiuc.edu
Message-ID: <3aju66$feo@vixen.cso.uiuc.edu>
Source record: 36536

Perhaps the honeymoon is over.

As many readers to this forum know, I recently found the Tom Leykis show on a satellite feed. I also was quite taken by him and his show. I still think it is a fine show, but I have a complaint.

I called Tom's show (a remote from Madison Wisc) today (Open Phone Friday, when anything goes) and told the screener that I wanted to say hello to Tom and welcome him to Chicago (he will be on 1160 WJJD which has just flipped to all-talk). The screener told me that he could not put me on without 'an issue' and to call back if I had one.

Ok no porblem, even though Tom said it was open phones, I guess that meant open issues. I called back in a half hour with a political issue (one he would have had fun with) and the screener said OK and placed me on hold.

I waited for 2 hours on hold, and was checked in on several times to be sure I was still on the line. Still no problem. However, as time ran on it seemed clear that I was not going to be put on the air, at least not in any sort of order. During the last 45 - 50 minutes no screener came back to the line, and I sat there.

All through the show, which I was hearing via my telephone, Tom kept assuring the audience that this was 'open phones' and that is was OK to call for ANY REASON. Apparently that is not totally true.
At 10 minutes before the end of the show, I was hung up upon without even a word saying "Sorry Bill but we are out of time".

I say a *Major BOO-HISS* to you, Mr Leykis. Or whomever was responsible for my long wait followed by a cold disconnect. That is not in keeping with the air personna at all.

I guess the biggest gripe I have is being checked in on several times and told to "Be sure to be near my phone after the next segment" then to be coldly hung up upon at the end. Sorry Tom, bad form, buddy.
Very bad form.

Bill

5137. North San Diego County report

Newsgroup: rec.radio.broadcasting
Date: 1994-11-19 04:16:07 UTC
From: ChrisCarm@aol.com
Message-ID: <3aju67$fep@vixen.cso.uiuc.edu>
Source record: 36537

>North San Diego Report; Friday, Nov. 18, 1994

The Freddy Jones Band, and Widespread Panic did a backdoor concert at KKOS (95.5, 3.8kw) Carlsbad on Thursday. The 40-minute set started in the rain, but didn't dampen the spirits of the crowd. KKOS' Ron Lane emceed the event, and the concert was broadcast live. This is the second time in two weeks that KKOS has had a backdoor concert. Last week, Richie Havens entertained a small gathering at the station with the concert on the radio.

KFMB-FM Program Director, Tom Gjerdrum was suspended without pay for faxing bogus contest entries to cross-town rival KKLQ-FM. Gjerdrum tied of the fax of Q-106 for hours, preventing listners with real entries from entering. [Gjerdrum was probably caught with the header most fax machines send -- KFMB's fax sends the calls and phone number.] Also in the rumor mill for KFMB-FM: The Star format hasn't been up to the expected numbers, and a "country" mix might be in the works. The Star format is 70s, 80s, and 90s soft rock.

It's been a long time since I have reported on the power-house Noble broadcasting giant, XETRA-AM. The Tijuana-based station now claims to be the most listen to sports station in the Americas. The latest books for the Tijuana/San Diego, Los Angeles, Orange County, and San Bernardino books can prove this. It was reported in the Escondido Times-Advocate and Oceanside Blade-Citizen that WFAN, New York, average is 2.6; and XETRA-AM is 3.2. Plus the combined listenership of four books puts them as number one. XETRA-AM (690, 50kw-U, DA N) is still in the market for another southland station. One possibility is for Noble to go south of the border and buy XEPRS, another 50kw screamer from Rosarita at 1090 AM. The station has studios south of the border, and in Los Angeles. This would help the sports giant in the full plate of broadcasting two major college schools, NBA, SD Chargers, and a try for baseball.

Highway Advisory Radio: California Highway 78, linking I-15 to I-5 from Escondido to Oceanside's radio station(s) is nearing its first anniversary. WNRS operates at 530 AM, with 1.5watt. There are three "stations" along the corridor. [I live about two miles off the freeway, and can get it clearly] The station, which is on 24-hours, broadcast traffic and weather information.

In other LA basin news, here's a short run-down:

Tuna's back! Charlie Tuna, formally at 710 KMPC, was reeled in to KIKF (94.3 FM) Orange, California, from 6 - 10 a.m. The popular fixture in LA radio was not picked up when CapCities/ ABC bought KMPC from Gene Autry. [I have listened to him for years via KOMA, Oklahoma City; Armed Forces Radio; KCBS-FM; and KMPC.] KIKF is a country-music format station in Orange County.

400 fans attended last weekend's convention of SPERDVAC, a group of early-radio enthusiasts. Fans packed the room to see Bill Ballance. His show debuted on KGRB, 900 AM, and is also on Catalina Island's KRCI, Avalon. [The Orange County Register did not break down what SPERDVAC means]

Rabbit Ears Radio, on Sunday, will feature Mel Gibson reading "David & Goliath." Branford Marsalis furnishes the music. The production can be heard on KUSC (91.5, 100kw) Los Angeles. On Wednesday, Rabbit Ears will feature Graham Greene reading "Squanto & the First Thanksgiving," with music by Paul McCandless. The show broadcast at 7:30 p.m. both nights.

The new, and improved North San Diego Radio log has been updated, and includes formats for the majority of espanol stations. [I am still working on power/direction on some of the AM and FMers from south of the border.] For a copy, e-mail me!

>AM Stereo standard as well....

As one of the manufacturers of the "remote monitoring products"
(and I've also talked with two more manufacturers and the FCC), I have
these comments.
The NPRM has not yet been released, but is expected "before
Thanksgiving". Once it is released, I should have it on our fax server
(+1 805 541 0201). I've attached the FCC news release on this below.
As to why this was not done "a long time ago", the Communications
Act of 1934 provided that licensed operators were required to be
operating broadcast stations. Congress amended this (section 318 of the
Comm Act) in 1992. A very small section of the NTIA authorization
legislation says "by the way", let's change this part of the Comm Act. I
read the Congressional Record on this earlier this week. There was no
discussion of this provision. All the discussion involved support for
the NTIA. I did not get to see what discussion happened in committee,
however. As I recall, the bill was introduced in early November and
passed later that month.
So... once it was legal for the FCC to do this, they started
looking at. One of the major concerns, of course, is EBS. The new EBS
rules (which I'll do another posting about) make provision for full
automation of EBS, allowing operator free operation, at least with regard
to EBS.
I think the new rules will be an expansion of the existing ATS
rules (which are certainly vague!). I would hope that they would specify
which parameters are critical enough to require continuous monitoring.
Most stations are continuously monitoring power but not necessarily
monitoring frequency, modulation or occupied bandwidth and spurious
emissions continuously. Power is probably the least likely thing to
cause interference, as most transmitters will not operate substantially
over the authorized power. So, perhaps they will specify other
parameters the equipment must monitor.
I would also expect a "failure mode analysis" on the monitoring
equipment. If the monitor or control equipment fails, it will take the
station off the air.
They MAY also require some sort of a "back door" for FCC access
to the station. However, if the monitoring and control equipment does
indeed monitor all interference capabilities and fails into the off-air

mode, there may be little need for the FCC to shut down a station cuz it's interfereing with airplanes...
If a 'back door" is established, with some communications circuit to somewhere, it would appear that the circuit would need to be tested occasionally. In previous correspondence with the FCC, I've suggested a "three hour failsafe" where a control point and a transmitter site must handshake at least every three hours or the site would shut down. Either site might start the handshake two hours after the last one, try a few times, and sound an alarm before the three hour shutdown occurs.
I'll comment more when I get the NPRM. If I can get the NPRM in ascii, I'll also post it. Otherwise, call our fax!

Harold

Report No. DC-2678 ACTION IN DOCKET CASE November 10, 1994

FCC PROPOSES TO ALLOW UNATTENDED OPERATION OF
BROADCAST STATIONS
(MM DOCKET NO. 94-130)

The Commission is soliciting comment on a proposal to allow unattended operation of broadcast stations. The Commission said that in light of the many improvements which have been made in the stability, reliability and automatic control of transmission systems, it may be appropriate to waive the requirement for a licensed duty operator. The Commission said waiving this requirement would conserve both Commission and station resources.

Currently, FCC rules require each AM, FM, or TV station to be operated by a transmitter duty operator holding a commercial radio operator license or permit. This person is responsible for the proper operation of the station's transmitter and must be on duty at either the transmitter site, a remote control point, or an automatic transmission system monitor and alarm point.

Now, however, the availability of modern monitoring and control equipment may have rendered unnecessary the continuous attendance of the duty operator for many, if not all, stations. In automating their stations, the Commission believes that most broadcasters will exercise due diligence. The Commission emphasized, however, that the proposed rule changes will in no way diminish the responsibilities of licensees to adequately monitor technical operations and to adjust and maintain their stations in compliance with the technical rules. The Commission will continue to hold the broadcast station licensee fully responsible for rule violations or operations that are not in accord with the station authorization.

For those stations that choose to retain duty operators, the Commission proposes to waive the requirement that the duty operator hold a restricted permit. The Commission also proposed changes to various rules that would be affected by waiving the

duty operator requirements. In addition, it proposed updating and clarifying various transmitter monitoring and control requirements in response to questions commonly asked concerning their interpretation.

(over)

-2-

In the context of unattended operation, the monitoring and control of critical parameters must be performed by equipment that could take the station off the air or contact some person designated by the licensee in the event of a serious malfunction.

The Commission stated that while the focus of this proceeding is on AM, FM, and TV stations licensed under Part 73 of its rules, it also seeks comment on similar flexibility for low power TV stations. In addition, the Commission is asking for comments on whether it is appropriate to consider analogous changes to the operator requirements governing international and experimental broadcast stations. The Commission noted that various sections of the rules concerning broadcast auxiliary, ITFS and FM translator services refer to operators and may require conforming modifications.

Finally, the Commission asked for comment on whether the effective date of any changes adopted in this proceeding should be linked to stations activating the new Emergency Alert System for which the Commission adopted rules today.

Action by the Commission November 10, 1994, by Notice of Proposed Rulemaking (FCC 94-289). Chairman Hundt, Commissioners Quello, Barrett, Ness, and Chong.

>at home and advises him that the EBS has fired. He can then opt out of
>it and to back to regular programming at will. Now, if the EBS *key*
>station is also automated after hours...well then...

At the station I owned 3 years ago, we had a deal with the EBS Primary. They monitored out XMTR (via remote)during unattended hours and obviously were sitting on our EBS situation. Our dial-up remote was configured so the monitoring station (or any authorized individual) could put the EBS monitor audio through to the air, or put the phone audio on air, remotely.

Unattended operation is not appropriate for all stations (especially those regarded as full-service)but for the secondary and tertiary players in the market, it can make the difference between viability and going dark.

Thursday, November 17, was the Designated News Day for the 14th annual Northern California Radio-Television News Directors' Association Awards competiton.

Entries for Best News Broadcast, radio or television, must have been broadcast on that day. Any other entries can come from any day in 1994.

The deadline for receipt of entries is 5PM on January 11, 1995, but feel free to ship early and avoid the rush.

The awards will be presented at the NorCal RTNDA Convention in March ion Monterey.
Anyone who works in a radio or television news department who didn't receive a copy of the rules and an entry blank or who has questions may call Gil Haar, Executive Director of NorCal RTNDA, at (415) 259-7538 or fax (415) 259-7539. E-mail rtnda@aol.com.

>restrictions on the amount of recorded music a station could
>play, as opposed to live dramatic, musical or spoken word pro-
>gramming, to be allowed to operate at 500 watts or more. No
>one successfully challenged it.

this restriction, as i recall reading, had less to do with the desire of the station to keeping local programming fresh than it did with the musicians unions clamoring for protection from a new technology (the phonograph) that threatened to put them out of business.

as for your first amendment question: i'm not sure there is such a way to impose this kind of restriction. canadian stations do have a content law (i think it's 40% of programming having to be canadian in origin), but the free speech provision in their constitution might be less subject to legal challenge that that of the united states.

Omni:-0
Could someone please send some information to me concerning Fcc regulations for college radio stations. Week after week, I'm told by our GM not to make comments about writers in our school paper. Also, he seems to have problems with any type of humor that might be the slightest bit provocative. Example: one fine morning I played a tune by U2. Here is how I promo'd the song: "Coming up next, for you guys who have to deal with your Bono in the morning, U2." Yes, it leaves little for the imagination; however, commercial radio is far more explicit, and, often, much less witty. Secondly, is there any type of newsgroup or trade magazine that lists entry level (I believe that's where I'm forced to look) jobs for media personnel? Specifically, someone who has done television, radio, print, and internet, and wants to do on-air work, writing, and anything else an organization will let him (or her) do? Would it help an individual if s/he also happened to be working on a Master's degree in English (go ahead, show me my errors) and teaches composition at the college level.

Air Talent with creative personality and enthusiastic attitude. Air time and production equipment experience
includes:

* Radio Announcer/Full Time * Promotions Work

* Multi Track * "Real Time"
Computer Playlist Program
* Music Librarian * D.A.T.

* Assistant Music Director * Engineer Control Board

* Morning Show Producer

Loves music and knowledge of music history. Enjoys the fast pace of radio industry. Willing to work flexible
hours. Now prepared for a challenging Producer and/or Disc Jockey position with a "cutting edge" radio station.
Enjoys being creative!

EMPLOYMENT HISTORY

WSNY (Saga Communications), Columbus, Ohio, Adult Contemporary 1994

Part-Time Air Talent
Assisted promotions department in set up for concerts and promotional events. Produced guest tapes for morning
show, ran board, manned phones and handled contest call-ins.

WWCD 101 (Ingleside Radio), Columbus, Ohio, New Rock 1992 - 1993

Radio Announcer/Disc Jockey
Interned for 3 months as Music Director Assistant. Helped out as Assistant Promotions Director, then hired as part-
time Jock for Sunday morning shift. Promoted to Morning Show Producer and given more air time after 2 months.
Promoted again to full-time overnite Jock after only 6 months. Also served in capacity of Music Librarian.

* Experienced in production work, promos, commercials and dubs.

* Contacted record companies to negotiate promotional give-aways and order new music.

* Provided input to Assistant Program Director and Music Director on playlist.

* Updated music library of 5000 titles to insure correct labeling and condition of discs.

* Researched music data for input into new IBM computer reference library.

EDUCATION

Radio/TV Broadcasting Degree, (600 hrs of coursework), American School of Broadcasting, Columbus, Ohio, 1993

Hi, I'm moving from Washington DC to NYC sometime early next year (hopefully) with four years of experience in radio. How can i find out of openings in NYC (or within reasonable commuting distance of Manhattan)? Do you know any good contacts? I don't plan to be on the air in New York. I'm no where near ready for that, but I'd like to get into production/engineering in radio or a radio network - or a production company, or television, etc, etc, etc - - you get the idea -- anywhere!!!

Thanks in advance

David Linn

Randi Rhodes is doing middays at WJNO in West Palm Beach,
Florida. I can get the station south of Ft. Lauderdale, and you might
pick it up in Miami. WJNO is 1220 AM.
She's received some local press here and the station has invested
in a major billboard just north of the city on I-95 northbound. In it,
she's ripping through the "old boys club" of Jack Cole and Lee Fowler.

Greetings,

My firm is trying to round up some radio stations for a trial
use of our service. We are trying to see how radio stations
can use a mail-server to increase their listeners, etc.

Here is what I would like to post, please advise and post
if it passes the purity test. Thanks.

We are in search of radio stations that could use a mail-server to
automatically distribute their information (Concert info, upcoming
events, shows, upcoming personalities, etc.) to their listeners.

The cost of using this service could be substantially reduced
or waived entirely depending on the arrangement between the
station and us. Location does not matter as e-mail is worldwide
and growing fast.

If you would like to see what our service does and how you could
use it, please send a message to info@reply.net and wait a few
minutes for an automatic reply. The service we provide is one
of the best methods of placing information into the hands of
listeners, readers, etc. We would like to see how radio stations
could use this type of service for their day-to-day operations.

Thank you for your time,

John Brogan
Director of Operations
Brogan & Associates

5155. BROADCASTERS & SCHOOLS

I'm wondering how much interest AM-ers & FM-ers are showing in
the servicing of schools in their listening area.

I'm not talking about school radio stations. I am interested
in knowing about the visits broadcasters (Announcers-D.J.'s-V.J's)
make to the actual school complex. And what it is you do there.
Are you involved in the academic function, awards aspect, or some
other unique aspect of the schools in your listening area.

Are there any out there that make it a point of targeting
their efforts toward that demographic, or is it not worthwhile
because of the lack of loyality by this demographic.

I'm doing some research into the effects of direct media contact
on students of school age. (Elementary, Jr.High-Intermediate, and
High School).

The name is Dick Reeves. I do mornings at VOCM in St.John's,
Newfoundland CANADA.

Thank you in advance for your contributions.

Hi,
Does anyone in here remember a DJ named Wendall Brown? During the first half of the 1980's he worked the evening drive-time and 7-to-midnight shifts at what was then WLTA/WRMM/WARM-FM 99.7 in Atlanta (the frequency is now WNNX-FM "New Rock 99X". He was let go in February 1986 when the station acquired new management and dropped its "soft rock" format in favor of a more up-tempo sound. Any 411 you can give me about his whereabouts would be greatly appreciated. I know I posted this message before but I forgot to leave my e-mail address.

5159. WIKN 107.9 Port Matilda, PA on the air

Newsgroup: rec.radio.broadcasting
Date: 1994-11-19 04:16:57 UTC
From: v131kkdn@ubvms.cc.buffalo.edu
Message-ID: <3aju7p$fgt@vixen.cso.uiuc.edu>
Source record: 36594

Driving through Central Pennsylvania on US-322 on Tuesday, I noticed that WIKN 107.9 Pt. Matilda was on the air with regular programming. The format seemed to be a rock leaning top 40, with "Wink 108" slogan. The fake legal ID on the hour suggests them trying to serve State College. Despite being rock leaning, they had jingles, unlike many rock-40s. I did not see any promotion while in State College, so I don't know if they have any yet. (does anyone know?) Sounds like some competition for "B103" WBHV 103.1 Does anyone know the transmitter location? They were non-existant in Lewistown, weak on the east side of S.C. and even downtown, they did not have a local like signal. However, going west on I-80, they seemed to hang in longer than the other S.C. stations before finally surrendering to WDSY Pittsburgh, though I heard traces of them as far away as US-219 north of Saint Mary's. I would suspect then that the tower is really over towards Port Matilda? No sign of the perennial CP WVCV 93. 7Boalsburg. Also the new WPSU 91.5 (ex 91.1) has tremendous coverage.

Greg

Bill, hope you and your mom are feeling better very soon. Sorry to hear about the accident. Best wishes and get well soon!

5160. WSCR (820 AM, Chicago) Gets Nighttime Authorization

Newsgroup: rec.radio.broadcasting
Date: 1994-11-19 04:16:59 UTC
From: tebrax@intgp1.att.com
Message-ID: <3aju7r$fgv@vixen.cso.uiuc.edu>
Source record: 36502

The Chicago Tribune reported yesterday (Thursday, 11/18/94) that Diamond Broadcasting's WSCR (820 AM, 5kW Daytimer) has been granted a construction permit to assemble a new 6-tower transmitter in Lemont, IL (~10 mi SW of Chicago) that will provide 1200 Watts of nighttime service.

WSCR ("The Score") is the first all-sports station in Chicago, and has been successful in building a loyal following of mostly men 18-34. Its programming has been limited, however, by the short broadcast day, which has also prevented it from picking up play-by-play rights for local teams.

WSCR has been waiting nearly three years for the 24-hour authorization, which has been held up partly by objections from 50kW WBAP on 820 in Dallas/Ft. Worth, and partly by the FCC's characteristic glacial speed. Regular listeners (of which, I must confess, I am one) are excited about the expanded broadcast day because of WSCR's reputation for clever and collegial programming.

Is this another redwood falling in the forest, as WBAP now has an interloper sharing its nighttime frequency? A legitimate question. But in a previous incarnation, the 820 kHz frequency in Chicago (WAIT, WCZE) had a low-power nighttime authorization, too. The FCC must have concluded that there was a precedent.

Peter George and others, I invite your comments: is WBAP as deserving of an uncluttered frequency as WOWO? I really don't know the answer, and I must admit to not having been a regular listener of WBAP at night. The spectrum marches on, I guess.

Message-ID: <3amg7l$dj8@vixen.cso.uiuc.edu>
Source record: 36506

Change is in the air....

WJJD, Chicago's Big Band outlet will cease that role Monday, November 21. Infinity Broadcasting, which owns the station, is dumping it music in favor of talk targetted to 35-64 year olds. The new line-up is: Ed Vrdolyak and Ty Wansley 5:30 -10 G. Gordon Liddy 10-2; Don "Geronimo" and Mike O'Meara 2-5 (Yes, that is the same Don Geronimo who was on WLS-FM and WBBM-FM during the early 80's). LA Talker Tom Leykis lands a Chicago home from 5-9 followed by National Enquirer Editor Mike Walker from 9-11. David Brenner (David Brenner?) from 11 -1am and Jim Bohannon from 1-4. The station will rebroadcast Larry King's CNN show from 4-5. The station placed 18th in the Chicago market with a 2.8 share in the latest Arbitron ratings.

Jay Mariotti, Sun Times columnist is out a a talk show host at WMVP.

Mitch Rosen, "Chunga", has left as producer on Kevin Matthews morning show on WLUP. Chunga is now the Vice President of Operations for the Chicago Rockers (CBA basketball team). Producer to Vice President?

Bobby Skafish, who was uncerimoniously dumped as morning host on WKQX has resurfaced where it started for him in Chicago. Skafish is doing weekends and fill in work at WXRT.

Carole Nolan has left WBEZ where she was General Manager. The station flourished under Nolan and is now the third largest public radio station in the nation. The station is an outlet for news, talk and in the evenings, jazz. Nolan is leaving the station after 23 years.

Good things come to those who wait:

WSCR, Chicago's original Sports Talk outlet has finally received approval to operate 24 hours. However, it may take 6 months to complete construction of the necessary antenna's in suburban Lemont. Get your on air tapes to Ron Gleason, station PD, who will begin the process of adding on air talent.

Boys will be boys:

WRCX morning host Mancow Muller was suspended for one day last week for an ongoing "battle" with sister station WLUP overnight jock Keith Van Horne. Van Horne, a former Chicago Bear, was recently charged with battery related to an alleged altercation with a female following a traffic dispute. Mancow lampooned Van Horne with on-air tirades and parody songs (they were clever) about the incident. Van Horne has demanded an apology but refuses to go on the Mancow's show to discuss the incident. Mancow accused Van Horne of threatening him and considered obtaining a restraining order. Van Horne is threatening a lawsuit and station management pulled Mancow off the air while reviewing tapes.

Joe

5164. Kansas City Radio Watch (11/19/94)

Newsgroup: rec.radio.broadcasting
Date: 1994-11-20 03:36:22 UTC
From: Mark Roberts <transvox@tyrell.net>
Message-ID: <3amg7m$dje@vixen.cso.uiuc.edu>
Source record: 36507

Suburban daytimer KCXL(AM) in Liberty, Mo. returned to the air today (Nov. 19), nearly two months after the date originally planned for its reactivation.

Independence school district computer technician Pete Schartel purchased the station from the Small Business Administration earlier this year after the station's previous owners relinquished its assets to the SBA.

The station is relaying oldies programming from the Jones Satellite Network. It had been silent for nearly 2-1/2 years. It previously was an urban contemporary station. With its 500-watt signal, it could not compete with entrenched Kansas City's urban powerhouse combo KPRS(FM) and KPRT(AM).

Listening to KCXL's programming today, it's evident that Jones uses the slogan "good times and great oldies" -- as does established oldies station KCMO-FM. While it's unlikely KCXL will make much of a dent in KCMO-FM's numbers, the slogan confusion could cause minor problems during the next survey period.

****

Still remaining in the Kansas City/St. Joseph/Lawrence/Topeka "Z file":

* KFKU (1250), share-time with Topeka's WREN. The Lawrence station has been silent since WREN went dark in 1990. Two years later, it did not return to the air when WREN did. The University of Kansas apparently still holds the license.

* KAYX (92.5) and KLEX (1570). Silent since mid-1994 after purchase by Kansas City-based gospel chain Bott Broadcasting. Presumably the 92.5 signal interfered in the northeast parts of the KC metro with Bott's KCCV-FM, a class C3 signal on 92.3 in Olathe, Kansas (the southwest corner of the metro area). KAYX is Richmond's only radio station; likewise KLEX is Lexington's only station. Both towns are northeast of Kansas City.

Bott has applied for 92.5 in Silver Lake, Kansas. Silver Lake is a suburb of Topeka. One possibility is that Bott will network KCCV-FM with the 92.5 stations, but no announcements have been made.

* KZTO (95.7), COL in Ottawa, Kansas but functioning as a Lawrence station before it pulled the plug early in 1993. The C1 station has a CP to move to the KMCI-TV tower southeast of Lawrence, which would give it a chance of reaching the Missouri side of the Kansas City.

****

M Street Directory readers will note an error for the mid-Missouri market in the new 1995 directory. 93.9 is listed for both KTLH(FM) Boonville and KNCD(FM) Columbia. Since the two communities are fewer than 30 miles apart, there clearly is a problem with the listing. Solution: KNCD's CP was moved to 102.3. Judging by media reports

in the Columbia area, the station may be on the air by the end of the
year. KTLH began broadcasting this year in mid-July.

5165. Alice's Restaurant, annual visit

Newsgroup: rec.radio.broadcasting
Date: 1994-11-20 03:36:23 UTC
From: D Citron <dcitron@gate.net>
Message-ID: <3amg7n$djh@vixen.cso.uiuc.edu>
Source record: 36508

"You can get anything you want at Alice's Restaurant"

In south Florida, oldies station WMXJ (102.7 mHz) annually plays Alice's Restaurant twice on Thanksgiving day.

Is this a local custom, or do other stations do it too because of the subject matter? (As an aging boomer who stopped listening to rock & roll by the mid-60s, I only heard the song for the first time on Thanksgiving 1990 or 1991, though I'd heard OF IT before.)

If your station has it scheduled for a certain time (especially if you're in Florida!), please announce it here or e-mail me. Such a list could become a minor Internet phenomenon -- and I could write a short article about it.

BTW, are the words to Alice's Restaurant archived anywhere on the net?

Nasty doings at "LA's Home of Rock ' n' Roll, 95.5, KLOS."
The corporate geniuses have fired two longtime DJs and are apparently aiming to go after all two dozen listeners about to be abandoned when hard-rocker KNAC goes espanol in Feb.

PD Carey Curelop, having failed in his attempt to completely kill the station by replacing evening riock and roll with taped Greaseman highlights, apparently has to do something. He has already missed the "alternative" boat, failing to ever take any musical chances a la 91X or KROQ. He also missed the AAA train, as KSCA's word of mouth and juyst-starting-to-improve-from-nothing ratings show. So now, he's going to be the "hardest" station in town, the "Megadeath, Quennsryche Voice."

Benson in particular will be mnissed. His sunday night show, "The Seventh Day," j has been imitated all around the country. Not imitated, however, is Benson's knowledge and experience. Most of his rock histories are taken from his own book.

Curelop has done all he can to kill KLOS. I hope his biosses at CAp Cities are happy when all they have left listening to all dayparts except Mark and Briuan are teenage motorheads.

Falme off... flame off... whatever.

5166. WOWO and the "Price" we have to pay for blunder.....

Newsgroup: rec.radio.broadcasting
Date: 1994-11-20 03:36:23 UTC
From: "PETER Q. GEORGE" <PGEORGE@WELLESLEY.EDU>
Message-ID: <3amg7n$djf@vixen.cso.uiuc.edu>
Source record: 36509

"MayA548980@aol.com" had it right on the money, the previous owner of WOWO (and rest assured it was not Group W) has made the biggest blunder in modern radio history...by selling the station to a Group Owner who made NO bones about it....they will power-down and in essence DESTROY one of Americas oldest LIVING radio stations in order to give New York City yet another fulltime service. I have no qualms about the current owner, but the way the whole deal is being consummated is disgusting. The airwaves, in spite of what the big corporate bigwigs might say...are STILL the property of the American people. The FCC might be able to just throw out 200 hundred letters in protest of this travesty of a sale out of a "legal technicality" by saying that the 200 letters and several "Petition-to-Deny" do not "meet the legal criteria" for such. In essence folks...."Money talks, Shit walks".
There is still an opportunity to stop this assassination....be ready to use all of the legal ability at your disposal and get "in-the-know" on how to send a "Petition-to-Deny" any changes in the WOWO night pattern..... it's simple as that. The WOWO Listeners' Guild cant do it all by itself.
In addition to our plan to show the FCC that there IS an alternative way to get WLIB its' nighttime pattern, but YET leave the WOWO pattern just as it is ....it is also crucial that the private listener ALSO do their best to show that this is a real "grassroots" effort for ALL concerned...whether they are members of the Guild or not. Call the FCC on a regular basis to the AM Branch and the Technical Branch. Just call 202 Directory Assistance and ask for the FCC. When you get ahold of the FCC ask for the AM or Technical Branches or a reasonable facsimile thereof. We can still make a difference in saving one of America's premier radio stations from sinking into the sunset. ARE YOU GAME ????????

LETS DO IT !!!!!!

I am looking for some enlightened information on the radio business
for a business plan that I am working on in a management class at Utah
State.

Does anyone know the generalities of radio antennas. How much would
one cost to buy and get operational? Also, can you use different
sizes for a small commercial broadcasting station? I've always
seen the big huge 500 ft ones but is that just the max? It seems to
be a tough subject for novices to research.

Any hints and information that anyone could give would be greatly
appreciated. Thanks.

In article <3aju6g$ff1@vixen.cso.uiuc.edu>, detboy@aol.com (Detboy) writes:

(on possible objections to a local content rule as a condition of keeping a clear channel)

As a First Amendment near-absolutist I'd be inclined to agree with you...except that the FCC prior to 1981 DID have local origination quotas, and quotas for news and public affairs programming, for ALL stations regardless of power or coverage area.
I'm actually proposing something less than that. All I'm saying is, the large stations with wide-area coverage from 50,000 watt nighttime signals should be called on to justify their continued monopoly on their channels. Many of them already do, and put forward unique programming that reflects their markets AND entertains listeners over a wide geographical span as well. But some do not, choosing to use that power and coverage to duplicate programming easily available locally...that's a waste. Make them either originate more than 50% of their post-sunset, pre-midnight programming, or reduce power or directionalize to allow other local and regional services some extra room. I don't propose to tell them what to program...just that they have to program something unique to justify a special privilege most stations don't enjoy. We need more WBZs and WFANs, and fewer satellite repeaters on the clear channels. Bob Smith, middays WXXI/1370 Rochester NY

In article <3aju6m$ff6@vixen.cso.uiuc.edu>, "Philip L. Hinkle"
<plh1@Ra.MsState.Edu> wrote:

|: Could someone please send some information to me concerning Fcc
|: regulations for college radio stations. Week after week, I'm told by our
|: GM not to make comments about writers in our school paper. Also, he
|: seems to have problems with any type of humor that might be the slightest
|: bit provocative. Example: one fine morning I played a tune by U2. Here
|: is how I promo'd the song: "Coming up next, for you guys who have to deal
|: with your Bono in the morning, U2." Yes, it leaves little for the
|: imagination; however, commercial radio is far more explicit, and, often,
|: much less witty.

FCC rules for college stations are essentially the same as for any other
out-air facility.

It sound more like your problem is college rules for FCC stations.
^^^^^^^ ^^^
If you can convince a conservative station management to let your
broadcast what you want, great. And if the listeners decide _they_ love
it, even better... you'll go far in this business.

Just remember: if you can't convince management and you don't back off,
you probably won't survive very long. Robin Williams/Adrian Kronauer might
have done a very good show in Vietnam, but he still lost the gig...

Waving the Communcation Act around won't help. It's perfectly _legal_ to
say nice things about President Clinton... but that won't force Rush to
include it in his programming.

|: Secondly, is there any type of newsgroup or trade
|: magazine that lists entry level (I believe that's where I'm forced to
|: look) jobs for media personnel? Specifically, someone who has done
|: television, radio, print, and internet, and wants to do on-air work,
|: writing, and anything else an organization will let him (or her) do?

Not really at the entry level, except some of the Christian stations
sometimes advertise (and I don't think that's your bag).

Broadcasting (and other publications) list jobs, but internships and
gofers are usually hired on a more casual basis. Make a list of stations
whose formats you like, send out resumes and demo tapes, work the phones,
and show up on the doorstep. It's the only way.

|: Would it help an individual if s/he also happened to be working on a
|: Master's degree in English (go ahead, show me my errors) and teaches
|: composition at the college level.

As a person, probably. As a broadcaster -- unless you plan to go into
writing (news, ad copy, etc) -- not much.
Air talent is hired because they're entertaining. Period.

No. When I was young, I could hear WHAM (from St. Louis) with no problem.
Then, I recall hearing Radiio Marti on the same channel. Also, when I was a
kid, in St. Louis, I could listen to KFI. No channel on AM is clear any
longer. If you want broad area coverage, you have to be on a satellite.

> As we all know, one of the announced goals of the new party
>in control of Congress is to eliminate burdens on industries which do
>not apply to the regulators themselves.

I have been thinking about the same subject. Howere, my approach would be to petition to require the FCC to live up to the same standards we do. E.G., the pool of applicants for a new channel must represent the racial make up of the population within the are to be served, the availability of channels must be publicized through public notices, including advertising in newspapers, and direct solicitation to minority groups, and that the agency would be "fined" when these requirements are not met.

To do this will highlight the hipocracy of present regulation, AND earn the support of minority groups. To reduce or eliminate EEOC would be fought by minority groups.

What do you think?

5177. WJJD (chicago) flips to talk (was: Spoken word radio, then and now)

Newsgroup: rec.radio.broadcasting
Date: 1994-11-20 03:36:49 UTC
From: directory.js@genie.geis.com
Message-ID: <3amg8h$dlh@vixen.cso.uiuc.edu>
Source record: 36520
Cross-posted to: rec.radio.broadcasting,chi.media

On 'spoken word radio in Chicago' ...

Ed Janik and yours truly, despite a total lack of interested participation from anyone else, continue to bore you all with our discussion. There's now a further development on one, and my continued nitpicking on another. <g>

I had noted that, in his listing of non-music programming in Chicago radio today, he had left out WJJD which was then carrying local-origination talk programming in morning-drive and syndicated Liddy middays. I had a specific reason for lobbing this in, and the announcement was made the other day.

WJJD is now scrapping the musical rest of their day, effective Monday (21), to pick up additional syndicated talk programming: Don & Mike (2-5p), Tom Leykis (5-9p), Mike Walker (9-11p), David Brenner (11p-1a), Jim Bohannon (1-4a), and Larry King (4-5a).

The non-talk air talent were officially told in a 4pm meeting Wednesday, though the rumor mill got to most of them first. The local and national trade press had the story next morning.

Likely results: (1) The station saves money in the long run. (2) Parent company Infinity Broadcasting syndicates all this stuff via Westwood One, which now has a Chicago outlet for these programs. (3) Whether or not the audience grows in size, it almost =has= to start skewing a little younger. (WJJD's median age under the older format was consistently above 65. Even the other upper-demo talk stations (WGN, WLS) and the all-news and classical stations manage to do a little better than that.) This in turn should make their local advertising minutes more saleable.

And now on to the nitpick: <g>

Ed, in noting many of the Chicago "spoken word" radio stations of "15-20 years ago (late '70's)", had mentioned a "country WJOI" at 101.1 FM. I guessed he was referring either to another country FM at the time (WJEZ) or to the brief WNIS-FM simulcast of WMAQ after NBC pulled the plug on the NIS service (November '76) and before the switch to local aor at year's end.

I wonder if he's referring to a brief period in the =early= (not late) 70s when there was country music on that frequency. In among trying top 40 (an overwhelming failure) and other position in the contemporary spectrum (also all without ratings success), NBC was experimenting a little with both stations.

(At the same time, WMAQ was "All American 67Q" under no-previous-experience pd Lawton Wilkerson, playing what we were then calling "chicken rock" -- not unlike what WIND had been programming before they went oldies in '71, music

that would probably be called "highly-unfocused ac" today -- with "Sweet Dick" Burch in mornings and the legendary Joel Sebastian in afternoons. And that didn't work either!)

But again, that was in the early 70s, not the late 70s.

Ed also reminisces,
> "... do you recall in the hours before the AOR format on WKQX when they played a loop with an announcer saying "The music starts tonight at 6" or something like that?"

Yes, they yanked the simulcast on New Year's Eve (12-31-76) for a few hours of that before hitting the switch into the new "live-on-tape"* (as Hank Kingsley says introducing "the Larry Sanders show") format. [* WKQX in those days was voicetracked automation.]

Do you also remember that their debut months were commercial free? General manager Charlie Warner figured that they weren't going to sell many ads in the first quarter anyway -- slow season, new entry in an already crowded format, unproven technology -- so why not turn it into a promotional gimmick!

Helped them for the first book.

Jim

Actually, this shouldn't be that big a surprise. We lived in Vegas for what seemed like the longest 2 years of our lives. Vegas is one of the leading retirement communities in America. Also the fall and winter see the arrival of the "Snow Birds" people who are wealthy enough to live their city of origin (e.g. Chicago, Milwaukee, Dnever) for the summer and then when the weather turns they go to Vegas or Laughlin until spring. Vegas demos show a big bulge in the 55-plus catagory. So since KJUL is the only game in town, pardon that expression, they'r just bound to do well.

I can understand your outrage, Bill, about being treated in that manner.
Tom seems to look for the most controversal callers, and your subject that
came up on his preview screen probably was not "riveting" enough for his
high standards in *sleaz-ability* of a story. It might have been the best
thing, he never got to your call, he may have publicaly humiliated you, if
your call wasn't fascinating enough for him.
You talked about him not keeping with his "air personna", that is my one
major gripe about his show. He comes across to his national audience as
an open and honest talk show host that will talk about anything, including
anything in his past, but he continues to hide the fact that he WAS arrested
for beating up his wife in Boston last December. Somebody sent me the
articles from the Boston Globe and Tom, himself, wrote me and told me his
side of the story. I urged him to tell his national audience about it
(in his own words) so he can explain this hidden secret.
Instead, he has done many shows on the subject of "men who abuse women"
and use the notion of being drunk as a legal defense. His "on air personna"
is completely outraged by the shear idea of anyone using such a defense and

how "you should always be held accountable for any behavior you commit in that condition". It seems to me, he was being very hypocritical when he voiced such an outrage about this kind of subject matter. I was almost ready to call into the show myself, on these occassions, but since I was at work and I knew the screener would probably not even give me the chance, I let it go.
I know Tom reads this newsgroup, so it's probably the best way to get his attention and him to respond to this issue. I can post those Boston Globe articles, if anyone is interested in the details of this *riveting*, *controversial* story that Tom's screener would also have "put on hold" for the entire show!

Bill, I'm sorry you were treated that way, he should handle his listeners more reponsibly and not just coldly disconnect you at the end.

Later,

Paul

>Do you have any specific examples to back up your claim that NPR is a
>cheerleader for the Democratic Party? And which NPR program featured
>homosexuals making love?
>
>Mark Tomlonson
>Kalmazoo MI
>

The program with Homosexuals making love was on PBS not NPR. About 2 years ago, there was a big controversy in Cincinnati when WCET 48 ran it, if featured parital nudity and glorification of homosexual love. Well, they can make the program if they wish, but I object to MY tax dollars supporting this. Ill bet if they put on a program glorifying Christians the Liberals would have a fit.

And as for NPR.... When I hear the political correctness run rampant, I just want to barf. .... Native American? I was born here, but I don't qualify... Ill leave the rest for your imagination.

How about the stories after the last election when they got on the radio and talked about how the Republicans were going to compromise with the democrats, while Limbaugh ran a speech by Mr Newt of how the President was going to have to toe the line. They loudly ignored or poo poohed the stories about whitewater and Paula Jones, if mentioning them at all, they were saying how they were just Republican propaganda. Oh yes, of course,

how they ignored the recovery during the end of the Bush era to help president klinton and her husband get elected.

What has made them so mad is that they no longer have the monopoly on broadcast ideas. Now the right has gotten its own voice, and is competing with the left, and so far having good effect. They are stealing listeners away. People are tired of their conservative lifestyles being called old fashioned and antiquated. They are tired of their morality being ridiculed by the mass media. And, according to the last election, they are tired of the liberal ruling class forcing this stuff on them.

To sum up, the liberal meadia, led by NPR, think that the Republicans can do no right, and the democrats can do no wrong. WHY? They were trained in the same liberal institutions that taught them to think that way. Until the advent of the new Congress, NPR's funding was untouchable because the funders agreed with their ideas. The goal is to first balance their tax supported programing, and make it consistent with the majority of the taxpayers, then balance public education, returing to good old AMERICAN CULTURAL VALUES!!!!! (God Bless America plays in the background).

From: rharris@netcom.com
Message-ID: <3amg9d$dqr@vixen.cso.uiuc.edu>
Source record: 36531

Today's letter comes from Duane Wadsworth, who writes:

: Dr. Toni Grant used to be on ABC's TalkNet and heard here in the Bay area.
: I know that she originated in Los Angeles but I haven't heard her name or
: anything about her psychological talk format in a long time. She stayed
: away from the sensationalism and was very compassionate in her conversation
: with listeners. Anyone know if she's on the air now?

Actually, she was on the Mutual Broadcasting System. She left the air to
get married and now lives in one of the north-central states with her
husband.

You'd better hope this array works better than the previous nighttime
system, which I believe was also a six-tower job. When I lived in
Chicago during the mid 80's you could barely hear the nighttime signal
in much of the metro, and WBAP often came punching right through.

The previous site was in Elmhurst, at the original WMAQ site.

} Chicago during the mid 80's you could barely hear the nighttime signal
} in much of the metro, and WBAP often came punching right through.
}
} The previous site was in Elmhurst, at the original WMAQ site.

The previous *4* tower site was, indeed, in Elmhurst, but was at the old WAIT site, which was leased land with a single 820' tower. When the station got its night time signal (1000 watts directional) it put up 3 more towers and had an almost 100% null to the SW (protecting WBAP whose protected curve touched I-80 immediately to the SW of Chicago).

The array was basically a cardioid pattern aimed NE. with a super null toward Dallas, and also (given its place in Elmhust) over much of the west and southwest suburban area (which heard little of WXEZ (the calls at the time) and a LOT of WBAP <Dallas>. So the array *did* work, it worked so well that much of the suburban marhet was left out of the pattern.

The new array will be located much farther south and a little west of the Elmhurst site, and should therefore include much more of the lucrative west suburban area in its contour. But Ill bet you won't hear it 5 miles SouthWest of the site.

I have not seen any specs on the array, but with 6 towers (probably in-line, or a pair of three in-line) will no-doubt be quite directional. Wonder if they will have to protect WNYC in New York, which moved in recent years from 830 to 820.

Best of luck WSCR. While I am not a sports junkie, they sure did it right, and have beated 50,000 watt, full-time WMVP into the ground.

Newz from the Left Coast.....

This past week, AOR KLOS (95.5), Los Angeles, blew out pretty much their ENTIRE airstaff. Bob Coburn (middays), Geno Michellini (afternoons), and "Uncle" Joe Benson (nights) are all history. Between them, they have all been on KLOS for about a combined 50 years!!! Only Mark & Brian made the cut (love those syndie deals!!) outside of a few part-timers..
In a related note, KLOS has hired Heavy Metal KNAC jocks Long Paul and Remy Maxwell. KNAC (with it's VERY crippled signal) is going (yawn) Spanish in February. In turn, KLOS has been increasing the amount of current product on-air. Almost as if to distance themselves from Dinosaur rockers KLSX (97.1) and KCBS (Arrow 93.1).
KLSX has been blasting Arrow on-the-air by saying "Why listen to a 70's jukebox?" and "How dare they call 70's classics 'Oldies'!!" and then parodying the VERY robotic Arrow jocks. It's actually pretty funny to hear them do it, and they are constantly playing those promos during "The Howard Stern Show" for maximum impact..

KSHE St. Louis (well, actually, Crestwood, Mo.) has played Alice's
Restaurant at noon on Thanksgiving every year since it was available.

On New Year's Day 1979, after a particularly nasty ice storm the night
before that knocked most the St. Louis FMs off the air, KSHE came back on
about noon...with "Alice's Restaurant." (I think it was 1979.)

DavidB6517 (davidb6517@aol.com) wrote:
: The reason your GM is telling you to cool it is because your station is
: owned by the University and therfor should reflect their views.

I think this is the essence of college radio regulation. The college holds the liscence to the radio station and therefor any complaints that would result from someone's broadcast would go against the liscence holder (the university) so they don't want to get themselves in hot water.

Also, and this *is* my opinion, I think that college radio is watched closer by the community and possibly the FCC. I think that it centers around the fact that many college stations tetter regularly on the edge of what is proper and what isn't, both verbally and musically. I don't think they do this intentionally (although I do know that some do) since they are not "professional broadcasters" and may not know what is OK and what isn't. Further, the NCE band is so crowded and so many people want on that in an effort not to lose a liscence due to challanges at renewal time, many colleges will specifically tell their stations to keep it on the up and up.

Is all of this right? I think so. I have heard college stations that go way to far, in my opinion. It often sounds like they train people so they can get a broadcast permit legally, but don't tell them what they should or shouldn't do on the air. Some stations need to train their staff better and learn then rules. Am I harsh? Yes. Good radio is hard to come by and college stations can be as good as professional stations give the proper training and resources.

Sincerely,
Mike

There are dozens of companies competing in the Digital Audio Storage/Automation arena.

The largest installations are at WABC, NY, KSL, Salt Lake, and KPIX, San Francisco.

KPIX has a 96 x 64 switcher, its air studio consoles, one production console, & telephone hybrid system all automated with the digital audio storage system. All audio is stored on hard disk and there are only tape machines to play commercials, produced outside the station. News stories, commercials, PSAs, phone calls, and station promos are accessed through the touch screens in the studio. The system even turns on the console's channel, sets up mix - minus, and selects the input channels to the console.

Our Highly Esteemed (and, in this case, Highly Steamed as well) Moderator writes:

>I called Tom's show (a remote from Madison Wisc) today (Open Phone
>Friday, when anything goes) and told the screener that I wanted to say
>hello to Tom and welcome him to Chicago (he will be on 1160 WJJD which
>has just flipped to all-talk). The screener told me that he could not
>put me on without 'an issue' and to call back if I had one.

>Ok no porblem, even though Tom said it was open phones, I guess that
>meant open issues.

I've always taken Tom's label of "open phones" to mean "bring me what you want to talk about, but I'll still be piloting this plane." Which means, basically, that it isn't simply a matter of his handing control of the program's flow over to callers on a first-come-first-serve basis. As far as I can tell, Tom believes that there's more of a chance that listeners in San Francisco, Buffalo and Tacoma will be more likely to be concerned with the relegalisation of marijuana or the newly-displayed arrogance of Newt Gingrich and Jesse Helms than with someone wishing him good luck in Chicago. As well, throughout the show he specified that (a) the topics be presented in a legitimately compelling manner and (b) callers had to convince Mike Dooley, Tom's Friday "bouncer", that compelling they will be. In addition, I suspect you also noticed that Tom was in front of a boisterous beer-chugging crowd (the acoustics at the UW Rathskeller are comparable to the legendary echo of tiled school rest rooms), further complicating the situation. I suspect that Tom would have been slightly more open to your call had he not been in danger of Cheeseheads starting a jeer of "BULLSHIT! BULLSHIT!" if a caller uttered the wrong phrase. (This actually happened to me once at a UW remote, so I know how real that possibility is.) To top it all off, Tom was running the show through a laptop computer, and I have no idea exactly how much information on the callers' topics he could get on the laptop. I wouldn't have done a show under the conditions he had to that night without being in danger of winding up at the local mental hospital (which, incidentially, happens to be directly across the Lake Mendota from the UW campus).

> I called back in a half hour with a political
>issue (one he would have had fun with)

What was the issue?

> and the screener said OK and
>placed me on hold.

>I waited for 2 hours on hold, and was checked in on several times to
>be sure I was still on the line. Still no problem. However, as time

>ran on it seemed clear that I was not going to be put on the air, at
>least not in any sort of order. During the last 45 - 50 minutes no
>screener came back to the line, and I sat there.

Sounds like Dooley's fault from this point on, not Tom's. If he were doing the job Tom implies on-air that he was entrusted with, I suspect this part wouldn't have happened.

>I guess the biggest gripe I have is being checked in on several times
>and told to "Be sure to be near my phone after the next segment" then
>to be coldly hung up upon at the end. Sorry Tom, bad form, buddy.
>Very bad form.

This part was DEFINITELY Dooley's misdoings. HE's the one to roast, and THEN Tom if the situation doesn't shape up.

Later, Our Highly Esteemed Moderator wrote:

>[Moderator's Note: To be fair, I have received email from Ron Harris
>and I feel better about the situation after discussing it with him. I
>have yet to hear anything from Tom, though. Bill]

Tom's been on a lot of promotional appearance-type stuff for WTSO, the Madison affiliate, ever since hitting town yesterday (11/18). Then it's on to the same stuff in Chicago for WJJD. I suspect Tom might need a breather before wading through the thousands of E-mails he probably has in his box.

As well, au664@freenet.buffalo.edu (Paul Kerr) writes:

>He comes across to his national audience as
>an open and honest talk show host that will talk about anything, including
>anything in his past, but he continues to hide the fact that he WAS arrested
>for beating up his wife in Boston last December.

Tom most certainly does make reference to this incident on occasion, and in fact he and his wife Susan devoted one of Tom's first Westwood One programs to the incident. While I think it would be a good idea for Tom to repeat the program for the current 101-station lineup, he owes it to nobody, least of all a couple of 'Netters in Buffalo and Nordheim, to actually do it. While you imply guilt by bringing up the arrest, you don't mention here that there was no TRIAL on the charges, since they were dropped by the Suffolk County District Attorney's office, thus no CONVICTION. There was a sickening multi-participant argument on the subject in the Compu$erve Broadcast Professionals Forum last January, most of the posts of which I've saved. After that despicable sequence, I wouldn't blame Tom if he NEVER brought it up on his show again.

>Tom, himself, wrote me and told me his
>side of the story. I urged him to tell his national audience about it
>(in his own words) so he can explain this hidden secret.
> Instead, he has done many shows on the subject of "men who abuse women"
>and use the notion of being drunk as a legal defense. His "on air personna"
>is completely outraged by the shear idea of anyone using such a defense and

>how "you should always be held accountable for any behavior you commit in
>that condition". It seems to me, he was being very hypocritical when he
>voiced such an outrage about this kind of subject matter.

This is patently unfair on your part. Unless you have some first-hand information the Suffolk County D.A. doesn't have, and you obviously don't, this characterisation of Leykis is in itself hypocritical, since you assume without basis there's more involved than meets the public eye. I suggest you prove there is before further ripping Leykis on this matter.

>I can post those Boston Globe
>articles, if anyone is interested

Sorry; both the Boston Globe and the Boston Herald have reputations for accuracy and pertinence just slightly better than the Weekly World News. A lot of the feathers Tom ruffled while in Boston were on the Globe's plummage, and this incident just gave them an opportunity to be vindictive. Most of those Globe stories, in fact, were simply hack rewrites of the same item.

Unless there's some similar incident in Los Angeles, the whole matter should rest in the files of the Suffolk County D.A. I truthfully can't see any legitimate purpose of rehashing the story on the 'Net.

} I've always taken Tom's label of "open phones" to mean "bring me what you
} want to talk about, but I'll still be piloting this plane." Which means,
} basically, that it isn't simply a matter of his handing control of the
} program's flow over to callers on a first-come-first-serve basis.

Yes I understand this Daevid. As I said in my article, there was no
problem with that. It is Mr Leykis' show and I have no illusions to
the contrary. I may have been born at night, but it wasn't *last*
night :-).

} Tom believes that there's more of a chance that listeners in San
} Francisco, Buffalo and Tacoma will be more likely to be concerned with the
} relegalisation of marijuana or the newly-displayed arrogance of Newt Gingrich
} and Jesse Helms than with someone wishing him good luck in Chicago.

Again, Daevid, I am certainly not complaining about that. I never
made it past the screener with that topic and I have no qualms about
that. I believe I made *that* clear too in my article.

} you also noticed that Tom was in front of a boisterous beer-chugging crowd

This is a factor that dawned on me after the fact. Not that the crowd
would yell bullshit (because I *am* a riviting and entertaining
speaker <grin>) but because Tom was *on stage* and unlike the empty
studio had to keep his *studio audience* happy too. He was
'working' the crowd. He had them in the palm of his hand.

} I suspect that
} Tom would have been slightly more open to your call had he not been in danger
} of Cheeseheads starting a jeer of "BULLSHIT! BULLSHIT!" if a caller uttered
} the wrong phrase.

The entire show was on a *15* second delay so that is not a problem.
But I do think that Tom was considering the 'live' factor of the

performance when he chose the calls. They DID do a lot of yelling at stupid callers, but they seemed to know that they had to keep it clean otr be escorted out. Tom gives a good impression of not taking any shit.

} > I called back in a half hour with a political issue (one he would
} > have had fun with)
}
} What was the issue?

It had to do with Bush, Clinton and congress. I wont bore you with it now, but Dooley liked it and put me through.

} >I waited for 2 hours on hold, and was checked in on several times [...]
}
} Sounds like Dooley's fault from this point on, not Tom's. If he were doing
} the job Tom implies on-air that he was entrusted with, I suspect this part
} wouldn't have happened.

Ron Harris told me Tom chooses the calls. I think Mike Dooley did his job and Tom did his. As I said, Daevid... I am not so naive or self-important to be steamed because Tom didnt take my call. True, it was a bummer, because I had a better topic and would have been much more interesting than some of the callers that DID get on... But I totally realize that it is Tom's show. You and I have both been on the other side of the microphone, Daevid and you and I know that the host must run the show. Period.

} >and told to "Be sure to be near my phone after the next segment" then
} >to be coldly hung up upon at the end. Sorry Tom, bad form, buddy.
}
} This part was DEFINITELY Dooley's misdoings. HE's the one to roast, and THEN
} Tom if the situation doesn't shape up.

I believe Dooley thought (as did I) that my topic was a good one and that Tom would probably take the call. Unless Tom *told* him that he was not going to take the call, what should Dooley do?

I dont want to roast any of them. Tom is a consumate professional and he is in a very competitive biz. He has more on his mind than whether some dipshit moderator is on hold :-). I know that.

My post was the result of frustration with a 2 hour hold, but mostly with the cold 'click' at the end of it all. *THAT* is what got me steamed, if anything did.

} Later, Our Highly Esteemed Moderator wrote:
}
} >[Moderator's Note: To be fair, I have received email from Ron Harris
} >and I feel better about the situation after discussing it with him. I
} >have yet to hear anything from Tom, though. Bill]
}
} Tom's been on a lot of promotional appearance-type stuff for WTSO, the

} Madison affiliate, ever since hitting town yesterday (11/18). Then it's on to
} the same stuff in Chicago for WJJD. I suspect Tom might need a breather
} before wading through the thousands of E-mails he probably has in his box.

Tom does not owe me anything, Daevid. If he replies I'll be happy
about it. If he does not, then I will still enjoy his program and
respect him for his success and for his talent. I would like to think
that Tom is not so big that he forgets the 'little people' like me,
but I know he will be hopping for quite a while if he is to maintain
success.

While I would like to hear from him at some point, I want to make it
clear that I am not angry with him (as if that matters in his world)
and I hold no grudges. I feel the thing could have been handled
better, but the world shall not end for either of us. Tom Leykis is
still my favorite talk show host and my respect for his efforts has
not diminished because of this.

} As well, au664@freenet.buffalo.edu (Paul Kerr) writes:
}
} >anything in his past, but he continues to hide the fact that he WAS arrested
} >for beating up his wife in Boston last December.
}
} Tom most certainly does make reference to this incident on occasion, and in
} fact he and his wife Susan devoted one of Tom's first Westwood One programs
} to the incident. While I think it would be a good idea for Tom to repeat the
} program for the current 101-station lineup, he owes it to nobody, least of
} all a couple of 'Netters in Buffalo and Nordheim, to actually do it.

I agree. I would not like to be in Tom's place where that is
concerned. We dont know the situation, and there was no trial or
conviction.

} Unless there's some similar incident in Los Angeles, the whole matter should
} rest in the files of the Suffolk County D.A. I truthfully can't see any
} legitimate purpose of rehashing the story on the 'Net.

Neither can I. I posted Pauls note because it was a reply to mine.
Plus he specifically wrote and asked that it be included. I really
dont want to use this fine forum for delving into the murky closets of
people whom we proport to serve with the forum. If Tom wants to talk
about this on the group, let him bring it up. We are not judge and
jury here, nor are we the Natl Enquirer. If it applies to the
broadcasting world, fine. But I cannot see how rehashing Tom's dirty
laundry is of service to the broadcasting community.

If someone can offer compelling argument to the contrary, I am willing
to listen.

Bill

We are in the process of hunting for a new news console and I'd like to hear about what people out there are using, what you can recommend, (or recommend against) in the way of an INEXPENSIVE news console (under $7,000) (About 10 inputs needed) Space is also a consideration, but durability is a must. You know these news people. Thanks.

NPR never led anyone to anything. I'm a fan of "All Things Considered", "Mor-
ning Edition", and other NPR programming. While I do detect a somewhat "green"
approach to some of their programming, I feel that they do a pretty fair job
of getting both sides of the story out. The only bias would be that of the
host, and not a cultural bias imposed by management. BTW, I'm a 30 year
broadcast pro, former talk host and can in NO WAY be considered a liberal!

Stations that have live operators don't monitor modulation or occupied bandwidth now so why would they start. If the stations went spurious they would not know until someone called to complain. That's just how it works in radio today.

> If a 'back door" is established, with some communications circuit

Handshake with Who or What ? No one is at the studio so who cares if the remote control is calling the studio no one is their. The doors are locked and the only person who is working is at the satellite service studio.

We just picke up a box that inserts Weather reports at the bottom of the hour.
It can also be placed into a stop set if needed. The thing gets a dump from
the newsroom computer containing the text of the weather forcast or alert.
>From that it looks at the local sensors and produces a weather forcast for
playback when called for. The audio is pasted together from a local weather
guy that read all the common reports into the machine where they were cut up
an stored. The thing sound almost live. The public has no idea that there is
no one there.

>The Communications Act of 1934 designated the PEOPLE as owner of the
>airwaves and that stations be licensed to serve the public "interest,
>convenience, and necessity" as trustees of that public interest.

As I recall it, the Communications Act doesn't say anyone "owns" the spectrum, even though Reed Hundt is selling it at auction! I believe the spectrum more like a public street. We can get licenses, and own vehicles that travel on the streets. Likewise, we own the stations, but do not own the spectrum.

Government must either see that licensees present balanced views, as it did with the fairness doctrine, or the owners of stations must themselves represent diversity of our population. Without a doubt, radio station ownership is not diverse. But, I would not trust the fairness doctrine to bring about diversity.

The restrictions on licenseing to prevent a "radio traffic jam" have limited ownership to a relative few. Kind of like taxicab madallions in New York. A true "free market conservative" would close down the FCC and eliminate the government radio license process. All who desire to "enter the traffic jam" would be allowed to do so.

Maybe, instead of a fairness doctrine for broadcasters, the FCC should be required to see that holders of licenses represent diversity. Kind of a "fairness doctrine" for the FCC. Personally, I want don't want government to ask me to fix what they broke.

5214. The WBAP Question...

Newsgroup: rec.radio.broadcasting
Date: 1994-11-21 00:39:20 UTC
From: "PETER Q. GEORGE" <PGEORGE@WELLESLEY.EDU>
Message-ID: <3aoq7o$oa6@vixen.cso.uiuc.edu>
Source record: 36469

Tom Braxton basically asked "Is WBAP deserving of a Clear Channel Service and is WSCR deserving of a nighttime authorization". This is a good question, deserving a good answer.
True, WBAP in Dallas/Fort Worth is being encroached upon in a big way. But, are a victim of stupid radio policy that the FCC enacted when they killed the Clear Channels. Today, 820 is a jumble of noise with WNYC, CHAM and a host of other new fulltimers. This is a perfect example of what will happen when the FCC adds in yet more fulltimers in an already destroyed AM band. This is the "Forest of NO Return". The WOWO situation is still still a fixable one. 820, on the other hand is ...well...the damage has been done. WBAP still has a full time pattern which, while being encroached upon is totally intact. And WBAP has no plans to let itself be bought out by some heartless Clear Channel wannabee. WOWO, is fighting for its' life. WE INTEND TO SAVE IT. As long as WSCR is protecting WBAP, we can say that the people outside of Chi-town will still be able to get it, albeit noisily. The WOWO situation is similar in that with a little bit of engineering wizardry, WLIB CAN get its' nighttime signal to NYC without destroying the WOWO signal that people outside of The Big-Apple can still enjoy. IT CAN BE DONE ! I
I have a challenge....I welcome any or all parties involved in the WOWO transaction to contact me directly to see if there is a common ground where all people can be satisfied...in essence WLIB for New York City and WOWO for all the rest of WOWO land. I dare the InnerCity folks to contact me me and at least hear me out ! Are they GAME ?????

5215. WOWO changes

Newsgroup: rec.radio.broadcasting
Date: 1994-11-21 00:39:22 UTC
From: rmeyer@cap.gwu.edu
Message-ID: <3aoq7q$oa9@vixen.cso.uiuc.edu>
Source record: 36470

I was just in Fort Wayne last weekend and thought I would add a little more info to the changes already detailed by Scott Fybush:

1. Several off-air WOWO employees were let go by Inner City around Nov. 11. Some MAY have the opportunity to return later at lower salaries. On air staff is supposed to remain in place.

2. WXKE-FM 103.9 (Rock 104) has indeed agreed to purchase WOWO-FM from Inner City. In the meantime, they have LMA'd it and are simulcasting Rock 104 on WOWO-FM 102.9. The station is still being IDed as WOWO-FM, WOWO staffers are still controlling the transmitter and (get this) the simulcast is being accomplished via an FM receiver (tuned to 103.9) patched into the FM audio chain at WOWO.

3. Pathfinder has announced that WOWO will abandon 203 West Wayne Street, its home for nearly 20 years, and move into the WMEE/WQHK complex on Maples Road on the south edge of Fort Wayne. Some sort of construction is supposed to start soon (completion scheduled to be completed by spring) and the type of building is unknown. WMEE/WQHK have broadcast from a group of attached mobile homes for many years. WOWO will have new studios, but the "World Famous WOWO Fire Escape" will be history.

4. Tony Richards, GM of WMEE/WQHK, is the new GM of WOWO. He replaces Gina Maxwell, who chose to leave about two weeks ago. Richards has said publicly that he doesn't expect the WOWO signal/pattern change to happen before 1997, if then.

5. New promotions manager at WOWO is Charley Butcher, former morning shock jock at WMEE. He left a couple of years ago to become a house-husband and got tired of it and this job was the only one Richards could offer him for now. (Tony Richards was Charley Butcher's on-air partner for several years).

That's all for now.

Randy

5216. Washington, D.C., Radio Watch 11/21/94

Newsgroup: rec.radio.broadcasting
Date: 1994-11-21 23:20:20 UTC
From: TOMLACKO@delphi.com
Message-ID: <3ar9vk$i0u@vixen.cso.uiuc.edu>
Source record: 36473

WJFK FM 106.7's (Talk format) bad-boys-gone-national, Don & Mike, add another affiliate to the Ham & Eggs radio network beginning today, Monday November 21, 1994. It's WJJD in Chicago, IL. WJJD is only picking up 3 hours of the show. But fans of D&M know the Chicago station will soon be inundated with calls demanding the 4th hour. After that happens, WJJD will learn they often go 4 and a half hours but, they'll cross that bridge later. Tom Leykis fans in Chicago will have to be on alert as D&M try to take away his first hour. In the meantime, enjoy the show Chicago in its abbreviated form!

Don and Mike were in Harrisburg, PA., last week broadcasting live from one of their affiliates who recently filed for Chapter 11 bankruptcy protection. The remote from WCMB/WIMX was deemed a success by the duo. The idea of the "save the station" remote was to get the word out that despite the stations current financial woes, the advertisers need to know that the ratings are up and they should buy time on WCMB and WIMX. Hundreds showed up at the remote and all were given goodies from the station and tours of the facility. Some even participated in strip trivia. And many fans brought money to help save the station. All money collected was turned over to Children's Hospital in Washington, D.C.

Next month Don & Mike and company will travel out west to visit KPLY in Reno, Nevada. Then it will be on to their Sacramento, CA., affiliate KHTK.

WGAY FM 99.5 (AC format) has hired former WLTT (W-Lite) announcer Josh Cohen to work weekends. Josh was the main vacation fill-in voice and weekender at W-Lite. He left the station in November 1993 when they changed to the All Rock & Roll Oldies (ARROW) format.

Correction. Last week while discussing the former WBMW, I said that former WBMW/WJFK midday voice Cerphe Colwell was programming WYSP in Philadelphia. I was wrong. WYSP has been and is still being programmed by Tim Sabean. Sorry 'bout that!

I've received a few comments from listeners of WARW, ARROW 94.7, All Rock & Roll Oldies, stating they thought the station has taken on a more AOR or Classic Rock feel lately. I don't think they have but, see what you think.

Below is a comparison from two different periods. The column on the left is from April 5, 1994. Back then someone from out of town emailed me and asked for a sampling of the ARROW format. The

column on the right is from Sunday November 20th.

April 5, 1994 November 20, 1994

Guess Who/Laughing BTO/Let It Ride
Lynard Skynard/Free Bird Queen/Another One Bites ...
Bob Seger/Fire Lake G.Harrison/What Is Life
Steely Dan/My Old School ELO/Evil Woman
Ringo Starr/It Don't Come Easy CCR/Down On The Corner
Steve Miller/Swingtown E.John/Love Lies Bleeding
Don Henley/Boys of Summer EL&P/Lucky Man
America/Lonely People T.James/Money, Money
R.Derringer/R&R Hoochie Koo Stones/Beast Of Burden
CCR/Proud Mary J.Cocker/Feelin' Alright
Gerry Rafferty/Baker Street Who/I Can See For Miles
Santana/Black Magic Woman Rod Steward/Maggie Mae
Alan Parsons/Wouldn't Wanna Be Like U Billy Joel/You May Be Right
Van Morrison/Brown Eyed Girl Boston/Longtime
3 Dog Night/Never Been To Spain Doors/Light My Fire
ZZ Top/Sharp Dressed Man Steely Dan/Do It Again
Who/I Can See For Miles Toto/Hold The Line
Heart/Magic Man Grand Funk/American Band
Chicago/Just You 'N Me Guess Who/Laughing
Cars/Just What I Needed Tom Petty/Breakdown
Billy Joel/You May Be Right J.Browne/Running On Empty
Rolling Stones/It's Only R&R Bob Seger/Hollywood Nights
James Taylor/You've Got a Friend Beatles/Come Together
Doors/Love Her Madly D.Edmunds/Hear You Knocking
Starship/Jane Foghat/Slow Ride
Animals/Gotta Get Out Of This Place Huey Lewis/Want A New Drug
REO Speedwagon/Keep On Lovin' You Doors/People Are Strange
David Essex/Rock On Procol Harum/Conquistador
Boston/Peace of Mind Steve Miller/Abracadabra
Rod Stewart/Tonight's the Night R.Derringer/R&R Hoochie Koo
EL&P/Lucky Man Supertramp/Logical Song
Supertramp/Logical Song
Beatles/Hey Jude
Bob Welch/Ebony Eyes

Not much difference to me. LAUGHING, ROCK & ROLL HOOCHIE KOO, I CAN SEE FOR MILES, YOU MAY BE RIGHT, LUCKY MAN and THE LOGICAL SONG must be in a hot re-current rotation since they all came up in each of my two hour samples.

I think the only difference is in WARW's DJ liners and bumpers. They mention "classic" more now since Classic Rock WCXR went by the wayside. They used to mention "oldies" more in the past. They still use the term oldies but, not as often.

Enjoy your Thanksgiving! I'll be out of the Metro Washington, D.C., area until November 29. At that time I'll scan the local papers to see what, if anything, may have happened up and down the

dial. If anything of interest happens, post it! I'll follow up
when I get back in town.

5217. NYC Radio Waves 11/21

Newsgroup: rec.radio.broadcasting
Date: 1994-11-21 23:20:23 UTC
From: SRogMix105@aol.com
Message-ID: <3ar9vn$i13@vixen.cso.uiuc.edu>
Source record: 36474

NYC Radio Waves 11/21/94

The latest Arbitrends are in! Here's the rundown--

12+
WLTW A/C 5.0
WCBS-FM Oldies 4.6
WQHT (Hot 97) Urban 4.5
WHTZ (Z-100) CHR 4.4
WPLJ A/C 4.3
WBLS Urban 4.0
WABC Talk 3.9
WINS News 3.9
WSKQ (Super Q) Spanish 3.9
WRKS (Kiss FM) Urban 3.8
WMXV (Mix 105) A/C 3.7
WQCD Jazz 3.5
WXRK (K-Rock) Cls Rock 3.5

Trends - CBS-FM up .3, Z-100 & WPLJ down .2, Super Q up .5, Kiss-FM down .4, WMXV up .3.

25-54 - WLTW, WCBS-FM, WPLJ & WSKQ (tied), WQCD, WXRK, WBLS & WMXV (tied), WRKS and WHTZ & WNEW-FM (tied).

AM Drive 12+ - WXRK (Stern)-7.9, WINS-7.1, WCBS-AM-4.9, WOR (Gambling)& WPLJ (Shannon)-4.6, WQHT (Dr. Dre/E. Lover)-4.4, WFAN (Imus)-4.3, WCBS-FM (Harrison)-4.2, Z-100 (Lander)-4.0, & WLTW (Buckner)-3.7.

Other notes--

K-Rock does their annual Hungerthon this weekend starting Friday Nov. 25th. The 61 hour event raised $324,000 last year and looks to top that figure. Requests go for $125--all proceeds go to the World Hunger Year, a group founded by the late Harry Chapin.

A follow-up on the Art Athens story--He tried to stay to cover the elections, but doctors and legalities wouldn't allow him to. He did make a farewell appearance with outgoing NY governor Mario Cuomo last Thursday. Cuomo invited him since they had been doing the show together since 1985. One other Athens piece of trivia--He was the first talk show host heard on WABC when they switched from music in 1982. His first guests--Dan Ingram and Ron Lundy.

NJ Governor Christie Whitman made an appearance with WABC's Bob Grant Thursday in an attempt to bury the hatchet over Grant racist remarks and her denouncement of him during the recent election campaign.

The Greaseman brings his syndicated show to Club USA for the next two weeks, while rumors swirl he could be headed out the door at K-Rock in favor of John DeBella, who just joined Infinity's WYSP in Philadelphia for PM Drive. DeBella was the long time AM Driver at WMMR in Philly who was toppled by Stern. His ex wife appeared on the Stern show and later committed suicide. Plans call for DeBella to go the syndicated route.

Don Imus' book "God's Other Son" makes the NY Times best seller's list next week. Imus, of WFAN, is doing a book signing tour, having broadcast his show last week from Washington and Boston. The book was originally released a few years ago. It's popularity these days can be traced to the I-Man statue as a syndicated personality. He appeared on the Today show today plugging the book.

Have a happy Turkey day!!

Scott Rogers

Let me just say that AM clear channels are the savior of rural communities who want a big city sound. I was living in Eastern WA when the Big One hit San Francisco. I knew that if I dialed up the Giant 68, KNBR San Fran I could get the whole picture. Right now, I'm living in Northern Oregon...rural Oregon. I am so glad and can pick up KGO, KCBS and KBOI better than even then Portland stations. Homesick for Seattle...If only KIRO were CC, so I could hear Dave Ross...The station I work for is a CBS affiliate, I even went out out my way to retune the demod to hear Dave Ross for awhile...
To hear a distant voice of sanity...that's what Clear Channels are all about. Let's keep them...

Kevin Weeks, KMCQ "Q-104" The Dalles, Oregon.

For the most part, the FCC does not "watch" anybody. With around
2,000 employees total to regulate literally millions of transmitters
(remember, they deal with much more that just broadcasting) plus the
huge, complex common carrier business, they just don't have personnel or
facilities to designate, on their own, a particular segment of one of
the regulated industries to keep tabs on. Rather, the Commission
usually gets involved when it reacts to complaints. Then, if the
complaints are warranted, the FCC will investigate. Besides, why target
college and university stations when big, powerful commercial licensees
offer plenty of opportunity to gig stations for objectionable
programming.

Ed,

Without going into advertising mode I thought I'd let the people
in the list know about the system I have been working on for the last year.

I think it fits your description of a "computer integrated radio station."

The system is called D-RADIO. It was developed by the
Australian Broadcasting Corporation in Sydney, Australia during 1994.

It is based on a fully digital mixer controlled by a "virtual console"
(no audio passes through the desk) and interfaced via TCP/IP to
Windows PCs that provide external information
services & live messaging as well as on-air schedule creation.

The console consists of 12 independently assignable channels, a telephone
interface and intercom controls as well as various hard-key accesses
to additional text-based information sources and console functions.

Two touch screens provide device configuration on-air scheduling,
telephone line information and real-time text messaging from networked PCs
in the attached production support studios or sound lock.

The system provides support for a combined mode where two consoles
are attached for a full announcer + production support type
of operation.

The system interfaces directly to ABC Digital's multi-user digital audio
storage and editing system, D-Cart, which you may have heard of.

I am involved in the development effort myself so the above information
is provided by way of technical interest for the members of the list.

The system was launched at IBC in Amsterdam earlier this year.

Of interest to radio hobbyists may be the The DX Audio Service, produced by members of the National Radio Club. The NRC is the USA's oldest club devoted to broadcast band DXing. The Audio Service delivers a 90 minute cassette each month to its subscribers.

Its monthly columns include:

AM Switch - call letter changes, applications and grants for facilities changes, other station operations notes.
Travelogue - each month a successive frequency on the AM dial is featured with an ID from every station that members have submitted a taped legal ID from.
BandScan - one member goes up the AM dial, voicing what he usually hears there at night, and plays a few seconds sample of each frequency
Musings - member call-in section, usually with radio changes of note
Historical Moments in Broadcasting - veteran DXer and broadcaster John Bowker tells a story from 30, 40 years ago on the history of AM radio broadcasting.
and best of all, Marketscope - airchecks, sometimes exotic. A few months back it was Guam, from a member who'd travelled there. in October it was Hawaii. Usually it is a comprehensive listen to a market, i.e. a sample of each AM & FM station in the market. Sometimes they fill with jingle package excerpts.
Often there are other news stories included on the cassette as space permits. Occasional features include Radio Roundup, highlighting format and programming changes as submitted by members.

It is now digitally edited on a SAW!

A sample issue is $3; A subscription is $25 for 12 issues, both via Fred Vobbe, 706 Mac Kenzie, Lima OH 45802 - checks payable to "National Radio Club."

Paul Mount, DX Audio Service subscriber since 9/87.

Jeremy, some interesting ideas.
Under current law, if the FCC buries an item in a paper release,
that counts as valid "public notice"... even if the item can't be
retrieved via the Internet.
I'm a veteran of many comparatiave proceedings at the FCC
and I've observed the utter cynicism with which women and minorities are
recruited to act as fronts for other interests.
The requirements the FCC imposes on broadcasters not only don't
apply to the FCC. They also don't apply to flight crews, drug companies,
nuclear power plants, hazardous waste dumps, importers, exporters, or
numerous other businesses which require federal permits to operate.
Should broadcasters be presumed guilty?

Perhaps it has something to do with the changing political landscape in DC ... possibly "doing something" before the request for resignations.

sigh.

Two items worth commenting upon, in the media:

1) The FCC in an outgoing spasm of PC overdose, has voted to "increase the number of stations a minority can own" to 25, as opposed to 20 for others. My opinion is that this is a stupid, idiotic and politically correct edict driven by a bunch of mentally deficient and morally short changed individuals. (Not a very strong opinion, eh?)

The stated purpose is to increase minority ownership of broadcast stations. The FCC expects that monied interests will purchase 49% of these stations in return for providing money to build the stations.

What will happen, if anything, is that more minority folk will become instant millionaires as they continue to sell the stations virtually before sign on ... and the percentage of minority owners will not change very much.

The only real possibility of achieving the FCC's stated goal would be to restore the Three Year Holding Rule. Of course the NAB and minority oriented lawyers oppose that, since it cuts into their business.

2) The NAB has expressed disappointment that the FCC will not remove the restriction of duopolies not owning more than half the stations in a market. Apparently, they think the Mexican model, where one family usually owns all the stations in a town is the best for the industry. Of course, the NAB attitude has no room at all for service to communities, etc.

All in all ... not a bad month for the monied interests.

Comments? (No flames at the FCC ... I think I've covered that <ggg>).

Regards,

Barry

Hi there.

I am new to this list so I thought I would post an introduction and my background. I've been in the radio buisness for about 20 years in the capacity of announcer, morning show talent, producr, program director and some other mundane positions. I've worked in the Miami, Dallas, New York Metro and am currently in the Detroit market. Some of the more recent positions I've held are: Production Director @ WZTA Miami, Morning show talent @ KDGE Dallas, Producer for ABC Radio Networks in Dallas and am Currently the production director @ WLLZ in Detroit. My formatic background is mostly in AOR but I've also worked in modern rock, country, talk, CHR,and some other nitch formats. I even got out of the radio business for a couple of years because of the B.S. but eventually came back because I realized I hated working for a living. Well, thats the big scoop...look forward to hearing from you!

Hello my name is Phillip Laton. I am new to this group so here is my introduction:

I am a student at Appalachian State University in North Carolina. I have interests in broadcasting.
I have a couple of questions about finding sidnicated shows...

I was wondering if the Dr. Demento radio show is available in the following areas;
Savannah, Georgia
Charlotte, North Carolina
Boone, North Carolina
Southern Pines, North Carolina
If so, what stations and frequencies is the show on?
...and if possible, what times is it on?

Thank you.
Phil Laton.

> (216) 742-1452

Dr. Hagin:

This is rather complicated, as you can imagine, but here goes: Duke Enterprises bought KJBR-FM and KBTM-AM about two years ago. Duke needed a waiver for KJBR because, as I understand it, there is an exception for FMs which overlap with a certain number of signals in a market, or control a certain percentage of the market. While waiting for the FCC to act on the waiver, Duke purchased KBOA-AM in nearby Kennett, Missouri. That delutes Duke's total control of the market. So, in essence, Duke no longer needs the waiver to keep KJBR. But, of course, we're still waiting for FCC approval of the KBOA purchase. Make sense?

In a previous article, au664@freenet.buffalo.edu (Paul Kerr) says:

(in reference to Bill's bummer of an experience while trying to call
Tom Leykis' show):

> I can understand your outrage, Bill, about being treated in that manner.
>Tom seems to look for the most controversal callers

Uh,Paul,do you have proof to back it up? If you don't,then STFU!

>came up on his preview screen probably was not "riveting" enough for his
>high standards in *sleaz-ability *

And Don & Mike are 'polly-pure',if you go by that line of logic.. :>

> He comes across to his national audience as
>an open and honest talk show host that will talk about anything, including
>anything in his past, but he continues to hide the fact that he WAS arrested
>for beating up his wife in Boston last December. Somebody sent me the
>articles from the Boston Globe and Tom, himself, wrote me and told me his
>side of the story. I urged him to tell his national audience about it
>(in his own words) so he can explain this hidden secret.

To quote the group Too Much Joy,"That's a lie." Tom most definitly HAS
talked about it on his show...and during an earlier edition of Wide Open
Telephones,no less(this was within a few weeks of his show coming on
board WWKB). Also,the L.A.Times did an interview with him just before
the show began,and it did contain a section about the incident. I'd be
more than happy to post THAT to this group...

>[Moderator's Note: To be fair, I have received email from Ron Harris
>and I feel better about the situation after discussing it with him. I
>have yet to hear anything from Tom, though. Bill]

Give it time...and don't let one bad trip completely turn you off
to the show.

TTYL..

>Tom most certainly does make reference to this incident on occasion, and in
>fact he and his wife Susan devoted one of Tom's first Westwood One programs
>to the incident.

Let me begin by saying that I enjoy listening to Tom's show and do not
wish to be disrespectful to him nor anyone that is connected with the show.
I have a feeling this discussion can start getting quite ugly and I'm already
fealing like somewhat of an "escape goat".
As you stated above, Daevid, Tom may *refer* to this incident on occasion,
but he does so in a very general way. He might admit he "spent a night in
jail" or when speaking of other talk show hosts being "convicted felons",
he would say in in a comical way that he WAS ARRESTED for *a crime*... but
NEVER CONVICTED! I have never heard him give any details of *this crime*
and at times seems to wear it as a (controversial) badge of honor.
When you say that "one of Tom's first programs with Westwood One"
was devoted to this incident seems to imply some kind of *Network*
audience heard it, when in fact, the show you speak of was done the
week *before* the show went national with the network. I spoke with
Ron Harris (who was the board-op on *that show*) and he admitted that
only the (local) L.A. audience heard this public explanation of this
incident.

>While I think it would be a good idea for Tom to repeat the
>program for the current 101-station lineup, he owes it to nobody, least of
>all a couple of 'Netters in Buffalo and Nordheim, to actually do it.

That is all I am trying to say here, that..."it would be a good idea for
Tom to repeat that program with Susan as a guest for the current stations"!
As for the comment "why should he explain this for a couple of people in
Buffalo and Nordheim?"... because WE are his PRESENT audience and deserve
to be treated the SAME as his local audience was treated.
I might as well mention at this point, that YES...I am ONLY a member
of his vast audience and DO NOT secure any high position in the
broadcast field. That may discredit me totally in the eyes of the many
"professionals" in this newsgroup, but I did major in Media-Communications

in College and have a very firm grasp on the workings of the Radio Business.
That seems to be the first thing, people want to know on the "Net"...
"WHO the hell do YOU think YOU are?...saying something like that!"
Let's just say I AM YOUR AUDIENCE (be it a very critical member of your
audience)... but, I am definatley *someone* who should be heard and listened
to by you folks... because, where would you all be with out an *audience*!

Let me say, in conclusion, that I am not doing this as any kind of
hostile jesture towards Tom or his show (I think *Tom* understands that)...
Don't worry about Tom, HE KNOWS what HE is doing by riding this
"controversial crest". He understands, like I do, that the more we talk
about such issues, the more people will tune in to hear what "all the talk"
is about!
This is the *key* to success of any "show"!

(Imagine... such pearls of wisdom from an average "Joe Listener"!) ;-)

Later,
-Paul

Me too. I regret to say I don't remember which station it was (I was still in Jr. High), but when an FM station in New York City switched to Rock-and-Roll in the late 1960s (and was, I believe, the first FM in the country to do so) there was some sort of dispute with the DJs: so for the first week or two they played music, commercials, and the only voice was somebody doing the station ID. My friends and I thought it was great. This was the last time I heard Frank Zappa's works being played to any extent on the air.

The only problem was, there was nobody to announce what the titles or performers of the the songs were, which was a bit frustrating. But then, I couldn't affort to buy records then anyway, so the record companies didn't loose anything by it anyway.

By the way: does anyone remember which station this was? It was before WABC-FM/WPLJ, and before WNEW. I think they later went easy-listening.

DJs are what it make for me when I listen to music programming. Most of the time I am tuned to newstalk programming on WNYC-AM in New York, but I seek out certain music programs not just for the music, but for the djs. These include Felix Hernandez, host of WBGO's "Rhythm Review" on Saturday mornings; WNYC's Saturday afternoon "Big Band Sounds" with Danny Styles; and Jonathan Schwartz's Sunday morning program on WQEW. I like Felix for his enthusiasm and in-depth knowledge. Styles' musical taste is sometimes questionable but he establishes a very personal connection with his listeners and plays a lot of obscure (in some cases, deservedly so) stuff. I also like the old radio clips he plays. His show really gives the sense of a bygone era. Jonathan Schwartz is such a pleasure to listen to for his velvety, cultivated voice; his love of the music and singers; and his extremely literate patter. He even makes baseball magical.

>supporting this. Ill bet if they put on a program glorifying Christians
>the Liberals would have a fit.

I stumbled across this program, quite by accident, the day it was aired, and was glad I did. It was called "Tongues Untied", and was about what it is like to be a black, gay man. *PBS did not make this program.* A black, gay man did. I do not know the source of his funding. The show was one of that year's "POV" series; "POV" was a forum for independently-produced programs like that. By the way, the most skin I remember seeing was bare chests and backs. And I did not interpret the program as glorifying "homosexual love" -- it mostly spoke of the pain of being born black and gay.

>And as for NPR.... <snip>
> How about the stories after the last election when they got on the radio
>and talked about how the Republicans were going to compromise with the
>democrats, while Limbaugh ran a speech by Mr Newt of how the President was
>going to have to toe the line.

Hm, I listen to both Rush and All Things Considered every day, and I don't remember All Things Considered talking about Republican/Democrat compromises. I remember them talking about Ds and Rs working together, and I remember them talking about *Democrats* giving a bit to Republicans.

><snip> What has made them so mad is that they no longer have the monopoly
>on broadcast ideas. Now the right has gotten its own voice, and is competing
>with the left, and so far having good effect.

I'm not sure what "them" refers to; I assume NPR. If so, I do not at all detect that they're angry. They seem to be doing the same job they always have, which I perceive as being left-leaning, but much closer to the center than Rush Limbaugh. (This refers only to the programs I listen to regularly, pretty much limited to All Things Considered and the imbedded NPR News.)

>They are stealing listeners away.

NPR's listenership has always been small. (A tip of the hat to those of you who say you're in markets with NPR stations that do well in the Arbitrons. You're in a tiny minority!) NPR and programs like "Morning Edition" and "Fresh Air" and "All Things Considered" tend to appeal to educated, upper-income fortysomethings. Decidedly a small market to target.

(Call to balance NPR's programming with conservative content deleted)

Funny, the "liberals" want the same from Rush.

Star 95.5 (WOVV) in West Palm Beach is doing a promotion in which they drop a live turkey from an airplane. According to Sunday's Miami Herald, morning host Joe Mama `came up with the idea' on his way to work one day. Like he's never seen the infamous WKRP episode.

Of course, the animal rights activists are up in arms over this...

Jeremy D. Lansman (JDL@alaska.net) wrote:

: As I recall it, the Communications Act doesn't say anyone "owns" the
: spectrum, even though Reed Hundt is selling it at auction! I believe the
: spectrum more like a public street. We can get licenses, and own
: vehicles that travel on the streets. Likewise, we own the stations, but do
: not own the spectrum.

Jeremy! One of my 2 broadcasting heroes! [My other hero is Lorenzo
Milam.] What a pleasure to see you on this newsgroup. I was a little rash
when I said the Act gives ownership to the public, but I think you'll
agree that broadcast stations are designated (or *were*) to be public
trustees and to act in the public interest.

: A true "free market conservative" would close down the FCC and eliminate the
: government radio license process. All who desire to "enter the traffic jam"
: would be allowed to do so.

It has been my observation that business owners who support the free
market suddenly want to close the door when they've gotten theirs. They
really don't like competition after all. (One example, though removed is
still germane: there is a photographers' lobby which has been trying to
get a bill introduced in the California legislature to *license*
photographers. Apparently the free market of photographers is a little
too free for some people's tastes.)

: Maybe, instead of a fairness doctrine for broadcasters, the FCC should be
: required to see that holders of licenses represent diversity. Kind of a
: "fairness doctrine" for the FCC. Personally, I want don't want government to
: ask me to fix what they broke.

Hmmm...I remember this happening in the Bay Area in the 1970s when KCBS-FM
wanted to change channels. They made a 3-way swap deal, essentially
giving an African American banker, Lloyd Edwards (of the Bank of Oakland)
the old KMPX for about $200,000. He kept it the minimum statute time, 3
years, and then sold it to Viacom for $3,000,000. This was an attempt at
diversity in which the FCC had been giving preference to minority people.

With that as an example I wonder if it is the norm or the exception.
Does giving preference to any particular group produce the kinds of
results we want to achieve? Is there a better way?

Yes, it is true. And it works, even at long distances. For instance, I have heard KNX in Los Angeles (600 km) and clearly heard their news teletype effect and their commercials in stereo. Unfortunately, there're not a whole lot of stations playing music in stereo, and not a whole lot of receivers either.

We certainly do. Unfortunately, the general public is not very aware
of it. About 11% of US AM stations broadcast in stereo (according to
info I recently read, sorry, I can't recall the source of that info
but could look up the title if needed). There are approx. 20 million
AM stereo receivers in the country. The majority of them were installed
as factory equipment in US cars. Again, many people may have one and
not even know about it if they only listen to FM or to mono AM xmtrs.

Yes, and if I understand your second question, no.

Depending on the terrain, it can sound better than FM stereo, IMHO.

The problem is that the receivers are scarce but car manufactures are using them more and more. And there never has been a standard as to transmitter type and is(was) left up to the marketplace to decide and the marketplace is still making up it's mind, I guess.

There are three or four AM stereo stations in Seattle and sound great.

Yes, I remember the show. I'm a publicist who booked several guests on it, including Elaina Zuker, author of THE SEVEN SECRETS OF INFLUENCE. I also remember meeting Al Parinello in the very early days of the show, when he was a guest on the Fox mid-morning show which at that time was hosted by Bill Boggs and produced by Gwen Barrett. Bill Boggs is doing media training now (as is Al, isn't he?) and Gwen, recently the producer of the Charlie Rose Show, seem to have lost her job. Does anyone know what's going on with the staffing at the Charlie Rose Show? Why did they move? and what happened to Gwen? Any plans for reviving Your Own Success or producing a different show?

Yes, we do have AM stereo here in the USA. We use the Motorola CQUAM
system. The transmitter has a quaditure modulator synced to the AM
frequency carrier. In phase is the old fashioned mono signal (L+R).
The difference (L-R) signal is quad modulated on the carrier at 90
degrees phase shift.

Only thing: the American public isn't aware that AM stereo exists.
I may be the only listener in all of Portland, OR with an AM stereo
reciever :-).

Listening to distant AM stations in stereo can yield some strange effects
when there's co-channel interference. Sound sources seem to move around.
Sometimes, a station can interfere with itself, ie, groundwave plus
skywave arriving at slightly differing times. All you need is about
250 nanoseconds of delay between the two, and, assuming your station
is on 1000KHz, your delayed signal mono phase adds to the difference
signal of the other signal (250 nSec is 90 degree phase shift at 1000KHz).
Some say that the Khan system might have been a better choice (lower
sideband = L, upper sideband =R). But the FCC really blew
it by deciding to allow 5 standards to exist.

I'm listening to a local AM stereo station (KBBT) right now, and it
sounds pretty decent for AM (5KHz bandwidth, and their sound might need
some clean-up, but many stations could use that).

There's no truth to the rumor that the newly discovered atomic element
#110 is to be named "Pentium". (Many atomic elements' names end in "ium") :-)

Thanks Bill!

snip here:

>North San Diego Report; Friday, Nov. 18, 1994

The Freddy Jones Band, and Widespread Panic did a backdoor concert at KKOS (95.5, 3.8kw) Carlsbad on Thursday. The 40-minute set started in the rain, but didn't dampen the spirits of the crowd. KKOS' Ron Lane emceed the event, and the concert was broadcast live. This is the second time in two weeks that KKOS has had a backdoor concert. Last week, Richie Havens entertained a small gathering at the station with the concert on the radio.

KFMB-FM Program Director, Tom Gjerdrum was suspended without pay for faxing bogus contest entries to cross-town rival KKLQ-FM. Gjerdrum tied of the fax of Q-106 for hours, preventing listners with real entries from entering. [Gjerdrum was probably caught with the header most fax machines send -- KFMB's fax sends the calls and phone number.] Also in the rumor mill for KFMB-FM: The Star format hasn't been up to the expected numbers, and a "country" mix might be in the works. The Star format is 70s, 80s, and 90s soft rock.

It's been a long time since I have reported on the power-house Noble broadcasting giant, XETRA-AM. The Tijuana-based station now claims to be the most listen to sports station in the Americas. The latest books for the Tijuana/San Diego, Los Angeles, Orange County, and San Bernardino books can prove this. It was reported in the Escondido Times-Advocate and Oceanside Blade-Citizen that WFAN, New York, average is 2.6; and XETRA-AM is 3.2. Plus the combined listenership of four books puts them as number one. XETRA-AM (690, 50kw-U, DA N) is still in the market for another southland station. One possibility is for Noble to go south of the border and buy XEPRS, another 50kw screamer from Rosarita at 1090 AM. The station has studios south of the border, and in Los Angeles. This would help the sports giant in the full plate of broadcasting two major college schools, NBA, SD Chargers, and a try for baseball.

Highway Advisory Radio: California Highway 78, linking I-15 to I-5 from Escondido to Oceanside's radio station(s) is nearing its first anniversary. WNRS operates at 530 AM, with 1.5watt. There are three "stations" along the corridor. [I live about two miles off the freeway, and can get it clearly] The station, which is on 24-hours, broadcast traffic and weather information.

In other LA basin news, here's a short run-down:

Tuna's back! Charlie Tuna, formally at 710 KMPC, was reeled in to KIKF (94.3 FM) Orange, California, from 6 - 10 a.m. The popular fixture in LA radio was not picked up when CapCities/ ABC bought KMPC from Gene Autry. [I have listened to him for years via KOMA, Oklahoma City; Armed Forces Radio; KCBS-FM; and KMPC.] KIKF is a country-music format station in Orange County.

400 fans attended last weekend's convention of SPERDVAC, a group of early-radio enthusiasts. Fans packed the room to see Bill Ballance. His show debuted on KGRB, 900 AM, and is also on Catalina Island's KRCI, Avalon. [The Orange County Register did not break down what SPERDVAC means]

Rabbit Ears Radio, on Sunday, will feature Mel Gibson reading "David & Goliath." Branford Marsalis furnishes the music. The production can be heard on KUSC (91.5, 100kw) Los Angeles. On Wednesday, Rabbit Ears will feature Graham Greene reading "Squanto & the First Thanksgiving," with music by Paul McCandless. The show broadcast at 7:30 p.m. both nights.

The new, and improved North San Diego Radio log has been updated, and includes formats for the majority of espanol stations. [I am still working on power/direction on some of the AM and FMers from south of the border.] For a copy, e-mail me!

Date: 1994-11-23 04:10:53 UTC
From: Blake Lawrence <blake@well.sf.ca.us>
Message-ID: <3aufcd$9uj@vixen.cso.uiuc.edu>
Source record: 36352

KDIA-1310 is being sold to Jim Gabbert, owner of KOFY-1050 (Spanish) and KOFY-TV20. Rumors are flying even though Gabbert has been quoted as saying he wants to return KDIA (now playing R&B oldies) to its greater "Boss of the Bay" days. Remember, this is the guy who promised to keep 98.9 a progressive signal when he bought KKCY and changed the calls to KOFY-FM...weeks later, PD Thom O'Hair was out and the format was changed to lame AC. (Gabbert later sold this station to Viacom, and it's been through four sets of call letters this decade.)

When local newspapers haven't been on strike lately (!), they've been printing stories about a Sonoma County man stalking Gabbert. KDIA was getting press before the election, too, about how part-owner and Oakland Mayor Elihu Harris was possibly spending too much time at KDIA versus his hours at City Hall.

Another rumor has Gabbert buying KPAY-1060 Chico, CA so he can turn it off and thus relax the tight directional nighttime signal of KOFY-1050. KPAY recently burned to the ground leaving only its towers standing, and now broadcasts with 2500w non-directional from temporary studios. Talk about a fire sale.

KYCY-93.3 ("Young Country") programmer Lee Douglas has left the building.

Where are they now? Former KRQR and KDBK personality Mimi Chen has landed at progressive KSCA/Los Angeles.

Anyone know the wherabouts of former KFOG and KDBK jock M. Dung?

FCC UPDATE

November 22, 1994

An update on news from the
Federal Communications Commission

---
written by:

Shaun A. Maher, Esq.
Smithwick & Belendiuk, P.C.
1990 M Street, N.W.
Suite 510
Washington, D.C. 20036
avb@cais.com INTERNET E-MAIL
(202) 785-2800 VOICE
(202) 785-2804 FAX
(202) 887-5718 FCC WORLD BBS

COMMISSION ISSUES POLITICAL/
ABORTION RULING

The FCC has issued its decision concerning
how broadcasters are to handle political ads
with graphic abortion images. In 1992, the
FCC was confronted with the question of how were
broadcasters to deal with political candidates
that wanted to air political advertising that
contained such images. The Communications
Act prohibited censoring Federal candidates'
ads. Some broadcasters were concerned that
such ads which contained images of aborted
fetuses would be deemed indecent and set
the licensee up for a forfeiture. The FCC
has ruled that licensees cannot ban the
ads altogether but may insist that they be
aired at times when children are not in the
audience.

The full text of the Commission's
News Release follows.

Report No. DC-2684 ACTION IN DOCKET CASE November 22, 1994

FCC PERMITS CHANNELLING OF POLITICAL ADVERTISEMENTS
CONTAINING GRAPHIC ABORTION IMAGERY
(MM DOCKET NO. 92-254)

The Commission has ruled that stations may reschedule or "channel" political advertisements containing graphic abortion imagery to time periods when children are less likely to be in the audience. The Commission believes that Section 312(a)(7) of the Communications Act, which requires licensees to provide reasonable access to federal candidates, does not necessarily preclude such action; nor does such an approach violate the "no-censorship" provision of Section 315(a) of the Communications Act.

The Commission cautioned, however, that a licensee may not channel political advertisements containing graphic abortion imagery simply out of disagreement with the candidate's political position. The licensee's decision to channel must be made in good faith and relate to the nature of the graphic imagery in question and not to any political position the candidate espouses. The Commission believes that this policy fully complies with the "rule of reason" embodied in Section 312(a)(7) of the Communications Act and properly balances relevant public interest considerations, including the First Amendment values inherent in the Act. The Commission said that licensees who choose to channel political advertisements containing graphic abortion imagery they believe is harmful to children must air those advertisements in time periods that are otherwise consistent with the candidate's right to reasonable access.

Action by the Commission September 28, 1994, by Memorandum Opinion and Order (FCC 94-249). Chairman Hundt, Commissioners Quello, Barrett, Ness, and Chong.

WCMF (96.5), the heritage AOR in my hometown of Rochester NY, has done Alice's Restaurant for years at 5pm on Thanksgiving Day.

What I want to know is, do any of the local stations (such as there are) in the Stockbridge area play it? WSBS in Great Barrington is probably the closest commercial station, but they'd better play it early -- they go to flea-power at sunset, which is 4:30-ish in these parts now.

5250. Re: FCC to Allow Unattended Stations

Newsgroup: rec.radio.broadcasting

In article <3abck5$t1a@vixen.cso.uiuc.edu>, UltimaJock@aol.com says:

>Welcome, ladies and gentlemen, to the Age of the Neutron Programming Bomb,
>which will wipe out all living bodies in local broadcasting in an effort to
>leave money piles standing. It deserves to flop as badly as Quad FM, but
>don't bet on it.

It's not so much a question, really, of eliminating living bodies as
is a case of trying to survive.

My station can run unattended for days at a time... with Lantastic
running, as it is at this moment, I can access the machine with no
problems, and completely control the system...

With my remote control at the transmitter, almost all the transmitter
functions can be handled remotely, too. The remote will call me if a
parameter goes outside its limits.

Where's the necessity for me to spend $$$$ on personnel?

[Moderator's Note: Warms the heart, doesn't it? Bill]

From: dhughes@prairienet.org
Message-ID: <3aufco$9ve@vixen.cso.uiuc.edu>
Source record: 36357

In a previous article, plh1@Ra.MsState.Edu ("Philip L. Hinkle") says:

>
>Omni:-0
> Could someone please send some information to me concerning Fcc
>regulations for college radio stations. Week after week, I'm told by our
>GM not to make comments about writers in our school paper. Also, he
>seems to have problems with any type of humor that might be the slightest
>bit provocative. Example: one fine morning I played a tune by U2. Here
>is how I promo'd the song: "Coming up next, for you guys who have to deal
>with your Bono in the morning, U2." Yes, it leaves little for the
>imagination; however, commercial radio is far more explicit, and, often,
>much less witty. Secondly, is there any type of newsgroup or trade
>magazine that lists entry level (I believe that's where I'm forced to
>look) jobs for media personnel?

1. The license of most college stations is held by the board of
trustees. Technically, THEY are ultimately responsible for whatever goes
on the air. And usually such boards are VERY conservative. We once got
a complaint from a trustee because in a program on carpentry we
mentioned Elmer's glue (instead of the generic--and confusing--"white"
glue). These people control the funding of the station, and you have to
play it safe and assume they may be listening at any moment. Often word
gets back to them even when they don't listen.

2. A college station in New York state was fined something like $27,500
last year for airing a song with the "f" word in it. Could you pay that?

3. Borderline humor from a mature adult is funny to everybody; the same
humor from a teen is not appreciated by most adults. Unfair but true.

4. As for jobs, we have more in this area (central Illinois) than we can
fill. Best way to get on at a small-market station is to call the
program director and make an appointment; ask him to critique your tape
and resume. Most PD's are happy to do this, and there's no pressure
because you're not really applying for a job. If he seems to like you,
let him know you would really like a part-time slot. The main thing is
that you make yourself known to him as a person, not just a tape and
resume. Hopefully he'll think of you when an opening occurs. Keep
sending him tapes if you're improving. (Forgive me for the constant use
of the masculine in this section, but I've never run into a female PD).

From: ad225@detroit.freenet.org
Message-ID: <3aufcv$9vt@vixen.cso.uiuc.edu>
Source record: 36359

CKLW-FM (Windsor) which had been playing rock and roll oldies since last February has given up the ghost, changing its format to "The River" and its call letters to CIVR. The River is described as a mix of rock, reggae and blues dating from the '60s to the present.

It is widely perceived that CK was knocked out of the box by the new STAR 97-FM, the CBS owned and operated FM station that recently switched from easy listening to the Greatest Hits of the 70s.

Also, WMTG-AM, which stood for Motown Gold, is trying a new format, dropping classic soul for children's programming. They are affiliating with the Radio Aahs kids network.

WHHS, a high school radio station, is actually going to undertake a remote broadcast from another hgih school on Thanksgiving Day.

At one time, we had non-equalized lines to every high school in the area (even the local ice rink for ice hockey games...and the Philadelphia Spectrum...only about 15 miles away...wasn't around then, have no clue what it was used for).

But when I decided I wanted to do a remote, I discovered that the price of doing so is tremendous. We do a remote via non-equalized line from our home football field (about 1/6 mile from the studios) and that line is up all year.

To my surprise, it cost $1000 a year for that line.

Before knowing that, I aksed the Tel. Co. how much for only one day for a 3-5 mile distance...$700!

So we decided to go with a dialup...

Unfortunately, the remote site (a school) has NO direct lines form Bell. So we can't use theirs...and have to have one installed...since the school has no lines, their is no Bell equipment in the area...so Bell has to bring it from the street...a distance of about 1/6 mile. Charging $42 to come out, $16 for every 15 min of labor, $75 activation fee, $30 for ONE CALL TO THE STATION.

Probably gonna be about $325...for a REGULAR PHONE LINE!

We are borrowing equipment from a Philadlephia commercial station to use a dial-up...so we save $200 right there.

Bell is a rip off...I could buy a spool of wire and run it down the street in 30 minutes (yes the school is down the street from ours...but about 5 miles). It would be a lot of wire...but cheaper I imagine.

Has your station been in a similar situation...what do you do for remotes?

-Dave Brouda (General Manager/Program Director, WHHS-FM, Haverford High School, Non-Comercial Radio Since 1949)

P.S. Cellular, and Micro-Wave are out of the question :)

5256. computerized radio

Newsgroup: rec.radio.broadcasting

Greetings!
Could I toss out a topic for discussion, which I am sure has previously been debated, but I'm new to the group, and with continuing advances, surely this is a hot item.
I'm suffering from SEVERE information overload....the manager has asked me to research, and reccomend, digital computerized type systems for the future of our radio station(s). I have been reading and re-reading all the literature I can get my hands on, and the more I go over it all, the more baffling it seems...kind of like trying to buy a car from the sales brochures, and it certainly seems like some of this stuff was written by the same people who do those "cute" real estate ads, you know the ones...handyman's delight; cozy fixer-upper....
The point is, I would be most appreciative to hear of your experiences, and thoughts on what's out there in the market. What are the bouquets and the bricks? On Nov 15, Kevin Lockhart of KYZX-FM lamented production without a digital workstation....my basic thoughts exactly....I've told the boss if he doesn't get something capable of multi-track editing, he's crazy (well not in those exact words). So for the benefit of those of us still contemplating the ultimate plunge, what are your regrets and suggestions? And for the benefit of all, I suggest a general posting rather than personal mailing.
Regards from CHSJ Country 700.
Ian Cameron, programmer and upside-down flier extraordinaire!

Somebody's fibbing here. Tom Leykis himself posted a message on this
newsgroup saying that he has never been arrested for any altercation with
his wife. He said someone had posted something to that effect by forging
his name. Now, if he comes on here to say this, my suspicion is either
that you're maliciously spreading a lie, claiming something you never
heard on his show, or you're getting this 3rd-party from someone else who
may be out to slander him. As to whether the denial is a forgery, I
can't think of any reason why anyone would want to forge a denial of such
a scandalous statement; so I believe the denial post was really his.

I believe the station to which you refer was WOR-FM 98.7 (then WXLO, now WRKS), which went rock in 1966 or 67. Murry the K (ex WINS) was one of the early announcers. Back when the big money AM's were funding the little experimental losers (that was when FM meant "forget money"), the programming was fun listening. Anybody remember "Radio Free New York" with Bob Lewis on WABC-FM (aka Bob-A-Loo on 77 WABC), the "other" Dan Ingram, and Zacherle on WNEW-FM? Also great fun was hearing, for the first time, full fidelity simulcasts of many AM sister stations during off-hours. News was on FM in New York long before NBC started the NIS. It was simulcast on WCBS-FM 101.1...

5261. Radio's use of outside media (San Francisco)

Newsgroup: rec.radio.broadcasting
Date: 1994-11-23 04:11:22 UTC
From: Blake Lawrence <blake@well.sf.ca.us>
Message-ID: <3aufda$a0n@vixen.cso.uiuc.edu>
Source record: 36366

Here's what some Bay Area stations are doing for the fall book using outside media.

KPIX (95.7/1550, News, "Jazz" nights and weekends): Lots of cross-promotion with KPIX-TV, touting the advantages of a unified TV/radio news team. Slogans include the poor grammar of "You have questions, KPIX-5 and 95.7 KPIX *has* answers."

KABL-FM (98.1, 70's oldies): Buses and billboard with cute plays on words like "We're doing Doobies...Big 98.1FM"...and "The only Byrds we play are Eagles" etc.

KSOL (98.9, Urban AC): Slick bus cards that simply say "The Soul of the City." Possibly the simplest and most attractive of any station using transit.

KIOI (101.3, Hot AC): Tacky looking bus cards that say "Remember: Bay Area's Best Music Variety...K-101."

KDFC (102.1, Classical): The first outdoor promotion in a LONG time. Simple purple bus backs that say "KDFC, Classical 102.1."

KKSF (103.7, NAC): Busbacks: "103.7 KKSF...Smooth Jazz."

KITS (105.3, New Rock): Slogan: "Live 105...the Modern Rock Revolution" on top of pictures or logos of bands like U2, Cracker, Nine Inch Nails, etc. Sometimes on bus cards, other times they've painted the entire backs of buses!

KMEL (106.1, CHuRban): "Unity through music...106 KMEL." Pictured are several seemingly naked multi-racial types in unnatural rainbow hues. Santa Clara County's transit system found these too racy to post on their buses, and passed on KMEL's cash.

KCBS (740, News): Buscards: "Reality Bytes...KCBS All News 74."

How about some outdoor campaigns from other markets?

I chuckle and sigh when I see lists of songs that are "no good." For most of the songs that invariably find their way onto these lists, there are a million purchasers who disagree. What, everybody was stupid in the old days and some youngster who has seen the light comes along to put the old fogies in their place? Or some older fogie wants to put down the younger fogies?

Let's face it--musical taste is genetic, and you may make someone angry when you knock their music, but you ain't gonna change nobody's mind. So unless your sole purpose is to ruffle some feathers and look like a fool in the process, let those who enjoy _____ (fill in blank: country, disco, female vocals, dead-teenager songs, novelty, etc) continue to enjoy. Listen to what you like, but let me listen to what I like too.
--

[Moderator's Note: I don't remember anyone insulting musical taste or telling you that you should not listen to any particluar song. I remember some readers expressing their opinions (as you just did) and that is not the same thing as telling you hat to listen to. Bill]

Hi Dan,

At ABC in Dallas I handled the network production...Demos of the formats, Production of the new projcts (Tom Joyner show, Disney Radio demos, etc.) and worked closely with the engineering folks with new equipment and training.

When I first came on-board at ABC the place was pretty dismal. All the prod. was done on a Tascam 1/4 inch 8-track. It has since ben replaced with the Pacific Recorders Dawn 8-track digital system, McCurdy delivery system and a whole bunch of new toy's. Matt Wolfe is the Producer at Z-Rock and is a realy nice guy and a great producer. What is realy amazing is that until a couple of years ago, all his prod. was done on that 1/4 inch eight track. Wow! Proof positive that "it aint th meat it's the motion", nice toys are cool...but you can't beat creativity.

There used to be about 4 or five producers at the net but I believe it was cut back to 2 or 3, with the slack taken up by the jocks on the 24 hour formats. (sound famaliar?)

Hi John,

I saw this post, and thought I'd drop you a line with my congratulations...
I was the competing applicant for the WLLZ job! I'm Production Director
at AOR-formatted CHTZ-FM in Niagara, Canada, with a signal that covers
both Toronto and Buffalo.

I see from your credentials that you worked at the ABC group in Dallas.
I'm a big fan of the production on Z-Rock and some of the other ABC stations
I've heard. If this is the area you worked in, I'd be fascinated to hear
what kind of set-up they have there, how many producers are on staff, etc.

Please say hi to Ed Kelly for me, and ask him to drop me some E-Mail if he
has access to the system you're using at WLLZ.

See you on the nets.

Dan Stark

[sorry - lost original reference]

>> Now that NPR and PBS funding is largely going to be controlled by the
>> likes of Jesse Helms, Newt Gingrich, and vicariously, by Rush Limbaugh,
>> what is going to happen to All Things Considered, Fresh Air, Morning
>> Edition, McNeil/Lehrer Newshour, and even Sesame Street (which has
>> received received considerable criticism from rabid neoconservatives
>> for being on public TV) and Barney (which has been called
>> anti-Christian)?

This taxpayer would like to see the whole thing de-funded and make
those programs have to _compete_ for advertising dollars, rather than
having Congress pick my pocket to produce programming I have no use for.

>> Are these all going to be replaced with reruns of the
>> now politically-correct Rush Limbaugh?

I still don't want my tax dollars paying for it, even if it's closer to
something I might listen to. Why is the government in the radio business?

>> And what about classical music in most areas? Is the funding for this
>> going to stop completely?

If you like it, support your local NPR station.

Nothing sickens me more than NPR and PBS begging for money on their
"annual" fund drives (which seem to happen every couple of months!)
when they and I know full well that they are funded via the federal
government with dollars taken from me under threat of force. What
a racket... And in the case of Sesame Street and Barney, they get
revenue from the toys and the books and the T-shirts and the videos
ad nauseum...

Quite recently I've become a talk radio aficionado. Unfortunately, the majority of talk stations in Miami are - you guessed it - 100% Spanish speaking. I know there's a number of great AM talk stations in Ft. Lauderdale and beyond, but it's quite seldom that I pick them up. Is there any way to help my radio receive these distant AM broadcasts? A magic black box availible at a local RadioShack, maybe? :-)

Also, bits and pieces of information about satellite radio have flown my way lately. Exactly how can one access such radio programming? Can it be done with a regular C-band dish, or does it require special equipment?

Thanks!
-Joe

5272. On the road to Scranton/Wilkes-Barre PA

Newsgroup: rec.radio.broadcasting
Date: 1994-11-23 04:11:48 UTC
From: fybush@world.std.com
Message-ID: <3aufe4$a23@vixen.cso.uiuc.edu>
Source record: 36377

Just a quick summary of a very busy weekend trip:

After the ride down I-84 (much of it spent airchecking the Danbury CT and Poughkeepsie-Kingston markets), my first stop Friday afternoon was at WARM-AM/WMGS-FM/WBHT-FM in the "WARM Building", just off I-81 at exit 49B (thanks Paul Richards for the directions!). A stack of WARM stickers and magnets was by the entrance...and the receptionist finally turned up a WBHT "Hot 97" keychain. Back out onto PA 315, and a few miles down the road is WILK-AM (simulcast on WGBI-AM 910)/WKRZ-FM/WGGY-FM. Plenty of 'KRZ stickers and a few "Froggy 101" stix at the desk. Just across I-81 is the tower of what's now WWSH-FM "Wish 102". The station's former studios are across PA 315; that building is now abandoned. Last stop on Friday was an unexpected one at WVIA-FM/TV; we just *had* to turn when I saw the sign pointing to the left off 315. Upon arrival at the Woodlands Inn in Wilkes-Barre, I started tapes rolling on PM drive: WBHT, WKRZ, WARM, WEZX, etc.

Saturday afternoon brought another break from the wedding which was my main reason for making the trip, so we headed up into the mountains above Wilkes-Barre, to find the "Electronic Heights" site in Mountain Top, PA, off PA 309 at PA 437. Couldn't get all the way up the dirt road, but I got some nice video of the towers from a few hundred feet below. This site includes WBRE-28, WYOU-22, WVIA-44, WCLH-90.7, WVIA-89.9, WMGS-92.9, and WBHT-97.1. I think WKRZ was nearby, but I couldn't find it. Back down 309 to 81, and on to Montage Mountain Road, the nifty WNEP-16 studios, complete with helipad out front, and the sales office for "Cool 94.3" WSGD just down the road. Then it was off to Duryea PA, and WARD-1550's studios and transmitter. The studios were locked up tight... the station must have been running automated. Final stop of Saturday was on US 11 in Edwardsville, across the river from Wilkes-Barre. WBAX-1240's single stick is there, but the studio building is vacant and for sale. WBAX and sister FM WYOS-92.1 Nanticoke have been sold to Shamrock, and they're operating from WEJL/WEZX's studios in Scranton. WBAX simulcasts WEJL, and WYOS is now WTZR "Z Rock."

Sunday afternoon we wrapped things up, starting in downtown Wilkes-Barre with the WRKC transmitter at King's College and the WBRE-28 studios on S. Franklin (an old building!). Then it was up the hill to Mountain Road, Plymouth, where WDLS-93.7's studios and transmitter are in a small building at the top of the hill. The tower also carries WTZR.

Back down the mountain and onto US 11 south, where a lengthy and bumpy drive around the gravel roads down by the river produced some fleeting sightings of the WILK-980 sticks (3 in a row) but no definite path to get there. We did find WNAK-730 Nanticoke...one stick where US 11 meets PA 29. PA 29 took us back to 81 North, and thence into Scranton, where WEJL/WEZX are hard to miss. They're in the same building as their original owner, the Scranton Times, and the WEJL tower is still up top, along with a "WEJL" sign and a much bigger "Times" sign. WYOU-22 is around the corner in what looks like it used to be a department store. Very odd.

Headed out of town on US 6, I turned off on Keyser Ave. to get a shot up the mountain to the Scranton farm, and promptly saw a 3-tower AM array -- 2 self-supporters and a "flagpole" in the middle. It is apparently the now-dark 1320, and may be gone soon -- a bulldozer was at work when I was there. Further up Keyser, we spent half an hour very lost looking for the road up to the Scranton farm. We never really found it, but a drive up Mountain Rd. took us past the WICK/WWDL studios and up to a dead end with a good view to the mountain. WOLF-38, WUSR-99.5, WWDL-104.9, WKQV-95.7, and WEZX-106.9 are all up there. WOLF's studios are back down Keyser...you can see them from US-6.

It was here also that I realized one tape deck had jammed a few hours earlier -- so my tapes of WVMW-91.5, WEMR-1460, WYMK-107.7, and WQEQ-103.1 were all lost :-(Anybody driving through Scranton want to help me with these? I just need a few minutes of each, preferably with the legal included...

On to the market list, then...

550 WJMW Bloomsburg country
590 WARM Scranton news, talk, AC
630 WEJL Scranton standards (AM Only, I think), // WBAX
730 WNAK Nanticoke standards
750 WMXH Olyphant variety -- a wide-ranging "Mix."
910 WGBI Scranton news, talk, // WILK
930 WCNR Bloomsburg country
980 WILK W-B news, talk, // WGBI

Dave,
Your brother is only half right. We have Stereo AM transmitters, but not many receivers, and that stinks. Do they have them in England? I'd fly 8000 miles just to buy a decent AM stereo receiver. Most of them here in the states are novelties that are included in some General Motors cars. However, most of the people driving those cars could care less about AM stereo than they would about giant, herpetic snails attacking their homes with KrazyGlue.. Stations that have AM stereo now will continue to do so, because the equipment is already there, but the lack of excitement from receiver manufacturers has scared off a lot of stations that might have in the future. AM can sound DAMN GOOD on a wideband AM Stereo unit, but it's a pity that home reciever manufacturers would rather give you a second CD input instead...

Warmest American Regards,

================================================================================
FAQ: Where can I find a free database of US radio stations?
Where can I get information on radio station facilities?
================================================================================

The information on radio stations in the US changes constantly.
New call signs and owners, along with changes in facilities are
constantly being updated in the FCC files. Consulting engineers and
communications attorneys need accurate, up-to-date information,
information more accurate than the FCC's database itself.

Often the question is raised as to where on the Internet one can
find such a database of US radio stations. Usually the one
asking means "free".

Since the maintenance of such a database requires *daily* attention
to the information pouring out of the FCC, it is easy to understand that
it is a labor (and therefore money) intensive endeavor. Several companies
do exist to supply such data. Some distribute it by mail, others by
on-line computer. Such access has costs, and the data compilation is
copyrighted.

Is there a source for data on stations? Yes, several.

================================================================================

1. M Street Directory. One of the best annuals, this book contains
station listings for the US and Canada, format information,
and several ratings reports. Current cost is $32.95 & $3 S&H
It can be ordered by phone at 800-248-4242.

2. NRC AM Radio Log. Put out by the National Radio Club, a
DXer organization, the AM Radio Log lists all the AM
stations in the US and Canada. It costs $ 19.95 & $ S&H.

The NRC also produces a book of directional patterns for
the AM stations in the country. This book is available for
$ XX & $ XX S&H.

The main publication of the NRC is the DX News, a magazine
listing changes in AM stations, and information about how to
enjoy the hobby of DX listening. A one year subscription is
$24; a sample issue is available for $1.00. There is also a
monthly cassette version; a one year subscription is $25,
a sample issue is available for $3.00.
```

A catalogue of products is $1.00.

Contact the NRC at:
National Radio Club
PO Box 164
Mannsville NY 13661-0164 USA.

3. The Broadcasting Yearbook. Put out by Broadcasting Magazine.
This heavy book lists all the radio and TV stations in the
US, Canada and Mexico, listing personnel as well as other
station data. Allied and Trade orgranizations are included.
This publication is expensive, well over $100, but can
often be found at public library and university library
reference desks.

4. On-line services such as Communications Data Services or Dataworld
provide current information on stations, emphasizing the
the technical facilities and current applications. Cost is
by record request, and can be set up for remote interrogation
or reports mailed to clients. CDS is at 800-441-0034. CDS
provides free access to registered Ham Operators for part
of their database. email to rich@comm-data.com.

5. PRS, licensors of the ID LOGIC radio system (similar to RDBS),
have taken the M Street Directory information on stations and
their formats and created a shareware simulator of a car
radio. The current version id_na4a2.zip is available via
ftp from ftp.hk.net and should be available via Fido shortly.
The shareware fee is $45.00, good for one year of updates.

6. Some CD-ROMs, such as the Ham Call Directory, by Buckmaster
are also reported as having lists of the AM stations in the
country.

>have heard KNX in Los Angeles (600 km) and clearly heard their news
>teletype effect and their commercials in stereo. Unfortunately, there're
>not a whole lot of stations playing music in stereo, and not a whole lot
>of receivers either.
>
>--
>dk@crl.com The people who want free trade want it only
>San Francisco for themselves, not for their competitors.
>

Also from Los Angeles are KFI and KRLA. The latter sounds decent in stereo
even with a strong first adjacent signal, signal conditions permitting.
Without the multipath of FM, a strong AM stereo signal on a good radio is
not a bad listen in a car. AM car radio fidelity has improved somewhat in
recent years. A well processed station can approach High Fidelity.
Now if only some broadcasters would reduce the distortion...
Incidentally, the KNX teletype is a nice touch - reminds me of the old
WCBS Newsradio 88.

It's true what others have said here --- there ARE some stations that broadcast in AM stereo. It sounds GREAT! Sony used to make an AM stero walkman --- but it has since been discontinued. Most of the receivers ARE in cars.

It just so happens I work for the first station to bradcast in AM stereo after the FCC approved it. That would only stand to reason ... since my station is also the world's first commercial broadcast station.

I some information from a very qualified source that on the day before the switchover from WNIS to WKQX, that for the many hours before the change... all Chicagoans were treated to the following.....

"WNIS is WKQX"

That would drive anyone to drink! The qualified source was one of the engineers who were retrofitting WNIS to the music intensive WKQX.

Imagine, "WNIS is WKQX"...over and over and over again ! Hey, what the hell.. The new WXXW (not affilliated to the late WXXW/Channel 20 in Chicago) played "Old Time Rock and Rock" by Bob Seger for an entire weekend before they played another song other than "Old Time Rock and Roll". Man, what a kludge.

Archive-name: greaseman-faq

The Greaseman is a radio personality on the Infinity Broadcasting network. He broadcasts from Los Angeles to New York City, Washington, Atlanta, Philadelphia, and San Jose. He is known for his bits and song parodies. He also has his own vocabulary which he uses to avoid trouble with the FCC. Before, he broadcast out of DC on DC/101 where he competed and beat Howard Stern on a consistant basis. The Greaseman is on by himself most of the time, though sometimes you hear his producer, Bill Scanlan cackling in the background.

Q: What is the Greaseman's real name?

A: Doug Tracht. He prefers to keep his radio life and his personal life separate. His radio name is Nino Greasemaneli.

Q: Why does Howard Stern hate the Greaseman so much?

A: Howard worked for DC/101 until he got fired. When the Greaseman was hired to take Howie's place he not only held on to Howie's audience but increased it. Then when Howard syndicated in DC he competed with the Grease until the Grease moved to Infinity where they now are co-workers for the Broadcasting Giant. Now, mentions of the Greaseman on the Howard Stern show appears to be just an act in part of Stern.

Q: Which one was the Grease in the Village People?

A: He was not really in the Village People. But in the bit, he was the construction worker.

Q: What is this Bingo that the Grease dislikes so much?

A: The Greaseman's college nick name... Ask him about it.

Q: How can I get in touch with him?

A: Call him between 1730 and 2200 EST at 1-800-544-9294 and 1-213-850-0986 (FAX) and BTW do not address him as "dude".

Q: What bits does the Greaseman do?

A: Fudgeman- Fudgeman and his chicken assistant throbin
save the world from deviant behavior
Back in time with an uzi-
the Grease uses the equipment in the radio
studio to return to key moments in history

with his uzi
Carlos the International Terrorist-
Episodes of running into the famed and heavily
armed terrorist, Carlos
Medical Man- Stories about when Nino was the pompous
Dr. Greasemaneli
Bet the Bomb Bays-

Watch out Alex Trebek, here comes the Greaseman
Hobo-doo-ga-ga Handbook-

Methods to which recieve ingus.
Damien- The Grease has occasion to run into the "dark master"
while he is trying to perform his duties.

Q: What is the alarm that is sometimes heard in the background when the
Greaseman talks?

A: The Geeze alarm. This goes off when the greaseman starts geezing.

Q: What other gigs did Grease do on the radio?

A: Like any other up-and-coming DJ, Grease worked at other stations in
other markets to develop his unique style. They include:

Washington DC (WRC-AM 980) 1974 - 1976
Jacksonville, Florida (WAPE) 1976 - 1981
Washington DC (WWDC-FM 101.1) 1981-1993

Q: Did he always leave on good terms?

In almost all cases, yes. The one notable exception was WRC, when
management decided his morning personality wasn't quite right, and gave
him a choice between dropping the "Greaseman" character and leaving.
Grease chose the latter. If you ask about it today, he will joke about
the time he was collecting unemployment insurance in DC and would "stay
up to watch the moon rise and CURSE THE NIGHT!" although I'm sure at the
time it was somewhat unsettling.

Although he left Florida voluntarily to take the better offer at DC-101,
he did offend some bible-belt types during his stay. The Florida gig
was important to developing the Grease as a "god-fearing, truck-driving
redneck," though. The Florida station has since gone to religious music
("From Grease to Grace" was their motto for a while). Their loss.

Q: Are there any good biographies or other comprehensive stories about
the Greaseman?

A: Grease is a very private person, and spent a number of years in DC
before finally consenting to an in-depth story about him in the
Washington Post Magazine Fall 1987. It's a good resource to summarize
his past gigs and overall life story. Also the Washingtonian Magazine
did an article on him in the January of 1993 in commemeration of his
departure from DC.

Grease also appeared on the Larry King Show (early to mid-80's) to talk
about morning radio in general. The only down side was that he was
teamed with a "Morning Zoo" DJ as a co-interviewee, a format that has
become annoyingly ubiquitous on the radio landscape. Transcripts may be
available (don't know how to get them, sorry). This is the old
Mutual show that ran all night (Grease probably got up early to do it :-),
and not the current CNN TV talk show.

Q: Are there any albums or compilations of Grease bits?

A: There was a 4-part "Best of Grease" compilation, available on cassettes. These became unavailable shortly before he left DC-101. They are now prized collectors items and can only be obtained from private owners. Part of Grease's popularity on a national basis before he went into syndication (and hence part of the motivation for this newsgroup) was the creation and exchange of bootleg tapes among an extended network of fans. Some of his best work has never been republished (although you can occasionally talk him into doing them again on his current show).

Q: Did Grease ever serve in the military?

A: Like John Wayne, Grease has a deep and abiding respect for everyone who serves in uniform, but never served himself. During the Vietnam war, he was attending Ithaca College in New York, and his draft number never came up.

Q: But Grease did serve as a policeman?

A: Yes, he did. While working at his gig in Florida, he worked as a reserve police officer on the night shift. Morning staffers would be jolted out of their bleary-eyed state by the sight of Grease doing his show in full uniform with a 44 Magnum strapped to his belt.

Q: Is Greaseman a bigot/homophobe?

A: Certainly not. Like the program "In Living Color" or even rec.humor.funny, Grease parodies what's funny in everyone, and winds up defusing hatred as a result. Grease respects all of his fans, and wishes well even those who don't like him.

Q: But there was that "Martin Luther King, Jr." incident in DC?

A: Yes, sometimes there's a fine line between parody and cruelty, and Grease crossed the line only once during his otherwise unmarred broadcasting career spanning over 2 decades.

Sometime in the late 80's, he was noting the passing of Martin Luther King Jr.'s birthday (which had then only recently become a national holiday). Grease said something about "killing 4 more and getting rest of the week off." Grease was suspended, and apologized for the incident on an "Editorial Rebuttal" on WRC-TV in DC.

Haven't the rest of you made mistakes or are you all perfect?

Q: What does AMF mean?

A: Adios my friend.

Q: What is the "Bit without an Ending?"

A: When Grease was working in Florida, he would be prevented from getting a good day's sleep after his morning gig by thoughtless model-airplane enthusiasts who would buzz their models outside his window.

Grease came up with a revenge skit with a model plane of his own that would shoot the others out of the sky. The plane became posessed by Damien and started chasing after him. Grease then got too deep into this bit without a way out (and tried to incorporate this into the bit). After fumbling with the sound-effects, and trying a foray South of the Border, and then calling in Big-Dick Brannigan, he finally gave up groping for a punch line. Grease can usually be counted on to do some of the most impressive ad-libbing and improvisation on the radio today, but at that time his talents failed him. The bit originally aired in the Fall of 1982 from WWDC FM Washington, DC/101.

It's considered a classic, and is on Vol. 1 of the "Best of Grease" tapes. He owns the rights to all his bits, and may rerun it on his current show from time to time.

Q: What stations carry the Greaseman?

A: City Station Time
==== ======= ====
Washington DC 106.7 WJFK 1900-2300
Baltimore MD 1300 WJFK 1900-2300
New York NY 92.3 WXRK 1800-2200
Philadelphia PA 94.1 WYSP 1800-2200
Los Angeles CA 95.5 KLOS 2300-0000
Atlanta GA 92.9 WZGC 0600-1000

Q: I like what I have read so far, but the Greaseman is not currently in my city. Is there another way I can get hold of this zanyness?

A: Sure there is, there is currently a Greaseman Web server at http://absolut.gmu.edu/greaseman/ where you can listen to some of his bits.

spokane kazz 107.1
tulsa on air 11/15/94
ventura/thousand oaks kahs 1590
washington d.c. wkdl 1050

for those unfamiliar with 'radio aahs' (couldn't use 'oz' for legal reasons) it is a 24 hour children-oriented radio service based in the twin cities with affiliates in many major markets. as you can see from the above, most of its affiliates are a-m's (only exception is spokane).

listenership is difficult to determine, because persons under 12 years old don't matter to the rating service. but unofficial sampling, such as phone calls, response to promotions, and turn out at public events indicate the numbers are there.

the problem for radio aahs, which reportedly sets high standards for the advertising it accepts, is to convince advertisers they can get a good bang for the buck.

i.m.h.o., the time couldn't be better for this type of format.
satellite technology makes it relatively cheap and easy to distribute.
and market conditions have alot of a-m stations fishing for a
break-even format. if children's oriented radio can't make it
financially now, i doubt it will ever make in in over-the-air commercial
broadcasting

a-m forever

Source record: 36389

After spending the past two days in Boston, I'm still a bit shocked.
Brudnoy admitted that he is gay and has had aids for 6 yrs. His
hospitalization and near death is as a result of complications related to
aids.

The Boston Globe appartently "outed" Brudnoy on Thursday. Brudnoy
capitulated to the blackmail and made a public statement from his
hospital bed.

He slammed Howie Carr as a reason why he never came out of the closet.
Howie went on for awhile chronicaling the events, claiming he's know
brudnoy was gay for years and would never out him.

Brudnoy phoned Carr's show and talked with howie for 30 minutes or so.
Very interesting radio.

Brudnoy looks like he will return to work soon.

Best wishes to David and his family. Our prayers are with you all.

M1bz (m1bz@aol.com) wrote:

This past weekend, during Rick Dees' birthday segment, they played a quick birthday jingle that went, "Here's your birthday song, it isn't very long". Anyone know where this came from? I'd love to use it!

Thanx!

Jay

In article <3aufcv$9vt@vixen.cso.uiuc.edu>, ad225@detroit.freenet.org (Gary Baumgarten) writes:

(on CKLW-FM's passing)

The change in format is sad, but it was inevitable the moment serious competition from the Detroit side came along. (The signs were there dating back to Tommy Shannon being let go.)It's interesting that their FM sister in the CHUM ltd. duopoly, Mix 89, hasn't been seriously hurt by ITS cross-river competition in the new-rock realm. (For some reason Canadian stations generally do a better job with that format than Americans do...Planet 101.1 from Fort Erie is starting to show up in the Buffalo Arbitrons even though it signed on mid-book. And CFNY in Toronto, which also shows up in the Buffalo numbers, has had a long and largely successful run.) It will also be interesting to see if any shuffling occurs in the CKLW-AM lineup, which is doing pretty well with talk but is still being fine tuned. They're committed to spoken word programming there, and have reportedly stopped the financial bleeding the station suffered under its prior owners. It's said that they're #1 overall on the Canadian side, and at this point (according to their top management) any American listenership they get for the AM is just gravy. The FMs are a different story, dependent on Detroit listening to prosper, and we may see more turnover there...

Jaydio, I too consider myself to be "Looking" for the
Hexorcist album. I heard it once on WMCA NYC
probably 18 years ago. I taped *part* of it,
and therefore would like to hear the whole thing.
The voice I best remember on it is Gary Owens

Thanks to the gent in metro Akron who mentioned a place that had it.

Hope you're closer to Livonia than I (NJ)
Here's one line I remember from it.
"All these flames and everything's so hideous...looks like Cleveland!"
Or Gary Owens as the devil,
"I've lowered the thermostat to 3002. Just doing my
thing for the energy crisis you know"

Just a get-acquainted note from a new member. My name is Michael Hagerty. For nine years, I've been a reporter and substitute anchor at KTVK, the ABC television station in Phoenix. Before that, weekend anchor and reporter at the ABC affiliate in Las Vegas and the CBS in Reno. From 1971 to 1981, I was a (mainly AM drive) personality and PD/APD/MD at KIBS, Bishop, Ca.(my hometown, where I started at age 15), KSLY, San Luis Obispo, Ca., KIOQ, Bishop, Ca., KUKI, Ukiah, Ca. and KOLO, Reno, Nv. I've kept my hand in with guest appearances on the morning shows at KITT, Las Vegas and KKFR and KPSN, Phoenix.
It was hearing Gary Owens on KMPC at age 8(1964)that told me that I wanted to be on the radio...other big influences included Dick Whittinghill and Geoff Edwards(also KMPC), Robert W. Morgan, The Real Don Steele and Charlie Tuna(KHJ), and many more that will probably surface in future postings.
Anyone on here who I've worked with...or who has been at the same stations... or shares some of the same influences...I'd love to hear from you...I'll also post the first Phoenix radiowatchers report in the next day or two.
Michael Hagerty

>may be out to slander him. As to whether the denial is a forgery, I
>can't think of any reason why anyone would want to forge a denial of such
>a scandalous statement; so I believe the denial post was really his.

I remember the postings you are speaking of, in that post he stated
he was never CONVICTED of any such a crime and was appauled by the
person who brought it up and wanted to know what competitor this guy
worked for to be spreading such a rumor. Then Bill (our esteemed moderator)
noted that the person replying to this accusation was using an AOL address,
and could be someone else entirely (than the actual Tom Leykis).
Tom replied to this, along with alot of other fans, stating this was
the *real* Tom Leykis and his AOL address is often given on his show.
However, the *seed* of the notion of forgery was planted and there
was much discussion of a "fake AOL Tom Leykis", which never really posted
anything here.

So, Tom enfatically denied ever being CONVICTED of said crime, but never
suggested he was NEVER ARRESTED and brought up on charges of said crime!

When I read those Boston Globe articles... I thought the same thing you
did, and had to go back and check those posts to make sure Tom wasn't
lying... which HE WAS NOT! The Globe articles maybe considered somewhat
sensational journalism... but it was an ACTUAL news story with the
referral to actual *Police reports* that were filed, so we are not
disputing that no such incident occured.

I hope I was able to clear up this confusion about these past posting.

Later,
-Paul

Tom Leykis was arrested on December 22, 1993 at his Beacon Hill
home following a 911 call by his wife, Susan, and arraigned on charges
that he assaulted and threatened to kill her.
Contrary to what others will tell you (and according to the
Suffolk County records), Tom was NOT aquitted or cleared of these
charges; his wife later decided not to press them.
Before anyone starts yapping about what did and what did not
happen, I have newspaper articles that detail this story. Tom Leykis has
never brought any action against the papers for what they printed, so I
can only assume that they are accurate. If anyone has any information
(not *opinion*) to the contrary, I would love to see it. If it is from a
reputable source, I will be the first to make an apology to Tom.

>
>> I can understand your outrage, Bill, about being treated in that manner.
>>Tom seems to look for the most controversial callers
>
> Uh,Paul,do you have proof to back it up? If you don't,then STFU!

Uh, Carl, I thought that part of my statement shouldn't need any "proof"
at all, Tom explains every Friday that he is looking for "the most riveting"
callers and his "bouncer" will weed out any "boring" (run of the mill)
callers.
Tom even joked once, by saying, "people who call the show should be
captivating and what they have to say should make people want to rip off
thier clothes and run down the street naked and screaming!" I believe
Tom is trying to verbalize, he is looking for the *cream of the crop* in
controversial callers.
In addition, one of the formulas he uses on the show, is once he has a
topic, he looks for callers with opposing views and pits them against each
other and he acts as a moderator in *thier* discussion.
Carl, I hope that is enough "proof" that Tom looks for the most
controversy in his callers. *BTW* I almost had to go to my Net jargon
dictionary before figuring out your (then STFU!) comment. Since there
was no "smiley emoticon" after it, I'll assume it was meant to be hostile.
Thats O.K. with me... hostility is good, it shows me emotion and a passion
for the subject matter you are discussing, but you should watch your language
on this highly respectable newsgroup of broadcasting professionals! ;-)

>>came up on his preview screen probably was not "riveting" enough for his
>>high standards in *sleaz-ability *
>
> And Don & Mike are 'polly-pure',if you go by that line of logic.. :>

I haven't commented on the Don & Mike show in *this newsgroup* for
awhile, but now that you've brought them up, nobody showed any outrage
when someone published a "sleazy" court case story about one of them in
this newsgroup. Nobody ran to thier defense and said, "this is the kind
of issue that should be handled in the courts and not discussed on the Net".
Even though these are just alligations, people are discussing them as if
he is already guilty. I haven't even posted the Boston Globe articles,
before I have people flocking to Tom's defense. Both Tom and Don are

professional radio show hosts in the public eye, and with that, are open
to this kind of public scrutiny. They both run (fun and controversial) shows
and they themselves look for the same kinds of stories in the paper about
other people and discuss it openly on their shows.
With that in mind, why are people taking this (holy than thou) attitude
about such a subject in this newsgroup. You are totally forgetting about
the kinds of shows these guys have... If THEY had a *show* on the Internet,
they would be bringing up the exact same things I am bringing up!

>> He comes across to his national audience as
>>an open and honest talk show host that will talk about anything, including
>>anything in his past, but he continues to hide the fact that he WAS arrested
>>for beating up his wife in Boston last December. Somebody sent me the
>>articles from the Boston Globe and Tom, himself, wrote me and told me his
>>side of the story. I urged him to tell his national audience about it
>>(in his own words) so he can explain this hidden secret.
>
> To quote the group Too Much Joy,"That's a lie." Tom most definitly HAS
>talked about it on his show...and during an earlier edition of Wide Open
>Telephones,no less(this was within a few weeks of his show coming on
>board WWKB). Also,the L.A.Times did an interview with him just before
>the show began,and it did contain a section about the incident. I'd be
>more than happy to post THAT to this group...

Like I said in a previous post, I think Tom only *generally refers* to
it and for people who haven't heard the whole story, or heard that show
with Susan in the studio (giving her side of the story), it makes little
sense to the national audience. The quick comments made sense to you because
you read the L.A. Times story and when he mentions this issue you can
associate it with that. I WOULD like you to POST those articles, because I
would like to hear all sides of this story. I never meant for people to think
I was CONVICTING Tom of commiting this crime, just by bringing this subject
up on this newsgroup.
So... let's all drop our "holy than thou" attitudes about subjects like
this and admit (the way Tom does!) that we "love to wollow in the mud" of
these kind of topics because it makes for fascinating and interesting
reading!
If you can't admit to that... then your not a true Leykis nor Don & Mike
listening fan!

Later,
Paul (average "Joe Listener")

Nasty doings at "LA's Home of Rock ' n' Roll, 95.5, KLOS."
The corporate geniuses have fired two longtime DJs and are
apparently aiming to go after all two dozen listeners about
to be abandoned when hard-rocker KNAC goes espanol in Feb.

PD Carey Curelop, having failed in his attempt to completely kill
the station by replacing evening riock and roll with taped Greaseman
highlights, apparently has to do something. He has already
missed the "alternative" boat, failing to ever take any
musical chances a la 91X or KROQ. He also missed the AAA
train, as KSCA's word of mouth and juyst-starting-to-improve-
from-nothing ratings show. So now, he's going to be the
"hardest" station in town, the "Megadeath, Quennsryche
Voice."

Benson in particular will be mnissed. His sunday night show,
"The Seventh Day," j has been imitated all around the country.
Not imitated, however, is Benson's knowledge and experience.
Most of his rock histories are taken from his own
book.

Curelop has done all he can to kill KLOS. I hope his biosses
at CAp Cities are happy when all they have left listening
to all dayparts except Mark and Briuan are teenage motorheads.

Falme off... flame off... whatever.

First off, the comment you attribute above to Kerr was actually mine; no big deal, tho. We all digitally miscue from time to time.
But the denial Tom issued was not to the question of the Boston arrest, but to a hacked post stating that he and Susan had separated. BIG difference in topic.

:This taxpayer would like to see the whole thing de-funded and make
:those programs have to _compete_ for advertising dollars, rather than
:having Congress pick my pocket to produce programming I have no use for.

Man, I couldn't agree with you more!!!!!

:If you like it, support your local NPR sttion.

Here's the problem: Name ONE NPR/PBS station that isn't taxpayer
owned, or run with tax dollars? Every NPR/PBS station is owned by a
college, or a college "Board of Trustees", or a University Extention. If
you would take ALL tax dollars from these entities, there would be no
stations at all, let alone programming.
There are those on this newsgroup who would say this isn't so.
However, I personally only have to go back to last summer when I was asked
to do some voicework for a local PBS Television program. When I was paid
guess what? The check came from Madison, Wisconsin. And it was drawn
from the "University of Wisconsin, Board of Trustees." Had no problem
cashing it either.

:Nothing sickens me more than NPR and PBS begging for money on their
:"annual" fund drives (which seem to happen every couple of months!)
:when they and I know full well that they are funded via the federal
:government with dollars taken from me under threat of force. What
:a racket...

And isn't it funny, in the case with PBS-TV, that it is during these
"annual fund drives" that they run their most popular, or most mass-appeal
programming? As if to say that this is what you are most likely to see on
that station!
There are some programs that would survive (at least in the TV arena)
if all tax funding would cease. But the majority of it would go back into
the wasteland from whence it came.

I never considered the cost of the license or permit, which lasts
for life, to be a severe roadblock to getting into the industry. Until
1992, the Communications Act of 1934 required broadcast stations to be
run by licensed operators. The FCC just came up with the lowest impact
way of complying with the law (it's a license, but there's no exam).
With the amendment of the Act in 1992, the requirement for licensed
operators at broadcast stations went away (according to law, but not yet
according to FCC Rules). They are now updating the rules to agree with
the current law. The amendment can be looked at a couple ways. One is
that now stations (once the FCC writes the new rules) can use operators
without licenses, or they can use no operators at all. That's all part
of the NPRM that I hope to have shortly. Once I have the full text, you
should be able to get it by fax at +1 805 541 0201 or www at

Wow! I thought we had it bad! WUVA is served by
Centel, and we shell out about $250 for a "Class A Equalized
Line". Experience makes me wonder if these really are
equalized. The main problem we have, however, is reliability.
A Centel Radio Loop has about a 50% chance of working when
installed and a 30% chance of working when the remote comes
around.

We use a cellular phone as a backup system. It doesn't
provide good sound quality, but it works. We can do a minimal
amount of equalization on our phone hybrid. BTW, you can drive
telephone lines with one side of the balanced line out jack of microphone
mixer. I'm not sure what the clipping level is for dialup
lines, but it's pretty high for radio loops.

Of course, if Centel doesn't have a box near where
we're havng the remote, we're out of luck. We recently had a
community service remote where we didn't have a box and the
cell phone didn't have a strong signal. Not good.

Yes, there is such a thing in the U.S.! Unfortunately, our Federal Communications Commision (FCC) dragged their collective feet on picking a standard form of this type of broadcasting. While AM Stereo has been around some time here, there were four (later three when two similar types merged) different standards. The FCC let the market decide, which was tantamount to no decision. This past spring the FCC FINALLY picked Motorola's system which is called C-Quam, and told everyone else to stop using the others after around June. C-Quam was by far the most implemented one anyway. However, now it is very difficult to get a receiver. Most of the car manufactures (the place where AM is mostly listened to) have stopped even offering this option even in their top of the line radios. Sony and Denon both have receivers for in the home. Sony's go under the A-Max mark. But now digital broadcasting is being tested and soon we will have another opportunity for the FCC to botch! This will probably totally obliterate any interest there ever was in AM Stereo. G3J.

:the states are novelties that are included in some General Motors cars.

True, but they are also in all Chrysler cars, and the higher-end
Ford/Lincoln models. The Chrysler models are narrow band stereo, but they
still sound better than most of your after-market high priced car stereos.

:Stations that have AM stereo now will continue to do so,
:because the equipment is already there, but the lack of excitement from
:receiver manufacturers has scared off a lot of stations that might have
in
:the future.

True again. Add to that the fact that radio station owners refused to
put pressure on the F.C.C. and force a standard, when we had a De-Facto
standard (Motorola). And those stations who went stereo never promoted
it, or if they did, did a weak job at it. More like lipservice than
actually promoting it. In the end, they took the easy route and hooked up
to a sattelite reciever and began the deluge of banal, boring talk shows.

: AM can sound DAMN GOOD on a wideband AM Stereo unit, but it's
:a pity that home reciever manufacturers would rather give you a second CD
:input instead...

Even the original Radio Shack car unit (AM Stereo/FM Stereo/Cassette)
sounded DAMN GOOD!
The reciever manufactureres should be shot, if nothing else, out of
basic principle. The AM section of even their most expensive tuners, is
the same circuitry that exsists in a portable hand-held radio! No wonder
AM sounds terrible on the expensive units!

No one wishes your brother were lying more than I. Alas, but it is true, there is a misguided attempt to paint a pretty face on Ancient Modulation here in the states. Some people here feel that two channels of narrowband, noisy audio with limited response is better than one.

Now I have a question: what other countries have this nonsense?

(Flame abatement: yes, I know how it works; yes, I know all the arguments in favor; and, yes, I know how "good" it can sound. I remain unconvinced.)

Greetings Group,

I have a possible contract to update a "Travelers Information System" (TIS) - I am interested in hearing from others on the net that operate TIS systems or are vendors of such systems. I am looking for information concerning reports on methods of updating and changing scripts in a "real-time" manner, methods used to record messages, and editing systems that allow for multiple segments to be intermixed and assembled into a new outgoing message. Also any data concerning the effectiveness of using a professionally produced message or the dry/canned voice of whomever happens to be on duty. Any data out there that can point to what makes a TIS successful would be appreciated. The system presently uses the radiax (cable) method for transmission and will be changed to a vertical whip antenna system with multiple transmitters. Vendors of editing systems and transmitter equipment are invited to send product information to our offices at 6204 Highland Drive, Chevy Chase, MD 20815. E-mail may be sent directly to "tzsawyer@sawyer.com" If you are interested in who the heck we are, we have a web page at the following:"http:\www.clark.net\pub\tzsawyer\tzsawyer.html" the page also points to other areas on the net (including AIRWAVES) that may be of interest to broadcasters. Thanks in advance to all who reply.

>>don't bet on it.

[..]

>My station can run unattended for days at a time [...]

>Where's the necessity for me to spend $$$$ on personnel?

Well, as I've stated here before:

1. No matter how it's produced, local radio sounds local and
national/satellite radio sounds national. Listeners do discern
the difference over time.

2. Local, personality-based radio almost always beats out music-oriented
radio-mainly because the radio listener can get a "better mix of music"
from his/her CD or cassette tape player than any radio station can
provide. Soon satellite delivered digital programming will replace
the music-oriented stations anyway. Radio stations that know their
community and involve the listeners will survive the new wave.

3. Station owners who dump personalities in favor of satellite program
that comes at low-or-no cost other than a spot trade are forgetting
that a broadcasting station is no different than any other industry.
To survive in the long-term, industry needs to have extensive R & D-
research and development. In broadcasting, part of that is Arbitron,
the other is the development of a talent pool...so that when that
morning guy dies or leaves there's someone the community already knows
ready to move in. That should be reason enough to keep local talent
on the air...it's an investment in the future.

4. Oftentimes, management looks at not having to pay payroll, benefits,
workmans compensation insurance as a real benefit for satellite program
services. Are they really? When you count up the actual value of the
commercial inventory that you must surrender to those services and
multiply them by your current rates, does it then make it worthwhile?
By looking at the true "cost" of the programming...the inventory shrink
it causes...you can see the true value.

5. Ask yourself: When was the last time I had a "national agency buy"
on my station for Coca-Cola? For Snapple? Liquid Tide?

All the long-term national accounts are gone...because local stations surrendered their programming time to national syndicators, who in turn snapped (or maybe Snappled) up all the national buys.

Businesses like broadcasting can be run on a short-term or long-term basis. Those in for long-term profit analyze all the options and take a serious look at all the costs and benefits of each step they take...and they plan for the future.

>is described as a mix of rock, reggae and blues dating from
>the '60s to the present.

First, let me introduce myself to the group. I'm Production Director of AOR-formatted CHTZ (97.7 HTZ-FM) and its sister News/Talk CKTB in St. Catharines, Ontario, on the Niagara Peninsula. Our signal coverage area includes both Metro Toronto and Buffalo. I've been following things here for a while via a newsfeed, but now have posting access, so I'm looking forward to joining the discussions.

I had heard The River described as "Progressive", which I thought would almost put it in competition with its own sister 89X. Do you find a lot of similarity between the two? And how is 89X faring against Edge-formatted Planet 96.3?

>ad nauseum...

For most major market PBS/NPR stations the percentage of federal
government support is under 20% of operating budget. For my own station
public support(pledges) hovers just above 50%. The remainder is supplied
by foundation and corporate support.

I think it *is* a problem that most PBS kids shows have become program
length commercials. But my understanding is that all of the
merchandising of Barney goes only to the program producers. (This is
about as shrewd as the managers of the public system are.)

Know the facts before you open your big, stupid computer, Mark.

Cordially,

Norm

>revenue from the toys and the books and the T-shirts and the videos
>ad nauseum...

OK, people, expect a MAJOR SHOCK here.

I agree with him.

It's time for PBS and NPR to drop the pretense. They *have* been commercial operations for years now, ever since restrictions on underwriting were dropped.

If a pledge drive isn't a commercial, nothing is.

It's also time for non-comm audiences to be measured the same way commercial audiences are, at least in radio. That way, the "liberals," "moderates," and other sensible people who have fled to NPR, where some intelligence still remains, *would* be measured in the Arbitrons (as they are not now, except for the special figures NPR stations get).

I believe this is a major reason why program directors, most of whom never were overburdened by intelligence in the first place, think the way to go in talk radio is hard-right. That's because people who don't like that crap don't have the measurements of their listening habits reported (again, except to NPR stations).

I would make one exception -- for non-comm NCEs that are (1) truly "educational" or (2) used as a training ground for students with a certain percentage (say 80%) of locally originated programming produced by students.

At one time, I would have exempted non-profit community access stations from the requirements. But increasingly they are irrelevant to their communities (KKFI) or also going after a commercial-type audience (KOPN).

I also would not let so-called "Christian" broadcasters hide behind the skirts of the NCE-FM rules with their cranky one-dimensional version of the world. Under my scheme, any organization that claims a religious tax exemption would lose its NCE-FM license.

And as for the rest: let 'em sink or swim.

Now you see why I put quotes around political labels.

My best advice is to buy a station log, and then just quiz us here about the ones not in the book (or call the
FCC if you're 100% sure of a call letter set).
That way you can spend more time DXing and les time at the computer
(which probably doesn't do much good for your DXing when placed near the radio)

The AM Radio Log is available for non-members from
National Radio Club
Box 164
Mannsville NY 13661
NY orders add sales tax cost is $19.95 and is accurate as of 9/94

>ment) any American listenership they get for the AM is just gravy.
>The FMs are a different story, dependent on Detroit listening to
>prosper, and we may see more turnover there...

The Modern-rock and now the Progressive formats of those two stations make a lot of sense, actually. Canadian stations are bound by all kinds of regulations that require Canadian content, limit the number of times a song can be repeated during the week, require a minimum number of songs in a station's playlist, etc. etc., all of which make it difficult for the Canadians to compete in a mainstream format with an American counterpart. But when it comes to Alternative and Progressive formats, diversity and variety are actually what those audiences want, and some of the Canadian stuff actually adds quite a bit to the sound.

By the way, CHUM (owner of CKLW & all) just received approval to start up its own network, which will be the oldies format it carries on its AM's across much of Canada. The Montreal AM staff at CKIS "Oldies 990" has already received notice they're syndicating as of March 1. I wonder if the same may be in store for one of the Windsor AM's. CKWW 580 perhaps?

[Moderators Note: Daevid gets the cool post of the week award for this one. Bravo. Bill]

Back in 1965, Robert and Thomas Dunker of Gauntlet Press in Hermosa Beach, CA, (no connection to the modern-day GAUNTLET Magazine, BTW) began publishing an annual magazine called HORSESHIT ("The Offensive Review"). Inserted on page 11 of the first issue, amongst some primitively sexual humour, angry political satire and cartoons so surreal and biting that one suspects even the Berkeley Barb and the East Village Other would have rejected them, was the anonymous piece below:

SOME PEOPLE WHO MAKE VERY LITTLE NOISE.

*The pretty girl with deformed feet who sits at home with her aging parents and gets quietly drunk at night. Then waits until they have fallen asleep and cries and cries.
*The thirty-five year old fat woman whose husband won't take her anyplace and who pours out all her heart's love on her little dog, the only one in the world who loves her.
*The middle-aged man who looks up from his work and sees a pretty blonde teenager sitting close to her boyfriend in a car and remembers that he was always afraid of girls when he was young.
*The young married man whose wife is holding some unnamed grudge and won't sleep with him.
*The kid who was a star halfback on his small high school team and who was injured in his first college scrimmage but contines to play because he is afraid to tell the coach.
*The plain 31-year-old sales clerk who has a pair of newlyweds come into the store and keep looking at each other, while she waits with hungry hopeless eyes.

Of course, this describes a good part of the radio audience; those with such paralysing fears and sorrows about the world around them that they seem only able to relate to reality, or whatever little section of it they can, through US. I'm also certain that this describes a helluva lot of US, too; I'm willing to bet that at least a third of us are actually in this business because it allows us to make contact with millions of people at one time without having to look any of them straight in the eye.
I bring this up today because this is the time of year, the one month out of the twelve, where we pay lip service to the socially disadvantaged. We conduct God-only-knows-how-many local Toys for Tots campaigns, food drives and bell ringings for the Salvation Army at every business center imaginable. We seem to play more songs about positive family relationships, reconciliation and peace on Earth between Thanksgiving and New Years Day than any other stretch of the calendar. We claim to shed a tear or two over the

umpteenth local TV run this year of IT'S A WONDERFUL LIFE and A CHRISTMAS CAROL.
Question here is---why does it seem that on January 2 we begin thinking of these folks described above only when "Eleanor Rigby" pops up in the oldies rotation, if even then?

Surely it can't be because we can't effectively build a promotion like this around some other time of year---can it?

DavidB6517 (davidb6517@aol.com) wrote:

: WHHS, a high school radio station, is actually going to undertake a remote
: broadcast from another hgih school on Thanksgiving Day.

Hi David!

Since it is already Thanksgiving day when I read this, the advice may
only be good for future remotes.

: At one time, we had non-equalized lines to every high school in the area
: (even the local ice rink for ice hockey games...and the Philadelphia

I don't exactly know what kind of lines your talking about here, since
there are several alternatives. If they were the kind of lines that had
no dial tone and simply "plugged in" the remote to the station then
likely they were "8K" lines. This means that they are great for voice
transmissions, but they are definitely eq'd by the phone company. There
are other options along the same "plug in" concept.

These kind of lines are very economical when several remotes are being
done from the same location, like your football field. Otherwise the
cost you described is pretty normal for single day events.

: So we decided to go with a dialup...

: Unfortunately, the remote site (a school) has NO direct lines form Bell.

You don't necessarily nead direct dial access, just analog interface. If
you can get dial tone from the school system using a regular household
phone, you can use a comrex as an option.

Comrex (a brand name, but a generic concept like magic markers) uses one
or two phone lines for the transmission, and a single phone line for IFB
return audio. Two line comrex systems (the IFB is never counted as a
line) give very good audio quality.

The raw audio from comrex is not broadcastable, and different comrex
units will have different receivers or decoders on the station end. The
end result is single cable audio for the station console.

: We are borrowing equipment from a Philadlephia commercial station to use a
: dial-up...so we save $200 right there.

This sounds a lot like comrex to me. Maybe single line?

: Has your station been in a similar situation...what do you do for remotes?

I work as a freelance remote engineer for 9 stations in my market. All of them use RPU radio link units that either shoot directly to the station or to a remote receiver site on a mountain. One element of this is getting audio from inside a building or somesuch to the vehicle with the transmitter and antenna. For this an auxilliary low power transmitter is used from inside, to the vehicle, often called a "hop."

If remotes are in the future for you, you might try to strike up an agreement with a station to "share" a frequency and even some equipment. More than likely, you'll have to share the frequency and purchase your own transmission eqipment for these kind of remotes.

One station I work with shares their receiver equipment with a very small station. The small station has an 8K loop to the recieve site and coordinates their remote schedule with the bigger station. The small station pays a portion of the cost of the equipment, but does not have to maintain a vehicle or other associated expenses.

5331. FM Nostalgia in Boston

Newsgroup: rec.radio.broadcasting
Date: 1994-11-25 12:36:44 UTC
From: "PETER Q. GEORGE" <PGEORGE@WELLESLEY.EDU>
Message-ID: <3b4los$ns2@vixen.cso.uiuc.edu>
Source record: 36435

It is fun to hear about about some of New York City's early FM experiments after the 1964 FCC Mandate that all FM's inside a City of over 100,000 persons must break away from simulcasting the co-owned AM at least 50% of the time. It is rather funny in the fact that I listened to the "jingle packages" for WOR-FM "The Sound is.....98.7 WOR-FM...in STEREO!!" last Sunday. That must have been a fun station to listen to !

Here in Boston, we had some fun FM between 1964 through 1970. My favorite is WRKO-FM "This is ARCO, your automated ALL MUSIC station in BOSTONNNNNNN!". It was a Drake original (Bill Drake) with music you never thought would make on the air. But there it was on October 12, 1966 at midnight ! So, a lot of people, my self included began to "Come on over to the FM side!" with "ARCO-MATIC" as our guide. I still have a copy of the "jingle package" for ARCO that I treasure. I would love to see if someone out there has an aircheck of WRKO-FM, that would be a pleasure to hear once more.

For the most part, FM was the ghetto of Classical music. No offense here, I love the music but the kind of music these stations played were of the "drop the needle" type where they were pre-recorded with no introductions and the only thing your would here is (example)...."This is WBZ-FM, a Group-W station, Westinghouse Broadcasting.....for Boston". All mono, all the time. They were the loss leader for BZ' as were all of the Group-W FM 's around the country BEFORE Westinghouse knew what to do with FM. Can you believe that WBZ-FM was sold in 1981 to Greater Media as an auotmated "shlock rock" station for 4 million dollars. Today that same station, now WMJX (Magic 106.7) is one of the most listened to station in Boston. Stick value...$21,000,000 and going higher all the time. It does give WBZ Radio a run for the money!

103.3 in Boston was WEEI-FM, "The Young Sound at Stereo 103.3 FM", basically middle-of-the-road versions of popular rock tunes imported from WCBS-FM which really sounded nice in my father's Ford with true stereo sound ! Here is the FM dial in 1967 for Boston, tell me if these bring back memories of time no-so-long-ago.

88.1 WTBS Cambridge College Radio with 10 glorious watts!
88.9 WERS Boston 18,000 watts with very LOW antenna
89.7 WGBH Cambridge How somethings NEVER change, now Boston
90.9 WBUR Boston At the time it was a REAL College station
92.9 WBOS Brookline (stereo) The Music Theatre//WBOS-1600
93.7 WCCM Lawrence VERY WEAK, //WCCM-AM (800)
94.5 WHDH Boston (stereo) background music 24 hours a day
95.3 WHRB Cambridge (stereo) College/Commercial station
95.7 WKBR Manchester, NH. (mono) simulcasted WKBR-1250, strong!!!
96.1 WSRS Worcester (stereo) "Worc's. Stereo Radio Station"
96.9 WJIB Boston (stereo) "JIB !" ding-ding, nice

97.3 WBSM New Bedford (stereo) beautiful music
97.7 WBET Brockton (mono) //WBET-1460
98.1 WNBH New Bedford (mono) //WNBH-1340
98.5 WRKO Boston (mono) day //WRKO-680, (stereo) night
99.1 WPLM Plymouth (mono) //WPLM-1390
99.5 WLLH Lowell (mono) 50/50 simulcast with WLLH-1400
100.7 WCOP Boston (stereo) 50/50 simulcast with WCOP-1150
101.7 WLYN Lynn (mono) //WLYN-1360, different at night
102.5 WCRB Waltham (stereo) //WCRB-1330, ALL CLASSICAL !
102.9 WGAN Portland, ME. (stereo) "Stereo 103", beautiful music
103.3 WEEI Boston (stereo) "The Young Sound", 50%//WEEI-590
104.1 WBCN Boston (stereo) "Wonderful 104", hodge-podge
104.5 WFMP Fitchburg (mono) sounded awful, very weak, YUCK!
105.7 WKOX Framingham (stereo) symphonic music, weak signal
106.1 WCOD Hyannis (stereo) beautiful music
106.7 WBZ Boston (mono) 50/50 with WBZ-1030, classical
107.3 WAAF Worcester (stereo) 50/50 with WAAB-1440, top-40
107.9 WHIL Medford (mono) "WILLPOWER RADIO", //WHIL-1430

Notes: WGBH-FM was Boston's first Non-Commercial STEREO station in 1962
WERS's antenna was located between 4 taller buildings and it was
said that you could hear it in your toaster ! As for
ANSI rules.....well, we won't go into that !
WHIL-FM (now Boston's WXKS-FM, "KISS 108") was 50,000 watts at
70 feet above the ground at the studio site in Medford !
Word has it that when the station signed-off at 10:00 p.m.,
you could still hear the exciter for several miles and
be treated to a fumbling production person who used the
"on-air" board for production purposes...and you could
hear EVERYTHING ! *&$#@!*! How times have changed !

Think about this....only a handful of Boston's FM's have their original
call-letters.....WERS,WGBH,WBUR,WBOS,WHRB,WPLM,WCRB and WBCN since 1967.

Ah, MEMORIES!!!

>Here's what some Bay Area stations are doing for the fall book using
>outside media.
[...]
>How about some outdoor campaigns from other markets?

Here's what decorates the Philadelphia area's outdoors:

92.5 WXTU ("Country 92") - Their billboards and bus signs simply read: "Are
YOU in the mood?? ... 92.5 FM" I believe that they are trying to attract
a
younger audience (18-34's, maybe??) by not exactly specifying what their
format is. I've had occasion to tune in and here liners like "The new
generation of country music..92.5 WXTU!"

93.3 WMMR (Album rock) - The only billboard this station has up is a picture
of their morning guy Pierre Robert (supposedly standing in front of a huge
fan) with his *LOOOOONG* hair spread across the entire sign. Then it says:
"Pierre Robert. Mornings. 93.3 WMMR. Live the life, respect the music."
This is their attempt to draw the 25-54's away from classic rocker/(talker)
94 WYSP..and, as I've said before, 'MMR's ratings show that they're doing
just fine.

94.1 WYSP (Classic rock) - The last advertising I saw from this station was
about 8 years ago when they first started running Stern in the
morning...their billboards had some stoned-looking guy saying, "Howard
Stern all !@#$%
morning, classic rock'n'roll all !@#$%^& day!!!!!!"

95.7 WFLN (Classical) - In 20 years, the only advertising I've ever seen from
this station was a plain sign on the side of a bus that read: "Classical
music...95.7 FM"

96.5 WWDB (Talk) - About 6 years ago, they ran a billboard hyping their morning
guy (Paul W. Smith??) reading something like: "Paul W. Smith wakes you up!
..UP!!! 96.5 WWDB" I guess a station gets bonus points from me for having
exclamation points in their ads...if nothing else interesting..(How about
this:
"Killer classical music!!!!! 95.7 FM!!!! ..The POWER PIG!!!!!!!!!!!!!!!!")

98.1 WOGL ("Oldies 98") - Their ads typically have a pink convertible '57 Chevy
with "Oldies 98 WOGL" written on the side, with the car driving down a road
leading into the city, and the Philadelphia skyline in the background.

98.9 WUSL ("Power 99", Urban) - I think, for the 12 or 13 years since they
switched from "Kiss 99", Power 99 has ALWAYS had billboards up! It's
always been the familiar red & white "Power 99fm" logo on various

backgrounds ranging from pictures of their morning guys "Carter-n-Sanborn"
to their current one
which shows a picture of young black neighborhood children playing
jump-rope and the sign reads, "Power 99fm...Stop the violence, Increase the
peace"

100.3 WPLY ("Y-100", New rock) - Current billboards show an eye-catching
white background with the cool purple "Y100" logo, the digital "100.3 FM"
readout underneath, and the lop-sided blue triangle behind the logo. On
one side of
the sign, it says: "the NEW sound"..and, on the other side, it says: "BARSKY..
MORNINGS"

101.1 WBEB ("B-101", AC) - Familiar bright yellow background with "B-101" logo,
a bumble bee buzzing over the logo, and various lines underneath that usually
read "ALL MUSIC" or "ALL MUSIC..VERY LITTLE TALK" or "NO TALKY DJs"

102.1 WIOQ ("Q-102", CHR) - Billboards, which promote their old "Party
Planet" idea (with the phrase "Party URANUS off!!" scrawled on one side),
apparently
went up, like, the day before they got the approval to switch from Urban CHR
to CHR! My guess: They had a deadline in which they had to start on the bill-
boards..and it couldn't wait for the approval to switch formats. I could be
wrong. Maybe they're going to promote the hell out of "Philadelphia's New #1
Hit Music Station" first (just as they promote the hell out of every freakin'
song they play!! (ie. STILL the SAME SONGS over and over and over...)), and
then return to the "Party Planet" slogan. (Folks, you don't have to listen
to a station *TOO* much to recognize the "burnt out" songs!)

102.9 WMGK ("Magic 102.9", All-70s) - Signs read "NEW!! .. All the greatest
hits of the '70s..Magic 102.9 FM", and then the sign shows a stack of 8-tracks
from artists like Steve Miller, The Eagles, Lynrd Skynrd (sp?), "Saturday Night
Fever" soundtrack, Peter Frampton, and Chicago.

103.9 WIBF ("WDRE", Modern rock simulcast from Long Island, NY) - This station
gets my vote for the most clever signs. One that comes to mind is an early one
that read, "103.9 WDRE...We do more before 9AM than we do before 8AM".
Also, a current sign has half of the sign showing a happy couple holding
each other, and it says underneath: "Life."...Then, the other half of the
sign shows a pair of
open handcuffs, and it says underneath: "WDRE."

104.5 WYXR ("Star 104.5", A(C?)) - This station, which has been playing the
same 80's Bryan Adams/Don Henley/Elton John/Billy Joel crap over and over
again (and
MAYBE one 90's song an hour, hence the "A(C?)" designation!) for almost 5
years, occasionally has a star-spattered billboard with its "Superstars Of
The
80s & 90s" slogan on it. This station needs a major overhaul, format-wise.

-Darius

5335. Is Pat Robertson the Anti-Christ? (long)

Newsgroup: rec.radio.broadcasting

IDENTITY OF THE ANTI-CHRIST REVEALED

Text of address given by the Rev. T. Jonathan Brimstone, Tuesday, November 1, 1994, to the Northern California chapter of the Christian Enlightenment Society. The Christian Enlightenment Society is a national organization of scripturally correct conservative Christian Republicans.

Introduction of Rev. T. Jonathan Brimstone
by state chairman Brother Brian Tuttlesworth

Good evening, ladies and gentlemen, and welcome to all of you, and what a crowd!, to this most important meeting of the Northern California District of the Christian Enlightenment Society. I am Brother Brian Tuttlesworth, the California state chairman of CES. To those of you who are visiting by special invitation, this is the biblically correct conservative Christian Republican caucus. We are a national organization with chapters in every state. Even though we are a private organization with selective membership, and do not publicize our organization or its events and conferences in any of the media, we are still growing in numbers at such a rapid rate that new chapters are being formed daily. Again, we welcome you to this specially called meeting.

I am indeed honored to be given the privilege of introducing as our speaker the very highly esteemed clergyman, writer, and educator, the Reverend T. Jonathan Brimstone. I know of no man who has generated such love and respect from the most influential men in America, and that fact is obvious by the standing-room-only crowd at this meeting.

You are going to be startled by what you are about to hear. The Rev. Brimstone is going to identify the anti-Christ, who wears the mark of the beast, 666. We all know him very well. He has diabolically concealed his true identity from us, until tonight. We hope that you are prayed up. You will be angry at what you learn,

not only angry at the deception of the individual revealed, but you will be angry at yourselves for sleeping while the devil reigned.

So brace yourselves as we bring to the podium, perhaps the greatest biblical scholar of all time, the Rev. T. Jonathan Brimstone.

Address of the Rev. T. Jonathan Brimstone

Thank you. Thank you. THANK YOU! What a wonderful reception! Thank you. Please be seated.

And yes, it is my real name. I take a lot of kidding over it.

My fellow biblically correct conservative Christian Republicans, members of the Christian Enlightenment Society, I come to you tonight with a heavy heart, but not without an intense feeling of astonishment, rage, indeed righteous indignation and a sense of vicious betrayal by a man whom we accepted as a Christian leader and who, with his colleagues, manipulated us into a position of personal trust and to whom we have given thousands of our dollars.

To our own discredit, we were so dazzled by the perceived prominence of this man and his cohorts that we failed to notice the huge red flags waving wildly in the winds of their rhetoric.

We all know that the Bible tells us that Satan comes as an "angel of light" (2 Corinthians 11:13), and that he sows discord among the brethren (St. Matthew 13:39), causing derision, division, and confusion. Yet we have allowed this very work of Satan to give birth, grow, and fertilize right under our very noses without a whiff of the deceit bringing us to our senses.

We have watched without seeing; heard their mobilizing words without comment or challenge; and have been a silent partner as the so-called Christian Coalition literally tore apart churches that would not preach politics.

We aided and abetted Christian Coalition meetings where individuals were trained as "church liaisons" to infiltrate churches and pressure pastors to no longer preach Christ but to turn their churches into political boiler rooms. And we have sanctioned it, when a pastor rightfully refuses, to see these activists stir members of congregations against one another. And the devil, cloaked in conservative Christianity, has fulfilled his calling of causing division, derision, and confusion. Yet we have strayed so far from God and the Bible that we didn't even catch on.

In our passion to see a change in our government that would be sensitive to Christian concerns, we did not question Pat Robertson decided when he that HE was going to be president and publicly denounced his ordination to the ministry in order to pursue his fleshly ambitions and goals of wealth and power. This was a sincere man of God? Yet we slept.

Pat Robertson continually disgraced the cause of Christ and all conservatives but we dismissed each revelation as an "attack of the devil."

The latest Pat Robertson business scandal recently shook the cover of Newsweek and last week his unbiblical conduct was spotlighted on the ABC TV show Primetime, which detailed how he defrauded his faithful followers with a pyramid vitamin business scheme which pitched its wares in a manner redolent of the snake oil salesmen of the 1600s.

Much of the anti-Christian movement which has developed and continues to grow can be traced directly to Pat Robertson and his allies. Their flagrant disregard for honesty or ethics of any kind has angered all who have any sense of decency and because they are perceived as representative of Christianity, all of us suffer and are treated with suspicion.

Far too late to prevent serious damage to the cause of Christian conservativism, I set aside my own blind trust, and put Pat Robertson through a biblical test -- and he failed on every count. Every thing he's done is the very antithesis of ministerial or even Christian qualifications. Indeed his conduct perfectly matches the conduct of Satan.

I reluctantly began deep research to determine if any characteristic of the anti-Christ could be found in him. This was personally difficult for me.

While many ministers denounce numerology as a work of the occult, the same ministers that denounce it have flimsily employed the technique in an attempt to solve biblical mysteries and to point the anti-Christ finger at politicians they do not like and competing religious leaders such as the Pope.

So, my dear biblically correct conservatives, in the quest for truth, for all our sakes, I consulted with a professional numerologist who took as his guide Harpers Encyclopedia of Mystical and Paranormal Experience, which contains what is considered by experts as the definitive explanation of the technique of numerology.

Numbering letters of the alphabet from one to nine A to I, then one to nine J to R, then one to nine S to Z, I began this painful investigation.

The total number gleaned from the name would be added. If it comes out to three numbers those three numbers are then added, reducing it to two, such as 15. The total of those two numbers, one and five, would total six.

We followed strict rules in calculating these totals so that we could never be accused of an inaccurate report. For instance, the double number 33 can not be added to come up with six. This and

other strict guidelines were followed.

I will now show you on this blackboard how this works. Having put a number to each letter of the name examined, we start with BROTHER PAT ROBERTSON. Spelling it out on the board, B is 2, R is 9, O is 6, T is 2, H is 8, E is 5, R is 9, P is 7, A is 1, T is 2, R is 9, O is 6, B is 2, E is 5, R is 9, T is 2, S is 1, O is 6, and N is 5.

When we total up these numbers we have 96. Adding the nine and six gives us 15. Adding the one and five gives us, well, there it is -- six.

This distressed me. I tried another combination to be certain. I did not want to accept what I was being shown.

I tried, hoping against hope, THE REV. ROBERTSON. This totaled 78, reduced to 15, and that again came out to six.

Still unconvinced, I this time tried THE REVEREND MARION GORDON ROBERTSON which came up 177, which came up 15, and again my brothers and sisters, it still came up six.

Becoming somewhat sick to my stomach, I made a desperate final attempt, using a combination of his names that would surely vindicate him. I tried, as you can see on the board, REVEREND BROTHER MARION GORDON "PAT" ROBERTSON. The letters totaled 213, which added together becomes six. There was no mistaking, Pat Robertson is a definite six.

I next calculated his business that began on donated funds as a Christian TV network, which he then sold at a huge profit to himself for secular business, calling it FAMILY CHANNEL. The total of the letters of Family Channel came up to a resounding 60 which becomes six.

To show how deceitful the devil is, we next calculated the organization Pat Robertson founded, the organization we felt was a work of God, his CHRISTIAN COALITION ORGANIZATION and, as should by now come as no surprise, the letters totaled six.

So there it is, unmistakable and clear: Pat Robertson comes up six, Family Channel comes up six, and Christian Coalition organization comes up six. It all comes up to the dreaded 666. Pat Robertson is indeed the beast; he IS the anti-Christ.

Now, how about those well-known allies of his, Dr. James Dobson, the Rev. James Kennedy, and the Rev. Jerry Falwell? People naturally flock to their own kind.

I ran through the name THE REV. JAMES DOBSON. Watch this on the board, the numbers of his name come to 69, added becomes 15, which becomes, yes that's right, six. To be fair I tried DOCTOR JAMES C. DOBSON. As you can see, we still come up with six. Giving him every benefit of the doubt, I tried, as you can see, BROTHER JAMES

DOBSON, PH.D., which comes to 96, which comes to 15, which comes to six, as you can see on the board.

I ran through a valuable supporter of Christian Coalition, THE REV. JAMES KENNEDY. Look at these letters and numbers, we find another six. I tried REVEREND BROTHER JAMES KENNEDY, hoping he would prove to be the Christian minister he portrays on television and, as you can see, again we have the six, we cannot get away from this painful fact.

I investigated the name Jerry Falwell, even trying THE REVEREND BROTHER JERRY FALWELL and that totaled 159, which totaled 15, which totaled six.

So here are Pat Robertson's co-workers: Doctor James C. Dobson who is a six, the Rev. James Kennedy who is a six, and the Rev. Brother Jerry Falwell who is a six. Put this satanic alliance together and we have the unmistakable picture -- 666!

Now to firmly establish that we have been totally unequally yoked, and to prove that there is no question as to who these men really are, let's look at their ministries, so-called.

The Rev. James Kennedy is a six. CORAL RIDGE TELEVISION MINISTRIES, as you can see here, totals six, and his RECLAIMING AMERICA (annual conference) totals, yes, six. Put it together, Kennedy, Coral Ridge Television Ministries, and Reclaiming America, and we have the full 666.

We put Doctor James C. Dobson's ministry, so-called, to the test and here's the results. As you saw, Dr. Dobson is a definite six. An examination of Dr. Dobson's FOCUS ON THE FAMILY COMMUNICATIONS BROADCASTING turned up a six, and THE PROMISE KEEPERS MEN'S MINISTRIES brought us another six, making James Dobson another 666.

Need I say more? This truth cannot be denied. These facts cannot be disputed. We have been yoked with the anti-Christ. PAT ROBERTSON IS THE ANTI-CHRIST, and he, Dobson, Kennedy, and Falwell all become one.

I know this is disturbing, truth many times is. We can only thank God for He is faithful to reveal hidden things (Mark 4:22).

You know what to do. Cleanse yourselves from the satanic blasphemous contamination of Pat Robertson, James Dobson, James Kennedy, and Jerry Falwell. Separate yourselves from them, put oil on the doorposts of your homes, let no Christian be deceived any longer. Let's work to get our country and our churches back in the hands of true people of God: scripturally correct conservative Christian Republicans.

Thank you.

Joe,
There's a lot of radio on several C-band satellites:
1. On sub-carriers of transponders being used for TV
2. On "SCPC" (Single Channel Per Carrier) requiring a special receiver
3. Network feeds digitally encosed (require expensive receiver)
I frequently listen to AFRTS on S-2, Transponder 20. AFRTS is all talk and sports. They are allowed to pick-and-choose seemingly from all networks. I frequently hear CBS, ABC, Mutual, NPR, AP Network, UPI Radio and many more. They also pick up syndicated programs and shorts. One of my favorites is On Computers with three hours edited down to one with all commercials edited out).

Over the last few years the sound quality of AM stereo has improved, probably has something to do with the AMAX standard. I recently bought I new vehical and the sound quality of the AM stereo is signigcantly improved over just a few years ago. The unit I have has variable IF bandwidth control that adjusts based on the signal strength. When locked into a strong station the unit goes into the "wide" mode and produces a higher quality sound compared to older AM stereo radios. There are only two drawbacks to this system (1) the user doesn't have any control and under varying signal conditions you can hear the unit pop in and out of the wide/narrow IF bandwidth mode and (2) Selectivity is dimished near ajacent frequencies that contain strong radio signals.

5339. Carter/McGee's WNOV Jive Turkey Awards

Newsgroup: rec.radio.broadcasting
Date: 1994-11-25 12:37:01 UTC
From: UltimaJock@aol.com
Message-ID: <3b4lpd$nuj@vixen.cso.uiuc.edu>
Source record: 36443

Payback time from Richard Carter and Commander Michael McGee: Thanksgiving Day on their morning drive call-in show at urban-formatted WNOV Milwaukee, Carter & McGee gave their Jive Turkey Awards to Beer City notables, as nominated and elected by listeners. Among the expected recipients (Mayor John Norquist, Police Chief Phil Arreola, Governor Tommy Thompson, etc.) were Carter/McGee's most vocal on-air critics---cross-town ultraconservatives Mark Belling of WISN and Charlie Sykes of WTMJ. (Also among the listeners' nominees was Willie Davis, former Green Bay Packer great and owner of WMCS and WLUM.) But most stinging of all was their special Uncle Tom Turkey Award, the winner of which was competing talker Eric Vaughn of WMCS, also a loud Carter/McGee critic.

And what was the source of the widest pre-broadcast (negative) promotion of the Jive Turkey Awards? Columnist Meg Kissinger of the Milwaukee Journal, who devoted more space in Tuesday's edition than to any other single item in her "Taking Names" gossip column's history. Not-so-ironically, the Journal owns WTMJ, home of Jive Turkey recipient Sykes.

To all of those who enjoy the radio drama "Unshackled" on HCJB. When we expanded the airings of this popular program to every Tuesday and Thursday, we intended that a different drama would run each day. I have just discovered that by error we have been rerunning the Tuesday program each Thursday. I apologize for this error, and wish to announce that effective tomorrow (November 24), the Unshackled aired by HCJB on Thursday will be different from that which is run on Tuesday. So, join us for good radio drama twice each week on HCJB. (And watch for several special dramas coming up around Christmas time!).

Can
>someone please repost the info?

I cam e from a broadcasting on-air b.g KFWB,WBZ - went into
voiceover . I posted a notice in this forum an located two really
good/talented guys - a radio production genius in virgina beach named
chris White and a good actor named David Sobolov in Vancouver .
David and I are shareing exchanging leads . We've been at this
v.o. for sometime . If you're in chicago and you're willing to
get on the phone checking out leads . I would be willing to help
In Los Angeles the casting people consider radio announcers on the
low end of the fauna scale -- you're going to have to unlearn
a whole bunch of shit . Mainly the jargon of communicating with
an agency casting director . I will not push this in print for
the moment . I would like to find an on-line talent agent . We have
one next door that gets the LA breakdown . we need one in Ny & chicago
Your money's no good here - we need somebody with talent and a team
player . Les Beigel

5342. WNIS is WKQX (was: WJJD...)

Newsgroup: rec.radio.broadcasting
Date: 1994-11-25 12:37:08 UTC
From: directory.js@genie.geis.com
Message-ID: <3b4lpk$nut@vixen.cso.uiuc.edu>
Source record: 36446

PETER Q. GEORGE passes along his understanding that

> "... on the day before the switchover from WNIS to WKQX ... all Chicagoans were treated to ... "WNIS is WKQX" ..."

Actually, though not as a constant verbal stream, the dual identification continued for a couple of =weeks= past the start of the new format. (But arguably not "all Chicagoans", given that the station cumed only about 10%.)

But that was back in the "good old days" / "bad old days" (depending on your view of deregulation) when there was a more elaborate procedure for getting permission to change call letters. The station wanted to establish its call letters-to-be from the start, but legally were still stuck with the old set.

(The 13Q situation in Pittsburgh a couple of years earlier provides a much better anecdote of such cleverness imho.)

Jim

Frequently Asked Questions (FAQ) File for OTR
The Old-Time Radio Newsletter
(FAQ Edited by Lou Genco (lgenco@crl.com))

Last Modified 11-25-1994
---------------------

Copies of this FAQ are distributed monthly to rec.answers and other
newsgroups, and are on file at bloom-picayune.mit.edu in the file
/pub/usenet-by-group/news.answers/radio/old-time-faq. Updates may
occur more frequently than the normal distribution schedule. The most
current version is available by anonymous ftp from ftp.crl.com,
directory: users/ro/lgenco. See FAQ for more info on ftp and WWW
access.

|Changes from last version are marked by "|" in the first column.

---------------------

Table of contents:

Q1. What is "OTR"?
Q2. You haven't mentioned OTR music, why not?
Q3. Where can I buy recordings of old radio shows?
Q4. Which vendors have (lower prices) (higher quality) (faster
response)?
Q5. Are OTR shows rebroadcast? If so, where and when?
Q6. I remember a great show called (x). When was it aired?
Q7. Are there any books about OTR?
Q8. Does anybody trade tapes of OTR shows?
Q9. What's this stuff about Copyright?
Q10. How can I get my local radio station to broadcast OTR
programming?
Q11. I have some old transcriptions and tapes, how can I make them
sound better?
Q12. Are there any OTR clubs near me?
Q13. I have some OTR tapes of the same program, but their dates are
different. Why?
Q14. Is there anywhere I can get a complete listing of all the
episodes in a serial?
Q15. Is there anywhere I can get a written synopsis of the themes of
```

OTR programs?
Q16. Is there a World Wide Web page (URL) or FTP address that I can access for more info?
Q17. How do I subscribe to the OTR electronic newsletter?
Q18. Can I get archived copies of old issues of the OTR newsletter?
Q19. What is the best way to archive OTR programs?
Q20. My old reels squeak. Why does this happen, and can I fix it?
Q21. Where can I find more information about antique radios?

Q1. What is "OTR"?
A1. OTR is an abbreviation for "Old Time Radio", a term loosely applied to radio programs broadcast from the dawn of broadcasting to the early 1950's. Alternate names are "radio nostalgia", "golden age radio", etc. Usually this applies to radio drama, mystery stories, comedy and adventures.

Q2. You haven't mentioned OTR music, why not?
A2. There was a good deal of "big band" and other music broadcast during this era. For some reason, there seems to be more current interest in the dramas rather than in the music. There is no restriction to discussing OTR music in the OTR Newsletter.

Q3. Where can I buy recordings of old radio shows?
A3. There are several individuals and companies willing to sell tapes of OTR programs. A partial list can be obtained from the OTR WWW page or FTP address listed later.

Q4. Which vendors have (lower prices) (higher quality) (faster response)?
A4. Prices, quality and service differ somewhat among all vendors. Check with other subscribers to the OTR newsletter to learn of their experiences, then check with potential vendors.

| Audio quality is an important consideration when purchasing
| recorded tapes. As yet, there is no "standardized" description of
| sound quality. Jim Widner and other OTR collectors have suggested
| various metrics to describe the quality of OTR recordings.
| Discussion of these standardized descriptors is ongoing, and is
| summarized at the archive site, ftp sites and www sites.

Q5. Are OTR shows rebroadcast? If so, where and when?
A5. Yes, several AM and FM radio stations and three satellite feeds rebroadcast OTR. Check the OTR WWW page or FTP site for current info. If you learn of other sources, leave a note!

Julian A. Smith (jsmith@blues.epas.utoronto.ca), Frank Passage (passage@pluto.dss.com) and Bill Pfeiffer left the following information:

For AM listening, try the brand-new National Radio Club's _AM Radio Log, 15th Edition: Complete Listing

of U.S. and Canada AM Radio Stations_ (Mannsville, N.Y.: NRC, 1994). All AM stations carrying things like "Old Time Radio" are listed with the format code NOS (Nostalgia), and there are lots of other codes. [Order from NRC Publications, Box 164, Mannsville NY 13661-0164 USA. Price range: $20.00]

For FM listening, I'd suggest Bruce F. Elving's _FM Atlas_ (Esko, MN: FM Atlas Pub., 1993). Alongside lists, this has _maps_ of your area and its stations as well. [Order from Bruce Elving, PO Box 336, Esko MN 55733-0336. Price Range: $11.00 + approx $1.00 s/h]

The M Street Radio Directory, M Street at 800-248-4242 or +1 212 473 4668 voice, or +1 212 473 4626 fax. The address is M Street Corp., 304 Park Ave S Floor 7, New York, NY 10010 USA. costs $29.95 + p/h,

Q6. I remember a great show called (x). When was it aired?
A6. Check with subscribers to OTR newsletter, or look through the program database (WWW or FTP).

Q7. Are there any books about OTR?
A7. Yes, there are several books related to OTR. See the WWW page or FTP site for a list of some of them.

| Jim Widner left this address for a bookstore specializing in OTR
| books:

| Rainy Day Books
| P.O. Box 775
| Fitswilliam, NH 03447
| (603)585-3448

| Bob Crump reminded us that most good used book stores will do a
| nationwide search for a title, if given enough time. Henry Brugsch
| <henry@g0gku.demon.co.uk> related a good experience with the following
| on-line bookstore:

| Acorn Books
| acornbks@netcom.com

Q8. Does anybody trade tapes of OTR shows?
A8. Yes. Check with subscribers to the OTR newsletter. We hope to get a database of private traders as well. Leave a note in the OTR newsletter if you want to be listed in this database.

Q9. What's this stuff about Copyright?
A9. The copyrights on most OTR shows have expired. A few copyrights have been renewed. Examples of the latter include The Shadow and some of Arch Oboler's productions.

Q10. How can I get my local radio station to broadcast OTR programming?
A10. Call the station and tell them of the many people who like to listen to OTR. Suggest this programming will increase listenership and help buy things from their advertisers.

Q11. I have some old transcriptions and tapes, how can I make them sound better?
A11. You might try using a good equalizer and/or digital signal processing unit (DSP) between the playback and recording devices. Some people have mentioned that the Radio Shack DSP unit does a fair job. There are also other, more expensive DSP units available from Ham radio stores and audio stores. Some subscribers have attested to the efficacy of the Timewave brand of DSP units.

Randy Riddle (Rriddle@aol.com) left this information:

There's a firm that sells archival quality turntables
and sound processing units that can dramatically
improve old recordings. Their sound processing unit
runs around $300.

Audio 78 Archival Supplies
PO Box 187
San Anselmo, CA 94979
415-457-7878

| Henry Brugsch <henry@g0gku.demon.co.uk> left this information about
| Digital Audio Format (DAT):

| The dat-heads mailing list maintain an archive of all
| their material at the following site:
| ftp.atd.ucar.edu. Log on with the usual anonymous
| then, your routine password. head on over to
| /pub/dat-heads/ You will find a wealth of info up
| there. All the digests to the current day, and mike
| faqs, as well as market postings on equipment. Highly
| recommendable for anyone to get their feet wet in this
| media. Happy taping

Q12. Are there any OTR clubs near me?
A12. Check the club listing in the WWW page. We will add clubs as they become known to us.

Q13. I have some OTR tapes of the same program, but their dates are different. Why?
A13. Sometimes broadcasts are dated according to their original broadcast date, and sometimes according to a date on which they
| have been rebroadcast. For instance, the Armed Forces Radio
| Service rebroadcast many Mutual Radio transcriptions at a later
| date. Your tape may be of one of these later dates. Alternately, somebody might have made a mistypopgoof.

Q14. Is there any place where I can get a complete listing of all the episodes in a particular program serial?
A14. Some of the larger vendors / collectors may have this data. If you find such a publicly available source, we can make it available in the Internet OTR file repository.

| Some of the OTR Newsletter subscribers have contributed Program
| Logs for several well-known series. The logs are available at my
| ftp/www site.

Q15. Is there any place where I can get a written synopsis of the themes of OTR programs?
A15. Again, some vendors include this information with their catalogs. If you would like to contribute your interpretations of the themes, send them to the OTR newsletter for inclusion in one of our databases.

| Jim Widner has contributed some synopses / introductions to
| various programs. They are on file at my www/ftp site.

Q16. Is there a World Wide Web page (URL) or FTP address that I can access for more info?
A16. Yes, there are two WWW sites, as well as two anonymous FTP addresses and a Gopher. The two WWW sites are independent, and contain different information, but each can be accessed from the other. The FTP directories each contain different files & information. My FTP site holds OTR station lists, catalogs / libraries, bibliography, the most recent FAQ, etc. The Airwaves FTP site holds archived copies of the OTR digests as well as other files relating to -Airwaves- and rec.radio.broadcasting.

(1) My site:

World Wide Web URL:
ftp://ftp.crl.com/users/ro/lgenco/otr.html

FTP:
Anonymous FTP to ftp.crl.com
directory: users/ro/lgenco

(2) AIRWAVES E-Publishing's Site:

FTP:
Anonymous ftp to radio.aiss.uiuc.edu,
directory: misc/rec.radio.b-cast/OTR.

GOPHER:
gopher radio.aiss.uiuc.edu 7070
(select "OTR")

World Wide Web URL:
http://radio.aiss.uiuc.edu/~rrb

For subscribers without normal FTP access, there is a (presently experimental) FTP-by-mail server. For more information, send

email in -exactly- this format:
To: lgenco@crl.com
Subject: Request otrhelp
(the body of the message is ignored)

Q17. How do I (un)subscribe to the OTR electronic newsletter?
A17. To subscribe, send email
To: otr-request@airwaves.com
Subject: SUBSCRIBE

To unsubscribe, send email
To: otr-request@airwaves.com
Subject: UNSUBSCRIBE

(The body of the message is ignored in both cases)

Q18. Can I get archived copies of old issues of the OTR newsletter?
A18. Yes. The OTR Digests and Index are updated three times a week, and are accessible through the WWW pages mentioned above, or from the AIRWAVES anonymous FTP site mentioned above.

Q19. What is the best way to archive OTR programs?
A19. The most popular way seems to be reel-reel tapes, using each of the four tracks to record monophonically. Cassettes are generally fine for portability / ease of use / exchange, but they suffer from several problems when used as a long-term storage medium. The Hi-Fi VHS tape is gaining in popularity because of its six-hour storage capability and relatively robust mechanical construction.

Some subscribers have mentioned TalkingBook tape recorders as a possible archival method. These recorders operate at 15/16 ips (half the speed of a standard cassette recorder), and can operate in 4-track mode, thus giving up to 6 hours of play time on a standard 90 minute cassette.

Don Coco (djc@crl.com) left the following information about sources for Talking Book type equipment:

The American Printing House For The Blind
1839 Frankfort Ave.
Louisville, Kentucky 40206
Tel. (502) 895-2405
Sells Braille and recorded books, 4 track recorders which record at 15/16 IPS, and other products of interested to Visually Impaired persons. Price of 4 track recorder around $175

I.R.T.I.
1411 West El Camino Real
Mountainview, Ca. 94040
Tel. (415) 961-3161 or (800) 322-4784
Sells all including Radio's, TV's with SAP, Reading Machines, Computers ETC.

| Conrad Trautmann (CONRADTRAUT@delphi.com) left this note in
| response to a query about finding used reel-reel machines:

You can also call Harris/Allied used equipment
division at 1-800-622-0022 or call Radio World
magazine at 703-998-7600 for subscription
information. Radio World is an industry trade and has
used equipment listings in the classifieds once a
month.

Q20. My old reels squeak. Why does this happen, and can I fix it?
A20. There are at least two causes for "squeaky reels" on a
reel-reel tape recorder. (1) The tape edge may be rubbing
against the rim of a distorted take-up reel, or (2) the oxide
may be sticking to your erase (or other) heads. If the former,
the least frustrating alternative is probably a new take-up
reel. If the latter, Fred Korb left this note:

If you have any squeaky reels that you would like
to recover, I will be glad to send you more
information on how to do it. Just send me a
stamped self addressed # 10 envelope and I will
respond. Send your request to: Fred Korb, c/o
Oldtime Radio Collectors and Traders Society, 725
Cardigan Court, Naperville, Illinois 60565-1202.
I am willing to help you preserve the sounds of
radio days gone by.

| [Editor's note: I tried Fred's method. Although temporary, it
| does indeed work! I'd recommend it for those squeaky tapes that
| you wish to re-record onto newer reels. Much less tedious than
| manually holding a cotton swab soaked in tape head lubricant
| against the tape!]

Q21. Where can I find more information about restoring antique radios?
A21. An excellent place for discussions about antique radios,
phonographs and accessories is the rec.antiques.radio+phono
newsgroup, created by Bill Robie.

Actually, the first station in the country to broadcast "AM Stereo" was WOW-AM 590 in Omaha, NE. They were a test site for one of the first prototypes of AM Stereo. The Kahn system (far superior)...WOW ran several promos telling people to tune one radio just to the left of their freq. and another just to the right.

AM Stereo receivers, at this point had not been produced, nor had the far inferior CQUAM system.

PETER Q. GEORGE (PGEORGE@WELLESLEY.EDU) wrote:

: Think about this....only a handful of Boston's FM's have their original
: call-letters.....WERS,WGBH,WBUR,WBOS,WHRB,WPLM,WCRB and WBCN since 1967.

: Ah, MEMORIES!!!

Indeed! I went to school in Boston during 1970-1974, and again from 1976-1978. Around 1970-1972, I was at WTBS-FM 88.1, and during the summer of 1972, I was a summer replacement engineer at WUNR 1600/WBOS-FM 92.9 in Brookline. You have indeed brought back some memories.

: 88.1 WTBS Cambridge College Radio with 10 glorious watts!

Not just 10 glorious watts, but also (according to one of their station promos with very dramatic-sounding music in the background):

. . . Limited power output!
. . . Unpredictable operating characteristics!
. . . And REDUCED ENVIRONMENTAL TOLERANCES!!!

All quite true, by the way!

: 92.9 WBOS Brookline (stereo) The Music Theatre//WBOS-1600

This was just *slightly* before my time. In 1972, I used to drive out every day to their transmitter site of Saw Mill Brook Parkway (where both the AM and FM were located) to work as their summer replacement engineer. I saw all the Music Theater tapes stored in tape boxes up against the back walls of the transmitter building, but we were not allowed to play them (on FM only; the AM was mostly ethnic programming by then) except in an emergency. The FM studio consisted of one room with two record turntables, a cart machine, and a microphone. (AM audio was piped in from downtown, except during occasional simulcasts -- i.e., mostly those times when they were not able to sell time on AM. [I can't verify this -- I wasn't in marketing])

One day, I noticed that the level from one of the turntables was substantially down on one of the two channels, so I put one of the tapes on the air for 15 minutes until I could fix it. The music was not substantially different from that which we played on the turntables, but it _was_ different from the scheduled playlist. The next thing I knew, I got an earful over the studio phone line telling me not to do that again!

: only thing your would here is (example)...."This is WBZ-FM, a Group-W station,
: Westinghouse Broadcasting.....for Boston". All mono, all the time. They
: were the loss leader for BZ' as were all of the Group-W FM 's around the
: country BEFORE Westinghouse knew what to do with FM. Can you believe that

: WBZ-FM was sold in 1981 to Greater Media as an auotmated "shlock rock" station
: for 4 million dollars. Today that same station, now WMJX (Magic 106.7) is
: one of the most listened to station in Boston. Stick value...$21,000,000
: and going higher all the time. It does give WBZ Radio a run for the money!

Of course, at the time, the FCC had more stringent limits on the total number of stations any given owner could have. Thus, the sale of WBZ-FM in Boston might have to be looked at in the aggregate, considering all of the other stations that Westinghouse might have bought and sold around that time. It may well have been a good deal for them, if, by selling WBZ-FM, they were able to pick up and develop a more valuable property elsewhere.

The WOR-FM jingles you mentioned didn't last long. They supported a format which was very progressive for its day (honchoed by Scott Muni, who took it over to WNEW-FM in '67). RKO/General (yes the same owners of WRKO among many others) went Drake in a big way in '67. We then got the same basic package that all the Drake stations got.

PRESS RELEASE

FOR IMMEDIATE RELEASE

FOR INFORMATION CONTACT:
Craig Bailey
CptnBoogie@aol.com

"FLOYDIAN SLIP"
ARRIVES WITH NEW MOON

(Burlington, VT USA)-- Pink Floyd fans gets their own monthly radio show, when WEXP-FM debuts "Floydian Slip," Friday, December 2nd at 11 PM.

This locally produced program will feature music from all phases of the legendary band's history-- from early works with founder Syd Barrett to the current band line-up of today-- and include solo works as well.

"Floydian Slip" is the creation of Craig Bailey, evening announcer at WEXP. "It seemed like the perfect late night show," Bailey said, "and there's such a devoted following for this band, I thought there'd be a lot of interest."

Bailey's spent the past few weeks promoting the show using the resources of the Internet. "Between newsgroups devoted to Floyd-- and Echoes, the Internet mailing list-- there are thousands of fans we can talk to. Within hours of posting my first message about the show, I'd gotten back a half-dozen responses," Bailey said. "The most impressive was a guy in Saskatchewan, Canada who wondered if WEXP had a satellite uplink so he could listen." (They don't.)

"Floydian Slip" will air every night there's a new moon, from 11 to midnight. "We thought when the moon was dark would be the perfect time," added Program Director Joel Bolton. "Dark Side of the Moon-- what's Pink Floyd more known for?"

The program debuts Friday, December 2nd, on WEXP 105.1 FM.

Comments or suggestions can be sent to: Floydian Slip, WEXP, P O Box 105, Burlington, VT USA 05402-0105. Or emailed to CptnBoogie@aol.com.

In <3b11pf$o7o@vixen.cso.uiuc.edu> MARK808@news-feed.delphi.com (MARK808@DELPHI.COM) writes:

>It's time for PBS and NPR to drop the pretense. They *have* been
>commercial operations for years now, ever since restrictions on
>underwriting were dropped.

You're right. Lots of us keep fighting and losing this battle. PBS/NPR are now totally incapable of fulfulling the mandate of the original Carnegie Commission Report because they are intimidated by advertisers. Do you think "Marketplace" is going to cover G.E.'s legal troubles in any depth?

>It's also time for non-comm audiences to be measured the same way
>commercial audiences are, at least in radio. That way, the "liberals,"
>"moderates," and other sensible people who have fled to NPR, where some
>intelligence still remains, *would* be measured in the Arbitrons (as
they
>are not now, except for the special figures NPR stations get).

But the "special figures NPR stations get" are complied from the same research that goes into the commercial Arbs. The reason hardly anybody sees them is that in some markets, NPR stations beat the pants off a lot of commercial stations. The commercial stations don't want *THAT* getting around.
>

>I also would not let so-called "Christian" broadcasters hide behind the
>skirts of the NCE-FM rules with their cranky one-dimensional version of
>the world. Under my scheme, any organization that claims a religious
tax
>exemption would lose its NCE-FM license.

AMEN to that. Also something needs to be done about the interference to real radio stations on the low end of the band because of the psuedo-religious noise from all the translators popping up.

5353. Satellite Radio

Newsgroup: rec.radio.broadcasting
Date: 1994-11-26 01:51:51 UTC
From: "ROBERT J. CRUMP 785-6650 or 324-1650 or 488-0939" <JCRUMP@A1.UTMEM.EDU>
Message-ID: <3b64bn$kbf@vixen.cso.uiuc.edu>
Source record: 36305

In issue #960, Joe Cassara asked about receiving radio signals via satellite. This intrigues me also. The only problem is that I don't have a satellite dish. I have seen it done and helped other people tune their systems to receive Old Time Radio shows.

In the magazine Satellite Orbit, one page lists a hundred or so radio stations that can be received via satellite and tells of more. It lists the following instructions for receiving them:

1. Move your dish to the satellite the radio station uses.

2. Set the satellite receiver to the proper channel.

3. Using your receiver's audio tune function, tune to the frequency(ies) indicated.

4. If the station broadcasts in stereo, its listing will have two frequencies follwed by DS. For example, 5.58/5.76 DS. DS indicates discrete stereo. 5.58 is the left frequency, 5.76 is the right frequency. Set your audio tuning to discrete stereo and tune the left and right frequencies for stereo reception. If a station is not in stereo, it broadcasts in the monaural format. You only need tune one frequency. If reception is not clear, try setting your receiver's audio bandwidth to narrow (N).

5. You will see the TV picture of the video service that uses that satellite channel, but you will hear satellite radio!

Following is a long list of of radio stations you can receive. I am not going to type them in, but here are a few:

Station Satellite Channel Audio

Yesterday USA G3 17 6.2
Yesterday USA G7 14 5.74
Yesterday USA S3 5 6.8
For the People Talk Radio F1 2 7.5
Talk America S3 9 6.8
AFRTS S2 20 7.4
AEN F3 1 6.2
C-Span F3 7 5.22
WCBS-New York G4 20 7.4
WCCO-Minneapolis G2 15 6.2
WSM-Nashville G5 18 7.38/7.56, DS

There are a lot more. I suggest you buy a copy of the magazine. The one I have is October 1994, but this may by in each issue. I don't know.

As I say I am only passing on information about which I have no first-hand knowledge. Good luck.

Bob Crump (jcrump@utmem1.utmem.edu)

[Moderator's Note: For in-depth information on satellite audio (and video for that matter) write to Robert Smathers (roberts@triton.unm.edu) or look in the AIRWAVES web page(s) for the satellite info page. Bill]

5354. Stereo AM

Newsgroup: rec.radio.broadcasting
Date: 1994-11-26 01:51:52 UTC
From: mikerleb@random.ucs.mun.ca
Message-ID: <3b64bo$kbk@vixen.cso.uiuc.edu>

Yes, we here in Canada (unquestionably one of the BEST countries to live in) also have AM Stereo. I work at VOCM Radio Newfoundland which broadcasts at 590 KHz (LIVE 24 hours a day) from St. John's, Newfoundland (North America's Oldest and most Easterly City). We are 50KW and cover the North-Eastern part of the Island. Our signal is also available on the ANIK E-1 sattelite and, therefore available for all of North America to enjoy. We use a totally solid state transmitter using CQUAM stereo.

I have been driving a Chrysler LeBaron, and I have found that MOST Chryslers, Dodges, and some General Motors products have AM Stereo radios as standard equipment. Sounds GREAT!

>Sony's go under the A-Max mark. But now digital broadcasting is being
>tested and soon we will have another opportunity for the FCC to botch!
>This will probably totally obliterate any interest there ever was in AM
>Stereo. G3J.

This may not be in the hands of the FCC. There is presently limited technical information available concerning the IBOC-AM (in-band on-channel) systems being considered in the USA, but it seems almost sure that they will NOT be compatible with AM stereo. It would seem obvious then that radio stations and comsumers would have no interest in investing in AM stereo if it has a chance of being put out of service in the near future, regardless of the system selected by the FCC as a standard.

I remember a few years ago here in Canada some AM stations switched to AM stereo, but I don't know anyone with a stereo AM receiver. Anyways, our FM spectrum is not as congested as the FM spectrum in the USA, and so some of these previously AM stereo stations have now or are currently in the process of switching to FM.

yes it is true that there is AM stereo in the US.

A group of broadcasters, USA Digital (CBS Radio, Group W Radio, and Gannette Broadcasting) are developing digital AM broadcasting.

They have an expermental station on 1660, at a Westinghouse Facility in Cincinnati, where they are testing and refining its operation. It uses Musicam audio encoding and transmits 128 KBz in a standard US AM broadcast channel.

>there is a misguided attempt to paint a pretty face on Ancient Modulation
>here in the states. Some people here feel that two channels of narrowband,
>noisy audio with limited response is better than one.

I've met broadcast people who can't stand listening to FM because of the 'picket-fence' effect of multipath. They prefer listening to lower quality mono AM that does not suffer from this impairment. I personally can't stand listening to AM, stereo or whatever.

>each Thursday. I apologize for this error, and wish to announce that
>effective tomorrow (November 24), the Unshackled aired by HCJB on
>Thursday will be different from that which is run on Tuesday.

How long did it take for anybody to notice? Far as I can tell, "Unshackled" has been running the same program (or undistinguishable variations) for thirty or forty years.

5361. Kansas City Radio Watch (11/27/94)

Newsgroup: rec.radio.broadcasting
Date: 1994-11-28 00:15:09 UTC

Source record: 36317

Bonneville Broadcasting's decision to ban gambling-related ads on its radio stations is costing a KCMO(AM) talk show its time slot.
When the Bonneville policy was announced earlier this month, local Bonneville manager Ron Carter said the policy would not affect news or talk show coverage on KCMO or news/talk station KMBZ(AM).
However, the Woodlands racetrack in Kansas City, Kansas has been told that its weekly talk show on dog racing won't be heard on KCMO starting January 1.
The show had been on KCMO for five years.
Carter said the talk show will be leaving the air because it was actually part of the track's advertising contract with KCMO.
Bonneville made the policy decision because its owner, the Church of Jesus Christ of Latter-Day Saints (Mormon). The Mormon church opposes gambling.
*****
The closest thing the Kansas City market has to a "shock jock," KBEQ-FM's Randy Miller, has signed a contract for two more years at "Young Country Q-104."
Miller is also hoping to syndicate his morning show nationally.
Miller told the Kansas City Star, "there's always a need for interaction on the telephone, and I think I do that probably better than most guys in the country."
*****
Charles Osgood will broadcast "The Osgood Files" live from Kansas City on Thursday from KMBZ. While KMBZ' duopoly partner KCMO is a CBS affiliate -- and KMBZ is not -- KMBZ does carry the "Osgood Files" during its morning drive news block.
(This is an ironic twist for those of who know that KCMO and KMBC swapped ABC and CBS radio network affiliations 39 years ago...Thursday, December 1!)
Osgood will also be a guest on KCMO's "Mike Murphy Show" during his visit to Kansas City.
*****
I have been reading a book by Michael J. Weiss, "Latitudes & Attitudes: An Atlas of American Tastes, Trends, Politics, and Passions" (Little, Brown, and Company, 1994, $14.95). It is a fascinating book, written by the same guy who wrote "The Clustering of America."
It divides the U.S. into the 200+ Arbitron ADIs (i.e., "markets"). There are brief profiles on individual markets AND cross-tab-style charts showing each market's interest in various activities or products.
For musical tastes, here is how the Kansas City market rates. For comparison, I have also listed the number of radio stations catering to

those tastes:
Classical ..... above average interest (1 station+1 rimshot)
Country ..... above average interest (5 stations)
Classic Rock ..... high interest (2 stations)
Folk ..... above average interest (1 parttime rimshot)
Jazz ..... above average interest (1 parttime station)
Rap ..... below average interest (1 parttime station)
Modern Rock ..... high interest (1 rimshot)
Heavy Metal ..... above average interest (1 station)
Gospel ..... below average interest (numerous AMs + 2 FMs)
==> This, folks, is based on "research," which is supposed to be the
all-knowing, all-hearing (I almost said "all-seeing," but this is
radio) deity of formats.
Then why doesn't Kansas City have a modern rock station, or even a
modern-leaning CHR?
(Likewise, with this city's jazz history and interest, why is THAT
genre represented so poorly??)
Everything's NOT up to date on the Kansas City radio dial, it
seems. And don't tell me it's because of "research!" Horseshit!
(I personally would love to put up a translator for KLZR but don't
know how to go about it, how to pay for it, or even if it's possible with
our screwed-up allocation spacings....)
*****
Speaking of translators, the eastern KC suburb of Blue Springs, Mo.
has had one for a couple of years, relaying gospel broadcaster KCVO
from Camdenton, Missouri.
Imagine my surprise yesterday when tuning across the dial on I-70
when stopping for gasoline at Blue Springs and finding an AC format at
97.3.
I listened for a while and got lucky (with my radio listening, not
with anything else, believe me!): I heard a legal ID:
"Variety 93 is KGRC Hannibal-Quincy." Yes, the translator was
relaying 92.9 mHz, KGRC from Hannibal.
Hannibal must be more than 170 air miles from Blue Springs. I am
wondering if this translator wasn't in fact relaying another
translator. Reception of KGRC seemed extremely consistent considering
the distance.
I remember the debacle in Columbia during the mid-80s with an
attempt to relay KEZK(FM) from just about 120 miles away. It relayed
noise half the time.
Have any TV-FM DXers out there heard about this switch? Why would
a Hannibal station be interested in limited coverage of the KC metro,
which is on the other side of the state?

5362. Mid-Missouri Radio Watch (11/27/94)

Newsgroup: rec.radio.broadcasting
Date: 1994-11-28 00:15:10 UTC
From: Mark Roberts <transvox@tyrell.net>
Message-ID: <3bb7ee$dts@vixen.cso.uiuc.edu>
Source record: 36316

Columbia's newest radio station is presently operating out of a hotel room, churning out automated oldies.

KOQL(FM)'s permanent studios are still being constructed two blocks away in downtown Columbia at the former Jean Prange Intimates lingerie shop.

Reports in the Columbia Daily Tribune and the Columbia Missourian on "KOOL 102.3" focused heavily on the station's computer-driven CD jukebox technology. In one story, program director Chris Kellogg, said, "I'm excited about the technology, but I'm kind of worried about the future dinosaur status of disc jockeys. But there will always be a need for personalities to sit and chat with the listeners." However, my listening to the station this weekend indicated it was still running jockless.

Kellogg, by the way, was the former program director at KFMZ(FM) in Columbia until earlier this year.

The station is owned by Tom Cooke of St. Louis and Elmo Donze, owner of silent KSGM(AM) Chester, Illinois-Ste. Genevieve, Mo. and KBDZ(FM) Perryville, Mo. KOQL went on the air November 13.

Donze told the Missourian that he first started his application for the station six years ago. The station took so long to get on the air in part because twelve other applicants competed for the frequency and in part (this was not mentioned in the newspaper article) because the allocation was moved from 93.9 mHz to 102.3 mHz. The 93.9 mHz allocation was moved to Boonville, where it is now occupied by KTLH(FM), which went on the air in July.

Kellogg said the oldies format was chosen for the station because that format was underrepresented in Columbia.

I am not so sure this is true. Later on in this report, I'll show what the FM radio dial for this market now looks like.

*****

The advent of KOQL presented KARO(FM) with an arithmetic problem. Since 1986, KARO has been known as "K-102."

That was before KARO's move from 101.7 to 101.5 mHz as part of an 80-90 upgrade. The station has still been calling itself "K-102," or in some cases, "Mid-Missouri's K-102 at 101.5 FM."

Problem: KOQL is now closer to 102 than KARO.

Solution: change call letters, ditch the slogan, and even tweak the format a little bit.

Since mid-month, the station is KPLA, "a 50-50 mix of the latest music and the greatest music." Much to my surprise, the station uses its call letters constantly; one liner was "101.5 KPLA...A new name for your favorite radio station."

*****

OK, so what does this little market look like now? It's a good

lesson in how the reduction in mileage separations provided by BC Docket 80-90 have reshaped the FM dial in many medium-sized and smaller communities. (Columbia is big enough to be an ADI, but it is culturally distinct from the surrounding area. That's a nice way of saying it's a bit weird.)

A + indicates a new station made possible by 80-90, # indicates an 80-90 upgrade, ## indicates 80-90 upgrade AND frequency move:

88.1 KCOU, University of Missouri student-run station, alternative rock
88.9 KJLU, Lincoln University (Jefferson City), jazz, R&B
89.5 KOPN, adult alternative daytimes, special prgrs nights, some NPR
90.5 KWWC, Stephens College, jazz AM drive, easy listening days, student-run nights (modern, dance, 80s oldies)
91.3 KBIA, University of Missouri, NPR, classical days, jazz nights
92.3 KMFC, Centralia rimshot, gospel
92.7# KLOZ, Eldon fringe, hot AC, "Z-93"
93.9+ KTLH, Boonville rimshot, "lite" AC, "Lite FM," new in 1994 (AM: KWRT, local)
94.3 KZMO-FM, California rimshot to Jefferson City, country (to get 80-90 upgrade and probably relay KLIK(AM)) (KZMO(AM) silent)
95.7 KWWR, Mexico regional, country/farm, "Country 96"(AM: KXEO, local)
96.7# KCMQ, young country (AM: KTGR, simulcasts)
98.3# KFMZ, album rock
99.3# KCLR, Boonville rimshot, country, "Clear 99," market leader
100.1# KJMO, Jefferson City, oldies (AM: KWOS, talk)
100.5##KKCA, Fulton rimshot, automated oldies (was 97.7) (AM: KFAL, local)
101.5##KPLA, AC (was 101.7) (AM: KFRU, news/talk)
102.3+ KOQL, oldies, "Kool 102.3," new in 1994
103.1 KMFC translator in Columbia
104.7 KRES, Moberly regional, country and farm (AM: KWIX, local)
105.5# KZZT, Moberly rimshot, satellite hot AC
106.1+ KBXR, Ashland, adult alternative, "106-1 BXR," new in 1993
106.9 KTXY, Jefferson City, album rock (AM: KLIK, country)

==> Note all the rimshots. That points out the real effect: small town stations going after the bigger markets (and in one case, KCLR, winning big), leaving their COLs without locally oriented FM service. Their only local service is on AM.

Those who carelessly advocate dumping the AM dial altogether need to think about this situation. Not everyone lives in a big city or even a medium-sized city.

5363. Phoenix RadioWatchers #1

Newsgroup: rec.radio.broadcasting
Date: 1994-11-28 00:15:11 UTC
From: mhtv3@aztec.inre.asu.edu
Message-ID: <3bb7ef$dtv@vixen.cso.uiuc.edu>
Source record: 36318

Since this is the first Phoenix RadioWatchers report, a little overview:

Phoenix has about 2.5 million citizens in the metro area and 44 radio
stations. Three years ago, it was pretty bleak, with an incredible
amount of format duplication...SIX A/C stations at one point.
Now, at least by comparison, things are much more diverse.

The dial:

FM

88.3 KNAI/KPHF(2 stations owned by separate entities that share the
signal. KNAI is Spanish during the day. KPHF is English-language
Religion at night. Both are non-commercial)
89.5 KBAQ(K-BACH)Classical/NPR. Non-commercial college station.
90.3 KFLR(Family Life Radio) Religious.
91.5 KJZZ(K-JAZZ)Jazz(lite)/NPR. Non-commercial college station.
92.3 KKFR(Power 92)CHR/Urban. Consulted by HOT97/NY's Steve Smith.
93.3 KDKB:AOR since 1971.
93.7 KMEO(Cameo)New Age.
94.5 KOOL:Oldies.
95.5 KYOT(Coyote):"Smooth Rhythms"(Pat Metheny, Sting, Steely Dan,etc.).
96.9 KPSN(Sunny 97) Oldies.
97.9 KUPD:AOR.
98.7 KKLT(K-Lite)A/C.
99.9 KESZ(K-E-Z)A/C.
100.3 KZRX(Z-Rock)Heavy Metal.
100.7 KSLX:Classic Rock.
101.5 KZON(The Zone)AAA.
102.5 KNIX: Country.
103.5 KTWC: Eclectic MOR.
104.7 KVRY(Variety 104.7)A/C.
105.3 KRDS(Eagle 105)Religious.
106.3 KEDJ(The Edge)Modern Rock.
106.9 KMJK(Majic 107)Urban.
107.1 KVVA(Radio VIVA)Spanish.
107.9 KMLE(Camel Country 108)Country.

AM
550 KOY:Adult Standards(Unistar AM ONLY).
620 KTAR:News/Talk.
740 KIDR:Children(Radio AAHS).
860 KVVA(Radio VIVA)Spanish.
910 KFYI:News/Talk.
960: KOOL(KOOL Gold)Oldies(The origination for Transtar's KOOL Gold
satellite format).

1010 KXEG:Relgious.
1060 KUKQ:Modern Rock.
1190 KRDS(Eagle 105 simulcast)Religious.
1230 KISO(Kiss 1230)Urban A/C.
1280 KHEP:Religious.
1310 KXAM:Talk/Jazz.
1360 KGME(The Game)Sportstalk.
1400 KSUN:Spanish.
1440 KOPA:News(CNN Headline News audio).
1480 KPHX:Spanish.
1510 KFNN:Business and financial newstalk.
1540 KASA:Spanish.
1580 KCWW:Country(Origination for "Real Country" satellite format).

Next: The battles.

5364. Phoenix RadioWatcher#2

Newsgroup: rec.radio.broadcasting

From: mhtv3@aztec.inre.asu.edu
Message-ID: <3bb7eg$du1@vixen.cso.uiuc.edu>
Source record: 36319

Format battles:

COUNTRY
The summer Arbitrons(trends are due this coming week)showed four-year old challenger KMLE(Camel Country 108) beating market legend KNIX 12+, 25-54 and in morning drive. KNIX saw this coming six months ago...moving 17 year vet W. Steven Martin out of morning drive to Noon-3pm and bringing in the team of Hawk and Hunter to battle the hotter-than-hot Tim & Willy on KMLE. The audience didn't buy it. Tim & Willy shot to first place and Hawk & Hunter have been let go. KNIX is searching for a new morning show. GM Mike Owens (Buck's son...buck owns the station, Shamrock holds KMLE)says he offered the morning show back to Martin...who turned it down. KMLE flipped from religious(under the same calls)to Country in December 1990 and have built audience consistently since...but the addition of Tim Hattrick & Willy D. Loon has put the growth into high gear. The team was brought in from KRQ in Tucson, but Hattrick is a Phoenix vet(KKFR,KDKB,Y95)and Willy was Johnathon Brandmeier's sidekick at the old KZZP in the early-mid 80's. Neither had done country before.

AOR
KDKB beat KUPD 25-54 this book. KUPD(and sister AM modern rocker KUKQ)were acquired by KDKB's owner Sandusky Broadcasting
in a duopoly move this past summer.

CLASSIC ROCK
No battle...but one heck of a comeback story. This time last year, Citicasters' KSLX was on the ropes...a 2.4 12+ and 16th place 25-54. John Sebastian(KDWB,KHJ,KUPD,KTWV,WBMW) was brought in as PD. The winter book was worse...a 2.2, but spring and summer books have seen KSLX leap to about a 4 12+ and fourth place 25-54.

NEWSTALK
KTAR and KFYI are two-tenths of a point apart 25-54. KTAR is the more traditional of the two...KFYI, after struggling for years, hit gold with Rush Limbaugh and has now adopted the slogan"Hot Talk and Burning Issues". Former KFYI PD Tom Leykis' syndicated show airs from 7-11pm (tape delay).

A/C
Three stations all within 0.8 of each other. KVRY(Variety 104.7...formerly market CHR legend KZZP)leads with a 5.1 25-54. Variety has the hottest 70's-80's-90's mix. KESZ(K-E-Z)has a 5.0...they are much more personality oriented, with a broader music base. Longtime A/C leader KKLT(K-Lite) has a 4.3. A station that for years did better the softer they went, is now dumping the Carpenters records and promoting itself as "The better, brighter K-Lite".

OLDIES
KOOL-FM appears to be back from the dead. Bonneville's KPSN(Sunny 97) delivered a near-knockout punch in the spring of '92 when it flipped from A/C to oldies. KOOL, on its way to recievership at the time, was in no position to respond as Sunny debuted with a 4.2 12+ and knocked KOOL to a 2.8. But the key is "near-knockout"...KOOL got back up... Summer Arbitron has them with a 4.7 25-54 to Sunny 97's 2.7. KOOL kept its longtime (10 years plus) PD Tom Peake, tightened up the music, brightened up the technical sound...and replaced most of the air staff. Lee Baby Simms(KRLA,KYA)is in for mornings...and Machine Gun Kelly (KHJ,KTNQ,KOST,KCBS-FM)is in afternoon drive. KPSN shouldn't be counted out, though....morning jock Danny Davis(KRIZ,KFMB,KIMN,KKSN)is a pro.. and afternoon guy Steve Goddard is a household name in the market, having spent years at KZZP,Power 92 and the old Y-95(as well as KCBQ, San Diego). Aggressive new GM Buz Powers arrived in August from Bonneville's Classic Rocker in Dallas. This ain't over.

That's the overview....next time..news as it breaks!
Michael Hagerty

5365. Pittsburgh Radio Watch

Newsgroup: rec.radio.broadcasting
Date: 1994-11-28 00:15:19 UTC
From: AMCCOY@delphi.com
Message-ID: <3bb7en$dum@vixen.cso.uiuc.edu>
Source record: 36321

(Copyright, Pittsburgh Post-Gazette. Reprinted here
by permission. Republication prohibited in any medium.)

Quinn Unplugged? WRRK-FM morning host Jim Quinn has been getting calls from a few listeners complaining about being barred from listening to his show at work. An employee at Frito-Lay's distribution center told him complaints by some female co-workers prompted a decision from corporate headquarters in Texas to institute a no-radio policy.
Frito-Lay corporate spokesperson Lynn Markley says the ban isn't only on the Quinn program or WRRK, but amounts to a radio blackout at the loading dock. She says the decision wasn't because of his show. ``It wasn't because of one station. We were playing a lot of stations up there. Unfortunately, having the radio on became disruptive.'' But, she added, the radio ban affects only the company's two Pittsburgh distribution centers.
Quinn doesn't see it as a matter of corporate policy against a radio in the workplace. ``They've taken upon themselves to decide what they can listen to - to eliminate the radio because they don't like the content of the show'' and that that content is ``something that constitutes a threatening work environment. What next - magazines, newspapers?''
If it was indeed a factor in the decision, it's a problem as thorny as the smokers vs. non-smokers battle for dominance in public places. Unlike the controversy over access to pornographic materials on the Internet at Carnegie Mellon, radio is a communal medium. Quinn's show isn't for everyone. He has a right to talk. Listeners who find his humor offensive or upsetting have a right to tune it out. But what happens when more than one person controls the radio dial? Compromise can work when it's a matter of oldies on Monday and country on Tuesday, but dealing with material with the potential to offend requires trying to find solution that works for everyone. Maybe we'll end up a nation of isolated Walkman listeners.

Larry O'Brien and John Garry are headed back to the local airwaves. WTAE-AM has hired the popular radio team to host its morning show.
They'll sign on Dec. 5, replacing the current "Newsline" program, an all-news format that airs weekdays from 5 to 9 a.m.

WBZZ-FM has hired ``Downtown'' Billy Brown for the 3 to 7 p.m. shift. He starts Monday.
Brown comes from Nashville and before that worked in Atlanta and Baltimore.
He replaces Clark Ingram, who's leaving town for a program director

post in Rochester, N.Y. Ingram's assistant program director duties will be taken on by B94 production director David Edgar, who is also doing the noon to 3 p.m. shift.

Mark Andrew is on overnights at WZPT-FM, the new all-''70s format. Andrew previously was a part-timer at WVTY-FM.
WZPT has also hired long-time Pittsburgh jock Ron Chavis for part-time/weekends.

WDSY-FM (Y108) has extended an interesting employment invitation to the city's out-of-work hockey players. The station is offering sales rep jobs to any idle Penguins looking for something to fill their idle hours - or maybe a little extra holiday cash.
Sales director Doug Abernethy says professional athletes have a lot of the same qualities he looks for in a sales staff: aggressiveness, discipline and ambition. After all, radio sales is a tough game, too.
Even if the strike ended soon, the training wouldn't be wasted, Abernethy says. ``Some athletes don't have business skills to fall back on once their careers are over. When you're talking about a physical sport, who knows when that day may be.''
There are no commitments yet, although Abernethy says there's been some interest. If any players sign on with the station, they'll go through a short training period of several weeks and then go to work developing new retail business.

WTAE-AM talk show host Lynn Cullen received Contact Pittsburgh's first annual ``Golden Ear'' award. Contact Pittsburgh, a crisis hotline center, instituted the award to recognize ``good listeners.''
And WTAE news anchor Alan Boal was named Radio Broadcaster of the Year by the Champions Association of Pittsburgh. Champions Association is a community service agency that provides educational and recreational opportunities for inner-city youth.

``Pittsburgh Exposure,'' a series of recorded performances by the Pittsburgh New Music Ensemble, will debut on WQED-FM.
``Pittsburgh Exposure'' consists of selections from recent New Music Ensemble concerts. The four-part series will run weekly on Tuesdays at 10 p.m., starting November 15. Composer and New Music Ensemble director David Stock hosts the show.
Although it's airing on classical WQED, ``Pittsburgh Exposure'' was produced by Mark Yacovone and WDUQ-FM and will be carried nationally.
After its run, the series will be replaced by another local program - ``International Music from Carnegie Mellon,'' which is devoted to classical music from the 18 through 20th centuries, with a focus on Latin American composers and performers.
``International Music'' will run for the following six weeks, starting Dec. 13.

WDVE-FM is celebrating its 25th birthday - which is no mean feat when you consider the average life of a radio format. It's like turning 100 in human years. It's very rare that a station/format

can end up being older than a portion of its listenership.

Around the Dial:

Pittsburgh Piranhas games are being carried live on WYJZ-AM (860), WPIT AM (730) and on WQTW-AM (1570) in Latrobe.

The FCC has approved the sale of WWKS-FM (``The Force'') and sister station WBVP-AM in Beaver Falls.

When New Paltz NY was about to come on with Z-rock for Poughkeepsie,
mysterious billboards began appearing. One showed each of "CZX"
"Q-92" "WRWD" "PDH" "K-104" in the "no whatever" circle with a
slash thru it, with the notation "Poughkeepsie Radio Really Stinks!"

Later on an "Untamed Radio is Here Z Rock 93.3 FM"
billboard was seen.

Other than Fat boys Dr. Dre and Ed Lover covered only by frying pans, the
Billboard campaigns in metro NYC haven't been anything too fantastic lately.
(they are the morning team on Hot 97 via Yo!MTV raps)

5367. radio books ?

Does anyone have suggestions on books I should buy for Czech Radio while I am vacationing in the US?

We are a pretty big operation (1600 employees) - so any book that's known as the "Bible of...for radio" will find its audience here, no matter how specialized or how general! we have 3 nationwide domestic stations, (one news and music, one 'family' oriented, and one classical) a regional network of 8 stations, foreign broadcasts, and then we have departments from public relations to programming to technical to education and training (and lots more in between).

Thanks in advance!

: and why do they exist? Also, what is the Canadian equivalent of the
: Emergency Broadcast System (er, I mean the Emergency Alert System)?

I'm about as far from Canada as you can get in the 48 states, but I know
the answer. Only several prefixes were assigned to Canada by treaty --
not all the C's. They have CJ*, CH*, CK*, and I think a few more. Other
two-letter combinations were assigned to other countries, like CM* for Cuba
and 4V* for Haiti, for example. Mexican stations are XE*. But the USA
has all W* and K* combinations.

Please note that some of this info MAY be out of date, because I
haven't been an active AM BCB DXer for many years. Who has the time?
Some 25 years ago I was even a member of the National Radio Club! I
may write to their address posted on another thread to rejoin (and to
see if they remember me!)

5370. why Chuck changed from WGN

Newsgroup: rec.radio.broadcasting
Date: 1994-11-28 00:15:30 UTC
From: mitch.scott@WPCUsrGrp.MB.CA
Message-ID: <3bb7f2$e2i@vixen.cso.uiuc.edu>

Cross-posted to: rec.radio.broadcasting,chi.media

I first found out about Chucky Shwirsky<sp> leaving WGN for WJR, in RRB/AIRWAVES. A little later on, I was listening to WGN, either in the early am, or in the the evening, anyways there were numerous GN staffers on air, Lyle Dean, Bob Collins and a few more, all chatting about the great years Chuck enjoyed at GN, shared a few amusing stories about him, and went on about how they'll miss Chuck at GN, the tone of the entire segment on Chuck was very flattering and respectful towards him...Just today, a little question popped up in me, why did Chuck leave WGN? From the sounds of it, it wasn't a personality conflict with other GN personalities?...Was it a money issue? Did WJR offer him a package he just couldn't refuse, and GN wouldn't match? Anyways, I'm real curious and would appreciate if someone would fill me in. Thanks ahead of time. and btw imho jr reeled in one heck of a sports personality, to compliment an allready outstanding station.

i agree!!! when i was a kid growing up in north carolina i used to like
to listen to clear channel stations in new york, chicago, &c at night
and pre-dawn until i lost the signal. i especially like to listen to
bill bailey who was working the overnight shift on wls-am and don imus
who did the morning shift on wabc-am [i didn't get too much listining
time]. when i was growing up i longed to see the rest of the world
outside of north carolina and listening to news and commercials on
the clear channel stations allowed me to imagine what it was like to
live in the big cities that i had never seen.

interestingly, i now live in chicago...

Yes, there are a few. TM Century and JAM Productions, both of Dallas,
have numerous demo CD's. Making .wav files of them would be very time
consuming
since they are packed! But the new iRock[TM] jingles should be ready soon at

http://www.irock.com

Oh...iRock.Communications is one step beyond conventional radio. The all new
iRock.com is coming...stay tuned.

Haven't seen any CDs with radio jingles, however a couple of years ago I visited the musem of Broadcast Communications in Chicago and they had an archive of some the radio jingles from the 60's and 70's of a few Chicago radio stations on a cassette tape format.

Some companies, JAM and Thompson Creative come to mind,
produce CDs with jingle packages on them.

I don't think they're available to the general public, not even
to the readers of this newsgroup, unless you're the program or
production director of a station.

Best suggestion is to find a friendly prod dir who knows you collect
these things and hope that someday he'll send you the CDs when
he has the authority to do with them what he wants (worked for me!)

Hi Dennis,
When the 3rd class license was deep-sixed (late 1970's?), the
replacement no-test permit was free, and stayed free for the next ten
years. In the late 80's the FCC began charging $35 for it, then this July
it jumped to $45.00. People who work at non-commercial stations can
still get them free, but the free ones are stamped "NCE" for
Non-Commercial Endorsement. ---Dan

Earlier this month, Fred Smith, one of the members of the legendary rock group of the late 60's - the MC5 (from Detroit)- died of a heart attack. As kind of a tribute to him and the group, a WWW Page was created with the help of many contributors. Some were hardcore fans; some media folks; some contributed stories and info about how much they hated the group and gave accounts of their recollections. In a certain way, that even seems kind of fitting for this grandfather of punk bands in America. =8)

The page still could use more input in the way of text, audio and graphics files. What have you? It still would be nice to hear from folks like Lenny Kaye and Wayne Kramer.

The address is: http://131.188.190.131/~mikel/fred.html

Put it in your Bookmarks/HotList:

<A HREF="http://131.188.190.131/~mikel/fred.html">Fred Smith/MC5 Page</A>

Come and visit; come and contribute. Radio and newspaper folks: let us know if you if you post or pass on the address to your listeners or readers. Smithserv readers: feel free to re-post this to appropriate groups in your local areas or on the commercial services' usegroups. Thanks!

charles hobbs asks in Airwaves 964

>I wasn't aware that US (or other foreign) interests were allowed
>to own Mexican radio stations (Of course, I could be wrong . . .)

I don't think Charles is wrong, but there is a provision that Gringos can own land, business within a certain area from the border. XETRA's transmitter is in Rosarita, XETRA-FM, XHRM, and XHTZ transmiter is on Mt.San Antonio. You can see this from downtown SD -- at least when we Californians are buring cleaner, expensive gasoline! I believe the same goes for radio w/pictures (TV); but don't know of any gringos owing them. Bottom line is that Noble owns XETRA AM/FM. I will try to clarify the U.S./Mexico rules on this.

From: gmdrawhorn@ucdavis.edu
Message-ID: <3bb7fu$e4a@vixen.cso.uiuc.edu>
Source record: 36338

I want peoples opinions on the FCC's regulation that states that
non-commercial stations can only do on-air fundraising for their own benefit.
I note that many religious broadcasters constantly violate this rule by
fundraising for their licensee or even political interests (pro-life
groups or local churches). This is a clear violation of the FCC rules as
a university once tried to raise $ for their scholarship fund by an
on-air auction and got in deep doo-dah. This seems so different from what
the FCC allows for commercial stations and really restricts what
non-commercial stations can do in terms of charitable work...although it
also clearly is designed tkeep charlatans and those who would make use of
Non- Commercial licenses to commercial advantage out of the game.
I've heard lots of complaints about one group of b'casters who have
virtually set up a profit-making entity around religious NCB
licenses...it seems that the FCC would be warranted to do audits of
these stations that fundraise for specific evangelists and their
"causes".I think these sham stations should be shut down and their
frequencies given over to local community groups.

Jerry Drawhorn.

:getting around.

Are you sure about that? Why don't the NPR stations start shelling out some bucks and subscribe to Arbitron and get "real" numbers, instead of claiming "special figures"? Then if in fact they did "beat the pants off" the commercial stations as you claim, they could boast to the whole world about it. And not just those stations at the bottom of the ratings pile, but let's see if they can at least be competitive with the upper etchelon of stations. But that would bring NPR stations into reality, and they don't want to leave their dream world.

:AMEN to that. Also something needs to be done about the interference to
:real radio stations on the low end of the band because of the
:psuedo-religious noise from all the translators popping up.

Assuming that "real" radio stations are in the NCE end of the band. If they were "real" radio stations, they wouldn't be there. They would be slugging it out for ratings with those at 92.1 Mhz and above.

Mike,

Randi Rhodes, the DJ at NYC's 'APP and the Randi Rhodes talk host in
the Miami area (forget the station -- WIOD?) are one and the same.
When Emmis bought 'APP, Randi took a PD job in Dallas, TX, had a bad
break there, and ended up in the Miami area. Last I heard, she's enjoying
herself in the talk format.
She used to be online on Prodigy. Her ID was (is) rffx68c@prodigy.com.
I haven't heard from her in almost a year.

-Gene

Actually...there were many stations testing AM stereo at that time. KDKA, although now broadcasting AM Stereo in C-Quam...actually tested using the Kahn system. Mr. Kahn was here frequently during the testing and modified a number of Radio Shack table model radios to receive his signal. We used the tune a little to the left and right bit to. HOWEVER --- a Group W lawyer was stationed at the FCC the day approval for AM stereo was expected. When the official approval came for stations to broadcast (NOT TEST) in AM stereo --- he called us --- we then threw the big switch and broadcast a commemorative program. Sorry :-)

Let's see--that is about 12:1 digital compression, no? I would guess from what I have heard so far of these schemes that any moderately well-maintained conventional analog FM station will still sound much better. This kind of compression approaches that of the MiniDisc which is an utter abomination.

Nice to see that broadcasting is ever advancing; marching right into the toilet! Oh, well. Some enterprizing folks are trying to sell the MiniDisc to broadcasters as a "cart machine replacement". It will fit right in.

This makes a good case for "diversity" operation of the FM radio. I know
how much it did for the church wireless microphone system, and I cant see
why they don't do a true 2 antenna diversity system for car FM

i think there is a long history of the fcc [and the frc before] being
slow to dictate broadcasting standards and history, i think, has shown
that this was the proper course as it lets the competing technologies
shake themselves out. once the fcc does declare a standard, people
then begin griping about how the standard inhibits technical advances
in the field. so they end up getting it one way or the other regardless
of what they do.

Hello, fellow bored (pun intended) Ops! I am the board op for supergold
at my station in Gainesville (WKTK-FM). This past saturday night, (11-26),
we experienced audio problems at the end of the 7pm hour (EST). Did any one
else? I have a feeling that they were having uplink problems. Also, they
must have had a newbie running the control board at MGM. In fact, the 10 o
or 11pm hour's ID came one minute early! Really pissed me off! I got hotlined
by the bossman! REALLY REALLY PISSED ME OFF! is there a number we can call
to gripe about it? Past SuperGOld ops must have thrown out our information
sheet. thanx for any info/discussions you have about this.
-"Gabriel Michaels" Pritz, 98.5 WKTK-FM., Gainesville, FL.

5400. Re: WNEW Airchecks??

Newsgroup: rec.radio.broadcasting

In article <3b4lo9$noc@vixen.cso.uiuc.edu>, prm@cbnews.att.com (paul.r.mount) writes:

About old WNEW stuff....
I was assistant CE of WNEW during its final years, and current Chief Engineer at WBBR, the present occupier of the old WNEW 11-3-0 dial position. The earlier comments about mismanagement being heavily responsible for its demise are not without foundation. Westwood One, which owned the station at the time, may have been good at syndicating Larry King and Casey Kasem, but their abilities to run a radio station left a lot to be desired. It seemed we changed music philosophy almost monthly for a good deal of time. They just couldn't leave the format alone. Their other stations had similar problems....remember the Pirate Radio/Scott Shannon debacle in LA?

I enjoy what WQEW is doing, and glad to see Jonathan Shwartz has been able to maintain the nitch for his Sunday show. While it may not be everyone's cup of tea..the program definitely has a place in New York radio.

I notice someone mentioned WJUX/Jukebox radio in Bergen County. Many people are not aware that they ended up with most of the old WNEW music library...carts and records. If they had a bigger signal in metro NYC, I believe that they would give WQEW a good run for their money, especially where the music is concerned. They, as well as WQEW, have a few old WNEW people walking the halls...Mike Prelee was WNEW News Director.

As far as WBBR is concerned, the only old 11-3-0 holdovers are myself and John Kennelly, WNEW's Sports Director.

I miss WNEW a great deal...both as a long-time listener, and as a former employee. It was truly a one of kind radio station. It's history of innovation is viritually unparalleled in the industry. It didn't have to die, and it should not have.

OTR (OLD-TIME-RADIO) Newsletter Created

OTR, the noncommercial, electronic newsletter for folks who
enjoy collecting and listening to nostalgic radio programs is proud to
announce the acceptance of charter subscriptions.

OTR was founded after discussion in Usenet newsgroups and email
exchanges, indicating the desire of a number of Usenet users to
have a forum dedicated to the hobby of listening to old-time radio
(OTR) programming.

-o-o-o-o-o-o-o-o-o-o-o-o-o-

Some of the anticipated topics include (but are not limited to):

Lists of AM radio stations broadcasting OTR.
Lists and critiques of OTR tape vendors.
Contents of personal libraries / collections.
Offers to privately exchange recordings.
Critiques of individual or serialized programs.
Discussions about radio dramas / mysteries / adventures.
Hints on re-recording and preserving audio quality.

-o-o-o-o-o-o-o-o-o-o-o-o-o-

If you fondly reminisce about some of the programs you heard during
the "golden age of radio", would like to learn more about programming
on the "TV without a tube" that fascinated your parents, or would like
to contribute your topical expertise, send in your subscription
request now.

Are you interested in the "Modern Day" radio dramas and how they
compare and contrast to the 'Golden Age" of radio? If so, then OTR
is for you.

Subscribers will receive periodic emailings of contributed articles.
in a daily digest format (as news warrants). You may enjoy reading

OTR while listening to your favorite radio dramas. An enjoyable
example of sensory multiplexing :-).

-o-o-o-o-o-o-o-o-o-o-o-o-

To subscribe, send an email message in the following format:

To: otr-request@airwaves.com
Subject: SUBSCRIBE

<The body of the note is ignored by the server>

You will receive a 'welcome' message with even more information.

OTR is brought to you courtesy of -Airwaves Radio Journal (wdp@airwaves.com)
and Lou Genco (lgenco@crl.com), who actually remembers some of the
original programs |-).

We have archives of past issues, available via the following means...

5402. Seeking radio people's web pages

Newsgroup: rec.radio.broadcasting
Date: 1994-11-29 03:05:58 UTC
From: wdp@airwaves.com
Message-ID: <3be5qm$3n1@vixen.cso.uiuc.edu>
Source record: 36257
Cross-posted to: rec.radio.broadcasting,rec.radio.info,rec.radio.shortwave,rec.radio.noncomm,ba.broadcast,chi.media

The AIRWAVES RADIO JOURNAL (the email digest of
rec.radio.broadcasting) is seeking to add a "Radio Folks"
Page to its ever-expanding web server (http://radio.aiss.uiuc.edu/~rrb).

We are looking for home pages of any and all radio people.

This is different from the "Personality Page" we have started which
consists of, mainly, well known radio personalities FTP sites and web
pages (although we need more of those too).

This page will be strictly for the working women and men in the
business, or those who have recently left the business, to tell their
tales, show their stuff and stake their place on the web.

You can post your resume', sound clips from your show, photos, what
ever you wish, and it will be accessible by the many broadcast pros
and quasi-pros who read AIRWAVES and who visit our web site daily.

So, if you are involved in radio, either on-air, in sales, management,
engineering, or what-have-you, be you commercial, non-comm, USA or
elsewhere, send me your URL, to the address below, and I will add you
to our new feature called Radio Folks.

Please reply to web@airwaves.com. If that should bounce (the
domain was just changed and may not have propagated everywhere yet)
try web@airwaves.chi.il.us.

This is a new and exciting project. We are trying to bring together
as many broadcast people on the web as possible. We would love to add
you to the composite.

If you do not have a web page, create one. It is very easy. Ask your
system administrator. If you are not able to create a page, you may
send us a "Short" (under 10k) bio sheet with information about who you
are and what you are interested in. No photos or sound clips in this
file, sorry. But do include your email address(es) and we will see to
it that people who read your page have instant mail access to you via
the World Wide Web. We will post as many bios as we have room for
here, but it is much better if you maintain your own page so it can be
updated at a moments notice bu you, plus you can have the sounds and
photos available on your page.

Again, the address to send URL's or bio's is - web@airwaves.com.

Our web site's address is - http://radio.aiss.uiuc.edu/~rrb.

Seeya

* David Brudnoy dying of AIDS...

On Thursday morning, November 17,1994 the popular WBZ AM 1030 talkshow host David Brudnoy held a news conference in his room at Mass. General Hospital to announce that he had contracted HIV about six years ago and has been living with full blown AIDS for the past year.

Brudnoy, a very private man, has said that up until his hospitalization in late October due to an AIDS-related viral infection which caused his heart to enlarge, he's been seeking treatment for AIDS from a doctor in Washington,DC.

Brudynoy is expects to be back on the air sometime in December...

* Infinity's WBCN 104.1FM lands NFL's Patriots :

On November 17, 1994, NFL's Patriots announced that they're leaving Westinghouse's WBZ AM 1030 at the end of this season and will have a new flagship at Infinity's AOR WBCN 104.1FM starting with 1995-1996 campaign. The price for the 3-year deal was said to be around $10.8 million.

WBZ radio is paying the Patriots $1.85 million for this year. The Patriots will receive $3.5 million in their first of WBCN pact. WBZ tried to retain the Pats for about $2 million a year. American Radio Systems which own 'SportsRadio 850' WEEI AM 850 came in with $2.8 million a year offer.

Patriots will be one of 5 NFL teams that have all of their games only on FM. [Dallas, Philadelphia, Arizona, and KC are others.] WBCN becomes the 5th Infinity property to own rights to an NFL team[NY Jets. Philly,Dallas and Tampa Bay are the other 4 heard on Infinity stations]. Apparently, Infinity is looking to establish a sports-marketing network which will offer national sponsors ad-spots in multiple markets than they could get in single-station deals.

WBCN is not likely to break even on this Patriots deal even if does sell out all of ad time for all of the Patriots broadcasts...Last time the Patriots were heard on FM was in mid 80's when their games on WHDH AM 850 were simulcast on WBOS-92.9FM. This was part of a 10-year stretch when Pats' current 18-year voice Gil Santos didn't do their play-by-play...In the case of 'HDH/'BOS deal, both stations were owned by Sconnix. Santos was/is a WBZ staffer. Prior to that, the games were on CBS-owned all-news WEEI 590(now WBNW)...Will Santos come back to work for WBCN next year? Most insiders say it's unlikely eventhough he apparently has the green light from his employer(WBZ)...John Carlson who did the games on WEEI in the early '80s is said to be very interested...One thing is for certain : Who ever becomes the Patriots play-by-play person on WBCN, it won't that station's resident morning sports reporter Paul 'Tank' Sferruzza...:-))

* Sox stay put on WRKO...

Red Sox will stay put on American Radio Systems' All-Talk WRKO AM 680 next year. ARS planned to move the Sox broadcasts to its all-sports WEEI AM 850. That would have caused conflicts with the NBA's Celtics in March(Sox' Spring Training). April and possibly May(if Celtics ever make it to the playoffs again)...Both Celtics and Red Sox management are opposed to having their games shifted due to conflicts. So, ARS' idea of having 'EEI broadcasting both Sox and Celtics has been nixed for now....Also, ARS is reportedly ready to give 'EEI's night-time sports talk host Dick Lutsk a play-by-play jon Sox broadcasts. He would replace Jerry Trupiano who has no new deal...If Lutsk goes to 'RKO to do Sox games, that would give 'EEI an opportunity to carry newly revised nightly syndicated Pete Rose's show based in Florida...ARS is high on Pete Rose's show and wants it on 'EEI sometime soon...WRKO aired his show on tape-delay until a big programming shuffle took place in late August which involved shifting all the sports from the old WEEI 590 to 850 and making WRKO 680 a non-sports talk station station...

* Trouble in paradise?

On October 24th, Noble Broadcasting had agreed to sell it 50k watt WSSH AM 1510 to Denver-based Communicom for $1.5 million. The problem is/was that a couple days before that, Noble had signed a 5-year lease deal with Gelova Broadcasting to air Spanish programming on 24-hour basis...Apparently, Gelova will not stand in the way of the station sale but wants some sort of monetary damages because it claims that Noble didn't notify them of its upcoming deal with Communicom... It also claims that it pays Noble about 36 grand a month and can't find anyone(sponsors) to pay its bills since the station will go all-religious when FCC grants its approval sometime in January 1995...Anyway, this mess will be resolved in court...

* Early Arbitrends....

Arbitrends, rolling averages for August-October, predicting Arbitron's Fall Book have rolled in and they look like this :

In a 12+ :

1. WBZ AM 1030 News/Talk 8.2
2. WXKS 107.9FM CHR/Top 40 6.6
3. WJMN 94.5 FM Churban 6.0
4. WRKO AM 680 All Talk 5.7
5. WODS 103.3FM Oldies 5.0
WXLX 100.7FM CR 5.0
WBCN 104.1FM AOR 5.0
8. WBMX 98.5FM Hot AC 4.6
9. WMJX 106.7FM AC 4.3
10.WSSH 99.5FM Soft AC 3.4

The big story continues to be the slide of Pyramid's powerhouse CHR WXKS 107.9FM which took dives in all demos : in 12+, it registered a 6.6(down from 7.2 in the summer book), in 18-34 it still holds a top spot with 11.5 but lost a full rating point since summer(12.5) and in 25-54 it had 5.6(down from 6.1).... The complete Fall Book numbers should be out in early December....

5404. San Diego RadioWatcher Report

Newsgroup: rec.radio.broadcasting

From: ChrisCarm@aol.com
Message-ID: <3beevl$n5a@vixen.cso.uiuc.edu>
Source record: 36259

>North San Diego County Report: Nov. 28, 1994

The Xs have it: On Sunday, Nov. 27, the San Diego Chargers football game was available in the San Diego market from stations south of the border: XETRA-AM (690, 50kw, U) for English broadcast, XEXX (1420, n/a) espanol, and XETV (TV 6, Fox). This was the first time the Chargers Football has been carried soley on south of the border stations.

XETRA's coverage of San Diego State football may have had its final run last Saturday. XETRA wants the contract for next year, but SDSU is "not happy" with the bumping of some games to the one-station XTRA sports network. KOGO (600 AM, 5kw, U-D, DA-1, N) was paid $$ to carry the conflict games. SDSU wanted the sports station to honor its "no conflict clause" but the Noble giant didn't. Most of the conflicts came via XETRA's new contract with UCLA sports. All three major SD county papers reported that SDSU's sports package will go to another station, most likely KOGO.
ALSO: SD Tribune's sports page wonders if the claim of XETRA "from Baja to the Canadian Rockies" is true. Reception north of San Francisco is spotty, as reported in the Tribune. [I can only find one other station in the west at 690: Honolulu, Hawaii and Alaska, does anyone have some insight??)

For a complete of broadcast stations for San Diego County, please e-mail me! I'll try to return as fast as possible.

Chris Carmichael "If I said the same as Sen. Helms,
Carlsbad, California I'd be in a federal holding cell."

I always recommend Lorenzo Milam's "Sex and Broadcasting", which has nothing about sex in it, but a *lot* about community broadcasting. I know that it pops up in used bookstores from time to time, but the best place to get it is via Powell's Technical Bookstore in Portland (Oregon). You can dial their BBS, get the ordering info that way, then call them by voice phone and order it sent to you. Their BBS number is: +1-503-228-0807. Powell's will sell worldwide. The entire inventory of their technical bookstore is online on the BBS.

Hi there..
I'm just grazing in this newsgroup and noticed your ??

Canadian call letters start with CF, CG CH, CI, CJ or CK. The reasons for this are not entirely clear but probably have the same basis as the American K in the west and W in the east designations. There are a few stations in Newfoundland that have V-based call letters. There were on the air pre-1949 when Newfoundland entered Confederation.

As the the Emergency Broadcast System..(This is a test...if this had been a real...) we don't have one as such although the CBC is the obvious system to reach the entire nation with emergency information on several networks AM. FM, Eng TV, French TV and cable.

When the Martians or others land, we'll here about it. "ICI, RADIO-CANADA"

Cheers
Doug Main

My understanding from listening to WGN is that Chuck left because WGN was
cutting down on the amount of DePaul Basketball that they were going to
broadcast, and Chuck wants to call basketball games badly....

Was money part of it? Probably. WGN has been becoming stupid and cheap
lately. First they hire Punnett, then they dump Ed Curran (who ever heard of
anyone who was #1 in their timeslot, getting more and more share every book
getting dumped?)..... then they hire Dean Richards.......

As I understand it, Chuck Swirsky wanted to do more play-by-play college basketball. WGN has cut back on DePaul University broadcasts (only about 1/3 of the games will be broadcast) and Swirsky got an opportunity to do Wolverine (UM) play-by-play. The financial details were not released to my knowledge, and I'm just a listener, but that's what they are saying here in Chicago. He's a good sports personality, and he'll do well in Detroit.

Last night, I thought of another reason for clear channel. I was driving cross country at 2am, and for 4 hours, listened to WLW and the truckin bozo. Now, I'm not a truck driver, but how else could you listen to the same show for 4 hours while barreling across the country. If the people who don't want clear channels got their way, then the OTR driver would have to find a new station every 30 minutes as he crossed markets. And many of the stations he would find would be automated tea kettles.

Maybe if they allowed domestic shortwave broadcasting.... Think of it, every trucker listening to WWCR all across the country.

5410. DMX Stutter?

Newsgroup: rec.radio.broadcasting
Date: 1994-11-29 05:42:47 UTC
From: dk@crl.com
Message-ID: <3bef0n$n6k@vixen.cso.uiuc.edu>
Source record: 36265

I was listening to DMX in a cafe today (yes, they pay ASCAP/BMI rates to use it), and I heard an *excellent* selection of music on their jazz channel. Anyhow, the CD stuttered for about 10 seconds, the music stopped for an instant, and another song was faded in. Knowing that the thing is automated, and it's doubtful anyone actually was scanning 30 music channels and heard it, there must have been an automatic correction system in place to play the next CD.

Does anybody know how DMX automatically dumps out of skipping CDs?

>All in all ... not a bad month for the monied interests.

I very much agree. I feel very strongly that all elements of society should have ownership access to electronic mass media, but ,it is clear that the FCC can not assure media diversity. Sometimes I beleive closing down the FCC would be better. But I'm not sure about that. Look at who is the Prime Minister of Italy. (Italy had no broadcast regulation for some time).

As you may know, people sell station licenses all the time. And, as you may know, the Communciations Act prohibits this! As you may not know, a federal circuit judge found that FCC licenses were "property" for tax purposes. So, would ownership be more diverse if licenses could not be assigned (transferrable)?

Chris Carmichael says, in essence, that Noble Broadcasting OWNS the XETRA stations outright. I beg to differ on that as the Mexican Authorties have clearly stated that ONLY Mexican nationals are eligible for owning the country's Radio and Television stations. Noble only programs and maintains the facilities in both San Diego and Rosarita. All of the stations you have mentions (XETRA-AM and FM, XHRM and XHTZ) are owned by Mexican nationals who sell the air time to the American interests on a lease agreement (usually a five or ten year period, with an option to renew). Most of the English track owners use the stations as an investment (a good one, at that). It guarantees a regular income and allows the investor to take a "hands-off"roach. approach to owning it. As long as the check comes in, he's happy. If not, be ready for another American party to operate it. Notice also that all of the stations mentioned have studios in San Diego...not in their City of License. From what I have been told, the American programmers must get a waiver in order to microwave the programming across-the-border to the respective transmitter sites. It is NOT easy to get such a waiver...but as you can see...it can be done.

Adios,

Let's see if I can make this clear for you: The numbers the public stations get are the same numbers the commercial stations get. The difference is that we see *ALL* the figures. The commercial guys don't want to see *ALL* the figures (or rather, the account executives don't want to show them to their clients), so Arbitron obliges them.

Yes, of course. REAL radio stations are the ones featuring the same bunch of syndicated windbags and endless rearrangements of the same recordings of ephemeral music.

I am the first to criticize the programming stupidities of the public stations--including my own--which, by the way are evidence of the mediocrity of the high end of the band creeping lower and lower. But here and there some folks on public radio, usually battling air-headed administrators, ocasionally manage to make some creative use of the medium.

NYC Radio Waves 11/28

It's soon to be official - Emmis will close on WRKS-FM, giving it a duopoly in the Big Apple. Emmis currently owns WQHT/Hot 97. Rumors abound that KISS-FM will change formats on November 30th to something other than Urban, so as not to compete with Hot 97. GM Charles Warfield is leaving Kiss-FM as soon as the deal's complete. As to what the format will be, no one is saying. All-70's is the hot rumor, Urban Gold is another angle. We shall see.

Regarding a recent posting in reference to WCBS-FM's morning ratings - While a 4.2 12+ looks low, Harry Harrison's still getting the 25-54 cell - #4 in the market, which is not bad. Harry's still got it.

***For radio talk on America Online--check out ABC Online's radio section. There is a radio bulletin board there dealing with a number of topics.

Till next time--

Rumors persist that country WYNY-103 FM in New York City will soon switch to a dance format. A new morning team has been hired according to R&R. This move would fragment Hot 97, and possibly beat WQHT's new LMA - 98.7 Kiss/WRKS to a similar move. Any thoughts on these strategies?

Also in NYC radio news; Welcome to our new weekend board-op Tricia Thomas, (from WFAS, also formerly middays at Z100 Portland) and Congrats to Heidi Hess, moving to mornings @ Q101 in Chicago. She was in middays at crosstown Q104. I met her at a concert, she was friendly, and major fine looking.

On 28 Nov 1994, Paul Richards wrote:

> Heading down to Orlando in mid December, any suggestions as to what's
> good on the radio down there (any format)?

Yes, Paul, I worked in Orlando for much of the past two years (I'm at WRMF in West Palm Beach now) and can recommend some of the following stations:

Country: B-94.5 "Young Country" - where I worked until this past August. K92FM (92.3) is the other country station (and B-94.5's duopoly partner)

AC: Mix 105.1 (WOMX) - one of the best sounding AC's around. you should also be able to hear Mix 96 in Tampa (95.7) which is the other really good AC in Central FL. Magic 107.7 is a soft AC

AOR: 101.1 WJRR (Ron & Ron morning show), 100.3 WDIZ (heritage AOR), 96.5 Q-96 (classic rock, probably about to die). WMMO 98.9 is soft-AOR AC-based hybrid.

news/Talk: 580-WDBO (Rush Limbaugh), 104.1 WTKS (Stern)

CHR: WXXL (106.7)

Oldies: Cool 105.9

Orlando's one of the most over-radio'd markets in the country, with nearly half the full-signal FM's serving Orlando licensed to someplace else (Cocoa Beach, Daytona Beach, Mount Dora, etc).

I think I got most of the biggies, email me if you have specific questions.

Andy in West Palm Beach

If I were a gambler, I'd bet that most FM stations could go to mono and nobody would complain, thereby eliminating multipath (if there were no subcarrier stuff). It seems that for most listeners, "stereo" means 2 speakers, nothing more. (Not so, classical and jazz, but I did say *most* stations.)

>why they don't do a true 2 antenna diversity system for car FM

I understand this 2 antenna diversity approach to reducing the
multipaths in FM isn't very popular with car manufacturers, and
they might be the main reason this hasn't become popular. Certain
very high end cars offered this (in Europe and Japan, I believe)
a few years ago, but no one talks of it anymore.

Vane Jones died in the mid-80s. The 15th edition, with a 1984 copyright date, was the last. I kept using my increasingly outdated VJ log for traveling purposes until 1990, when I replaced it with the somewhat larger (but much more comprehensive) M Street Directory.

M Street has everything the VJ log had (except TV!) plus so much more: addresses, formats, full power and directionality info for FM as well as AM. Even though the new 1995 edition is almost too big to travel with, it's still the most bang for the buck when it comes to radio references, IMHO.

:The Kahn system (far superior)...WOW ran several
:promos telling people to tune one radio just to the left of their freq.
and
:another just to the right.

:AM Stereo receivers, at this point had not been produced, nor had the far
:inferior C-QUAM system.

Someone musth have "Kahnned" you into saying this. While Kahn's system
was a good sounding system, there is no reason to trash C-QUAM like you
are doing. Unless it is nothing more than sour grapes. One of the main
reasons that the F.C.C. said "Let the marketplace decide", was in fear of
a lawsuit by Mr. Sour Grapes himself, Leonard Kahn.

Actually, no one "Kahn-ed" me into saying this. I had the opportunity to hear
both... there was no movement of the stereo image with the Kahn system,
furthermore, the punchiness of the overall signal was better on the Kahn
station....although this could have been their processing.

Regardless, I read all the data....and was convinced.

You work for Motorola???

In regards to fybush@world.std.com question about why Eagle 93-7's call letters weren't part of the format kick-off 2 months ago......

Eagle signed on Sep 30th at 3pm and kept the old call letters WCGY until

authorization was obtained for WEGQ last week. From what I underestand, although WEGQ was not officially being used by any radio station at the time, those call letters were still being held in reserve by the FCC. It took a little longer to get those letters freed up...but as of Nov 28 they became official.

Anyway..the call letter issue was dealt with after the format was revealed. Call letters are used only on the station at the top of the hour so it was
not the most important part of the presentation.....Eagle 93-7 and "The Eagle" are the main identifiers as is the slogan "Hits of the 70's".

WBMX Mix 98.5 was launched the same way nearly 4 years ago...carrying the old WROR call letters for a month (at the top of the hour) until the new letters were official.

Accuratings is showing some strong growth for Eagle in it's early stages.

When I was starting up WOWB/WOWZ in Utica-Rome, N.Y., I simply wrote to JAM Creative Productions and TM Century and they sent me demo CD's, and then I bought a package...

TM Century's number is 800-TM-CENTURY. I don't have JAM's number with me, its at the station and I'm at home, but they are very nice at both companies.

[as opposed to public stations...]
|: Yes, and REAL radio stations pay their own freight, and don't have
|: their hands in the taxpayers pockets, in one form or another.

In Boston the two giant public stations are WGBH-FM -- funded by charitable grants and subscribers, using no government money -- and WBUR, funded by subscribers and a facility contribution from privatly-owned Boston University.

Programming on WBUR is mostly talk, including NPR feeds and local call-in, but also such rabid liberals as the BBC's Newshour and Car Talk (which they originate). Block-programmed music on weekend evenings.

WGBH is primarily music... some pop, some classical, some jazz, some ethnic. But they also run some NPR news, and some highly-capitalist GE-supported business news.

Both are popular and show on books. Neither has their hands in the taxpayers' pockets. Both have their hands in the consumers' pockets, just as advertiser-supported stations are. The public stations ask for money, the commercial ones get it by indirectly raising the cost of consumer products (remember: the price of a Big Mac includes airtime).

The stereo demodulator chip that Sony developed for the SRF-A100 and -A1
surfaced shortly thereafter in the synchronous detector of the ICF-2010
shortwave portable.

>* Limiting factor at this point must be availablility of receivers. I

If you want to go mail order, J&R has the SRF-42, even though the jackass
salesman at the portables counter told me throughout the first quarter of
1994 that the radio didn't exist, even when I showed him one.

Platform motion may be useful for some acid rock music, but that's about all.

Could you please explain your comment "Kahn has an audio
bandwidth limitation"? The only bandwidth limitation I ever
noticed with Kahn was that KKSN kept its signal to within its
assigned channel instead of polluting several adjacent channels
the way the CQUAM stations do.

(In reference to KLOS Los Angeles' use of this slogan)

Heritage AOR KYYS(FM) Kansas City appears to have been the first station to use this slogan, in 1990, after it managed to survive the meteoric rise and fall of Rock-40 KXXR(FM) by slogging about and doing nothing.

(KXXR was entropy personified, if a radio station can be said to personify anything, but it was a fun station to listen to. It should have become our modern rocker. Instead it went CHR and later became entangled in an LMA.)

KY-102 used the slogan for about a year, then dropped it.

Another slogan during that time was, "why are you listening to a radio station that calls itself KY?"

I asked myself that question and, as a result, I'm not much aware of what's being transmitted at 102.1 in Kansas City anymore (other than the WDAF(AM) IFB that's on the 67 kHz SCS subcarrier)!

Two Phoenix stations have begun the annual blitz of Chrismas music. KTWC-FM, which signed on in May, went all-Xmas music at Midnight the day after Thanksgiving...beating last year's all-carols station, KOY-AM at their own game. KOY is doing holiday music weekends only until Dec. 10... and will then go non-stop carols until Christmas. KTWC owner Don Jerome is betting the better quality and earlier availability will translate into a cume generator for his still-young operation. KTWC is the first FM in recent memory to go all-Christmas music in Phoenix. Most stations did holiday music only sparingly during the late 70's and early to mid 80's. Group W broke away with KMEO-AM five or six years back dropping the beautiful music for Christmas carols and renaming the station "Cozy 740" for six weeks a year...but new owner Bonneville flipped it to Radio Aahhs creating a void that "AM Only" affiliate KOY has filled for the last 2 years.

The Thursday editions of the Arizona Republic report that the FCC is investigating complaints of signal interference caused by a small translator for religious station KRDS-FM. KRDS' primary signal is at 105.3...but the stick is located 50 miles northwest of Phoenix...and the signal is poor to nothing in the populous (and conservative) East valley. A Scottdale businessman is rebroadcasting KRDS(in mono) on a translator at 106.7. Urban KMJK, at 106.9, says the translator is jamming their signal in predominantly black areas of the South Phoenix area. The FCC confirms it is looking into the matter.

KXAM-AM(1310) continues its evolution from adult standards to talk. Never able to score even a measurable rating in most books despite a live local AM-stereo presentation versus KOY's satellite delivered format in mono, KXAM bagged most of the music after five years and countless GM's. Current chief Del Hull (ex-KOOL, KUKQ), made the switch...former Arizona congressman Sam Steiger(who was on KUKQ) handles mornings. G. Gordon Liddy middays...Ken Hamblin's satellite show from Denver in afternoon drive...and Bruce Williams late nights. Only resident jazz expert and musician Vic Caesar remains to play music...in early evenings. KXAM(which until 1989 was KZZP-AM), has a poor nighttime signal in much of the metro area....low wattage and a stick in the East valley don't help the coverage.

5454. San Diego Radio Watchers - Nov. 30, 1994

Newsgroup: rec.radio.broadcasting
Date: 1994-12-02 00:41:46 UTC
From: ChrisCarm@aol.com
Message-ID: <3blqga$akn@vixen.cso.uiuc.edu>
Source record: 36159

North County San Diego Radio Watcher's report: Dec. 1, 1994

The election is over, and the mud-slinging is -- still happening? The co-author of California's Proposition 197 has launched a radio-ad campain contending wide-spread voter fraud by illegal aliens. The ads are also partly financed by Republican Senate-hopefull, Michael Huffington. He also blames his loss by illegal immigrants who voted for Democratic Sen. Diane Feinstein. [Huffington has not conceeded the race to her either, as witnessed on CNN's Larry King Live]

The radio ads are running in Los Angeles, San Diego, Kern, Fresno and Sacramento counties.

Milestone: Dan Erwine, host of "These Days" on KPBS (89.5, 1.77kw) marks his 25th year on San Diego airwaves next week, the SD Union-Tribune reported on Nov. 30. His career started in 1969 on KOGO. Before joining KPBS in 1986, he was at KFSD (94.1, 100kw). Erwine has conducted nearly 2,000 interviews for his show. The popular program airs Monday through Thursday from 9 a.m. to 11 a.m.

Los Angeles' KIIS Rick Dees will host the second KIIS-MAS party. It's slated for Dec. 12 at the Sony Pictures Studios in Culver City. Tickets will be given away on KIIS (102.7). Performers include Miranda and Harry Connick Jr.

I READ IT IN AIRWAVES FIRST [caps for shooting effect]: The Wednesday San Diego Union-Tribune reported "Electronic Media's" story on the 'new Republican threat' to cut public funding for National Public Radio and TV's PBS.

KOGO entry into sports: San Diego State University is ready to jump from XETRA-AM to KOGO. XETRA's all sports programming includes LA Kings hockey, SD Chargers football, UCLA football and basketball, in addition to SDSU's contract. However, since signing the UCLA Bruins, the Aztecs have been repeatedly bumped from XETRA-AM to KOGO. As reported earlier, SDSU officials are not too happy with this one station XTRA Sports Network. [But, out of all the San Diego stations, KOGO has the best signal: 600, 5kw-U D, DA-I, N; KFMB's 50kw signal cannot be heard in LA!!] Lee Hamilton reportedly wants to stay the voice of the Azetecs, but probably will not. When the network was formed, newspaper ads had the call letters and frequency, "to-nights game between the SDSU & Hofstra will be on KOGO 600." Now, the ads read: "Tonights game between SDSU & Fresno will

be on AM 600." Bottom line: new deal for KOGO, assured frequency, and an entry into sports programming for upstart KOGO.

The San Diego county radio log was updated on Nov. 29. For a copy, please e-mail me!

articles@airwaves.com

Radio Watchers for North San Diego County: Dec. 1, 1994

The season's is upon us, the crispness in the air, and its time to go out and CHOP! Chop to you drop!
KKOS (95.5, 3.3 kw) Carlsbad, has started the chopping season by giving away passes to a local tree farm. Every morning this week, lucky callers get to chop their Christmas tree! The promotion continues for two weeks.

Roger Hedgecock of KSDO (1130, 10kw-U, DA-II N) San Diego spent two days at Maui, and broadcasted live (via ISDN) to the KSDO studios. The shows on Nov. 14 & 15 gave Hedgecock enough rest before a "town meeting" with Diane Sawyer and local journalists that was broadcast live on KGTV (10, ABC) San Diego. Roger took the brunt of the abuse, especially for his stand for using "un-named sources" for attribution. This came about because of the death of the first female carrier aviator in the U.S. Navy. [there was speculation that the Navy let her pass because of gender, not skills. That has been proven false, she was fully qualified. A few disgruntled sailors made their chauvanistic views to various media outlets, including Hedgecock's top-rated show.]

Wasn't it about one year ago when nationally syndicated Art Bell started his rise from a few stations to more than 125 outlets, including WOAI (1200, 50kw-U) San Antonio? His live show from 11 p.m. to 4 a.m. PST is the best overnighter I've heard of in years -- and beats the re-hash of re-run shows that seem to pop up else where.

KKSM, Palamor College radio has been available via area cable TV. At first, the station was on an FM carrier, but when Times-Mirror "Dimension" cut the reception for a digital music service (and a special tuner) they went digital. What disappoints me is that to listen to this 'free' service from Palamor, I would have to pay $$$$. [I'll state this again: loosing the FM signal from cable because of hilly terrian (like North County San Diego), coupled with strict zoning codes on outdoor antennas only benefits the cable companies. No wonder the franchises on wired systems are scared about the new option from the sky.][I will, however, refrain from using the words, " 'You money hungry-weasles' " in this mini-editorial!]

Outdoor advertising: in North County, transit busses have changed radio slogans from KKOS, Carlsbad to KIOZ (102.1, 10kw) Oceanside; and KOGO (600, 5kw-U, DA-N) Hot Talk. Billboards close to San Diego town center offer XETRA Sports [From Baja to the Canadian Rockies!]; or for their sister station, 91-X [just the "91-X" in a classic neon - Generation X style].

>From the Reader's Post

New "M Street Radio Directory" out: The 1995 edition is hot off the press. What I like about this years: Arbitron numbers, former call letters, and LMA/duopolies information. What I missed: instant reference to fax by call letters in the back. In all, worth the $43! 1.800.248.4242 to order direct. [standard disclaimers here: don't work for 'em, just use 'em]

Coming soon, my first "interview" with a San Diego radio talk show host!

Chris Carmichael Would someone please put
Carlsbad, California Sen. Helmes out of his misery?

KJAZ (92.7 until last August when that frequency went Spanish) is returning...but on cable. They'll be operating as a non-commercial, listener and grant-supported station. Many of the KJAZ announcers are on board for this satellite-to-cable-systems operations. Locally, Viacom cable systems are offering KJAZ at 104.1 FM, though in San Francisco proper KJAZ will be heard on cable 96.1, which used to be their spot for KPIX-FM (95.7 over-the-air).

KGO (810AM) and Ronn Owens, 9-noon talk host, are reportedly far apart on a new contract. Owens has claimed on the air that he's the only local talk host in America beating Rush Limbaugh (KNBR-680) in the ratings...and wants a salary that reflects that. KGO has offered him a substantially smaller raise. The 12/1 San Francisco Chronicle says that Owens may be planning to start a nationally syndicated show based in SF.

KCBS (740AM) nighttime anchor Art Finley will retire December 16 after celebrating his 50th year in broadcasting this year.

Radio Star reports that Bob Hamilton, formerly GM of KSFO and before that PD of then-combo KSFO and KYA-FM, will be the new PD of KYLD (107.7) - Wild 107 - simulcast in the South Bay and Monterey-Salinas markets on KYLZ (99.1).

: and Long John Nebal (i might have messed up the spelling)

In the 70's and early eighties, Big Wilson worked at radio 610 WIOD as well as WCIX TV Channel 6 on the Nite Owl Theatre, later seen on Channel 39 WDZL on a similar late night concept. I really enjoyed hearing that mellow voice after those talkrealfastbetweenrecords DJ.s. I even met him when WIOD covered the Strikers of the old NASL soccer. He had the WIOD camper driven by his son, J.T. BTW, J.T. still lives down here. I believe he is in advertising. Dammit, I miss Big Wilson and his kind of music on WIOD.

Everything I've heard indicates that the parting was pretty much amicable. But WGN was cutting back on the number of DePaul games they broadcast, and Swirsky was one of the announcers. He was growing frustrated by the lack of opportunity to broadcast college hoops, and part of the deal WJR offered was that he would be the "Voice of the Wolverines" during the college basketball season. Plus, I'm sure they made it worth his while, financially - although I don't think financial terms were disclosed.

In Southern California, as a child in the 50s and 60s, I did the same...listening to everything from WLS to WWL. But a few years ago, in a rural parking lot in Florida, I took a car radio through all the great 1-A clears, and got most of them.

What I heard were a dozen or so transmitters all lock-step broadcasting one Larry King on the Mutual Broadcasting System.

The beauty of DXing was that...through the magic of radio...you were carried to distant cities where you heard regional differences. You could hear the nation talking to you.

The FCC may have destroyed the 1-A's ability to speak halfway across the breadth of the land, but radio broadcasters themselves have destroyed my desire to strain to listen.

5460. CJSB AM-540 (Ottawa) off the air

Newsgroup: rec.radio.broadcasting
Date: 1994-12-02 00:41:58 UTC
From: rene@igs.net
Message-ID: <3blqgm$aln@vixen.cso.uiuc.edu>
Source record: 36165

Ottawa, Ontario --- The former CJSB AM-540 transmitter went off the air permanently at 6:00pm EST tonight (Nov. 30) after 90 days of simulcasting its replacement, CKQB FM-106.9 (The Bear).

This is great! Now I can do some DXing on 530, 540, and 550 (hopefully there's something there). With the recent demise of CKCH AM-970 Hull, I can also pick up stations on 970 now.

The shift of radio stations from AM to FM in this city has been astronomical. Five years ago, the Ottawa-Hull area was being served by 8 AM stations and 9 FM stations. We now have only 4 AM stations and 15 FM stations.

The AM stations left are:

580 CFRA Ottawa, ON News/Talk
1150 CJRC Hull, QC (French)
1200 CFGO Ottawa, ON All-Hit (Energy 1200)
1310 CIWW Ottawa, ON Oldies (Oldies 1310)

I have set up a WWW home page with information about Ottawa radio (including lists of radio stations and even some of the history of Ottawa radio). The information there is not really as complete as I would like, but I don't have time to work on it for a while. For anyone who is interested, the URL for the home page is: "http://www.igs.net/ottawa/index.html". Of course, comments are always welcome!

2) SUPERJOCK by Larry Lujack. (This one has been out of print for many years, but there's an outside chance you could find a copy at a good-sized used book store.) At the time of its writing (20 years ago) Lujack was the top DJ in Chicago at the old WCFL, but the material inside is still highly relevant to modern-day music broadcasting.

I'm glad someone mentioned this book, I thought I was the only one in radio who ever read it. The book is a total hoot!!! Larry had one of the best morning shows in existence back in the 70's and eeearly 80's. I heard he's retired now...any clues?

Well, you have tried to state this in a private e-mail message
before,
>but when asked for the numbers, you went silent, real quick. I wonder
>why?
> After 2 weeks, still waiting.....

I was surprised to receive your email. Later I realized I had probably sent my message privately instead of posting it here as I intended. If we're going to have a pissing contest, let's do it where everyone can watch. David Kaye pointed out here a few messages ago that my station is #3 in AM drive in the Bay Area. It happens that I am not sure this is a good thing--except to prove to ideologues such as yourself that people are listening to us.
>
> Yes, and REAL radio stations pay their own freight, and don't have
>their hands in the taxpayers pockets, in one form or another.

There are many areas in which the government intervenes because there are needs the market doesn't meet. Public Broadcasting was created mostly in response to the Carnegie Commission which identified needs which commercial broadcasting was disinterested in meeting. The situation has deteriorated further in the three decades since the Commission's findings. Largely as a result of the reckless deregulation of the Nixon-Reagan-Bush years, commercial broadcasting has ceased to serve any purpose at all except the escalation of the degree of sleaze it will employ to attract sensation-seeking audiences. Do not misunderstand me--I am not suggesting that it be shut down or have its first amendment rights curtailed in any way. But this country continues to need a segment of the broadcast industry that is freed from the commercial pressures that lead to the excesses we hear from our speakers and see on our screens every hour of every day.

You and I might agree that taxpayer funding is not only undesirable but has been unsuccessful. I suspect you would *not* agree with me that a spectrum use fee on commercial broadcasters would be a more desirable method.

> I am among the first to criticize the shortcomings of the public
> stations--including my own--
>
> I have yet to see it here, Norm.

And you probably won't see it here. Not much point. But I have not been bashful. Case in point: The San Francisco Chronicle published a control

room photo of me and quoted my pointed criticisms of my bosses. Anybody else here have that much guts?
>
> What I see here is a bit of eliteisim from those who either work in
>Public Radio, or are fans of it. And the reason is simple: You want
to
>continue to suckle off the Government breast uncontested as in the
past..

Yep, I am an unapologetic eltitist. I believe that thoughtful is better than thoughtless; that people do things--often good things--for motives beyond the bottom line; That explaining complicated issues so that Americans can be informed voters is better than pushing their buttons to sell something; That there is a place for music and story-telling with substance, grace, and romance rather than unfeeling sex, gratuitous violence and sensation; That listeners and viewers needn't be well-off or well-educated to appreciate these values; and that thoughtful people understand this and, not only do not begrudge the miniscule portion of their taxes that may support Public Broadcasting, but also contribute chunks of their after-tax income to insure that it continues.

>....and air more mass-appeal programs.

#3 in morning drive (see above). About 50 stations in this market would kill for such mass appeal.

5471. Looking for SRF-42 in Toronto

Newsgroup: rec.radio.broadcasting
Date: 1994-12-02 00:42:28 UTC
From: shealy@uoguelph.ca
Message-ID: <3blqhk$anj@vixen.cso.uiuc.edu>
Source record: 36176

With the recent discussion of AM Stereo in this conference, let me share my experiences of searching for a receiver. I've gone to a number of Sony dealers in the Hamilton/Toronto area looking for SRF-42. Every time, I'm offered the _new and improved_ SRF-43 Cassette unit. When I ask if the radio has AM Stereo, I get an awfully strange look and one familiar reply: "There's no such thing as AM Stereo. The SRF-42 is no longer being made (or has never existed)."

I know that our local AM radio stations are broadcasting in AM Stereo. I'm trying deseparately to obtain a receiver. Does anyone know where I might find one in the Toronto/Hamilton/Buffalo area? I'm wondering if the problem might be the fact that I'm looking in Canada - a lot of neat toys from the South never make it up here, because there isn't a market.

I'd greatly appreciate _any_ leads...

Sean.

From: dks@world.std.com
Message-ID: <3blqhs$aoc@vixen.cso.uiuc.edu>
Source record: 36178

Greetings,

I have scanned this group for some time now and still have not seen any mention of the Rolling Stones "broadcast" (technically, multicast) the week before Thanksgiving (last Thursday in Nov for those outside US).

I was most curious to see if there were opinions regarding whether or not that broadcast constituted a new manifestation of radio.

Does it? Is it?

I think that the Stones MBONE multicast WAS RADIO in the sense "broadcast radio" has been known until now. However, there is one big difference: the radio stations do not own nor control the broadcast frequency, as was evidenced by the Severe Tire Damage multicast just prior to the Stones.

Imagine what Infinity Broadcasting would do to an unsigned band if they barged onto the global Infinity channel like that!

So, opinions anyone? Was the Rolling Stones Internet event radio?

5476. WTOP's (kind of) new sounders?

Newsgroup: rec.radio.broadcasting
Date: 1994-12-02 00:42:39 UTC
From: jfox@pen.k12.va.us
Message-ID: <3blqhv$aol@vixen.cso.uiuc.edu>
Source record: 36181

I don't know how many others in Washington/Baltimore
radioland have noticed the new 'pan flute' sounders that WTOP
has switched to.
This was right around the same time that the morning
anchors began injecting opinions into the broadast, as well as
the time that sportscaster extraordinaire Michael Harrington
was fired for making potentially offensive remarks, trying (I
think) to follow that new policy.
Anyway, two questions for the audience:
1 - Should WTOP continue to use these sounders? I find it
harder to distinguish among sounders when the business,
traffic, and 'main' sounders are essentially the same. I
nearly got in a wrcek driving thru No. VA because I was
concentrating on listening for the traffic report, and for a
brief time, not on the road.
2 - Is this a new trend in radio across the country to bring in
a 'softer side' of the news? I have heard about an occasional
TV station doing this, but not a major, all-news radio station.

Just wondering,
Joe

5478. Southland California Radio Watchers

Newsgroup: rec.radio.broadcasting
Date: 1994-12-04 01:01:26 UTC
From: ChrisCarm@aol.com
Message-ID: <3br4d6$qnq@vixen.cso.uiuc.edu>
Source record: 36183

Southland Radio Watcher's Report:

Fall ratings!

Here's the Fall books for Los Angeles metro area

KLAX [Spanish music] 97.9 5.4 5.9
KPWR [dance hits] 106 5.4 5.1
KFI [talk/news] 640 4.7 4.7
KROQ [Rock] 106.7 4.6 4.5
KOST [AC] 103.5 3.8 4.5
KRTH [AC] 101.1 3.9 4.3
KIIS AM/FM [T-40] 102.7 3.9 3.9
KBIG [CHR] 104.3 3.6 3.6
KABC [talk/news] 790 3.7 3.3
KKBT [urban] 92.3 3.2 3.2

notable:

KSCA [AAA] 101.9 1.1 0.9
KMPC [talk] 710 0.8 0.8
XETRA-AM [sports] 690 0.7 0.6

Duopolies/LMA's:

KABC/KLOS/KPMC total fall: 5.7 [CapCities/ABC]
KFI/KOST/KACE: 9.8 [Cox]

Morning drive [6 a.m. - 10 a.m.]

KLAX [Spanish] 5.8
KLSX [Howard Stern] 5.3
KABC [Talk] 5.2
KFI [Bill Handel] 4.9
KIIS [Rick Dees] 4.9
KLOS [Mark & Brian] 4.1
KPWR [CHR] 3.9
KFWB [News] 3.8
KRTH [Robert Morgan] 3.6
KOST [Amidon/Wallingren] 3.6

Orange County Register's Gary Lycan radio column included
fan fallout on KLOS' recent cuts at the station. KLOS (95.5,
68kw) is the flagship for Mark & Brian -- and apparently the
only ones to make the cuts. The CapCities/ABC station has
been drifting in the recent ratings, but improved this term.

5479. Chicago Radio Watch: 12/3/94

Newsgroup: rec.radio.broadcasting
Date: 1994-12-04 01:01:27 UTC
From: JJB92@aol.com
Message-ID: <3br4d7$qnu@vixen.cso.uiuc.edu>
Source record: 36184

If the season changes, then we should too:

WKQX is at it once again. The (surprise, surprise) morning show is being changed again. Heide Hess, formerly of WLUP and WKQX returns from a brief stint at New York's WAXQ to cohost the morning show with Robert Chase. Hess handled the overnight shift at Q101 before leaving for New York. Perhaps the station should try dropping the morning shift format of two songs, commercials, two songs, news, commercials, traffic, commercials etc etc. Carla Leonardo who had been handling news for the morning show, is being reassigned to "other on air duties". Leonardo currently hosts a local music showcase and had been handling middays before being switched to the morning.

..But have a nice holiday season...

Dave Logan was bounced as Program Director from WLUP. Station honcho Larry Wert will be assuming the duties on the entertainment station. WMVP morning host Steve Dahl took several shots at Wert and all of management for the handling of the termination. Apparently, Logan was informed of the change the day before Thanksgiving.

The revolving door of radio:

John Swanson moves from producer for Steve Cochrane's show on WPNT (100.3) to Kevin Matthew's morning show on WLUP.

Brian Casey is now the Program Director at WYSY, Chicago's 70s station. Casey was PD at KVRI, KLZX and KCNR in Salt Lake City.

Frankie Rodriguez, known to friends as "Hollywood" has reupped with B96 for 2 more years as late night host.

WCKG, Chicago's dinosaur rock outlet is still seeking a Program Director. The station has been without a PD since Mike Dirkx left for Portland's KXC-AM.

Chris Witting, who had been the acting PD at news radio 670, WMAQ, was promoted to permanent PD at the station. Witting reaffirmed his committment to the news/sports talk format. Witting had been at Chicago's top news radio station, WBBM-AM.

Contract woes:

Denise Jordan Walker, midday host at WNUA for the past 7 years is in a contract battle with the powers that be.

OCTOBER TRENDS FOR PHOENIX

The just-released October Arbitrends show big changes from the summer book..
and from the September trends.
AOR KUPD surged to number one in October...more than doubling its
September numbers. Co-owned KDKB dropped 1.5.
Classic Rocker KSLX continues its rise from the dead...with nearly
a 3-point jump in October placing it firmly in the top 5.
CHR/Urban KKFR(Power 92) rides a 1.8 bump into 5th place.
KNIX reclaimed the country lead as KMLE dropped more
than a point. News/Talk KFYI leapfrogged KTAR(perhaps with some pre-
election Rush Limbaugh gains). KKLT moves to a more than 2 point lead over
KVRY and more than 2.5 over KESZ in the AC battle.
A virtually flat book for both oldies stations prompted Bonneville's
KPSN(Sunny 97) to switch to 70's oldies, fire its morning, afternoon and
night talent and change identity to KCHT(K-Hits), leaving the 60's oldie
to KOOL.
"Smooth Rhythyms" KYOT(Coyote) is up a full point.

The numbers are 12+shares Monday-Sunday 6AM-Midnight.
The numbers in parentheses show the September number, a hyphen, and then
the October number.
Stations are FM unless otherwise noted.

1. KUPD(AOR) (4.8-9.8)
2. KNIX(Country) (7.2-7.9)
3. KFYI-AM(N/T) (5.0-7.2)
4. KSLX(Classic Rk)(4.0-6.8)
5. KKFR(CHR/Urban) (4.6-6.4)
6. KTAR-AM(N/T) (6.4-6.3)
7. KMLE(Country) (7.2-5.9)
8. KOY-AM(Ad. Std.)(7.0-5.8)
9. KKLT(AC) (3.8-5.7)
10. KVRY(AC) (4.3-3.6)
11. KESZ(AC) (3.5-3.1)
12. KOOL(Oldies) (3.0-2.9)
13. KDKB(AOR) (4.2-2.7)
14. KPSN(Oldies) (2.4-2.5)
15. KYOT(Smooth) (1.3-2.3)
15.(tie)KEDJ(Modern Rk) (? -2.3)
17. KZON(AAA) (1.5-2.1)
18. KOOL-AM(50's) (0.8-1.9)
19. KZRX(Hvy Metal) (? -1.4)
20. KISO-AM(UrbAC) (? -1.1)
20.(tie)KMJK(Urban) (? -1.1)

22. KTWC(Elec.MOR) (1.3-1.0)
23. KGME-AM(Sports) (? -0.9)
24. KCWW-AM(Country)(1.5-0.7)
25. KVVA-AM(Spanish)(? -0.6)
26. KSUN-AM(Spanish)(? -0.5)
27. KPHX-AM(Spanish)(? -0.4)

>about the double-dipping that the music licensins giants have perpetuated over
>the years...

Well, I guess as a music producer, I'll give another view. I wouldn't call it
double-dipping at all. The fees are there, I believe, because the music is
enhancing a commercial enterprise's business. Because the music is played in
the restaurant, the patrons of the restaurant are exposed to the music more than
they would otherwise be. Most music produced today (or in the last 70 years?)
follows contemporary trends, and outlives most of its usefulness very quickly.
The greater exposure it gets, the faster it burns out, so it is fairly important
to collect on that exposure as widely as possible. I think its justifiable.
Also, please try to keep in mind that ASCAP and BMI (and SESAC) exist to help
composers, not musicians or record companies. Composers (IMHO) don't make,
on average, anywhere near what they should for their work. If not for them,
there'd be no music.

Greetings.

Another option would be to charge consumers for a license to own a
television or radio receiver as they do in some European countries.
I'm not advocating this but broadcasters could get a double-whammy
if Congress ever ends up charging broadcasters the "right" to use
the airwaves and then the broadcasters have to "pay" to air the
programming on those airwaves. How many "middle-men" must there be?

[re: superiority of Kahn over C-QUAM]

The trouble with Kahn as I understand it is not audio bandwidth but separation. There are only two ways I know to suppress a sideband: create a filter sufficiently sharp to cut it off, or phase-shift the audio 90 degrees and mix it with a phase-shifted carrier. Neither is perfect. I believe the Kahn system could only achieve 12 dB of stereo separation.

Of course with digital technology it would be a whole new ballgame. You could program an NCMO to create perfect ISB and demodulate it digitally at the receiver.

5484. The "Buffalo Hillbillies"... New Orleans Style!

Newsgroup: rec.radio.broadcasting
Date: 1994-12-04 01:01:37 UTC
From: au664@freenet.buffalo.edu
Message-ID: <3br4dh$qoj@vixen.cso.uiuc.edu>
Source record: 36190

Does anyone in this newsgroup know what the story is behind this
"Hillbilly" talk show that is broadcast on WWKB between 3p.m. to 6p.m EDT?
It's supposed to be a "National" show that is aired via sattelite, but
Buffalo seems to be the only city in it's *vast* audience.
This show is called the J.R. and Suzie Gach show and it is broadcast
out of New Orleans, but nobody in New Orleans hears *that* show. I believe
J.R. Gach does a morning show in the New Orleans area, then rumor has it,
that he goes home and does this show that is broadcast from his house to
Buffalo, N.Y. with his wife, Suzie Gach. They tell the audience, that it
is coming from a radio studio, but insiders say it is broadcast from his
house.
If anybody has any additional information on this southern husband and
wife team... I would like to hear it. They say that they have an online
address, and was also wondering if anyone knew it?

Key words: J.R. and Suzie Gach, New Orleans, WWKB from Buffalo, Hillbillies.

Thanks,

-Paul

I've seen similar setups at other stations, including CJDC Dawson Creek, BC, and CJNB North Battleford, SK. Often it's just a point on a patch panel that the engineer can connect to the board. I very much doubt you'll find this at newer stations, and wouldn't be surprised if the CRTC stopped insisting on it since the end of the Cold War.

If something happened today that needed an EBS message, most stations would probably go live with the BN (Broadcast News) feed.

>Yes he's still around. Had the misfortune of growing up with his talk
>show on the now changed CJCA am 930 Do you happen to work for the CBC,
>thanks.

Well, I came by that info two different ways: one, I used to be an
announcer in a number of small markets (in Western Canada), and two, I
also used to be a BCB-DXer... that is, I used to listen to distant AM
stations as a hobby. I don't currently work in the field.

Don't know what you mean about CHED's format: at the present time, they
are the only talk-format station in Edmonton. In nearly every city in
the US (and many in Canada) a talk station is number one in the ratings.
Yes, I miss the days when CHED was the number one rocker - but this is a
very competitive market. I've heard it said that Edmonton has more
stations-per-capita than any other Canadian market. Practically
anything you'd want to hear on radio is here in Edmonton.

Bill Matheson, though he isn't my favourite either, is a big draw on
radio. I'd have to admit he was better when he was part of the Bill And
Bill show on CJCA, because the other Bill balanced him out somewhat.
While you may not like him, you have to admit he's effective - you
listened, right?

Currently my favourite stations are FM 105 (the former MG 1200) and
100.3 The Bear. After all the format changes CFRN-FM went through over
the years, I'm amazed they finally got it right... now if only they
could do the same with 1260 CFRN - if I want a 'music machine', I'll
play a tape, thanks.

I'd be interested to hear what you listen to, and what stations on TV
you watch as well. Guess I'm still a programmer at heart...

Wow... let's see...

quote " Rumors persist that country WYNY-103 FM in New York City will soon switch
to a dance format. A new morning team has been hired according to R&R. This move would fragment Hot 97, and possibly beat WQHT's new LMA - 98.7 Kiss/WRKS to a similar move."

Human....

These rumors about WYNY have been going on for a LONG time... it would be nice if they went Dance don;t you all think.... However, when is it going to happen!!!

This move would fragment HOT 97.... obviously you don;t listen to HOT 97 very much, because we don;t play ANY dance product anymore, nor do we cater to that audience.. that audience is either floating, or maybe picking up some old disco on PLJ.... Not our audience since hip-hop a year ago, so don;t think that would have any affect.

And as far as thios LMA as you put it, it is a sale actually not an LMA... Let it be known we have no plans to make KISS a dance station, not in a million years... Someone please show me a dance station left ANYWHERE in this country doing successfuly... We changed HOT 97 FROM a dance station a year ago.. so don;t expect to see that happen on KISS, whatever YNY does we won;t be affected.. we have our own universe... just like Z-100.

Message-ID: <3br4eo$qqr@vixen.cso.uiuc.edu>
Source record: 36197
Cross-posted to: rec.radio.broadcasting,rec.video.satellite.tvro,rec.video.satellite.misc,rec.video.cable-tv

If you are a jazz fan, you may have heard of KJAZ, on the air since 1959 and how it sold its frequency last July. Today KJAZ returned to "the air", though only if you have a cooperating cable company or a satellite dish.

I'm listening to it now -- "non profit KJAZ, the national voice of jazz". They play a recorded message from Ron Cowan every now and then. Les Williams was on this morning, but the message promises Jerry Dean, John Rogers and several other regular DJs...

It's good to hear them. Many cable companies have put them on their FM feeds and any company can provide it for free. Folks in New York City can even listen on Manhattan Cable. Call your cable and beat them up if you like.

Satellite dish owners can find KJAZ on C1[04], Left channel at 7.74 and right at 7.92.

If you have any questions call KJAZ at 800/359-6447 between noon and 9 PM. I have no connection with them -- just a loyal fan since 1959...

Dave

A must-read. But I wouldn't know where to find a copy anymore except at a
Chicagoland library!

After WLS, Larry left radio and was required by the contract buyout to stay
out of Chicago radio for a number of years. I'm not sure if that's still in
place.

I hear that Larry's been doing some public appearances (I think for some
charity.) But he's pretty much been silent since he left the airwaves.

>
In 1981, WLS signed him to a long-term contract which (I believe) was to run thru 1995... he had a clause in there by which he could pick his own shift beginning in January of 1986, at which time he moved from mornings to afternoon drive, where he lost Steve Dahl and Garry Meier's audience and took the station into a ratings tailspin. Finally WLS bought him out in August of 1987, and one of the terms of the buyout was that he couldn't take a gig in a market where Cap Cities owned a station for the duration of the contract. So he's retired for now, but who knows if he'll resurface next year? I doubt it as Larry is getting up in years (he's 54) and has been off-air for 7 years now.

The December meeting of the Northern California Radio-Televison News Directors' Association will be a holiday meeting, just for fun.

It's called "Tell Me About the Good Old Days" and will feature Vic Reed, the first news director of KGO-TV, with Helen Bentley, Wanda Ramey and Ben Williams, all of KPIX, plus Film from the Eleven. What was it like before color, before satellites, before microwave or Beta and even before consultants?

The meeting will be at the San Francisco Tennis Club, 645 Fifth Street at Brannan, on Wedesday, December 14, with social hour at 11:30, lunch at noon and adjournment at 1:30.
The tariff is $20, with a $5 discount for reservations made before noon on Monday, Dec. 12. Reservations are requested, and anybody is welcome. You don't have to be a News Director or a member of NorCal RTNDA to attend. Reservations: (415) 259-7538.

Right now, A station would have to be "co-owned" by a Mexican citizen.
But I heard that under the terms of NAFTA, Americans will eventually be able to
have 100% ownership of stations.

: New York. WNET could actually air commercials any time, and a look in the FCC
: data base reveals that WNET and many other NCE TV stations have the comment
: "Non connercial station on commercial channel."

I believe that the same thing is true of the other PBS/NPR station in New York, WNYC AM/FM/TV. WNYC-AM is on 820 (I believe it moved there from 830). I suspect (although I am not sure) that they could air commercials at any time. (Are there any rules about noncommercial AM stations?) WNYC-FM is on 93.9, which is outside the non-commercial portion of the FM broadcast band. And WNYC-TV 31 actually *does* air real, honest-to-goodness commercials. Although they are a PBS affiliate, a portion of each broadcast day is leased to other entities, primarily ethnic broadcasters. These programs are, at least for the most part, commercial, and full-length commercials are aired during these shows on a regular basis.

KFUO-FM, the Lutheran station in St. Louis, used to be noncomemrcial religious, but is now a fully commercial classical station, still run by the Lutheran Church in St. Louis. I don't believe it was ever affiliated with NPR, however.

By the way, WNET in New York is really licensed to Newark, New Jersey. And, as another aside, when the Republicans first took over the government in New Jersey, they considered selling all of the Public TV stations that were run by the state to commercial broadcasters. But, as it turns out, none of the New Jersey Public TV stations were on commercial channels.

I don't know, I guess you got the NCE people on one side, and the commercial
folks on the other, and . . .

It's a political thing too...NCE is often accused of being too "liberal",
while the commercial stations, esp. talk radio is accused of being
too "conservative". It really depends on the program in question, as well
as how one defines those too political terms.

Speaking of which, here in LA, KCRW 89.9 (Santa Monica College) is being
spanked in the "liberal" (and I mean really--as in those throwaway newspapers
you get in the record stores) papers for cancelling a reggae program
from its lineup about a month ago. You should read some of the
letters and articles, accusing KCRW of "racism" for cancelling the program.

Then let the elitist pay for their own radio. Let the commercial program be sponsored by the expensive resturants, wine stores, lawyers. Why should my tax dollars (and it's the MY that is important) go to support the proproganda arm of the liberals to spread the gospel of socialism (under the name of Liberalism, sponsored by the democratic party)/

>#3 in morning drive (see above). About 50 stations in this market would
>kill for such mass appeal.

Then why did all newsradio fail so badly (and it did). In the world of the commercial (the REAL world) you must do what people will listen to, so that advertizers will pay for it. If you are number 3, then why doesn't number 6 go to an all news format and try to take some of your audience. You may and may not have the numbers you say, but if you were forced to stand by yourself in the commercial world, you couldn't pay for yourself.

I'm against government support of any sort of artistic expression or broadcasting. Except in the case of something like VOA, or KET (formed to spread school TV programs through rural Kentucky), commercial is the name of the game.

If the artist can't sell his painting, the solution is NOT government support, it is to paint what sells, no matter how intellectually pleasing it is. Now, if he wants to paint "fine" art (subjective taste here), ok, but don't force me, through the government, to pay for it.

Same with radio... the trouble with "thoughtful radio" is that only one point of view is considered "intellectual". Any sort of conservative view is viewed as base, and not worth discussion by intelligent people. What the conservatives are so mad at is that anything conservative is treated as intellectual trash, and the "arts and crossant" crowds opinions are considered refined. Trouble is that the A&C crowd is what got us in so much trouble.

Robert
rap@iac.net

[Moderator's Note: I believe that many NCE stations would gladly trade the government dole for full commercial status. Bill]

Stay at the hotels "across the street." I was at the Opryland last February at a convention and the rooms aren't that much more spectacular than other hotels except for the balcony or small porch you can walk out to next to the indoor gardens. But you can walk through those without being a hotel guest as well as eat at the restaurants. Apparently, they have the best buffet on Sundays in the hotel. Your money is wisely spent elsewhere than on hotel rooms, such as subscriptions to trade periodicals. Have fun!

: WHHS, a high school radio station, is actually going to undertake a remote
: broadcast from another hgih school on Thanksgiving Day.

Dave--

I am faculty advisor at WOVI Radio, Novi High School, Novi MI. We do 15 to 20 sports remotes per year, and a few Public Affairs remotes, as well. We usually go on the cheap and borrow a dial-up line from the host school-- whenever possible. The costs are high-- a football game in Oct. from 2 miles away ran $187. The phone call itself itemized out to under 4 bucks. The rest was labor, etc.

Anyway... dial-up line audio quality is not the best... but the trade off is worth it. My students get to do remotes that we otherwise couldn't afford to do. We have a Gentner Hybrid Coupler on each end. Works well.

We have a balanced line in a conduit out to our football pressbox. 1/6 of a mile is less than a thousand-foot spool of Belden cable! (Oops, no. My math is off. Wish we'd go metric.) We don't have lines to the baseball field, so I add another spool-- one of those handy hardware store reels-- and lay it along the fence. I've even used as much as 1400 ft. for a softball tourney behind the city rec center. No problems.

Hope you get it all worked out.

SUBJECT: Re: Radio Resources????
I think its time that "Radio Resources" be investigated for criminal behavor!
A while back I tried to order equip from a "Chuck Spencer". Gave him my credit card # for payment. Next morning, got a call from "chuck" telling me
equip I wanted was now "unavailable" When I asked if he charged my CC yet,
he told me that he had, but would issue an immediate credit.
When I got my credit card statement I found the charge on it , but no credit
was issued. I called "chuck" to find out what the hell was going on, he said
the person responsible for doing this was out and would not be back for two
weeks! I told him this was unacceptable as it should have been done two months ago! I asked to speak to the owner and was told that Mr. "Scarbrough" was not in. (gee, how convenient)
I called back the next day and spoke to "Ashly Scarbrough" (probably not his
real name) and he acted like he was doing me a favor by talking to me. I told him to run the credit on my CC and that I would NOT hang up until he
gave me the credit authorization # to prove it. He said he would NOT do that and would get to it when he could and then HUNG UP on me.
I finally had to call my CC people to remove the charge.
I also called Radio World magazine to complain about Radio Resorces questionable business practices, and was told I was not the first person to bring this to their attention.
Apparently, they have QUITE a reputation
So, beware of the Radio Resorces company; Its a SCAM

Chuck Forsberg WA7KGX (caf@omen.COM) wrote:

: Could you please explain your comment "Kahn has an audio
: bandwidth limitation"? The only bandwidth limitation I ever
: noticed with Kahn was that KKSN kept its signal to within its
: assigned channel instead of polluting several adjacent channels
: the way the CQUAM stations do.

My understanding was that the Kahn system limited difference information bandwidth to 5 kHz. However, that understanding may have come from someone who thought AM generally was limited to 5 kHz bandwidth, which is a common misperception if one assumes no bandwidth limitation at the receiver. Hence the somewhat fuzzy nature of that comment.

The SRF-A1 and A100 do seem to have lower high-frequency response in the "B" (Kahn) mode than the "A" (Motorola/Harris/Magnavox) mode.

Regarding other comments:

Tim Sawyer: thanks for the history from someone who was there!

Michael Schuster: the SRF-A42 is listed in J&R's latest catalogue. I have been thinking about ordering it but I generally hate to order anything through mail order unless I absolutely cannot get that item locally.

> picks the taxpayers' pockets much more than NPR ever has...

How so? They don't take government money (under the veil of the Corporation for Public Broadcasting), and they don't make a profit so there's nothing to tax. It's not _religious_ status that they have, it's NON-PROFIT status they have, which I believe anyone can get regardless of their religious affiliation. They _do_, however, create a few jobs which generate income for the employees, which IS taxed, still giving a net gain to the IRS. So what's your _real_ objection to non-profit non-government-supported religious stations?

We have a Christian station here in Cincinnati that is doing just fine at 104.3 FM and it accepts _advertising_ (gasp!). The programming is Contemporary Christian music, not the usual gushy music or preaching you hear at the other end of the dial...

It's been a while, so pardon me while I play catchup:

THE ATLANTA RADIO THEATER COMPANY progress report

BROADCASTS:

Our new radio home is WREK-FM, 91.1. We can be heard every Saturday
afternoon at 5:30, immediately following "Reality Break". Upcoming
shows include:
12/3 Pilot Error
12/10 Geoffrey Stanhope: In the Hour of the Wolf
(think "If X-Files starred Sherlock Holmes")
12/17 Armada Rising
(the return of the Spanish Armada)
12/24 Special Order
(An antiquarian bookseller locates a copy of the
Necronomicon. I wrote this 'un... And it
really does make sense as a Christmas Eve
story.)
12/31 Luck of the Irish

There will be at least four more episodes, still in the planning stages.

In addition, get ready to look for us on Peach State Public Radio on a
regular basis, thanks to the success of the Hallowe'en program, "The
Island of Dr Moreau". This will most likely take the form of a
quarterly live (or "live on tape") show, and probably a thirteen-week
summer series as well.

LIVE APPEARANCES

PROPS Bar and Restaurant, Thursday, December 8, 1994; 8:00 pm. The
program will include:
THE CRIMSON HAWK: "Compliments of the Vixen"
Our very own 1930's pulp adventure hero faces a very
unusual cat burglar. By *ahem* Daniel Taylor.
TERRA TARKINGTON: "Switch on the Bull Run"
Light science fiction, as everyone's favorite Space
Nurse runs afoul of a telepathic kangaroo. No, really.
Adaptation by Wendy Webb, from an original story by
Sharon Webb.
NIKKI'S PLACE: "The Big Homicide"
The stories Nikki tells are never quite what they seem.
(If "Tales from the Crypt" went "MAD"...) By Gerald W
Page.

THE FAR FUTURE

Feb 17-19, 1995 Under Construction
Mar 2-5, 1995 World Horror Convention
July 15, 1995 North American Science Fiction Convention

The juxtoposition of news and opinion could be an entire subject, but I believe its a trend that you'll be hearing more of. The driving forces are (1) the desire to entertain and (2) economics of not maintaining "news only" staffs. In Pittsburgh, once the nation's 14th largest market, even legendary KDKA ceases to have live, local news after 8 pm weeknights and after 1 pm on weekends. It's a shame that news is not available, and even worse when an event -- such as our recent Flight 427 crash -- occurs in the evening. While KDKA eventually had newscasters available, the sports host was left doing a talk show of live hearsay from "eyewitness" callers, much of which was incorrect information. It's not just where was the news team? Where was the news judgment? It seems a shame that money can't be found for a night news anchor in a major market.

Regarding the WTOP sounders, jingles and sounders in general are becoming more and more generic...customization appears to be done at the local level (rather than paying PAMS)...again, even KDKA has pushed aside its disctinctive audio logo in AM and PM drive for a canned sounder used in other markets. WTAE has switched to an obviously generic package of pop song parodies using talk radio words or generic spoken liners, rather than a full-blown customized audio logo, sounders of the same "family", and even 30-second image-builders. I'm sure research and economics support the change...but *I* like radio that sounds like radio!

5524. 100 GRX -> 100 X in Baltimore, MD

Source record: 36129

WGRX (liscenced Westminster, MD) has chnaged its format to what is calls "Classic Rock for the Next Generation." For the past couple of days, they have been saying that something new was coming on Friday, 12/2/94 at 3 PM. Indeed, they made the switch then with the morning people inaguarating the new format. For the past couple of months, they have upped the amount of chatter on the station and moved the playlist somewhat more current and less on the "classic" of rock and roll. I listened to the new 100 X (their new slogan) and they are playing Rolling Stones, Pink Floyd, 10,000 Maniacs, Bryan Adams and others. They are also playing some harder more alternative songs that I don't recognize. As for staff, they SAY that everyone is still going to be there, but we'll have to wait and see.

I am curious to know what precipitated the format change. I always thought that they had good solid ratings. They cover into Hagerstown, up to Harrisburg, PA and of course, Baltimore, MD. Although Arrow is on the air, they (Arrow) aren't receivable in all but WGRX's southern coverage areas. There is a new Arrow-type station in Baltimore (The Colt), but they don't (IMO) have as broad a playlist as the old 100 GRX had. Anyone have any ideas?

I'll post if I hear anything else.

-Mike

5526. The "Buffalo Hillbillies" and Western NY talk radio

Newsgroup: rec.radio.broadcasting
Date: 1994-12-05 01:07:47 UTC
From: talk1370@aol.com
Message-ID: <3btp53$1i9@vixen.cso.uiuc.edu>
Source record: 36130

In article <3br4dh$qoj@vixen.cso.uiuc.edu>, au664@freenet.buffalo.edu (Paul Kerr) writes:

(On JR and Susie at 'KB and other WNY talk radio matters)

The story on Jay R. and Susie is that the show is actually originating from WWL in New Orleans, where they do a live local late morning talk show. The pair were popular a few years ago on another Buffalo station, WGR/550 (of which more later). So when Keymarket, owner of WWL, acquired Buffalo radio stations including WWKB, they offered extra money to Jay R. and Susie to do a second show back to Buffalo by satellite. They know Buffalo from having lived there for some years, but they've rarely set foot in Western NY since leaving in, I believe, 1992.
Speaking of WGR, could the noose be tightening further around the neck of midday motormouth Rich Michaels? He's already on borrowed time, and in jeopardy because of a combination of poor ratings and insensitive racial and ethnic remarks that have caused protests and discouraged some potential sponsors. Now the big Buffalo Teachers' Federation, angered by what they consider borderline slanderous attacks, is launching a boycott on his remaining advertisers, and he's fighting back by pleading for support on the air. This is not dissimilar to what happened to former WHAM (Rochester) midday host Jack Kinnicutt early this year...and note carefully that I said "former" host. Will Michaels bite the dust? The man who brought him to Buffalo, longtime friend and former PD Chuck Finney, has been gone to Cincinnatti for months now. Michaels is already being heard in recorded commentary in his old market, Lansing Michigan, and there's growing speculation that without a BIG gain in AQH share and spot billing, he'll soon be back there permanently.
Bob Smith, middays WXXI/1370 Rochester NY

5527. Re: pseudoChristian stations and tax status

Newsgroup: rec.radio.broadcasting

Source record: 36132

ab415@lafn.org (charles hobbs) writes:

} Is your argument with *all* tax-exempt organizations, or just the
"religious"
} ones?

Religious. Of particular despisition are the double-dippers who weasel their way out of paying the taxes every other commercial entity is required to pay (and let's face it---most of the "non-commercial" religious stations are on the air to hawk the latest piece of "Christian" market junk as "premiums", be it the old-fashioned prayer cloth, the latest religious record album or the latest video from the sponsoring preacher attacking government officials, non-Caucasians, gays, non-Republicans or non-English-speaking citizens of the U.S.A. in a distinctly non-Christian manner) and then turn around and sell ad space to car dealerships and travel agencies. If someone thinks God can't provide enough revenue to pay Caesar what is Caesar's, they obviously have no actual faith in said God and consequently have no business using the public airwaves to tell other people to have faith.

As well, markm@xetron.com (Mark Malson) writes:

} > Willing to go the whole route and also yank the tax-exempt status of the
} > even-lower-rated (often commercial) religious stations? Their freeloading
} > picks the taxpayers' pockets much more than NPR ever has...
}
} How so? They don't take government money

They don't PAY the Government money, either. They're quite willing to bitch about how they think the Government wastes money on the NEA or the CPB, and to attack politicians who don't spend tax money the way they want (a flagrant violation of the laws concerning their tax-exempt status, BTW) but they don't have the guts to contribute to that pool of public funding that they're complaining about.

and they don't make a profit so
} there's nothing to tax.

No profit? You mean CBN, TBN and VCY all run on defecit budgets? I'll believe that when Pat Robertson and Paul Crouch start getting their suits off the rack at Sears.

They _do_, however, create a few jobs which
} generate income for the employees, which IS taxed, still giving a net gain
} to the IRS.

Bullcrap. The employees' income taxes will NEVER make up for the PROPERTY taxes these stations so conveniently get out of paying.

} We have a Christian station here in Cincinnati that is doing just fine at
} 104.3 FM and it accepts _advertising_ (gasp!).

If they carry ads, they have no business (no pun intended) asking for
non-profit status. Period, paragraph, end of story.

How does CQUAM "pollute" adjacent channels any more than the Kahn system would??

Although the C-QUAM systems suffers whenever the carrier phase is pertrubed the Kahn system suffers when adjacent channel signals are strong enough and corrupt the respective sideband signal that contains either the L or R channel information. Assuming that you are comparing CQUAM to the Kahn system on a 10KHz channel spacing I find it hard to believe that the Kahn system suffers any more audio bandwidth limitations than C-QUAM

A colleague who wants to syndicate programming is looking for a computer-readable mailing list that would target "nostalgia" stations. Do such format-sorted list exist somewhere, or must he continue to slog through printed yearbooks?

If you'll e-mail replies, I'll summarize and forward to Bill for posting. Many thanks!

Cheers,
Mark

>Brian Andrews
>Anchor, CNN

We're a CNN Radio affiliate, though our primary hourly national newscasts are from the ABC Information Network. We do use the CNN stuff throughout our own news blocks (AMD/PMD) and elsewhere. I started my career at a CNN Radio affiliate in Ohio (WOKG-AM "Talk 1570" in Warren, which is now something else).

My favorite CNN Radio story came when three male Talk 1570 staffers were sitting around talking about one of the female anchors...I believe she was also on the TV side on Headline News. (The name escapes me, tho...) We'd jokingly started an in-house fan club for her, and shouted her name in the halls of the station whenever she hit the top-of-the-hour cast.

So we were chuckling about this one day and decided to call her on the CNN 800 line and tell her about this. She was laughing and chuckling so much that we honestly believe it threw the poor woman for a loop on her next hourly. Felt kinda bad about that. :)

I suspect that CNN Radio (and your other former employer, USA) ends up on a lot of smaller stations as the primary hourly news source because the bigger stations end up using one of the ABC variations. But there are probably a lot of big affiliates like ours using CNN as a source, but ABC/CBS/etc. for the hourlies.

Anyway, I've always liked CNN Radio...though I wonder at times if it's Len King, a couple of stringers and a lot of TV sound bites. ;)

As a NCE station operating on a non-reserved channel (102.1 Mhz) let me say thay contrary to a previous post, we are not able to sell commercials without violating the terms of our licensing. We are covered by all of the FCC NCE R&R. Our frequency position makes no difference. The pertinent rule is 73.513.

I don't know the specifics of the NYC TV station that is non-commercial sometimes and commercial other times - my guess is that it is like WLLA (channel 64) here in Kalamazoo that is a commercial station featuring religous programming, but has fundraising because they can't sell enough commercial time to make a go of it. As far as the FCC is concerned, they are NOT a non-commercial station, even though their on-air pitches sometimes makes their viewers think so.

As for us being out of the reserved band, the University (licensee) was *given* this frequency by a commercial broadcaster who couldn't make it work back in 1951. The University almost got a second non-reserved channel in the late 60's, just before FM became commercially viable. Several people have approached the University over the years about making this channel a commercial one and moving this station into the reserved band. Fine, the University has said, pay all the costs of the transfer and we'll do it. So far, no one has been able to come up with a viable buisness plan that would allow them to do it.

I am interested in this particular topic because the idea that a merchant should pay ASCAP or BMI a fee for public broadcast use is rather absurd. Would you have restaurant patrons provide their own private sound systems as an alternative...(20 radios in a small restaurant blasting with 20 different programs would certainly add a flavor to the general ambience)? Then would ASCAP/BMI want to charge patrons for use of their receivers in public places? How many times would you charge for the same service? You could make a point about charging restaurants and other merchants for the performance for profit angle, but then the merchants should stop shamelessly promoting the music business without proper compensation by the music business!

There's nothing actually new to report since my last visit to the Norwich/New London CT area...but it's interesting to note just how much you can hear in that area with a halfway decent radio. Here's what I caught on FM last night, with nothing more than an Aiwa walkman:

88.3 WPBX Southampton LI
88.7 WNHU West Haven CT
88.9 WJMJ Hartford
89.1 WNPR Norwich
89.5 WPKN Bridgeport
89.7 WGBH Boston
90.1 WECS Willimantic CT
90.3 WRIU Kingston RI
90.7 WFUV New York City
90.9 WBUR Boston
91.1 WCNI New London
91.7 WHUS Storrs CT
92.1 WLNG Sag Harbor LI
92.3 WPRO Providence
92.5 WWYZ Waterbury-Hartford
92.7 WMVY Tisbury (Martha's Vineyard) MA
92.9 WBOS Brookline-Boston
93.1 WHYN Springfield MA
93.3 WSNE Taunton MA-Providence RI
93.5 WFXR Harwich Port MA
93.7 WZMX Hartford CT
94.1 WHJY Providence
94.3 WMJC Smithtown LI
94.5 WJMN Boston
94.9 WXTK West Yarmouth MA
95.1 WRKI Brookfield CT
95.3 WHFM Southampton LI
95.5 WBRU Providence
95.7 WKSS Hartford
95.9 WEFX Norwalk CT
96.1 WSRS Worcester MA
96.3 WRZE Nantucket MA
96.5 WTIC Hartford
96.7 WEHM East Hampton LI
WKHL Stamford CT
96.9 WBCS Boston
WFPG Atlantic City NJ
97.1 WQHT New York

97.3 WJFD New Bedford
97.5 WALK Patchogue LI
97.7 WCTY Norwich
98.1 WCTK New Bedford MA-Providence RI
98.3 WILI Willimantic CT
98.5 WBMX Boston
WMRW Westhampton LI
98.7 WXZR East Lyme CT
98.9 WXXW Webster MA
99.1 WPLR New Haven CT
WPLM Plymouth MA
99.3 WBLQ Block Island RI
99.9 WEZN Bridgeport CT
100.1 WQVR Southbridge MA
100.3 WOTB Middletown RI
100.5 WRCH New Britain-Hartford CT
100.7 WZLX Boston
100.9 WTYD New London
101.1 WFAL Falmouth MA
101.3 WKCI Hamden-New Haven
101.5 WWBB Providence
101.7 WBAZ Southold LI
101.9 WCIB Falmouth MA
102.1 WAQY Springfield MA
102.3 WVVE Stonington CT
102.5 WCRB Boston
102.7 WPJB Narragansett Pier RI
102.9 WPXC Hyannis MA
WDRC Hartford
103.3 WODS Boston
103.7 WWRX Westerly RI
103.9 WRCN Riverhead LI
WOCN S. Yarmouth MA
104.1 WYSR Waterbury-Hartford
104.3 WAXQ New York
104.5 WXLO Fitchburg MA
104.7 WBEA Montauk LI
105.1 WWLI Providence
105.5 WQGN Groton CT
105.7 WCLB Framingham-Boston
105.9 WHCN Hartford
106.1 WBLI Patchogue LI
WCOD Hyannis MA
106.3 WWKX Woonsocket RI
106.5 WBMW Ledyard CT
106.7 WMJX Boston
106.9 WCCC Hartford
107.1 WFHN Fairhaven MA
WWHB Hampton Bays LI
107.3 WAAF Worcester MA

107.5 WFCC Chatham MA
107.9 WEBE Westport CT

So there you have it...one location, and every commercial FM in the state of Rhode Island, almost every FM in Connecticut (except the NW corner), almost every Cape Cod FM, almost every FM in Eastern Long Island (oddly, WBZO 103.1 in Bay Shore did not come in, and WRCN was hard to hear under the very strong adjacent-channel WWRX). And then just to add to the fun, most of Boston (except for 104.1 WBCN and 107.9 WXKS which were blocked by co-channel), a smattering of New York City, and even WFPG! I'd love to see what could be done there with a good receiver and a yagi.

The dial there also shows just how bad 80-90 has crowded the radio dial. I'd guess that 10 years ago, you could have picked up much more NYC FM, before all the co-channel dropins on 98.7, 100.3, 101.1, 102.7, and 107.5. (Providence on 92.3 and 105.1 goes further back, as does Falmouth on 101.9). And I'd like to see what could be done there with a good TV yagi...I bet the co-channel between the channels 2, 4, 5, and 7 in Boston and NYC must be fun!

Reno, Nevada, gets a mix of CBU and XETRA, with Tijuana usually on
top. I suspect a few hundred miles north and it's solid CBU.

FYI, the best CBC signal into Reno is 1010-CBR Calgary, which is solid
at night, and I have logged late morning as well. (I once logged CFRB
from Reno after CBR s/off as well.)

I've never heard any of the CBC French stations in Reno.

A few years ago I used to hear XETRA regularly after 0100 (local time)
when CBU would sign off. It's impossible now that CBU's on 24 hours,
and the antenna towers being only a few kilometres from home doesn't
help any.

>I just stumbled onto this newsgroup. Wow! There are lots of other radiophiles
>out there!
>I've got 2 questions:
>1) How can I get hold of the schedules and station lists for syndicated
>AM radio programs?
Try writing the program, care of the station. For example, if you wanted
a station list for Bruce Williams, and he's on your local station WXXX,
write to: Bruce Williams, c/o WXXX, City, State, Zip.

That should get you started with most of the syndicated programs.

>2) Are there any new solutions out there to improve AM radio reception,
>where distance and interference are problems? We've tried the Selectatenna,
>but without luck.

The effectiveness of any of these amplified/enhanced antennas will vary
with the type of station you're trying to receive. Any radio will have
an easier job with a clear channel station, than with a distant local
station on one of the "graveyard" frequencies (1400, 1450, 1490, etc.)

What station are you trying to receive?

Keep in mind that neither Kahn nor anyone else can suppress a sideband, while maintaining compatibility with envelope detectors, without adding distortion components to the stereo difference signal. These distortion components can't be removed in the receiver. This may explain the (alleged) limiting of the difference signal to 5kHz. The distortion components that would have to be added to the signals beyond 5kHz may make it difficult to meet the occupied bandwidth rules.

I am curious to know whether there is a source of .WAV files related to the broadcast industry. I would be interested in things like liners/legal IDs from stations, pieces of famous broadcasts, etc. If there is a place on the Net where this is avaliable, please E-mail me or post here. Thanks for your help.

-Mike

PS- If there is a site, I would like to contribute some of the things I mentioned about once I get my system going.

Its too bad that John "Records" Landecker's creative talent is restricted
by magic 104.3 conservative approach to radio programming. Maybe that is a
comment about how segmented the radio market is.

It's official. As reported about a month ago here by yours truly, WTEM AM 570 (The team/All sports format) will not be renewing their contract with the Washington Redskins football team. The struggling station decided they can't afford the expensive broadcast rights for the NFL team that is also struggling. Since the rights for the games are now up for grabs, it looks like three stations will be bidding on them. WJFK FM 106.7 and AM 1300 (Local Talk/Stern/Don and Mike/Greaseman), WMAL AM 630 (Local and network talk) and WTOP AM 1500 (All news format) all are expected to bid on the rights. Of the three WJFK, which is owned by Infinity, has the deepest pockets. But as we learned three years ago when WTEM won the rights, anything can happen.

WHUR FM 93.9 (Urban format) has lost afternoon talent Randy Davis. Davis now works mornings up in Baltimore on WERQ. Randy teams up with Tony Hill at WERQ. Stan Boston replaced Davis in the afternoon at WHUR.

Local talker Armstrong Williams, formerly of WOL AM 1450, has finally found a syndicator that can bring his show back to Washington. Williams who had a deal with the Talk American Radio Network is now being syndicated by Salem Radio Network. The reason for the switch was Talk American's inability to secure a Washington affiliate for Williams' show. WAVA FM 105.1 (Religious format) will now carry Williams' show from 10 p.m. to midnight beginning in early January.

Once again bad-boys-gone-national, Don & Mike, add more affiliates this week. WCGC in Charlotte, NC., and WGBB AM in Long Island, NY., will carry the show live from 3-7 p.m. WGBB's sister station, WBAB FM in Long Island, will air the Don & Mike show on tape delay at night time. It took WJJD in Chicago only two weeks to learn that its a bad idea to chop off the last hour of the D&M show. So, they've changed their minds. WJJD began airing the show in its entirety on Monday, December 12.

Smooth Jazz WJZW FM 105.9 has changed their studio line telephone number to a toll free exchange. Listeners in town and those in the far out suburbs (like me!) can now call 800-779-1059.

[...]

As I understand copyright law as it currently stands, the owner
of a copyright has almost complete control over the created work. If
they want to charge you to play it in your store, that's their right to
do so! If you don't want to pay, you don't have to use their material.
I believe there is asome sort of a fair use exemption for stores under
400 square feet when the sound system is a typical consumer radio driving
no more than 4 speakers. There was a big court case about this several
years ago (I think the store was the Gap). The store lost and the
copyright holder won.
Now... there is room for improvement in the copyright laws. We
should determine what these improvements should be and work towards
changing the law. As it currently statnds, however, I believe ASCAP, BMI
and other music licensing organizations are fully within their rights by
asking retailers to pay for the use of their music.
It DOES seem, however, that ADVERTISERS are benefiting from
in-store use of the music. As such, stations can charge higher rates and
licensing organizations can collecte higher royalties from the stations.
This would be up to the licensing organizations to decide, as it
currently stands. It would, however, be interesting to change the law to
allow for the unlimited distribution of all copyrighted material that is
available to the public at no charge PROVIDED no changes are made to that
work. So, you could tape or play a radio or TV station on your premises
as long as all the commercials ran also (which increases commercial
viewership, which increases rates, and everyone gets paid!). The same
would go for photocopying. Go ahead and copy the magazine, but you can't
cut out the ads. Again, this is NOT the way the law currently reads, but
it seems like an interesting idea. Once any material is advertising
supported, it seems that increased circulation benefits everyone.

Message-ID: <3c2q7h$lrs@vixen.cso.uiuc.edu>
Source record: 36205

How many readers of this newsgroup have experience with PC-based digital automation systems? Good experiences or bad?
We use a "Troll" from Dave Scott Studios on one of our stations. It tends to be a bit bare bones as far as features go, but (relatively) intuative to use. The *BIG* problem is that their software upgrades tend to be *very* buggy...to the point where it almost always disrupts some vital function. The most recent experience we had was it deciding that all dayparts were overnites, and dropped in the jock breaks accordingly. (It was nice to hear myself in mid-days, but...). When our CE talked to them about it, their response was something in the line of "oh yeah, that upgrade was bogus" or something along that line. Any similar experiences?

The station we use it on is AOR, so there's no talk over music anyway, but has anyone had experience with systems that WILL let jock talk run over intros/fades? How does it compensate for levels (ie "pot down" the music while jock is talking)?

Recently, I attended Rich Conaty's 40th Birthday party. For those of you who don't know, Rich is the host of Big Band Saturday Night and Sunday's Big Broadcast on 1560 WQEW in New York. The Party was held in the private dining room of Jimmie Walkers, a bar in Manhattan.

Among those in attendance: Manhattan Mary, Mr. and Mrs. Conaty (all the way up from Florida), Stan Martin, Lee Arnold, Jonathan Schwartz, Valerie Seagraves, Bill Jerome (all of WQEW), Lloyd Moss (WQXR), and singer Dolly Dawn.

Dolly serenaded Rich with her versions of "Bye, Bye Blackbird" and "Happy Birthday." Rich serenaded Mary with his version of "I Can't Believe That You're In Love With Me." We all serenaded each other with Rich's theme song: Fats Waller's "You Meet The Nicest People In Your Dreams."

When we weren't serenading, we were being entertained by a first-class band, featuring Roy Gerson on piano, and Herb Gardner on trombone (yes, trombone).

A wonderful time was had by all.

If you'd like to wish Rich a "Happy Birthday," his e-mail address is:

Happenings in the #40 market:

*Alan Pergament's column in the Buffalo News on Friday reported on the possibility that Marc Stout may be leaving WGR-AM/WGRF-FM when his contract runs out in April. Sources said he might be leaving for Denver to work for a 4-station group that has the radio rights to the NFL's Broncos,baseball's Coloradio Rockies,and the University of Colorado football. The PD at KOA, home of not only the Broncos but the Rockies as well,is Bob Richards(ex-PD at WUFX-FM;he also PDs at KBPI-FM). Stout was quoted as saying that wherever he goes next-if he does-"I still want to be involved in sports,which is why Denver is so appealing." BTW,Stout took ill on Thanksgiving Day,forcing him to leave the Bills pregame show to head to a hospital for treatment of food poisoning.(Gee,I thought you were supposed to get ill AFTER the meal,not before it. :))

*To follow up on an article that Bob Smith of Rochester's WXXI-AM posted regarding WGR's Rich Michaels trying to get support for his show:on his show yesterday,he said that the Buffalo Teachers Federation has cut the station off from access to its press releases and news conferences-bleating that it impedes the public's right to know what is happening. Also,he claimed that 2 advertisers(of whatever he has left)were harassed with calls from the BTF-going so far as to say that the BTF was practicing censorship. Let me see if I have your line of logic down,Rich:Because the BTF doesn't like what you're saying,they're doing censorship by calling for a boycott of your show,thus depriving you of your First Amendment rights. Hate to tell you this,but we all have free speech rights. This from a guy who implies that the Buffalo News isn't going to kick him out-BTW,they've only written about you 3 times in the last year-plus. And,you still haven't come on this board to explain why you were doing commetaries on a Lansing,Mich.station why still under contract to WGR. Might it be because you don't have what Tom Leykis refers to as the "big brass ones" ?

*Claudine Ewing is still on a part-time basis at WIVB-TV(ch.4)whlie still at WBEN-AM(NewsTalk 930),but News Director Kirk Varner said that she would be considered for a full-time position. Perg may have noted that part, but I noticed it first.

*Another Buffalo radio vet heads to that great broadcast studio in the sky.
Richard Rifenburg died early yesterday in Cheektowaga at the age of 68. For over 30 years,he was a mainstay at WBEN and at what was then known as WBEN-TV,arriving in 1951 from Detroit's WJR-AM(where he was a sportscaster). He did color commentary for the Buffalo Bills(of what league,I don't know), play-by-play for the Univ.at Buffalo Bulls,as well as talk shows-even doing a stint as a late-night disc jockey. He left WBEN on a sour note in 1979,when

Algonquin Broadcasting(the new owners at the time)dropped his show to pick up Larry King's late night show on Mutual. He later resurfaced at WEBR(now WNED-AM)as the host of a Sunday music and talk show.
He also did TV work as well,working alongside the late Chuck Healy and Stan Barron,along with Van Miller on Channel 4's "Let's Talk Sports." A morning breakfast show from AM&A's and an exercise show were also on his resume.
Rifenberg also was a good athlete as well,having been seletced for All-State honors in his home state of Michigan for football,basketball and track while at Arthur Hill High School in Saginaw. He also played center for his high school basketball team,was tight end for the Michigan Wolverines (who won the 1948 Rose Bowl)and named an All-American. He is a member of the University of Michigan Hall of Fame. After he graduated(with a degree in communications and education),he played for the Detroit Lions for 2 years until a knee injury ended his career. Rifenberg also taught communications at Medialle College for a few years,as well as selling ads for the Buffalo Courier-Express before being hired by Erie County as an inmate training supervisor at the Erie County Correctional Facility in Alden.
Rifenberg had 3 sons and 1 daughter,as well as 2 grandchildren. Services will be private.

*One last note:I'm now on the Toronto Free-Net with the following e-mail address: ag064@freenet.toronto.on.ca . On the system,there's a Lynx hookup to CBC Radio schedules,as well as a discussion group.

I'll be in the Oakland/San Francisco area for the
first time on 12/09/94. I need to know the frequency
of stations that carry the following show/format:

-A news/weather/traffic station
-An all sports station (if available)
-A station that will broadcast the two NFL games on Sat 12/10/94
-A station that may still broadcast LA Raider games to the Bay area
-A station that broadcasts the Howard Stern show

Thanks
Charlie

From: sml@eden.rutgers.edu
Message-ID: <3c2q7s$lsi@vixen.cso.uiuc.edu>
Source record: 36209

I'm a big fan of Casey Kasem, and listened faithfully to "Casey's Top 40" every Sunday morning on Z100 in New York. This week, however, I tuned in to Z100 at 6 am when Casey is usually on, and he wasn't there. I called the station's programming department on Monday morning, and they told me that they'd dropped the show!!

So, I'm wondering if there is any one out there who might be willing to work out a deal with me...you send me either a complete or scoped (airchecks only) copy of "Casey's Top 40" each week, and I'll send you either a complete or scoped copy of some show you'd like to hear that airs in New York City each week.

If you are able to help me out, please send me e-mail at:
sml@eden.rutgers.edu

Thank you all in advance for your help!!

Sincerely,
Scott Lakefield

wastes money :on the NEA or the CPB, and to attack politicians who don't
spend tax money the way :they want (a flagrant violation of the laws
concerning their tax-exempt status, :BTW) but they don't have the guts to
contribute to that pool of public funding that :they're complaining about.

Could you please quote the law, chapter and verse? And have you
forgotten about the First Ammendment, which applies to everyone, even
those with whom you don't agree? Tax exempt status doesn't mean that they
have to leave their free-speech rights at the door.

:No profit? You mean CBN, TBN and VCY all run on defecit budgets? I'll
believe
:that when Pat Robertson and Paul Crouch start getting their suits off the
:rack at Sears.

Did anybody say defecit budgets? They are non-profit. So are the
Green Bay Packers, by the way.

:Bullcrap. The employees' income taxes will NEVER make up for the PROPERTY
:taxes these stations so conveniently get out of paying.

And what about the money that Public Broadcasting TAKES out of our
pockets? The employees' income taxes won't even come close to putting a
dent into that defecit.

:If they carry ads, they have no business (no pun intended) asking for
:non-profit status. Period, paragraph, end of story.

He never said that the station asked for non-profit status. That is
something you conveniently added to try and make people assume that they
did. Oh, by the way, here is the exact quote in case you forgot:

:We have a Christian station here in Cincinnati that is doing just fine at
:104.3 FM and it accepts _advertising_ (gasp!). The programming is
:Contemporary Christian music, not the usual gushy music or preaching you

NPR stations do exactly this during their fund-raising "auctions"... yet
NPR ACCEPTS government money IN ADDITION to their fund-raising drives. In
other words, by your own standard, NPR is more despicable than the
religious stations.

> If someone thinks God can't
> provide enough revenue to pay Caesar what is Caesar's, they obviously have no
> actual faith in said God and consequently have no business using the public
> airwaves to tell other people to have faith.

I appreciate your honesty... but do you want to single out religious
non-comm stations to dictate their fund-raising techniques, over and above
a non-religious non-comm station? This is a double standard, and one which
cannot be implemented, unless the First Amendment is overturned. If you
want to take away that sort of fund-raising technique, you have to do it
to _all_ non-comm stations, not just some. But you'll never do that
because there's nothing illegal about soliciting donations. I can't stand
to _listen_ to it (religious or otherwise), but it's not _illegal_...

(Nope. They can't endorse candidates or ballot issues, but they CAN
criticize or support issues and policies).

> but they don't
> have the guts to contribute to that pool of public funding that they're
> complaining about.

This cuts both ways as well. You would have to limit NPR _as well_ from
criticizing OR SUPPORTING any policy of the US Government. They've been
largely supportive over the last two years, but I'm sure their complaining
will be formidable over the next two.

> and they don't make a profit so
> } there's nothing to tax.
>
> No profit? You mean CBN, TBN and VCY all run on defecit budgets?

We HAD been talking about religious _radio_. These are religious TV
networks (except I've never heard of VCY).

I maintain that the non-comm religious radio stations don't make a profit.
Heck, many _major US corporations_ don't make a profit, either (or much of
one, anyway) -- they're designed that way.

> They _do_, however, create a few jobs which
> } generate income for the employees, which IS taxed, still giving a net gain
> } to the IRS.
>
> Bullcarp. The employees' income taxes will NEVER make up for the PROPERTY
> taxes these stations so conveniently get out of paying.

Property taxes aren't federal taxes -- they are local; we were talking
about federal taxes. BTW, many localities _do_ tax the property. Depends
on the city or county. Usually, it's properties specifically set aside for
worship that are not taxed. Radio transmitters and studios usually aren't
co-located with the worship facility, at least from what I've seen.

BTW, cities/counties offer tax abatements to corporations as incentive to
move their facilities to this place or that. I would guess that these tax
abatements overshadow the potential income from non-comm religious
stations by, oh, about a billion to one. My point here is that local
govt's are free to negotiate such taxation with organizations and it
really isn't anyone else's business outside of that locality to dictate
the tax.

I agree. They are not non-profit. They pay taxes just like the other stations.

5559. WTMI's Alan Corbett (Alvis Sherouse)

Newsgroup: rec.radio.broadcasting
Date: 1994-12-06 22:57:11 UTC
From: D Citron <dcitron@gate.net>
Message-ID: <3c2q87$ltm@vixen.cso.uiuc.edu>
Source record: 36214

Last Tuesday, November 29th, the radio business and south Florida classical music listeners especially, lost a legend. Alvis Sherouse, known to WTMI (93.1 MHz FM, Miami) listeners as Alan Corbett, died suddenly of a massive heart attack, in the production room of WTMI. He was 51.

Since apparently no one from the Miami market posts here (and only two from West Palm Beach, that I recall), I'm posting the following, paraphrased/abstracted from articles in The Miami Herald and The Sun-Sentinel, and from my own fond memories. Since I never had the opportunity to meet Sherouse, my own recollections are more like "background" material.

The recurring theme of both articles was that Sherouse/Corbett *WAS*, to the community, the personification of WTMI.

In the Sun-Sentinel, music writer Tim Smith said that Alvis Sherouse "was best known for his popular weekday program, The Open Road, which filled the afternoon airwaves with a breezy combination of music and wit. Avoiding the stereotypical stuffy style of the classical disk jockey, Mr. Sherouse delighted in finding suggestive double entendres in the names of compositions, or recounting anecdotes about composers. In the process, he made classical music fun and relevant for the initiated and uninitiated alike."

Of all the English-language stations in the Miami market, WTMI has probably stayed with its format longer than just about any other station. Its classical format is now 24 years old, and the last time it was fine-tuned was in in 1975 or '76, when WTMI began playing jazz after midnight, in the wake of this market's loss of its only full-time jazz station, WBUS, the Magic Bus. [WBUS was replaced with a new station (Love 94) that plays SOME jazz on weekends. But I've still never gotten over the loss.]

Oldies stations come and go, fads fade, but WTMI has been my favorite for a long, long time -- since college. In spring of 1970, in my first year of college, I wrote a column about local radio programming for a now-defunct (long-defunct) weekly paper. I remember how excited I was to announce that Miami would soon have a full-time classical music station, after reading about plans in the Miami Herald. It was only a few years later that Alvis joined the station.

Following are some Sherouse quotes from a 1986 Sun-Sentinel interview, recounted by Smith:

"I love my name, but it is simply not an acceptable radio name."

"A lot of what you hear on my program is a natural consequence of not coming from a classical radio background, but from rock 'n' roll stations. Those stations are always personality-oriented, and I think that's the way radio is supposed to be -- entertaining. It's just that here we play better music."

Indeed they do. Though I don't recall hearing it lately, a WTMI slogan I have always enjoyed is "The greatest hits of the last seven centuries."

Miami Herald Music Critic James Roos recalls that "on The Open Road, his daily 3 to 6 PM show, Sherouse entertained commuters, introducting the Hamburg State Opera orchestra as "good hamburgers" or barking the name of German composer Carl Orff as Carl 'Arff!'"

Roos also quoted WTMI general manager Allen Stieglitz as saying that Sherouse "made classical music fun for thousands of people who might otherwise have not connected with it."

Sherouse indulged his own wacky musical tastes once a year on his birthday show -- which featured not-quite classical music. I became acquainted with both P.D.Q. Bach and Spike Jones in this way. Smith's story mentioned that this year's birthday show included Judy Garland, Patsy Cline, Ella Fitzgerald, and other atypical recordings.

"So what!" I say. I like them, but you can hear them anywhere. But P.D.Q. Bach and Spike Jones aren't likely to be heard anywhere else but on WTMI, except maybe on the Dr. Demento show -- which (last I checked) is not heard in this market! Please let me know if I'm wrong!

There was more biographical info in the obits, of course. Sherouse was born and raised in Tampa. In his Alan Corbett persona, he was very involved in south Florida's cultural community, although he was a very private person. But I thought what would most interest Airwaves readers would be a glimpse of Alan Corbett, the entertaining on-the-air personality we have lost.

I believe WTMI is planning a memorial concert. I'll post a followup with the details. Or perhaps another TMI fan could fill in the details.

I don't know if anyone from WTMI is on the 'net. Or any other WTMI listeners. But if they are, I certainly invite their comments.

5561. Help me ID this station (800 kHz)

Newsgroup: rec.radio.broadcasting
Date: 1994-12-06 22:57:22 UTC
From: trond@smith.phys.ucalgary.ca
Message-ID: <3c2q8i$lur@vixen.cso.uiuc.edu>
Source record: 36216

Hi, I hope this question isn't too off-topic for this newsgroup.
I just got an e-mail from a friend back in Norway. He's listening
for distant stations on the medium wave, and a few days ago he
heard a station he just couldn't identify.
Apparently, just before the ID, there was an ad where they gave a
1-800 number. I called it for him and ended up at Sears in Colorado
Springs. He then looked up Colorado Springs in his handbook and only found
ONE Colorado Springs station on 800kHz. The problem is, it's a 7W station,
and laws of physics indicate that 7 Watts is just not possible to
detect over in Norway.
The ID itself drowned in interference, but he said it *sounded* like
KLSY, but that station isn't supposed to be on 800kHz.

I would appreciate it if somebody could tell us what station it could have
been, and whether there is some up-to-date listing of north american
medium wave stations on the internet.

Thanks!! :-)

Trond

The TV station that I work for here in Edmonton has an EBS receiver, as (I believe) do most other TV stations. It's a basic FM receiver that is tuned to the SCA channel above the basic stereo channel of a local FM station (I can remember who carries it)

When a warning (or more commonly a test message) is transmitted, the unit then stores the incoming audio in a buffer and emits a warning tone (with a flashing led above "New Message")

The operator than can play back the message by pressing the message button, and listen to it or do whatever.. As it's stored in memory.

These are specially designed units, I'm not sure who supplied it.

Source record: 36221

I happen to be geographically located such that I can tune in several stations that carry Imus in the Morning (spare me your comments about this being a good or bad thing) and Rush Limbaugh (dittos). What I am curious about is why none of these stations are in sync with one another. Some are as little as a couple seconds off some are 30 - 45 seconds behind/ahead. How is this done and why? Thanks.

Yeah we had them here at 103.5 KEDG, Las Vegas for a glorious six months when we where honored to launch Evel Bob over the pond out front of Ceasers Palace and have Marks suprise B-day party at Ballys. Unfortunately the station owner thinks that a morning show should have instant 10 shares with no time or promo support to build an audience. He dumped them and paid their contract off cause its easier for a nimrod to use his checkbook then his head. We still listen to the downlink in production and pass them around for all to enjoy. In fact I still have my M&B t-shirt hanging proudly in the closet>

PS. Did they ever launch Evel Bob over Snake River?

And for all of you wondering Freddy Snakeskin and Dusty Street have reunited here at the EDGE.

>
>
>Hi, does anyone know if the Mark & Brian show, based out of
>KLOS-FM/Los Angeles, is syndicated (or rebroadcast) by any other stations
>around the country?

The Mark & Brian Show started syndication (reportedly) about 1 1/2 years ago in Portland OR (KGON 92.3), and has been wildly successful; KGON is supposedly on top of the FM morning drive and just blowing Portland away.

M&B now boast broadcasting in 10 cities (generally West Coast), and rumor has it they are considering tape delayed braodcast in Japan within the next month or so.

These guys mix it up a lot during their show...there are some incredibly stupid, silly bits (involving stupid, silly listeners), some VERY good interviews with celebrities, and some genuinely touching moments. Couple all that with risque subject manner, and they have the recipe for success. Stay tuned for the "launching" of the Bob's Big Boy statue over the Snake River Canyon (Yeah just like Evel Kneivel) later this spring.

Makes great radio....

5570. WNOV morning man sentenced to 15-day jail term

Newsgroup: rec.radio.broadcasting
Date: 1994-12-06 22:57:51 UTC
From: UltimaJock@aol.com
Message-ID: <3c2q9f$m10@vixen.cso.uiuc.edu>
Source record: 36225

Commander Michael McGee, morning show co-host on WNOV-AM 860 in Milwaukee, was sentenced Friday to 15 days in jail for his part in a protest of the shooting of a young black man by a Milwaukee police officer.

The October 1993 protest occurred near Milwaukee's 5th District Police Station, in the 2900 block of North 4th Street. In the course of the protest, McGee was heard suggesting that a police car be overturned so as to quell the riotous energies of the crowd, and some in the crowd proceeded to do just that.

Circuit Judge Dennis Moroney ordered McGee to start serving the sentence on the 15th of January. McGee replied that he would be honoured to "go to jail on Martin Luther King's birthday." Moroney further ordered that McGee could serve the sentence under Huber privileges, so that he could continue to co-host WNOV's CARTER/McGEE REPORT with Richard G. Carter.

From: UltimaJock@aol.com
Message-ID: <3c2q9h$m19@vixen.cso.uiuc.edu>
Source record: 36226

Monday's Milwaukee Sentinel reports that WNOV-AM 860 morning show co-host Commander Michael McGee will refuse to eat during his 15-day January incarceration on a disorderly conduct conviction. On this morning's program, McGee said that, since he was acquitted of participating in the overturning of a Milwaukee police car at an October 1993 protest rally, his conviction on suggesting the car be overturned amounts to "disorderly speech", protected by the First Amendment, not disorderly conduct. McGee also says that he will refuse any Huber privileges that would allow him to be released for his work duties at WNOV. Co-host Richard G. Carter is organising a defense coalition for McGee; any parties interested in interviewing Carter or McGee should contact THE CARTER/McGEE REPORT's production office at 414/449-4661 (phone) or 414/449-4664 (fax).

The status of the WNYC stations is actually more complicated than it's been made out to be. The radio stations (AM 820 and FM 93.9) are indeed commercial licenses being operated non-commercially. It's unusual but not unprecedented. The TV station is a bird of another feather. It began in 1962 as WUHF-TV 31, an experimental project of the FCC designed to test UHF reception in a crowded city like NYC. The FCC finished testing WUHF in 1964 or thereabouts, and rather than turning it off, sold it (or perhaps donated it) to the city of NY. The calls were changed to WNYC-TV (ironically, the WUHF calls would later show up *on channel 31* in Rochester in 1980), and the station went noncommercial. But in the late 80s, the FCC agreed to allow WNYC to sell blocks of time in a leased-time fashion. I *think* WNYC-TV is not allowed to sell spot time, and I'm certain there are strict limits on how much time WNYC can sell. Strange station.

Incidentally, donating UHF's was not uncommon in that era. CBS and NBC each owned and operated two U's a piece from 1953 till the late 50s. When the nets got out of the U business (they could make more money back then affiliating with a V than going O&O on a U), one of the 4, WBUF-TV 17 Buffalo, was donated to public TV and became WNED-TV. The others were:

WNBC-TV 30 New Britain CT -- sold to WKNB radio, became WKNB-TV and kept the NBC affiliation (Hartford was a 2V/1U market and so NBC had to stay on a U).

WHCT-TV 18 Hartford -- CBS sold it to RKO General, which used it for early subscription-TV tests. Later became a commercial indie again; went dark in 1990 or so. The CBS affil went to new VHF WTIC-TV 3 in 1957 (now WFSB).

WXIX-TV 18 Milwaukee -- CBS had consolidated the CP for WXIX-TV 19 and the dark facilities of WCAN-TV 25 to create WXIX-TV 19 (later 18). The station later became WVTV, a successful indie. The CBS affil went to WISN-TV 12, then to WITI-TV 6. CBS might have done better to keep 18; they're still searching for a new affiliate in Milwaukee now that WITI's going Fox. WVTV is thus far refusing to become that affiliate.

I enjoy CNN Radio. Here in Cincinnati, we had an affiliate (in KY, really)
at 740 AM. They changed their format to something I also enjoy, but now
the nearest CNN news is up in Dayton at 1410, and it's pretty patchy down
here. It always strikes me as a little funny that a whole lot of TV
programming loses really quite little without the picture... only
occasionally do I need a picture when listening to CNN Radio.

I'd enjoy CNN Radio a little more if they'd cut back on the fluff and give
me more real news... that's a criticism I have of most Americal broadcast
news services, though.

Seems like we're coming full circle. Long ago in the days of truly great artists, artists were often (not _always_) commissioned by the _church_ to do their work. If the analogy were true today, then, the non-commercial religious radio stations would be putting out the highest-quality programming. I wish they were...

> Same with radio... the trouble with "thoughtful radio" is that only one
> point of view is considered "intellectual". Any sort of conservative
> view is viewed as base, and not worth discussion by intelligent people.
> What the conservatives are so mad at is that anything conservative is

> so much trouble.

I agree with Robert 100%. I've said here that I oppose NPR because they pick my pocket. However, I DON'T oppose them because of their views. (Heck, the fact that liberalism is alive and well was the primary reason for the Republican landslide last month! :-) If they want to have their haven of liberalism on the airwaves, they should be allowed to, as long as they pay their own bills. And if they pay it by selling advertising or out-and-out begging (like they do now), I don't care. But what's good for the goose is good for the gander. If we allow non-comm stations to exist in order to play All Things Considered (a misnomer if ever I heard one) or classical music, we should also allow other non-comm stations to exist in order to play fire and brimstone preaching and that sickeningly gushy sacred music.

If the Republicans move to cut federal funding to NPR I wouldn't mind it one bit. As far as I'm concerned a local non-commercial station run by volunteers would be just fine. A station in a market like Boston could raise enough money to stay above water. Sure, you wouldn't have expensive, state of the art facilities, and your GM wouldn't be driving a Porsche (no pun intended). It wouldn't be as slick, but so what, it would be more daring. We would have a real alternative, rather than the slick stuff on the air today. John Coltrane sounds the same whether it's being played by a volunteer or a highly paid professional.

>If they carry ads, they have no business (no pun intended) asking for
>non-profit status. Period, paragraph, end of story.

Well, you need to know that there are at least six student-run college stations in the east that are non-profit entities, yet support themselves by running ads. They are: Dartmouth's WDCR(AM) and WFRD(FM), Cornell's WVBR(FM), Brown's WBRU(FM), Yale's WYBC(FM) and Harvard's WHRB(FM).

The Harvard and Cornell stations (at least) are licensed to non-profit organizations separate from the universities.

The one with which I am acquainted (Harvard) gets NO support from the university and has to fend for itself. Yes, it sells ads; otherwise it would be off the air.

As for Pat Robertson and his kind, I wholeheartedly agree they should pay their fair share of taxes. The public does not benefit from the spread of religious propaganda-- especially _political_ religious propaganda!-- and should not be asked to subsidize it.

>
Your (and my} tax dollars go for lots of activities that we would not personally choose to support for ideological reasons--tobacco subsidies come to mind--or for self-centered reasons--many childless people feel put upon by paying taxes to support schools. (As a childless person myself I find this an appalling attitude.) But we are all properly obligated to pay taxes to support decisions arrived at through democratic processes.

As for the "propaganda arm of the liberals...blah, blah, blah," there is no purpose in responding again to this tired old lie, but, for the record, I know of no point of view that doesn't turn up regularly on NPR in general and on my station in particular.
>

>Then why did all newsradio fail so badly (and it did).

What, in God's name are you talking about? The last time I looked at the Arbs (and I admit I don't pay close attention) the top two stations here were AM all news and AM talk/news.

>You may and may not have the numbers you say, but if you were forced to
stand
>by yourself in the commercial world, you couldn't pay for yourself.
>
As a matter of fact, we could. And the pressure from our underwriting department to do so is a matter of concern. We are on the point of getting lost in the general commercial cacophony that dominates not only the broadcast bands, but all of American culture.

>Same with radio... the trouble with "thoughtful radio" is that only
one
>point of view is considered "intellectual". Any sort of conservative
>view is viewed as base, and not worth discussion by intelligent people.

Do you imagine that what passes for "conservative" discussion on commercial radio these days is "intellectual"--to use your word--or thoughtful or responsible? Here in S.F. we probably get a larger dose of what passes for "liberal" discussion on the radio that elsewhere in the country. It is equally useless and destructive. Commercial broadcasting has largely devolved into a swamp of sensation mongering.

Upstream, I attempted to make the point that many people behave from motives other than money-grubbing, and that these motives often cause people to do better things. It's clear that this is a foreign concept to you.

The belief that market economics solve all human needs is as discredited as its opposite. Clinging desparately to it is a spirit-shrivelling excercise.

When considering the mission of PBS, it's important to remember that the stations out there are not "affiliats." They are members. PBS and NPR are membership organizations, and the stations are members, paying dues for services and constantly pushing the organizations to meet their special needs.

Another thing to consider before suggesting that taxpayer support for non-commercial broadcasting be terminated is the fact that public radio and television stations have much more in common with cultural institutions like the library, the symphony, the zoo, the ballet company,, and the local museum than they do with the commercial broadcasters in the cities they serve. A good public TV or radio station contributes to the quality of life in a way that taxpayers have long supported in many different ways.

I don't hear anyone suggesting that the public library should be commercialized. And when was the last time a city turned its zoo over to a commercial operator? Public broadcasters may use the same airwaves and some of the same tools that commercial broadcasters use. But they provide a much different service, one that I hope people will think carefully about before they suggest it be turned over to the makers of pocket fisherman and veg-a-matic.

Think about all the books that you could not find at the public library if it only stocked what "sells." You've just got to put up with the pledge drives and endless repeats of Yanni if you want the beautiful things PBS and NPR make possible to be there when you want them.

> name of Liberalism, sponsored by the democratic party)/>

Why should they? Corporations pay a good deal of the freight,then comes the
public and the government. About your tax dollars:Rob,a lot of us see our
taxes used in ways we don't like. And about NPR being a "propaganda tool":
what utter BS. Might as well chalk you up to another person who can't argue
his way out of a paper bag,or who has your thinking done for you by others. >:>
Sir,NPR is just like the other networks-they use the standard of "quote someone
in power/get response from the opponents" that everyone else uses. And,it's
not above being intimidated:consider that when NPR aired a critical report on
the Contras in the mid-80s,Otto Reich(head of the Office of Public Diplomacy,
which said it was part of the State Dept.,but which actually took its orders
from the National Security Agency,and-indirectly-the CIA. It was compared to
a "vast psychological warfare machine")visited NPR. According to employees
there,Reich said that he had convinced editors at other media to change the
tenor of their reporting;further,he boasted that he had a team of people
monitoring all NPR broadcasts. A staffer called this a "calculated attempt to
intimdate". And,it succeeded in one thing:getting reporters to question
themselves.

> I'm against government support of any sort of artistic expression or
> broadcasting. Except in the case of something like VOA, or KET (formed
> to spread school TV programs through rural Kentucky), commercial is the
> name of the game.

VOA,and the U.S.Information Agency,are both part of the State Dept.,and
as such,could be considered as promoting propaganda. Some media heavyweights,
such as John Chancellor(LBJ's administration)or Sid Davis(under Reagan and
Bush)have served as its director.(they worked at NBC,BTW)

> Same with radio... the trouble with "thoughtful radio" is that only one

> so much trouble.

Great-more ditto-speak. How about fleshing out your own views,instead of
parroting what someone else says? BTW,a lot of things have gotten us into

trouble,but I can guaran-damn-tee you that "the A&C crowd" isn't one of them.

> [Moderator's Note: I believe that many NCE stations would gladly
> trade the government dole for full commercial status. Bill]

They might as well,considering that the underwriting is starting to sound
more and more like commercials.

>at any time. (Are there any rules about noncommercial AM stations?)

There are no reserved "non-commercial": channels on the AM band nor are
there non-commercial licenses issued to stations on the AM band. For
example, here at WOI, operating non-commercially on 640 and on the air since
1921, we're an NPR member, etc., etc. However, we could go commercial this
afternoon if we wanted to..probably after a courtesy-type notice to the FCC.
We could not, of course, be an NPR station under those circumstances.

Cheers.

Hi,
Recently I am making a FM receiver using Motorola chips MC3362.
However I meet a problem on the quadrature detector. Is there
anybody did it before? How's a quadrature detector works? I have
read some books on it, I think the problem is on the quadrature
coil. If anybody have any idea on it, pls share experience with me.

>-

This is what's called "trunked" radio...similar to cellular, in that two people talking to each other will use different frequencies each time they key the mike on their transciever. A computerized system routes the transmission to the right frequency and back again. It's tougher to receive these transmissions...but it's all done usually by the transmission of a digital code or "signature" at the beginning of each transmission. If you know those codes for the local PD, FD, etc, you can program the newer scanners to receive them. Gotta have that extra info, though...

I used to have a Sony car radio with FM diversity, and it worked great. It didn't get rid of all of the multipath but took care of at least 80% of it. I suspect most of the remaining noise was actually caused by front-end overload (my commute takes me close to a lot of broadcast towers).

For a time, Sony stopped making diversity tuners. A dealer told me that few people hooked up the second antenna, so Sony decided to leave out the second front-end.

Fortunately, by the time my first radio's cassette player bit the dust, Sony had re-introduced diversity in several of their radios. This time, they used an IC that alternately switches two antennas between a single front end. My guess is that it switches when it sees an increase in AM noise (which is a good indicator of multipath). It works at least as well as my first diversity radio, so it appears that nothing has been sacrificed by leaving out the second front end. It seems that Sony has instead concentrated on making the one front end better, because it is much more resistant to front-end overload than my old radio, even to the point that the DX switch does nothing more than decrease the seek sensitivity.

Now, Sony's top-end car radios have a tuner called SSIR-EX, but I have no idea whether it's a diversity tuner.

Source record: 36242

Not being in the AM broadcast industry since my 60's 1st phone days,
I enlisted some help from Chris Hays:

Kahn stereo reduces separation above 7.5khz. The 5khz figure dates
back to before the rules were changed to allow for the current
RF mask. When the STR-84 exciter was designed, the separation
was let out to 7.5khz. The spectral bandwidth of Kahn under
single-channel full-modulation conditions is equivalent to 1 radian phase
modulation, so it has significant second-order sidebands. Thus,
Kahn, being a responsible engineer, limited the L-R separation
to prevent the system from ever exceeding the rules, now known
as the "RF Mask".

C-Quam has never respected that mask. It has the same spectrum as
full quadrature, and has significant third order components. (That is,
the spectrum has significant sidebands at three times the modulating
frequency, although the third order is down quite a bit). It is
quite scary to see on a spectrum analyzer under full steady state tone
modulation. Normal program won't be quite this gross. But, consider
that this energy is not "garbage," it is part of the transmitted signal
and must be recovered for the signal to be properly decoded. Add to
that the fact that C-Quam uses a tracking algorithm for distortion
correction, and you begin to wonder how it can work at all in a
typical narrow band receiver. (answer: not very well).

In truth, C-Quam isn't really a quadrature modulation scheme at all.
It is really a mixed-mode approach, since the I term is replaced
with envelope. The truth is, the better way to do mixed mode is
the way Magnavox did it (the original system chosen by the FCC):
it is spectrally cleaner and much easier to decode.

Of course all this doesn't touch on the major adavantage of the
Kahn technology: The stereo doesn't suffer from multipath
anomalies that happen with skywave and other reflective
phenomena in the path. This is because the stereo is produced
using frequency separation rather than phase separation.
In a properly designed receiver, the reception under difficult
conditions will be superior to mono.

Feel free to send this on to Rec.Radio.Broadcasting. I'll try and
look in on it soon.

Chris Hays.

I had a similar experience at J&R back in April. The Salesman gave me a blank stare when I asked for an SRF-42. He was suprised to find it in his stock computer. The following week they had them in the store. While J&R had them for $29.95, Nobody Beats the Wiz had them for $34.95 in Manhattan. I bought one at J&R, they beat the Wiz.

5592. NYC Radio Waves 12/5

Newsgroup: rec.radio.broadcasting
Date: 1994-12-06 22:59:03 UTC
From: SRogMix105@aol.com
Message-ID: <3c2qbn$m6l@vixen.cso.uiuc.edu>
Source record: 36247

NYC Radio Waves 12/5 (20 shopping days till Christmas!!)

Latest on the KISS-FM front--Emmis seems to be moving the station into an "adult Urban" war with WBLS, leaving the younger 'hip-hop' audience to Hot 97, according to station insiders. Meanwhile, could WYNY's Country days be numbered? With KISS-FM's move, there might be room for a dance station to compete with Hot 97, and 'YNY might do it. Such a move would leave NYC without a Country station since the days of WHN in the 70's playing Country when Country wasn't cool!

WDRE and Z-100 are in a war of Acoustic--both are using the term 'Acoustic Christmas' to promote holday shows. WDRE claims to have used it for 3 years ('Acoustic Holiday'); Z-100 claims to be the first. The irony--both shows are for charity. Another fly in the ointment--Westchester radio station X-107 is giving away tickets to the Z-100 show, without mentioning their sponsorship of it.

Playboy is looking for a few good-looking women of radio--they are approaching a number of NYC ladies to appear in a home video "The Women of Radio". One person approached was Hot 97's Morning Maiden Lisa G. Playboy is looking for anyone connected with radio (the press release says even listeners who have won on-air contests are eligible. How's that for a promotional idea?). Call 310/246-4000 for more info.

Now that 'The Maddog' Chris Russo is inked to a long-term deal, WFAN is trying to sign his partner, Mike Francesa, to a similiar deal. However, he's been with the station longer than Russo (since 1987) and wants more money. The negotiations are said to be a bit on the 'testy' side. In addition, his Sunday morning 'NFL Now' show is syndicated by Westwood One/Mutual. Mike used to work at CBS Sports doing college Football and Basketball.

Resigned WOR talker Gene Burns looks to have landed with the Major Network and hopes to start a syndicated talk show by the end of the month. Burns will be based out of Orlando, FLA, where he worked earlier in his career.
He abruptly resigned from his 4-7p show in a dispute over programming and guests. He then asked WOR to talk it over, but they declined. It's unclear whether his WOR contract would prevent a station in NYC from picking up his show.

Till next time--

Scott Rogers

Cross-posted to: rec.video.satellite.tvro,rec.video.satellite,rec.radio.broadcasting,rec.video.cable-tv,rec.music.bluenote

The return of KJAZ (Jazz radio from the Bay Area) to satellite is wonderful. Here is one of the absolute best jazz mixes I have ever heard. They are now satellite/cable only and very new. They are non-commercial and stress *real* jazz, not *new age* nor are they a station to play the sort of jazz that reminds one of feeding time at the stockyards <tm>.

Very nice indeed. The sound quality is superb too, even though they use narrow band subcarriers. Find them on Satcom C1 (otherwise known as F1 in some satellite guides) on channel 4 7.92/7.74 narrow.

One problem, can they stop (or reduce the frequence of) those announcements that they are a "California non-profit mutual-benefit corporation dedicated to the furtherment oif jazz music and the education of said same". I am tiring of those rapidly.

Otherwise, WELCOME BACK KJAZ.

Hello AOL folks:

There is a matter of importance I must bring to your attention
regarding replying to news articles from the AOL newsreader system.

When you reply to an article, you will often see a line such as the
following at the top of your editor screen...

} In article <3c2q8i$lur@some.site.com>, some.user@some.site.someplace
} (Some User) writes:

This line is to designate that you are quoting the previous poster's
words in your article. Unfortunately a LOT of AOL users are not using
it to quote, but merely adding their comments under it, giving the
impression that the poster's (your) words are being attributed to the
'previous' poster.

If you are not quoting a previous poster, PLEASE PLEASE PLEASE delete
the attribution line before you type or send your article. It is
very confusing and has caused some discontent as certain posters are
being quoted as saying things they never said.

I may have to start rejecting submissions which come with attribution
lines and no quoted text. It is essential that you delete that line
if you are not quoting the words of a previous poster. Don't
misunderstand, quoted text can be taken to an extreme, but it is a
good idea to quote a line or two of a previous article to give context
to your words.

You can also start receiving this group in an email digest format. If
you are interested in receiving it that way write to me and ask about
AIRWAVES RADIO JOURNAL.

Happenings in the #40 market:

*As Bob Smith of WXXI noted months ago,rumors of Rich Communications dealing off its 4 stations(WGR & WWWS-AM/WGRF & WUFX-FM)continue. Alan Pergament notes in today's Buffalo News that it's still continuing. The most common scenario,he notes,is that Buffalo native-and ex-'GR general manager Charles Banta-will buy WGRF,WUFX,and WWWS.(It would give him a good portion of the 18-34 year old crowd-97 Rock and 103.3 the Fox finished in the top 5 in this demo.) The same rumor,however,also has Rich considering selling WGR to a religious broadcaster and offering its on-air hosts to Keymarket,which owns WBEN and WWKB on the AM side(as well as WKSE & WMJQ on FM). If the on-air hosts get offered to Keymarket,my advice-if I were in Keymarket's place-would be,"keep 'em-we don't want 'em".
Pergament adds,"Even if it doesn't happen,the idea of a religious format taking over an AM that has spread intolerance by several talk hosts has a certain pleasant irony to it."

*Is CKEY(FM 101 The Planet;modern rock)'s morning show revolving with a new AM driver? Looks like it...Bob Dancy(son of CKEY and CJRN-AM's owner, Keith Dancy)has been in AM drive for the past few days. Whether it's permanent or temporary remains to be seen.

12+ 25-54
WFMS-FM (Country) 13.2 WFBQ-FM (AOR) 16.4
WFBQ-FM (AOR) 12.8 WFMS-FM (Country) 13.2
WIBC-AM (news/talk) 8.2 WNAP-FM (70s) 8.5
WNAP-FM (70s) 6.7 WENS-FM (AC) 7.8
WENS-FM (AC) 6.1 WIBC-AM (news/talk) 5.8
WZPL-FM (CHR) 5.7 WTPI-FM (soft hits) 5.6
WTPI-FM (soft hits) 5.5 WGRL-FM (new count.) 5.0
WTLC-FM (urban) 5.2 WTLC-FM (urban) 4.4
WRZX-FM (altern.) 5.2 WZPL-FM (CHR) 4.4
WGRL-FM (new count.)4.4 WHHH-FM (CHR) 4.1

If my memory serves me correctly, last time I posted Arbitrends, in 12+ WFBQ and WFMS were pert near tied for first, and WFBQ had a slight lead 25-54. It is also interesting that WNAP, with its new all-70s, still jockless format is making a respectable showing.

===

Speaking of WFMS and WFBQ, morning shows from both stations have issued comedy albums. WFMS's album, all-original songs by "the Dennyettes" (after morning-show cohost Jim Denny), is called "Talent...Who Needs It?" The album compiles two years of Dennyette on-air favorites, such as "I Tried to Be a Cowboy (But It Hurt)", "Ugly Guys Need Love", and "The Denny One Step". The Dennyettes, eight "brothers" Kenny, Benny, Lenny, etc. (and Junior), have appeared at the Indiana State Fair. Proceeds from album sales benefit the Dayspring Shelter for homeless families.

WFBQ's Bob Kevoian and Tom Griswold have released their 17th charity album, "Canned Laughter", featuring comedians Pinkard & Bowden, Bert Challis, Jeff Jena, and Michael Bailey, as well as regular contributors Duke Tumatoe and Heywood Banks. Proceeds benefit the Indiana Children's Wish Fund, Gleaners Food Bank, and other charities.

5597. Various Sacramento, CA News - 12/6/94

Newsgroup: rec.radio.broadcasting
Date: 1994-12-08 00:11:46 UTC
From: mward@crl.com
Message-ID: <3c5j02$euo@vixen.cso.uiuc.edu>
Source record: 36053

Greetings from the nation's 32nd largest market!

A few items this time about my employer, KFBK News Radio 1530. Sports director Marc Moser takes over as host of the 7-8 PM "Sports Talk" program, replacing Sacramento Bee sports columnists Mark Kreidler and R.E. Graswich (who were alternating on different nights - Mark on Monday/Tuesday, Bob on Thursday/Friday). Moser has already been hosting Wednesday nights, a remote broadcast from a local sports bar. Now, he'll be doing the whole week.

It's a lot easier for Marc now, hours-wise...he recently moved to the afternoon drive hours when the station let go afternoon sports producer David Fisher. Morning drive sports reporting duties are currently being handled by morning show producer Jim Burrows.

I wouldn't be surprised to hear the Bee columnists on the show in the future, but probably in a guest capacity.

The entire KFBK programming day will be broadcast this Friday from a window at Macy's in Downtown Plaza. Well, almost the entire day... the notable exception is Rush Limbaugh, who will stubbornly do his show from his usual studios in New York City. (OK, I'm being tongue in cheek on that one, but heck, Rush launched his national show out of a stint at KFBK, so why not fly back for a day and do the show from here? I wonder if he'd been asked...)

That means from 5 AM to 11 PM, every KFBK-originated show will originate from Macy's. Come on down and watch! Unfortunately, I won't be down there except maybe for a pre-work visit...my Friday night stint with night talk show host Bob Dunning will be done from the studio, while Bob and producer Jesse Koehler are down at Macy's. Hope we still get to talk...

Speaking of remotes, nationally syndicated computer talk show "On Computers" makes its third visit to Sacramento in as many months this Sunday. Hosts Jerry Kay and Gina Smith do the program from the CompUSA store on Howe Avenue. The show has previously been at Computer City and OfficeMax. Hope to see you there...I hope to pull away from my post as morning editor at KFBK long enough to drop in and stay a while.

Elsewhere -

The aforementioned Jim Van Vliet column notes that ex-KSAC morning man Man Mountain Murphy is leaving the area. He's headed back to Milwaukee to be with his family. KSAC is the former all-sports station (AM 1240) which has been bought by a Bakersfield man with the intent to add it to his all-Spanish network. That must be taking a while...KSAC, which I guess is now legally KSQR, has not returned to the airwaves since the sports format shut down a month or so ago. Well, it did come back on a couple of times to run UC Davis football games, in English, but only for enough time to do the games and a

little bit of music.

More sports/Van Vliet stuff - KHTK (AM 1140) has apparently passed on the Kansas City Chiefs football network package, opting to go with CBS Radio's NFL package instead. The Chiefs have a relative following here because of their acquisition of former 49ers star Joe Montana. They'd been on KSAC before that station's demise. (Odd timing on this news item, too... I got a call from a guy on Sunday wondering where the Chiefs could be heard. He said he was not a Joe fan, but a Chiefs fan.)

And finally, a brief item from the radio with pictures department: Sacramento has a new TV station. Well, it does if you have a good enough antenna. LPTV station Channel 25 debuted in the early morning hours of Sunday. They're hooked up with the "American Independent Network", one of those satellite services that tailors their programming to low-power TV stations. At least one radio connection here - TV 25's owner is apparently a former KFBK staffer, though how long ago I don't know...certainly long before I came to town, as I don't recognize the name. Like most LPTV'ers, TV 25 is not on any local cable system, and there's no publically-expressed interest in carrying the station by Sacramento Cable.

There's also apparently no local programming yet, and not even any legal IDs that I've seen...maybe I'll give 'em a call and ask.

That's it for now!

Mike

What are you implying here? It sounds like you are saying that "full quadrature" modulation "has significant third order components". The truth of the matter is that "full quadrature" modulation does not have any sidebands that were not present in the original modulating signal. This apparent misstatement of the nature of "full quadrature" modulation casts doubt on the technical accuracy of your entire post. Regarding C-Quam, how do stations get their license if they don't meet the RF mask spec.? The RF mask is the law of the land here in the US of A and stations must prove they meet it on a regular basis.

> In truth, C-Quam isn't really a quadrature modulation scheme at all.

> with envelope. The truth is, the better way to do mixed mode is
> the way Magnavox did it (the original system chosen by the FCC):
> it is spectrally cleaner and much easier to decode.

All the systems, Kahn included share this feature of replacing the "I term" with the envelope. This is required by the FCC rules to insure compatibility with envelope detectors, and even Kahn does it. If the truth be know all the systems send the L+R sum signal on the envelope, the only difference between systems being the mathematical function used to generate the phase term, from the stereo difference L-R. As it happens Kahn also depends on phase, as all the systems do. That is not to say that the different systems do not react somewhat differently to phase perturbations, due to the different functions used to generate the pahse modulation term.

I believe one of the problems with the Kahn system is that he introduces distortion products in the audio chain to cancel the envelope distortion of pure ISB. Kahn does not use pure "frequency separation" of the sidebands, as that would not meet the rules. I have not seen any description of how these distortion terms can be removed in a receiver. Does anyone know how this can be done?

>other words, by your own standard, NPR is more despicable than the
>religious stations.

Please specify on which broadcast an NPR station attacked women, lesbigays, non-Republicans or ethnic groups without giving an opportunity to respond. THAT is the kind of despicable activity pseudoChristian stations engage in every damn time I tune in. Care to explain how that fits within a 501(c)(3) designation?

>> If someone thinks God can't
>> provide enough revenue to pay Caesar what is Caesar's, they obviously have no
>> actual faith in said God and consequently have no business using the public
>> airwaves to tell other people to have faith.

>I appreciate your honesty... but do you want to single out religious
>non-comm stations to dictate their fund-raising techniques, over and above
>a non-religious non-comm station?

Only when the station in question (as opposed to individual air personalities) openly advocates a specific stance on an issue of social interest---which any station claiming to be "Christian" and refusing to air programs dealing favourably with Judaism, Islam, Buddhism, Hinduism, Wiccan or any other religion does by simple definition.

>> As well, markm@xetron.com (Mark Malson) writes:

>> violation of the laws concerning their tax-exempt status, BTW)

>(Nope. They can't endorse candidates or ballot issues, but they CAN
>criticize or support issues and policies).

Oh, so THAT'S why Pat Robertson had his self-proclaimed "Christian Coalition", which has a 501(c)(4) designation, target churches, which have 501(c)(3) designations, with that "Congressional Scorecard" pamphlet last month---but instructed the churches not to release it until the Sunday IMMEDIATELY BEFORE the election so as not to allow those candidates he criticised in it to organise a response...they're barred from INFLUENCING elections in a partisan manner, not just endorsing individual candidates.

>> but they don't
>> have the guts to contribute to that pool of public funding that they're
>> complaining about.

>will be formidable over the next two.

Please cite specific instances...

>> and they don't make a profit so
>> } there's nothing to tax.
>>
>> No profit? You mean CBN, TBN and VCY all run on defecit budgets?

>We HAD been talking about religious _radio_. These are religious TV
>networks (except I've never heard of VCY).

We ARE talking about radio---CBN distributes Pat Robertson's TV show's audio track to radio stations internationally, TBN owns and operates KTBN Salt Lake City (a 24-hour shortwave station transmitting the audio portion of TBN and CBN TV programs), and VCY operates its own network of stations from its Milwaukee flagship, WVCY-FM.

umar@tiac.net (Rob Landry) writes:

>running ads. They are: Dartmouth's WDCR(AM) and WFRD(FM), Cornell's WVBR(FM),
>Brown's WBRU(FM), Yale's WYBC(FM) and Harvard's WHRB(FM).

>The Harvard and Cornell stations (at least) are licensed to non-profit
>organizations separate from the universities.

>The one with which I am acquainted (Harvard) gets NO support from the
>university and has to fend for itself. Yes, it sells ads; otherwise it would
>be off the air.

As a one-time morning jock for a similar enterprise, WLHA-AM-FM at the University of Wisconsin-Madison campus, I'm heartened that the Ivy League has that many groups of students with entrepreneurial initiative. However, any commercial enterprise should stand or fall on the weight of its business activity alone, without being helped along by an exemption from paying taxes. This may be part of why WLHA is now silent, but it's still the proper principle to follow.

>As for Pat Robertson and his kind, I wholeheartedly agree they should pay
>their fair share of taxes. The public does not benefit from the spread of
>religious propaganda-- especially _political_ religious propaganda!-- and
>should not be asked to subsidize it.

Can't think of a better way to close this one myself...

Dennis, darling, political organizations are not tax exempt. Nor are donations to said organizations. At our abortion rights group meetings (NARRAL Illinois) we cannot endorse any political candidates if the meeting is set up under our tax-exempt educational arm. Why should using the name of G-d exempt them from these rules?

>
> The New Chrysler Presidential Car: The Dodge Drafter.

Gee, I guess this car would be popular among the Speaker-elect and Rush Limbaugh as well.

--

How to get elected in modern-day America: Lie about your opponent's position. Hide your own position. Be tough on crime but ignore real solutions in favor of draconian rhetoric. Smile as you spout racism, xenophobia and homophobia. Promise to cut taxes and tolerance. Say no to compassion. Avoid honest debate of any relevant issue.

I dunno about Rush, but I work at a station that carries Imus, and we run
a delay of approx. 3 sec...not so much for content, but it seems they are a
bit loose at their end with local content...ie a traffic report, etc tends to
run long.

Source record: 36061

In article <3c2q90$lvs@vixen.cso.uiuc.edu>, field@bedford.progress.COM (Mark Field) writes:

As far as the short delay, this can occur when a satellite show comes from alternate paths, i.e. station A receives from Satcom C5, and station B gets it from Galaxy 4. This is a result of digital coversion, which causes a delay.

Very rarely does a satellite broadcast go straight up to a sat and directly down to an affiliate. A more likely scenario is an ISDN feed to an uplink point in town, downlinked by somebody in CA, and sent back up to maybe c5, then maybe downlinked by somebody in AZ, and put up on Galaxy.

Affiliates usually have several options as to what sat they can receive on.

Also, some affiliates add an additional delay on shows such as Stern and perhaps Imus, since program standards vary from community to community.

Hope this makes sense, and answers your question. As for 45 seconds, maybe a hefty digital or tape delay? Hard to tell.

I'm building a list of studios and radio stations using the Telos Zephyr (or any other MPEG-3) for audio transfers.

There is a commercial "Digital Dialup" list available (Digifon), but it's primarily 3d2 and missing a lot of Zephyr facilities. I'm builting this list as a public service to complement Digifon. I'll publish the results here, at some FTPs, and on Compuserve's BP Forum.

IF YOU ARE USING TELOS ZEPHYR or other MPEG-3 codec, please answer:

1) Name of facility
2) City
3) Contact and voice phone number
4) Can you be called for voice transfers, local spot duplication, etc (for a fee, of course)?

email your answer to:

jcrose@tiac.net

All who respond will receive the full list via email, once it's compiled.

5608. radio in East Europe, my observations (long)

Newsgroup: rec.radio.broadcasting
Date: 1994-12-08 00:12:24 UTC
From: juergenb@ecs.comm.mot.com
Message-ID: <3c5j18$f13@vixen.cso.uiuc.edu>
Source record: 36249
Cross-posted to: rec.radio.shortwave,rec.radio.broadcasting

During September I spend my vacation in the Czech Republic, Slovakia and Poland. I already visited Czech Republic & Slovakia 2 and 3 years ago.

It was interesting to see how the radio-scene has changed and how it looks today. When entering Czech Republic from Bavaria, I noticed two private local stations, one from Cheb that now are music formatted and more pleasant to listen to. Two years ago they sounded very boring. When driving through Prague the spectrum was really crowded with stations, like many western capitals. In retrospect it's really unbelieveable, 3 years ago there were only very few in Prague, and country wide only one network in the CCIR FM-band (87-108MHz). Music was not much played at that time. So I had to resort to MW, LW, and shortwave to get stations from Germany and Austria. It was like in a desert! Only in the area of Bratislava Rock-FM started, it later on grew to a network across whole Slovakia. Most stations now operate in the CCIR-FM-band. In Slovakia new private local station popped up. In the area of the Tatra mountains I saw advertisement on busses of Radio Tatry saying it was connected with Europa-2, however I didn't hear any Europa-2 announcements.

Most of my time I spent in Poland. Two years ago I only went there for a day visiting Cracow. On my way to it the whole FM band was silent then, everything was on the East-band. But nowadays they are opening up new CCIR-FM frequencies where the existing stations relay there programs. Larger cities have their regional stations (Radio Katovice, Radio Crakow etc). Signs along the roads point to their frequencies.

Interesting are the newer commercial stations RMF-FM and Radio-Z. Radio-Z was one of the first private stations in Warsaw, it is now expanding to cover whole Poland. In Gdansk I ran into their promotion team in the pedestrian zone. I got a leaflet and saw their coverage map. The whole area is covered by CCIR and/or East-band FM. Unfortunately I cannot read much Polish, so I don't know whether those frequencies are actually active. In few places I could not get Radio-Z although it was mentioned in the leaflet. Unfortunaly my radio does not cover the East-band. The map may perhaps only tell about what they are planning?

RMF-FM which also can be heard via the ASTRA satellite operates from Crakow and is also expanding. I heard them in a few cities including Warsaw but not in their home town, there they only operate on the East-band. RMF-FM is much more music oriented than Radio-Z which has at certain times news, talk & phone-in's etc. RMF-FM has two English news segment (10:05 & 18:0is also expanding. I heard them in a few cities including Warsaw but not in their home town, there they only operate on the East-band. RMF-FM is much more music oriented than Radio-Z which has at

certain times news, talk & phone-in's etc. RMF-FM has two English news segment (10:05 & 18:05) lasting for about 5 minutes. I haven't heard the 18:05 lately.

Also there's Radio Maria, a catholic station, that operates only a few hours per day. It appears to cover whole Poland. On the bulletin boards in churches I saw often their schedule & information posted.

Very interesting was my drive from Gdansk to Szcecin at the German border. It went along about 20km south of the coast. I really was amazed how strong Swedish stations came in on FM. They sounded like local stations, even valleys did not hurt. The same thing for Danish stations. Those, however come from the island of Bornholm, Swedish stations can only come from the mainland, and that is about 150 km or more away. In other places in Germany the reception across 150 km water is much weaker. The reception was quite constant and deterioted short before Szcecin. That was a drive of about 4 hours! From the west border German stations don't reach that far into Poland.

In Slovakia I help a friend programming his ASTRA receiver. I was surprise not to get CNN and VH-1. Both were extremely weak. Apparently the footprint is very sharp towards the east.

Like in many eastern countries, TV in Poland is showing foreign movies/series with voice-over sound. A voice speaks the translation on top of the original sound. This is very unusual for us in the 'west'. Dubbing or subtitling seems to be too expensive. I only was a bit surprised about Slovakia-TV, every evening they showed a dubbed movie!

Now an off-topic subject: In Crakow and Warsaw I got the tourist leaflet 'What, Where, When ...' In both leaflet they mentioned under the subject: 'Police' the dangerous areas. I personally never felt endagered, but was pleased about honestly being informed. I've never seen anything like this in other places. Especially in the US cities I would have appreciated an honest information about where NOT to go. -- Thank you Poland ---

Today, December 6th, 1994, marks the 45th anniversary of the first High School FM radio station hitting the airwaves for the first time on a regular, non-experimental basis.

On December 6th, 1949, WHHS-FM (Haverford High School, Havertown, PA) went on the air with a regular, non-experimental, license and refular programming.
Since that time, WHHS has continued broadcasting every school year.

Haverford High School was the FIRST High School in the United States to own and operate a FM broadcast station.

Today, WHHS alumni visited the WHHS studios for a reunion. Several of the alumni were part of the station in the late 1940's when it first hit the air waves.

Happy 45th Birthday WHHS, and Happy 45th Birthday to High School FM Broadcasting!

-David Brouda (Program Director/General Manager WHHS-FM; Haverford High School; Havertown, PA; Class of '95)

Peter Q. George replies to my post on U.S. ownership of Mexico radio and television stations. Peter sent out the following in Airwaves 974:

>ONLY Mexican nationals are eligible for owning the
>country's Radio and Television stations.

I called Peter on Dec. 1. His insight to this ownership across the southern border is commended; and knew this market better than myself! He know the rules and confirmed some rumors that I have heard: XETRA is at 50kw, but a tight directional pattern makes it like 100kw; and the same for XEPRS, 1090. She's at 50kw with a tight pattern and booms in the southland. XEPRS was formally XERB, where Wolfman Jack got his feet - hell, his whole body -- wet in rock 'n roll.

I thank Peter for giving a clear, concise answer to the questions often asked me: who owns English language stations south of the border? Mexican nationals [and rightfully so]. In the case of XETRA AM/FM,and other stations catering to the English crowd, consider it an LMA across the southern frontier.

Now, on to saving the clear channel airwaves of U.S.A.!

In article <3c2q9o$m1r@vixen.cso.uiuc.edu>, fybush@world.std.com (Scott D Fybush) writes:

: The TV station is a bird of another
:feather. It began in 1962 as WUHF-TV 31, an experimental project
:of the FCC designed to test UHF reception in a crowded city like
:NYC. The FCC finished testing WUHF in 1964 or thereabouts, and
:rather than turning it off, sold it (or perhaps donated it) to the
:city of NY. The calls were changed to WNYC-TV (ironically, the
:WUHF calls would later show up *on channel 31* in Rochester in 1980),

Are you sure about those call letters?
From 1959 to 1966 those calls were liscensed to Milwaukee station
Channel 18, now WVTV.

:WXIX-TV 18 Milwaukee -- CBS had consolidated the CP for WXIX-TV 19
:and the dark facilities of WCAN-TV 25 to create WXIX-TV 19 (later
:18). The station later became WVTV, a successful indie. The
:CBS affil went to WISN-TV 12, then to WITI-TV 6. CBS might
:have done better to keep 18; they're still searching for a new
:affiliate in Milwaukee now that WITI's going Fox. WVTV is thus far
:refusing to become that affiliate.

WVTV-TV 18 originally signed on the air as WOKY-TV 19, owned by Gerald Bartell and family, owners of WOKY 920 radio. It was sold to CBS and the calls were changed to WXIX. The original tower is still in use today as the tower for WLZR AM/FM radio in Milwaukee. And, unless it has been changed since I was there, the old tv antenna is still up on that tower as well. Hell, it took them almost 10 years to get the WRIT call letters off the tower. As a joke on time myself and another announcer flipped the switch to light those letters, and PD has seen them on coming home after a night of drinking.

Unfortunately, the City and County of San Francisco just did. They're cutting back staff, hours, and exhibits, and firing animal experts and replacing them with security guards. I fear that someday public radio may go the same direction. Be prepared, we are headed into the Dark Ages of the 21th Century, and I seriously mean this. There is a move by the Powers That Be to grab even more control of society than they already have. In my opinion, this means taking control of NPR, one of the few independent voices of reason in the USA.

There is another station that is a unique mix of commercial and non-proit: Chicago's WFMT, 98.7 and distributed nationwide via United Video's satellite system. I listen to it here in Milwaukee on cable.

WFMT went on in 1954 when a young couple purchased a bankrupt suburban FM. In its forty year history, it's been the home of Mike Nichols and Studs Terkel, the Chicago Symphony and Lyric Opera, and original drama. Its programs have won practically every award in the industry.

For years, WFMT wrote the book on maintaining the highest programming standards. Even among classical lovers, it may be regarded by some as too "elitist" or "dry": they limit the number of commercial spots per hour and except for FCC-mandated political campaign spots, they are all read live or recorded on DAT without music beds. They insist on rewriting agency copy to meet their own standards; otherwise they will turn down a sponsor.

A few years back economics forced them to accept agency (produced) spots. A number of listeners were so incensed that they formed a non-profit group, "The WFMT Fine Arts Circle", which does begathons every few months for the station's benefit. This has enabled WFMT to return to its "limited" commercial policy.

I am wondering: would this work as a model for the entire public radio system? Would we be able to maintain our high standards with a limited number of "real" commercials, as opposed to underwriting credits, combined with listener memberships?

After over two decades of CPB being a political football, of cuts in funding from our own local and state government licensees, such an alternative seems more and more attractive to me. I'm not sure I would have said this a couple of years ago, but the thought of having to answer to the likes of Newt Gingrich and Bob Dole makes me sick.

I'd be interested in hearing what other public radio/TV folks think about this. Since we're never going to get the excise tax on receivers recommended by Carnegie, nor the benefits of auctioning off spectrum space to commercial broadcasters, can we find other ways to be viable and independent without direct government support? The way things are going, this may be more than a theoretical question, and if we are to survive, I would rather have some input into the outcome than have a worse outcome imposed on us.

I'm so sorry to hear that you don't seem to have a REAL public radio
station in your region, a station airing NPR programs such as Crossroads,
Horizons, Social Thought, Technation, or This Way Out -- programs that
provide REAL information about REAL people and events.

Example: Recently on Crossroads I learned that immigrants from Mexico
moving to Los Angeles have BETTER health than natives of Los Angeles. It
started as a survey to help expectant mothers deal with health needs.
Turned out the Latina mothers had little need for the health services, but
as they became more acclimated to American culture, their health worsened
and matched the poorer health of native-born white people in the USA.
This is something I never would have learned on Howard Stern's show. He
doesn't even know where Los Angeles is, let alone Mexico.

Wow. Less than a year after we moved to Miami, WVCG was sold. It had been the classical music station. I was pissed at them for years, until they became an oldies station in about '81. Alas, that only lasted a few years, so I became pissed at them again! Of course, meanwhile, about 4 years after WVCG had dropped cl mx, WTMI appeared (the former WKAT-FM). I guess a longer version of this graf could be in the history.

> Let me recommend Music Choice, the former Digital Cable Radio.

I'm not all THAT knowledgeable about it. Mostly just the parts I like -- i.e. stations I have listened to. Though I could tell a few more stories, I suppose. What do you have in mind? But go ahead! I'm interested in reading about WPB radio, too.

BTW, what time of year does the Broadcasting Yearbook come out. I'd love to scrounge a secondhand (last year's) copy when the new ones come out. I haven't even seen Broadcasting magazine in many years.

I've done two radio shows re internet this fall. The only other time I was on a radio show (as opposed to being a caller) was in 1970, when I was writing that radio column I spoke of. Which might make an interesting

story. I still have a copy of that column somewhere.

Oh, can you get WWNN (980) up there? I'll be on Jim Rosetti's show next Tuesday night, tentatively.

Gotta get up early. Story at IBM in Boca tomorrow.

5625. Radio Watchers - Fort Wayne

Newsgroup: rec.radio.broadcasting
Date: 1994-12-09 05:14:38 UTC
From: thompsob@CVAX.IPFW.INDIANA.EDU
Message-ID: <3c8p3u$bb0@vixen.cso.uiuc.edu>
Source record: 36080

There are a few other things new here in Fort Wayne, other than the WOWO thing.

* Regional Radio Corporation (Lansing, MI) wants to buy WBTU-93.3 FM and WBYR-98.9 FM (The Bear). The first is a "Hot Country" station and the second is classic rock. Deal awaits FCC approval.

* Speaking of the WOWO thing, it seems for the past few weeks, Tony Richards (GM of WOWO, as mentioned earlier) has been going through the contents of the building currently occupied by WOWO. He has found:

+ WOWO ice scrapers
+ Old office Equipment
+ T-Shirts
+ WOWO Three Rivers Festival [Annual festival held in Fort Wayne...big event] visors
+ Old logbooks
+ A yellowed newspaper from the 1920's with an article about WOWO
+ Signs bearing the phrase "Buy War Bonds"
+ Photos of former WOWO air personaslities
+ Two large Bookshelves stacked with old 45 rpm records (Excuse me, I'm only 19, what's a record? {grin})
+ Reels of old program tapes

Now Richards has to decide what to retain and what to dispose of before WOWO moves into it's new offices, along side Federated's other Fort Wayne stations on Maples Road. Some of the items retained will be displayed in a case at the new office.

WOWO's air staff hopes to move to the new studio by March. The advertising staff is already at the new office.

Federated has agreed to buy WOWO for approximately $2 million dollars from Inner City Broadcasting who purchased WOWO for $2.3 million dollars earlier this year.

In article <3c5ivt$eui@vixen.cso.uiuc.edu>, ag365@freenet.buffalo.edu (Carl K. Gorney) writes:

(On WGR's fate) "the idea of a religious format taking over an AM that has spread intolerance by several talk hosts has a certain pleasant irony..."
I'm not so sure I agree with that, only because it may be a case of trading secular-based intolerance (of certain ethnic groups slandered by Rich "the bitch" Michaels, including Poles, blacks, hispanics, etc.) for religious-based intolerance of minorities, gays, or political non-conservatives. Those who've ever tried to endure a typical day of religious broadcasting either on AM or shortwave will know what I'm talking about.
My other guess is that, since 'GR's problems really are not all that severe outside of middays, and presumably the station is drawing enough audience to make money unless the sales staff is totally brain-dead, why sell now instead of fine-tuning the place, getting rid of the problems, and building it up for a year or two before you dump it off to a real broadcaster for $5 million or more? They ought to be making the nut on the basis of what Tom Bauerle is billing all by himself, and ought to go into the black whe you add the business Chuck Dickerson is drawing in afternoons...even if they dump the FMs and 3WS, WGR is valuable not only as a potential profit center but also as the main promotional vehicle for their baseball team. I doubt they'll be so quick to sell a strategic property like that...Bob

I heard a nasty rumor that John Derringer (sp?) is leaving the morning show at Montreal's (AOR) CHOM 97.7...Is this true? I also heard that he is originally from the states (the U.S. that is) by way of Toronto and was wondering if anyone knew what the story was on his backround.

CHOM has had a rough time losing morning men to competition, Terry Demonte and Ted Bird both moved to CJFM Mix 96 last year. Arron Rand, the morning man before Terry and Ted, went to CFQR 92.5. losing a morning team is bad enough but when you have to compete against them as well...ouch!
CHOM is still a rock and roll legend!! Regards...Joe

In article <3c5j0k$evr@vixen.cso.uiuc.edu>, SteveO <steveord@delphi.com>
writes:

(Clear channels-why bother?)

Steve's comment about the value (or lack thereof) of multiple
clear channel stations all relaying the same syndicated truckers'
show or talk show really makes the point of my original posting in
starting this thread. Why maintain the clears if we're not going to
use them to offer original and unique programming for a wide area?
We can use the precedent set by prior FCC majorities, and up-
held by the courts, to give these stations a choice. Either surren-
der part of your wide interference-free territory (a 1500 mile diameter
circle for a 1-A clear) to other medium to high power regional sta-
tions, or agree to offer locally originated programming for at least
a majority of your operating hours from sunset to midnight local
time. If you have to have a huge nighttime service area, you should
be expected to use it for more than just the umpteenth relay of an
endlessly rebroadcast syndicated show or service. (We would make
an exemption for regionally or nationally distributed programs that
are originated BY the particular clear channel station; WFAN's Mets
coverage, WABC with the Yankee broadcasts, or if Gil Gross were
to be carried on WCBS, would be an example of this.)
Any comments?

This is not a commercial -- I'll say that up front.

We recently switched to digital editing on the Roland DM-80 (we are tape-free, razor blade-free, splice-free radio!) and we LOVE IT -- universally. The producers love it, the news people love it, the engineers love it. Even the freelancers are (learning to) love it.

What is so fantastic about this machine is: it's like someone sat down and said, "let's design a digital system that's just like editing on tape." You find your edit point, you mark it, you "cut" it, you "splice" it together. Consequently, the learning curve is practically nil. I taught our GM how to do a basic acts-and-tracks piece in about 20 minutes.

I am interested in finding out whether anyone else has used the DM-80 or whether you have tried Turtle Beach (which I've used and hate), the Australian Broadcasting Corps' system or one of other digital editors out there on the market. My guess is it would get the most use not at commercial radio stations so much, but at ad agencies, music production studios and public radio stations (which do news stories longer than 40 seconds). But if I'm wrong, tell me.

I also would like to know about the same album. It is a devilishly
(sorry) funny album. Another album I enjoyed came out in 1976. It was
called "200 Years and There's Still Hope." It starred Bob Hope along with
Phyllis Diller, Louis Nye, and Fred Travelena as a variety of voices
including Gerald Ford and Howard Cosell. If someone knows the whereabouts
of these albums (preferably on tape) in the Ft. Lauderdale area, I would
appreciate it.

>copyright holder won.

AFAIK, the "fair use" clause only allows for royalty free use of music
for educational purposes, and private copying for personal use (not
sharing with others). If The Gap tried to take advantage of it,
they've got a pretty lame law firm. I just don't know why people think
they shouldn't "pay the composer". He's not the one getting rich or
famous in the music industry, i.e.- you can name 10 currently releasing
musicians, but can you name 10 currently released composers?

> It DOES seem, however, that ADVERTISERS are benefiting from
>in-store use of the music.

True.

> As such, stations can charge higher rates and
>licensing organizations can collecte higher royalties from the stations.

I don't think it works that way. There's really no way to gauge exactly
who's hearing what pieces of music. I think, however, BMI and ASCAP
(don't know about SESAC) are trying to collect royalties very fairly.
The bigger problems we see with them relate to the methods they use to
determine a given composer's share of the pie, but that's another story.

> It would, however, be interesting to change the law to
>allow for the unlimited distribution of all copyrighted material that is
>available to the public at no charge PROVIDED no changes are made to that
>work.

That doesn't work. I've licensed organizations to use specific music for
a period of time as short as a few weeks, and restricted it geographically,
to protect that music's future (not letting it get over exposed). Just
because something is available to the public at any one time does not make
it public domain.

> So, you could tape or play a radio or TV station on your premises
>as long as all the commercials ran also (which increases commercial
>viewership, which increases rates, and everyone gets paid!). The same

>would go for photocopying. Go ahead and copy the magazine, but you can't
>cut out the ads. Again, this is NOT the way the law currently reads, but
>it seems like an interesting idea. Once any material is advertising
>supported, it seems that increased circulation benefits everyone.

I think that would only work for the advertisers, not anyone else. Imagine a world where a radio was playing everywhere you go, because it's royalty free for commercial establishments. You would end up buying less music, because it's all around you, most of the time, for free. You no longer have a great desire to have your own copy of that one song, because the same week it was released, you heard it 22 times. This is over exposure, which cuts down the musician's royalties, as the musician makes money from copies sold, but not from radio play. Anyway, there's a balance that we try to maintain between airtime and sales. For the musician, airtime is advertising, but for the composer, it's income.

Greetings.

5648. Cutting Funding for CPB

Newsgroup: rec.radio.broadcasting
Date: 1994-12-09 05:15:33 UTC
From: Roger Chesser <CHESSER@UKCC.uky.edu>
Message-ID: <3c8p5l$bfg@vixen.cso.uiuc.edu>
Source record: 36003

I have read with some degree of unhappiness the comments in this
forum of those who would eliminate federal funding for the arts
and public broadcasting. I am the General Manager of a public
radio station which receives support from the federal government via
the Corporation for Public Broadcasting. I guess I'm in the
cross hairs of those who would eliminate CPB funding and make
public stations go commercial. Perhaps some words in
opposition to this thinking would be enlightening.
Of course, this forum is not the place for a thorough defense
of governmental funding for public broadcasting.
Anyone seriously interested in this issue can find ample
sources of fact and opinion in the nearest public (!)
library (assuming you are fortunate to have access to one).
Public broadcasting serves the needs of many, but it is
not for everyone. Obviously those who appreciate its
programming will support its funding, and those who don't
won't.
It might be pertinent to this discussion group to briefly
consider the commercialization of public broadcasting,
which has been suggested in this forum.
Though some might think otherwise, commercial broadcast
stations do not generally support making public stations
go commercial. Obviously they don't want even more
competition. And it wouldn't just be real commercials
mixed in with classical music and NPR news. No, my crystal
ball says that if non-commercial stations are made
commercial, they will quickly be bought by investors and
turned into more outlets for Garth Brooks and Madonna, etc.
Those artists are inherently more popular than
Beethoven or Duke Ellington. More popular means more listeners,
which means more money, etc. Yes, classical and jazz music
would probably survive on the radio dial here and there as
it does now on a few commercial stations, mostly in the
very largest markets. As for NPR News, perhaps public
radio's greatest gift to this country, it would be
eviscerated. As we have seen with the steady weakening
of network television news, particularly NBC, journalism
driven by the need to make money is not the same as
journalism driven by the need to tell the truth.
One posting to this forum suggested the programming of public
stations should be forced to carry advertising and pay for
itself, or disappear. That concept really says we shouldn't
have things which don't quicky turn a healthy profit. Should
we apply this concept elsewhere in our society? For example,

do we want our national parks to have to put in roller coasters,
water slides, and fast food joints in order to pay their own way?
Do we want to live in a society based entirely on the needs of
commerce?
At this time of year we can look to Dickens' Scrooge
for a lesson about putting the values of commerce first
in a person's life.
I offer these ideas in the hope some will see the need to
maintain non-commercial public broadcasting service.

Message-ID: <3c8p5u$bg5@vixen.cso.uiuc.edu>
Source record: 36006

I am the engineer of an ABC FM network (SEDAT ch 4) affialate. I have
installed the ABC data card and fanout connector to the Scientific Atlanta
receiver. The data card appears to be working. (lights on the front work) I
am tring to hook up a pretty generic epson mx-80 parallel printer up to it. I
bought a serial to parallel converter through Global computer supplies.
Although baud rate, parity, and data bits are selectable on the converter,
there is no selection for stop bits. There is a flow control selector though.
I can't get the printer to print anything. Not even the initalization page
you are supposed to get when you reset the data card. I did notice that the
activity light goes on when the converter is hooked up only to the data card.
When I plug it into the printer, it goes out.
Can anyone help me?

Thank you
Bob

5652. Looking for information on AM stereo

Newsgroup: rec.radio.broadcasting
Date: 1994-12-09 05:15:43 UTC
From: jeff560@aol.com
Message-ID: <3c8p5v$bg6@vixen.cso.uiuc.edu>
Source record: 36007

I'd like to add a few comments to the discussion on AM stereo receivers. At WGUL AM/FM in the Tampa-St. Petersburg market, where I work weekends, we air NAB spots promoting AMAX receivers. One of the two spots (there's a 30 and a 60) includes the line "Don't you wish AM radio could sound as good as FM?" I love AM radio, but I admit that only those people who get a very strong signal from our AM transmitter stand a chance of getting FM-like sound.

The spots mention two radios by name (Sony and Denon). Of course the purpose of the spots is to get people to request these radios in stores. But it's likely that listeners who search for these radios will be frustrated.

I borrowed the chief engineer's Sony SRF-42, which is a Walkman. This radio, like the discontinued SRF-A100, has no stereo light, although it has a tuning light. Both Sonys have a pseudo-stereo effect on all stations, so actually it is not immediately obvious whether a station is in stereo. The SRF-42 definitely has a wider frequency response than typical AM radios. There is a mono-stereo switch, and the frequency response is narrower in the mono position. (I loaned the engineer my Realistic AM stereo tuner, which was discontinued. It does have a stereo light, and there is no stereo effect on mono stations.)

I believe that WGUL is currently the only AM stereo station in the Tampa-St. Petersburg market. We simulcast a nostalgia format, so many of the titles are not in stereo. (Our AM station covers a part of the market that our FM doesn't.)

Incidentally, KDKA became the "first" stereo AM station on July 23, 1982, at 6:03 p.m. ET, when it broadcast the Star Spangled Banner. KDKA's initial stereo broadcast lasted only ten minutes. According to an article in Broadcasting magazine at the time, KTSA San Antonio began broadcasting in stereo 11 minutes after KDKA, and it claimed to be first because its stereo broadcasting was permanent.

Actually some AM stations, including WRCA-660 New York, experimented with stereo in the late 1950s and early 1960s. I don't know whether KDKA was among the stations that experimented with stereo back then.

It's often said that the FCC doomed AM stereo by initially allowing the marketplace to decide which AM stereo system was best, rather than choosing a standard. However, as a believer

in free markets, I would suggest that it's possible that the industry could have settled on a standard (perhaps one superior to the C-QUAM system) without the help of the FCC if AM stations had been allowed the freedom to pick a system back in the 1950s before the stakes were so high. The FCC decided not to authorize AM stereo at that time in order to give FM stations a needed boost. Other audio standards, such as specifications for phonograph records, analog tape recording, and CD's, were reached without government help, and in fact many engineers believe the FCC erred in 1961 when it chose the current FM standard because of the added noise which it introduces.

I have been doing talk shows in the Santa Barbara, California market for a couple of years, first with a couple of different Saturday shows: "Let's Talk With Adrian Vance," then "The Saturday Roundtable" and now a daily gig entitled, "Santa Barbara Voices." I have developed many gimmicks and ways of organizing, editing and presenting material in this medium, coming from a lot of writing experience in non-theatrical film, magazines and books, and would like to develop a couple of book projects in this area with one focusing on doing such shows in small markets and another doing interviews with the big guys and/or analyses of what they do and the nature of the national medium.

Do you know of a publisher who may be interested in projects of this kind. I am prepared, as I have done in the past to find a publisher the hard way, but think there may be someone in this medium who knows of a publisher festering for books about talk radio.

Adrian Vance, KQSB AM 990, Santa Barbara, California

>>
>> Religious. Of particular despisition are the double-dippers who weasel their
>> way out of paying the taxes every other commercial entity is required to pay
>> (and let's face it---most of the "non-commercial" religious stations are on
>> the air to hawk the latest piece of "Christian" market junk...
>
>NPR stations do exactly this during their fund-raising "auctions"... yet
>NPR ACCEPTS government money IN ADDITION to their fund-raising drives. In
>other words, by your own standard, NPR is more despicable than the
>religious stations.

That's one of of the reasons that it's difficult, for me anyway,
to work up a lot of indignation about "religious" stations in the NCE, per se.

There are no commercials (at least of the "conventional" 30-second spot
type) allowed down there, so everyone must beg, beg, beg (or be run by
someone with *deep* pockets)

I'm less concerned about NPR tax subsidies vs. religious tax exemption issue
than this idea of some that "religious" non-profit organizations should
not have the same tax exemption as other non-profit groups (Sierra Club,
NRA, etc.)

As applied to radio, who will determine what's "religious", therefore
unacceptable? Some college and NPR stations have some "religious" content
(even if it is limited to gospel music on Sunday morning).

5655. Thanks for the help

Great suggestions gang (both those here and the one's people have E-Mailed to me). There was a consensus building at our station around "Washington Weekly" which someone came up with.

Now it looks like we're going with "Metro Connection" (a name I suggested several months ago, but the GM said it sounded too much like a show about the subway) unless we come up with something better (PLEASE!).

We need something that suggests life in the city AND outside the city becasue, as with all media located inside a city we're seen as being city-centric by the people in the 'burbs.

It's a magazine show so things like "Speak Out", etc. don't apply -- there won't be a call-in component.

They also didn't like my other suggestion (well the PD liked it but he was too chicken to use it) which was "Shut Up And Listen." Anyone who wants that name, it's yours.

5656. TM Century UDS

I am the engineer at a station using the TM Century UDS with 3 Juke boxes. We are putting another station on in the market using another UDS. The GM wants to get a digital hard drive unit to run the spots on. I would appreciate any stories on the success of any Hard drive systems interfaced with the UDS and if they will run 2 stations at once. Also will I need another interface unit and card to add a hard drive system?

Thank you
Bob

5657. Kansas City Radio Watch (12/10/94)

Newsgroup: rec.radio.broadcasting
Date: 1994-12-11 17:03:49 UTC
From: transvox@interstate.net
Message-ID: <3cfbdl$ehr@vixen.cso.uiuc.edu>
Source record: 36012

A KEXS(AM) talk show host stuck her foot into a Florida murder case this week.

Regina Dinwiddie was attending the sentencing hearing for Paul Hill, who was sentenced to death for murdering a doctor and his bodyguard outside a clinic that performed abortions.

When the sentence for an unrepentant Hill was announced, according to the Kansas City Star, she snarled at the judge, "his blood will be on your hands and the hands of the jury!"

According to the Star, Dinwiddie signed a petition circulated by Hill's band of extremists, claiming as justifiable the use of lethal force to stop abortions.

Missouri Right to Life president Mary Kay Culp said Dinwiddie has also turned her bullhorn on fellow protestors who were Roman Catholic, telling them that they and other Catholics were practicing idolatry.

Dinwiddie hosts a half-hour Saturday afternoon show called "Rescue" on KEXS in Excelsior Springs. Station owner Gary Babb said Dinwiddie purchases the time for her broadcasts.

Babb said he had not heard her espouse violence on her show, but he said he would be concerned about giving a forum to anyone who holds such views.

***

KNHN(AM) morning show anchor Jerry Fogel is now the CEO of a Kansas City management company as well.

Fogel became owner of Martin Fromm and Associates earlier this year. The company was founded by Martin Fromm, Fogel's father-in-law. Company president Donald Ross died unexpectedly this fall, and Fogel assumed the president's job.

Fromm manages eight automotive and retail associations. Fogel joined Fromm in 1980.

Fogel was an actor during the 1960s, co-starring in "The Mothers-in-Law" and "The White Shadow." Fogel continues his radio job alongside Mike Shanin on the KNHN morning shift.

***

The Midwestern phenomenon of "tabloid weather," as reported by media outlets, made itself known this week with innumerable predictions of ice storms and snow that did NOT come true in the Kansas City area.

However, farther north and west on Tuesday (Dec. 6), ice caused several FM stations to reduce power or lose service altogether. Stations affected included KSJQ and KKJO in the St. Joseph market, KLZR in Lawrence, and KDVV in Topeka.

***

Terry Knab has reported to me strange goings-on at KTXY(FM) in Jefferson City.

The station evidently switched to a hybridized hot AC/80s AC oldies

format just after Thanksgiving.
Speculation is also building regarding Brill Media's plans for the station now that it's buying and upgrading KZMO-FM, California, Mo. Previous speculation had Brill simulcasting country KLIK(AM) on the upgraded KZMO signal.
The most recent speculation has Brill considering a country signal on KTXY and moving the AC format to KZMO-FM, perhaps with KTXY's former KKFA call letters. Terry reports the station's 800 number that includes a mapping of numbers to the KKFA call letters (5532) is still being answered.
KTXY's previous album-rock format has not done well in the central Missouri markets that are measured by ratings services, because of competition from entrenched album-rocker KFMZ(FM) and newcomer AAA KBXR(FM) in Columbia.
***
ADMINISTRATIVE TRIVIA:
I am in the process of moving most of my work to a SLIP/PPP account on a different provider.
I am hoping to get a web page up fairly shortly, with gopher services perhaps as well. The new provider (interstate.net) is very accomodating regarding inbound services.
Mail is still a little tricky at this time...POP3 servers and I seem to be having a bit of difficulty. The address that always appears to work is transvox@interstate.net. A cc: to transvox@tyrell.net <the other KC address> would be helpful as well.
Also coming is a 24-hour fax/voice mail server, probably after the holidays.
***
PERSONAL TRIVIA:
A few of you know that my real-life job is a network technical analyst for Hallmark Cards, Inc.
I can't send y'all cards over the net yet. (I'm sure we're working on that somewhere.) But I can wish all of you a happy holiday season.
The Kansas City radio watch will be suspended (except for anything big like a format change or reactivated silent station) until the first of January. I still will be answering mail and reading news.

NYC Radio Waves 12/12

After a holiday lull, lots to talk about---

Howard Stern saves jumper--the syndicated "King of All Media" is credited with saving a man from jumping off the George Washington Bridge Wednesday. The man called Stern, and the WXRK morning mouth was able to keep him laughing until police collared him. Stern told the man to wait until his movie comes out. The man laughed. Stern said he's always wanted to talk to someone ready to jump off a bridge.

WFAN has opened up a big can of worms - One of their regular callers, Eli Stra nd of Westchester, will get a chance to co-host a show in January. The problem--he is constantly complaining of racism in sports, even when it's not warranted. This announcement Thursday touched off a firestorm of calls, both pro and con, to the station. PD Mark Chernoff knew there would be some talk about this, but even he was a little surprised at all the calls to the all-sports station, which in the last few days has become the 'all-Eli' statio n. Not all the FAN personalities are happy about this--Midday host Russ Salzberg banned him a memorable on-air tirade a few months ago.

It's official--KISS-FM is moving to an "urban adult contemporary" format. They will veer away from the younger audience and battle directly with WBLS, leaving Kiss sister station Hot 97 the younger 'hip hop' audience. The first of the changes--new ads featuring Luther Vandross, Anita Baker and Barry White , and the elimination of hip-hop music. On air, Wendy Williams is off the Kiss-FM Wake Up Club. Jeff Foxx is back at the helm there, solo. According to station management, Williams will remain at the station in an undetermined slot. DJ Red Alert, the host of a weekend hip-hop show, is gone and VP/GM Charles Warfield is heading in that direction, too.

Also heading for the beach--WOR's Ed Walsh, who been VP/Programming for the AM talker. He resigned last week, and will leave the station at the end of the month. His departure has been rumored for quite awhile. In fact, it was reported last month in the Daily News Radio column by David Hinckley, who then retracted it the next day.

WFAN's Don Imus continues to receive alot of attention for his book "God's Other Son". The syndicated morning man was the subject of a People article last week, and his book is on the NY Times Best Seller list. An Ithaca, NY radio station just added Imus to their lineup and changed their calls to WIII, for Imus In Ithaca.

Pat Martin, formally of WDHA, takes a part-time gig at WAXQ/Q104.3. The station just celebrated it's first anniversary of it's change to 'pure rock' from classical.

WABC's Bob Grant is getting his own syndicated talk show. Infinity will air a weekly version of Grant's show. WABC will also add Jim Hightower to it's lineup starting January 7th. All the controversy about his views have been good to his ratings--Arbitrends show a 30% increase this fall.

The NY Daily News gave a nice plug to Corey Dietz's O.J. Christmas Song Parodies CD Friday. The WRVQ-Richmond, VA morning man is the one behind the Cyber-jock directory and other Internet and computer goodies..

Till next time--

Scott Rogers

5661. Re: The "Buffalo Hillbillies"... New Orleans Style!

Newsgroup: rec.radio.broadcasting
Date: 1994-12-11 17:03:58 UTC
From: au664@freenet.buffalo.edu
Message-ID: <3cfbdu$ei6@vixen.cso.uiuc.edu>
Source record: 36016

In a previous article, dmckee1041@aol.com (DMckee1041) says:

>
>buffalo hillbilly follow-up...JR GACH formerly did afternoons on WGR-AM
>in Buffalo...his wife filled in often as a talk-show host as well...the
>station is news-talk-sports, etc...he left Buffalo with an oscar-like
>song and dance that he was heading south because of his father's illness-
>this may or may not be true...but it was a teary on-air goodbye to the
>listeners...once out of his contract he shows up doing mornings in the big
>easy...WWKB in buffalo...just to stick it to WGR-AM...for some reason, has
>JR and his wife SUZIE on-air here from his "studio" in New Orleans...which
>HAS to be in his house...on-air sound is horrible...not much of a
>show...not
>much of a 'NETWORK' , huh?

MY POINT EXACTLY!

There are quite a few things that are *strange* about this show...

When the J.R. and Suzie Gach show first came on the air, they cut off
the first hour of another *real Network show* that was being aired by
WWKB at the time. The hosts from that show said they got the *REAL*
background story on how the J.R. and Suzie show was being broadcast.
The source was said to be an accurate one from inside WWKB, that did
not agree with the new changes that were going on.

The source said that J.R. did a local morning drive show on a station
in New Orleans. He would then go *home* and do a live feed from a basic
studio rigged up in his house by WWKB.

I use to have an AOL account, so I punched in the words "New Orleans Radio"
in the member profile search area. It gave me several AOL members that were
radio D.J.'s from the New Orleans area. I wrote to a couple and asked for
any info on this "J.R. and Suzie Gach"? They both told me they heard of
a J.R. Gach that did a morning show, but neither had heard of his wife being
in the radio business at all!

There is definately something fishy about them claiming to broadcast from
an actual radio studio. If anybody from the New Orleans area can get to
the bottom of this... I would be very interested in it!

Their show is very vulgar and it must appeal to a very low common
denominator. I tried only listening a few times, but soon had to switch
the channel because of the subject matter. One recent topic I just couldn't
stand anymore, was J.R. bringing up what he did with a container of
canned air. You know the air that photographers use to blow off negatives,
or people use to blow the dirt out of thier computer keyboards. Well...

J.R. went into this very descriptive story about what he did with this can of air, early one morning, while his semi-nude wife was still asleep. Lets just say... he described how his wife's rear end was just laying there "winking" at him so he decided to see what would happen? He had to add... "when air goes up that way... some kind of air had to imediately rush out!" This whole discussion really grossed me out, and he kept on bringing it up. I don't know if it's just *ME*, but I can think of better things to listen to then this guy talking about blowing air up his wife's butt to make her fart!

The whole show is so stupid, with all these same "local Buffalo characters" that call in every day to give their same opinions... BORINGGGG!

If anybody else has another perspective on this show... I'd like to hear it!

Later,

-Paul

} markm@xetron.com (Mark Malson)spoke thusly:
}
} In article <3c5j0d$evh@vixen.cso.uiuc.edu>, UltimaJock@aol.com wrote:
} > dennisn77@aol.com (Dennis Nuetzel) wrote:
}
} > >I appreciate your honesty... but do you want to single out religious
} > >non-comm stations to dictate their fund-raising techniques, over and above
} >
} > Only when the station in question (as opposed to individual air
} > personalities) openly advocates a specific stance on an issue of social
} > interest---which any station claiming to be "Christian" and refusing to air
}
} In other words, only when you disagree with them and they won't _GIVE_ you
} or your point of view air time. I bet they'd let you _BUY_ it....

Er, no, Mark. Christian stations do not allow programming to be
bought that opposes their particular version of Christianity. Some
are very strict and some allow more variety *within the Christian
viewpoint*. If you wanted to buy time on the average Christian
station, and your programming was not in compliance with the
particular politics of the station or owner, you cannot buy it for all
the tea in china or all the money in Fort Knox (presuming there still
is any money there <grin>). Christian broadcasters have very strict
codes that govern what they will program at any price.

} Is free speech only free if you pay taxes? It's not free then. I think
} you're requiring taxation to be a condition of the First Amendment. Free
} speech is a right that existed before the Constitution, which shall not be
} infringed by the gov't, not a privilege accorded by bribing the govt.

Ok, here is an issue that is really frosting my shorts...

<< RANT ALERT >>

Freedom of speech? I am so glad you (as a conservative) see this as a
freedom of speech issue. Funny, when Free Radio Berkeley and others
who advocate micro-radio and pirate radio claim that there is a
freedom of speech issue at stake, many on this group are very fast to
jump up and yell that the is no right to broadcast. They will insist
that broadcasting is to be regulated by the government for the good of
all (primarily for the good of the existing broadcasters who would
face increased competition and possible interference from such
micro-stations).

Now, all-of-a-sudden people of similar, conservative bent are yelling
that, not only do these broadcasters have First Amendment rights of

free speech, but that the vehicles of their speech, NCE radio should be given the free reign to operate high-powered stations, feed countless repeaters (repeaters which could be used to serve small communities, but the FCC wont permit them to originate programming), and do it all without supporting the tax roles that the same conservative thinkers are so bent out of shape over NPR being supported by.

What a bunch of two-faced, hypocritical hogwash!.. C'mon guys... either you want to see the market decide or you don't. If you are so upset and righteously indignant over the 14 cents you pay in taxes to support NPR,if you feel that to legalize 10 - 100 watt stations to serve a community on a streamlined license structure, would destroy the spectrum (that the FCC has already done a good job of destroying via 80-90 and other rulings) then you should be equally indignant over the proliferation of right-wing pseudoChristian radio stations which monopolize huge segments of the airwaves and are given preferential treatment when it comes to repeaters because they allegedly are serving the public interest.

Here in Missouri, a Christian station in Camdenton, operates one full-power station which covers about a 50 mile circle, then operates somewhere between 9 and 12 translators with anywhere between 20 and 200 watts. Some of these translators are in areas already served well by the main signal. So their signal is now in every major town and city (including Kansas City) from mid state on west. But if someone in one of these translator-served towns wanted to place 20 watts on the air to serve the area with local news and information, they would be denied the "First Amendment Right" to do so. If they went on the air anyway, they would be fined huge sums and would be told that they were interfering with the airwaves. Posters on this group would be up-in-arms over it. But if you are a NCE religious station, you can have the same signal and everyone calls it First Amendment Rights.

I have been watching this thread on NPR and seeing how each side is calling the other one names while having no problem when the pendulum swings in their favor. NPR is not the greatest thing since Marconi, to be sure... But it consumes very little of the tax burden and if we can tolerate single-issue politico-religious conglomerates to monopolize the airwaves then I think we can allow NPR to operate.

} "Every damn time I listen to them." I'm not the one trying to muzzle
} them. I want to keep the religious broadcasters AND NPR free. I just want
} NPR out of my pocket. The religious broadcasters are not IN my (or your)
} pocket.

Funny, I keep hearing that when someone 'cheats' on taxes that it is taking money out of the honest person's pocket because (s)he pays higher taxes as a result. Can you imagine what it would mean to this taxed-to-death nation if these free-riders on our airwaves had to ante-up for their chunk of the spectrum? Yes, any free-loader is taking money out of your pocket, Mark, and is doing a lot more damage

to all of our pockets than the 14 cents we each pay for NPR.
(remember we are not talking about PBS, here, just NPR). Plus, the
14 cents we pay for NPR is a known number, an up-front cost. The
untold millions or billions that religious-owned stations DONT pay is a
hidden cost. I'd prefer a robber to a burglar, frankly.

} > >> and they don't make a profit so there's nothing to tax.

Not true, except on paper. See here is how Non-Profit works. You can
make all the money you want... Provided that at the end of the year
you have a zero-balance. You can invest in equipment, pay salaries,
buy more property, as long as your bank statement zeros out at the end
of the year. There is plenty of profit to be made in non-profit
corporations.

} > >As for Pat Robertson and his kind, I wholeheartedly agree they should pay
} > >their fair share of taxes. The public does not benefit from the spread of
} > >religious propaganda-- especially _political_ religious propaganda!-- and
} > >should not be asked to subsidize it.
}
} Obviously, some members of the public DO benefit from this stuff, whether
} or not you agree with what they are saying, as evidenced by the fact that
} they support it monetarily.

The fact remains that many of these tele/radio evangelists are
millionaires and command billions in media, much (if not all) is tax
exempt. Many people support these organizations because they can
deduct them from their taxes. Viewers/listeners also support their
public TV and radio in the form of pledges. Most public broadcasting
derives very little government support.

} You, however, are NOT subsidizing it simply because they don't pay
} taxes.

Sorry Mark, your argument is full of holes. Think of tax-base as a big
barrel filled with water. On the top is a spigot pouring water into
the barrel, on the bottom is a tap where water comes out. The level
of that water is determined by both how fast it goes out *and* how
fast it comes in on the top. The more water that is put in the top,
the more can be taken out of the bottom without draining the barrel.

So if one group is allowed to buy and monopolize HUGE corporate
empires (in this case media empires) which are not beholding to anyone
but the operators of said media, and are not pouring water into the
barrel, they are causing the supply of 'water' to become lower because
they are allowed to operate with no input into the system.

I wish I could operate a company like that...

}I still maintain that they wouldn't pay any taxes anyway because
} they don't make a profit either.

They DO make huge amounts of money, Mark... get real! These are not charities, they are corporations. Just because they are allowed to funnel all their cash into projects, properties and salaries does not mean they don't make money.

I say lift the tax-exempt on all religious-run businesses, including any minister that uses the airwaves to beg for money. I also say that anyone who wants to get involved in the politics of this nation, and wants to use MY airwaves to do so, better pay the cost of admission.. and that cost of admission is taxes. I have to cough up more and more, why should these fat-cat ministers make cash off of the masses and not have to pay anything?

Bill

<comments on D&M station list>

WCGC is licensed to Belmont, a town on the west side of the Charlotte market.
WGBB is on 1240 licensed to Freeport. Being near the water, the signal
gets across the Ocean to Monmouth County NJ (hooray!)
WBAB is licensed to Babylon, and yes, they stretch the show into a 6 hour
event by adding a few rock tracks in the natural breaks D&M take.
Is there something special about CAROLTON that it's capitalized.
By the way on MOnday D&M said "we don't CARE about any other guys on the
radio." This seemed important because Howard Stern is so concerned
with calling EVERYONE else on the radio either "no talent" or "rip me off
lame DJs". A side effect of this is useless who's good/who s*cks
discussions on the UNMODERATED newsgroups for Greaseman, D&M, Stern.
Thankfully most of those are stopped before they appear here. You
could almost call this a broadcast professional forum, but the name is taken.

Paul Richards

And another example is when I was working overnights @ a 1,000 watt n-da in Minneapolis: we got a QSL from Finland. And how those crazy Finns could decipher me through all of that static at a barely audible level, well...I have to give 'em major credit! Had to listen to the tape they sent at least 5 times before I began to hear the station ID!

For what its worth:
Look for WFBQ's morning team of Bob & Tom to be on a radio station near you. Word has it they are trying to set up a syndication deal to spread the show thruout Indiana. They would like to set this up nationally (ala Don & Mike) but because us Hoosiers do not use daylight savings time (gotta keep those cows happy) it has been very difficult to set up.

> Well, it's about time! Maybe the City of Milwaukee has had enough of
>McGee's "Trash and Burn" tactics.

Which are? McGee has NEVER been convicted of vandalism or physically attacking another person, so your claim is not only false but also clearly libelous. And the conviction in THIS case came after some flagrant partisan jury intimidation by Judge Dennis Moroney, so it looks as if McGee has clear grounds for clearance on appeal.

It looks more like the residents of Milwaukee have had enough of cops killing their kids only to be reshuffled into desk jobs---a very real and dangerous problem I've yet to hear any online McGee critics deal with, let alone solve.

I'm tired of the howling about the symptom. Or is it that correcting the cause will leave armchair critics like Sykes and Belling with nothing to bitch about?

> broadcasting. Many of these people are under the age of 25!
> Those of us who are have the privledge of working with some very
> seasoned/experienced people. Let's all keep in touch! Let's talk about
> our careers, experiences, mentors, the job market, tricks of the trade,
> etc.

I'm 23 and have worked in various on-air and Marketing/Promotions positions at six commercial FM stations so far. I just want to echo the statement that it really is a "privilege" to work with seasoned professionals! Although they may not realize it, they have a tremendous impact on the younger folks in the building.

If it weren't for a mentor, it would have been extremely hard for me to have moved up in both market size and job responsibilities as quickly as I have. In addition to showing us "the ropes," the mentor performs one of the more essential functions in this business: introducing us to other industry figures and helping us build our contact networks. Because after all, it really does come down to "who you know." At least that's what I confirmed when I was seeking my first few gigs.

So, my advice for the beginner: find a mentor. For the big-wigs: find the young people in your organization and don't hesitate to take them under your wing. Your interns are probably working for free -- at least let them learn! Delegating a bit of responsibility will work wonders by freeing your time for more complex tasks, while immensely helping the person with less experience advance in his or her career.

While I understand the delicate position you must find yourself in, as GM

of a public radio station, I must disagree with some of what you say. Most especially your statement, "obviiously those who appreciate the programming will support its funding". This is not necessarily true. While I have "appreciated" much of what I have heard on public radio (and did NOT appreciate some) this does not automatically mean that I endorse taking money by force to support it (read: FEDERAL DOLLARS). I do not. Public broadcasting serves the WANTS of many, but the very fact that it is not for everyone means that someone is getting robbed.

It confuses me, also, that you bemoan commercialization (and commerce itself). The very concept which these ride on is the concept of trade, value for value, whose symbol and tool is MONEY. Yet the thrust of your plea is to keep money flowing to stations such as yours. Kind of reminds me of the televangelists who preach the "evil" of money and then offer themselves as a means to relieve you of yours. At least they had to rely on an act of will to get your money. Public broadcasting does not. It gets everyone's money, whether the "contributors" like it or not. And it does it with the force of government. This is wrong.

John is heading back to Toronto to do mornings on The Fan sports radio.
He apparently doesn't like Montreal or CHOM very much. I think he's
scheduled to make the move in the spring, once his contract is up in
Montreal. John is American, but I can't remember from where. His brother
Bill Hayes also works in Toronto at MiX 99.9, and does a lot of voice-over
work on national TV & radio spots.

Specify the election and broadcast which you claim NPR intentionally
influenced and how they did it. Put up or shut up.

>:Please specify on which broadcast an NPR station attacked women,
>:lesbigays, non-Republicans or ethnic groups without giving an opportunity
>:to respond. THAT is the kind of despicable activity pseudoChristian
>stations :engage in every damn time I tune in. Care to explain how that
>fits within a :501(c)(3) designation?

> That was not the point of the conversation, Daevid.

READ THE SUBJECT LINE. It most certainly was (and is).

> Now, could you please specify which "ethnic" group that religious
>stations have attacked?

Jews, for one example. It's a safe bet that most pseudoChristians have
conveniently forgotten Jerry Falwell's little comment about God disregarding
Jewish prayers; what cannot be disregarded is the viciously anti-semitic
AMERICAN DISSIDENT VOICES and SCRIPTURES FOR AMERICA running on WWCR and
KAAY, or WHRI helping Chuck Harder to sell Eustace Mullins' racist books.

> Let's face it, Daevid. Your main gripe with Christian stations is that
>their not tollerant of your already admitted lifestyle.

Aah, yes. I was wondering when you would sink to trying to hide behind this
one. First off, a person's sexual orientation is not their "lifestyle". Jimmy
Swaggart carrying on with hookers in Louisiana and California (the hookers,
no doubt, being paid with money sent to Swaggart by his broadcast flock) and
Jim Bakker raping a church secretary in a Florida hotel room IS a lifestyle.
Secondly, since John 13:23 and 25 clearly indicate homoerotic elements
existed in John's relationship with Jesus, and NOWHERE in the Gospels will
you find Jesus commenting negatively on homoerotic relationships, the refusal
to be "tolerant" that you refer to establishes that these stations wouldn't
be "tolerant" of Jesus himself were he walking the Earth today, let alone
would they worship him.

ELECTIONS. But they are still free to say anything else, including to
oppose policies etc.

> Please specify on which broadcast an NPR station attacked women, lesbigays,
> non-Republicans or ethnic groups without giving an opportunity to respond.
> THAT is the kind of despicable activity pseudoChristian stations engage in

I'm not asking you to agree with what they say, just to treat them with
the same level of fairness as those with whom you do agree.

The NPR broadcasts do not attack women, etc. They attack men,
heterosexuals, Republicans, whites, and Christians. They do it much more
smoothly than the religious stations, but the bias and attacks are there
nonetheless, because I hear it "every damn time I tune in."

It fits in with a 501(c)(3) designation because they do not endorse or
oppose candidates. In any 501(c)(3) organization I've been a part of, this
has been the litmus test.

> >I appreciate your honesty... but do you want to single out religious

> or any other religion does by simple definition.

In other words, only when you disagree with them and they won't _GIVE_ you
or your point of view air time. I bet they'd let you _BUY_ it....

Is free speech only free if you pay taxes? It's not free then. I think
you're requiring taxation to be a condition of the First Amendment. Free
speech is a right that existed before the Constitution, which shall not be
infringed by the govt, not a privlege accorded by bribing the govt.

I would hope you would equally oppose Bill Clinton and the "Rev." Jesse
Jackson from _speaking_ in a church for political purposes.

You're getting way off the broadcasting topic. I'm not going to address
the topic of individual churches on this forum.

> >> but they don't
> >> have the guts to contribute to that pool of public funding that they're

> >will be formidable over the next two.
>
> Please cite specific instances...

"Every damn time I listen to them." I'm not the one trying to muzzle
them. I want to keep the religious broadcasters AND NPR free. I just want
NPR out of my pocket. The religious broadcasters are not IN my (or your)
pocket.

> >> and they don't make a profit so
> >> } there's nothing to tax.
> >>
> >> No profit? You mean CBN, TBN and VCY all run on defecit budgets?

(BTW, budgets are not the issue here. The bottom line is.)

> >We HAD been talking about religious _radio_. These are religious TV
> >networks (except I've never heard of VCY).
>
> We ARE talking about radio---CBN distributes Pat Robertson's TV show's audio
> track to radio stations internationally, TBN owns and operates KTBN Salt Lake
> City (a 24-hour shortwave station transmitting the audio portion of TBN and
> CBN TV programs), and VCY operates its own network of stations from its
> Milwaukee flagship, WVCY-FM.

Are any of these non-profit? I suppose TBN is, since I've never seen any
advertising on the station (of course I can't stand to watch it long
enough to see if there ARE any). There is enough advertising on the Family
Channel to make the assumption safely that that IS for profit, and if it
is, they pay taxes on it. However, I stated (and you deleted) that many US

corporations don't make a profit either. If you've ever run a corporation,
you would know that that's sort of the idea.

Exactly what taxes would a non-profit entity NOT pay that a
for-profit-entity-which-doesn't-make-a-profit WOULD pay?

> As a one-time morning jock for a similar enterprise, WLHA-AM-FM at the
> University of Wisconsin-Madison campus, I'm heartened that the Ivy League has
> that many groups of students with entrepreneurial initiative. However, any
> commercial enterprise should stand or fall on the weight of its business
> activity alone, without being helped along by an exemption from paying taxes.

NOT PAYING TAXES IS NOT "HELP".
HAVING TO PAY TAXES IS A HINDRANCE.

Your paycheck is yours, and the government asks for some of it. Not:
"Your paycheck is the government's, and they let you KEEP some of it."

This difference of opinion between you and me, I think, is the basic cause
for our disagreement on this subject, no?

> >As for Pat Robertson and his kind, I wholeheartedly agree they should pay
> >their fair share of taxes. The public does not benefit from the spread of
> >religious propaganda-- especially _political_ religious propaganda!-- and
> >should not be asked to subsidize it.

Obviously, some members of the public DO benefit from this stuff, whether
or not you agree with what they are saying, as evidenced by the fact that
they support it monetarily. If they choose to support it, that is their
right. You, however, are NOT subsidizing it simply because they don't pay
taxes. I still maintain that they wouldn't pay any taxes anyway because
they don't make a profit either.

Message-ID: <3ckt25$g1b@vixen.cso.uiuc.edu>
Source record: 35970

Well now that the dust has settled at all sports WTEM, here is their lineup as of last week. You'll notice that absent from the lineup are Kevin Kiley, Rich Gilgallon and, after the season ends, the Washington Redskins.

Midnight- 5 a.m. Pam Ward
5 a.m. - 10 a.m. Don Imus
10 a.m. - noon Wash. Post columnist Tony Kornheiser
noon - 2 p.m. ESPN's Fabulous Sports Babe/Nanci Donnellan
2 p.m. - 4 p.m. former Redskin Rick "Doc" Walker
4 p.m. - 8 p.m. Dan Miller
8 p.m. - Midnight Bruce Murray

Still too early to tell if others won't have their contracts renewed. I guess we'll all know by spring, i.e., after the winter rating period. I still say the *only* thing that's hurting this station is its rotten signal on AM 570.

Right format, wrong frequency! Last time I said Randy Davis left his position at WHUR to go to WERQ in Baltimore. That's hard to do since Randy didn't *work* at WHUR. He left WKYS to go to "charm city". Thanks to all who sent me corrections.

WWRC (Local & Net. talk) continues testing in preparation of its much anticipated power increase. Engineer Kevin McNamara tells me the station should be ready to power up in late January. When all work is completed, WWRC will put out 50,000 watts during the daytime and 5,000 directional at night.

Former Washington, D.C., radio announcer William Coyle died on Monday, December 5, at Springbrook Adventist Nursing Home in Silver Spring, MD. He had Parkinson's disease. Coyle joined the staff of NBC's WRC back in 1932. He was the White House and Capitol Hill correspondent for WRC. He also handled local news and sports. Mr. Coyle also worked for the Washington Star newspaper in the 30's and 40's. In his retirement he worked for the Montgomery County paper (Gazette Newspapers) where he wrote the business column. William E. Coyle was 83 years old.

Just when I said I was taking a break....

Silent station KAYX(FM) returned to the air today (Dec. 11) as a fill-in repeater for Bott Broadcasting's KCCV-FM.
KCCV-FM broadcasts with a class C3 (25,000 watt or equivalent) signal on 92.3 mHz from a site in the far southwestern corner of the Kansas City metropolitan area.
KAYX is a class A (6,000 watt or equivalent) signal on 92.5 mHz, licensed to Richmond, Missouri, northeast of Kansas City.
The 92.5 signal should fill in KCCV's poor coverage of the northern parts of the Kansas City metropolitan area.
Other than legal IDs and an annoucement of a Richmond phone number for KAYX, the stations are simulcasting 100%.
Bott is calling the combined 92.3 and 92.5 signals a "superstation," using the slogan "Life 92 FM," referring to the stations' contemporary gospel music format.
This of course should NOT be confused with "Lite 99.7 FM," which is Bonneville Broadcasting's KLTH(FM), with a soft AC format.
Bott also holds a CP for a station on 92.5 at Silver Lake, Kansas, just west of Topeka. It also owns 6,000-watt daytimer KCCV(AM), licensed to Overland Park, Kansas. KCCV(AM) is programmed separately.
Bott purchased KAYX and co-owned KLEX(AM) Lexington, Mo. last year and took them off the air.
KLEX remains silent, as far as I can tell, and considering its status as a 250-watt daytimer at 1570 kHz, one might expect it to stay that way for a while.

>From the Left Coast.......

Expect San Bernardino Country Combo KHTX-AM&FM (590/97.5 K-Hits FM) to be Spanish by Midnight tonight. (12/12/94) They are presently in a "Special 48 Hour Simulcast" with former country rival KFRG-FM (K-Frog 95.1). They have been simulcasting since Sunday, and should be Espanol by the time you read this. New calls are forth coming for both AM & FM after a duopoly deal with the owners of crosstown Spanish KCAL-AM (1410). Do not expect the FM to pick up the KCAL-FM calls since they are already in use by AOR KCAL-FM, Redlands (96.7 K-Cal FM).
{Commentary: Once the switch to Spanish takes place, 97.5 FM should be a POWERHOUSE! The signal is one of the best in the Inland Empire and can be heard in Orange County and Los Angeles. Riverside/San Bernardino do not presently have a local Spanish FM, and with a large Hispanic Population, they could be another KLAX-type success story. A lot of little Spanish AM's have sliced up the pie so far, but this will change all that. KFRG should benefit by leaps and bounds since they will once again be the ONLY full signal Country FM in the area. They also own Hot Country KOOJ-FM (OJ 92.7FM-supply your own joke here) but OJ has never drawn numbers of any sort. Also, how will 97.5's Spanish flip affect Hispanic-targeted CHR KGGI-FM (99.1)? We will see.....

5685. ATTENTION !!!! WOWO APPLICATION FILED WITH FCC!!!!!!!

Newsgroup: rec.radio.broadcasting
Date: 1994-12-13 19:35:39 UTC
From: "PETER Q. GEORGE" <PGEORGE@WELLESLEY.EDU>
Message-ID: <3ckt2b$g1k@vixen.cso.uiuc.edu>
Source record: 35973

The INFAMOUS WOWO/WLIB applications have been filed with the FCC.......

Here is the LOWDOWN......(Bad choice of words....)

Inner City Broadcasting Corporation filed with the Commission applications to change the parameters of WOWO (Fort Wayne, Indiana) and WLIB (New York). In essence, WOWO will still keep its' 50,000 watt daytime (non-directional) intact, BUT.....here is the VERY BAD NEWS. WOWO will be powered-down at sunset to an obscene 9,800 watts (count em', 9,800 watts). The pattern will be engineered (or destroyed) to protect WLIB in New York. To add insult to injury, WLIB will operate with 30,000 watts at night in addition to the 10,000 watts it uses in the daytime. WOWO is currently OWNED by ICBC, but once this travesty is made....Pathfinder will take possession of a emasculated WOWO and will operate it as an ONLY Fort Wayne station.

We are waiting for the particulars from the FCC on File Numbers and whether or not this is considered to be Major or Minor modification. If it is a Minor one, there will be NO Public Comment period as both WOWO and WLIB are coomonly owned and operated. If it is a Major one, we can proceed to go on and file with the Commission any comments and petitions.

We will have the information a soon as possible. But in the meantime, send any questions to the FCC's AM Branch or call them at (202) 418-0200 and ask for the AM Branch. I need not say that it doesn't look good. But, the Guild will continue to press on this matter to the final decision.

Stay tuned.

Ok, here:

Musician = performer

Composer = writer

Mechanicals (of which you are speaking), are decided in a big heavy's
office, and may be as little as nothing. They are, for the most part,
negligible, making necessary BMI, ASCAP, SESAC, etc. My point is:
Can you name 10 rich composers (who aren't also performers)? In other
words, everybody's been griping about the charges collected by composers'
representatives, when it isn't composers who are getting filthy rich off
their music, but rather the performers, and record companies.

Greetings.

WXXX 95.3 FM, 95 Triple X, turned 10 years old last month without even a mention on air as far as I know. Since being taken over by James Broadcasting (co-owners of WVMT-AM Burlington, VT) they seem to have sort of given up on birthday celebrations. WXXX FM went on the air in November of 1984 owned by a consortium of local folks known as Champlain Valley Broadcasting. Triple-X was sold in 1987 to Metro_net of Cambridge, Ma. Metro_net never did grow to a group and sold the 'X' to Atlantic Radio (now American Radio Systems) of Boston in 1988. Atlantic attempted to buy WDOT-AM of Burlington, but the deal never seemed to take hold and Triple-X was sold in 1989 to James Broadcasting, the owners to this date.

95 Triple-X has always enjoyed good ratings with a pretty much straight on CHR format that has varied a bit here and there over the last few years. Mid to late next year 95 Triple-X should be upgrading from 3kw to 25kw with a frequency change to 95.5 Mhz. Building construction is under way now, with tower and transmitter work to begin in the spring of 1995. They plan on remaining at their current FM transmitter location.

James Broadcasting's WVMT-AM is still waiting for the other shoe to drop regarding the position of a new leg of a circumferential highway. I-289's next leg will be running in the town of Colchester right through where the WVMT / WXXX studios are located. It is still unclear if or when the studio building would move to make way for the highway. If so, the 5KW three tower directional AM tower array would stay with probably a new transmitter plant away from the highway.

May you have NO AVAIL's this holiday season !

Happy Holidays, Joe

From: raydio@aol.com
Message-ID: <3ckt3a$g3f@vixen.cso.uiuc.edu>
Source record: 36044

WOR-710AM in New York tried something new today.
That's exactly what the station needs! Although,
one old crankpot called in around 5:30PM to state
that the show was "inappropriate for suppertime...
or anytime", WOR must have attracted some listeners,
besides myself, under the age of 85 for the first
time in quite a while.

Gary Craig of Hartford, Ct. WTIC 96.5FM fame had his
"on air audition" today on New York's second rate talk
station behind the strong-signaled WABC 770AM. Craig
said that he had never attempted a talk-show before and
it was a "real eye opener".

The show wasn't all bad, but if the station really wants
to get less conservative and have fun on the air, I'd
recommend the nationally syndicated, "Don & Mike" show.
After all, as Howard Stern imitators go, I think they're
the best.

I caught the Gary Craig show from 5:10PM until 7PM. In the
first 15 minutes, I was just about ready to turn the dial
when Craig aired a phony phone call. Hmm... How many other
NY radio shows feature phony phone calls? Scott Shannon &
Todd Petingill (WPLJ), Rocky Allen (also WPLJ), John Lander
(Z100/WHTZ)...why I think that even Jim Kerr (WMXV) does them.
Enough already! I guess since it was odd to hear something
other than politics, finances, or plant talk on WOR, I stuck
with the show.

In the next bit, Craig talked about making a play-dough...uhh...
thingy and showing it to his preschool kid for laughs. This is
what promted the phone call from the old crankpot. Anyway,
wit his wife calling in to argue with him on the air (tell me
that wasn't planned), the stern-like segment went to the phones,
but after three phone callers, Craig abandoned the bit.

The show also featured some song parodies, a story about a
naked robber, and other phony phone calls. Some of the bits
were obviously taped on his Hartford show with station call
letters edited out, although there was a mention of the WDRC
call letters (However, I don't believe he's ever worked there).

WHO Radio and K-LYF in Des Moines, Iowa (commercial operations, both) are using the AKG DSE-7000 for most of our production. We demo-ed several of the workstations before settling on the AKG, including the Roland. We found the AKG to be for more intuitive than even the Roland. Without any training and without so much as scanning the manual, I was able to begin editing immediately. There is virtually NO learning curve with the AKG. (We even have one guy here--a 35-year radio veteran who could not grasp the advantages to 4-track production become a believer within hours of firts putting his hands on the control surface. Now he refuses to work on anything but the AKG!)

If we had the bucks, we'd quickly upgrade the newroom and remaning production rooms with the same units.

As the price of these workstations continues to come down, you'll see more and more stations using them, even in the smallest markets.

One observation: they don't really reduce the amount of time to do a given production, because the producer tends to tweak more--fixing things that would not have been fixed (or even fixable) before. The best reason to get one of these in summed up in one word: UNDO (the ability to do non-destructive editing.

From: MaxPace@aol.com
Message-ID: <3ckt3n$g4l@vixen.cso.uiuc.edu>
Source record: 36048

In regards to the recent post regarding the Roland system...I've heard it's very nice.

Although Turtle Beach's soundcards aren't really designed for what you're doing anyway...multitrack, etc. I use my soundcard with Fast Eddi...and I'm able to edit my airchecks into awesome demos in nothing flat...I'm not really doing anything THAT extravagant.

It was the sound quality (A/D D/A converters) of the Turtle Beach sound card that pretty much made it stick out of the bunch for me.
The Tahiti card is/was the ONLY soundcard for the PC with TRUE D.A.T. quality priced under $300.

I've seen Protools on a Mac...unbelivable! I've never worked with the Roland system except seen it in trades...maybe one of these days I'll work at a station with one.

DOUG ANNCR (dougannCR@aol.com) wrote:

: Just last week (about 12/5/94), Love went back to saying both 93.9 FM AND
: Love 94. Perhaps it has something to do with Arrow 94 in WPB.
: Strange, though that after 18 years in the South Forida market, the
: station would give up the kind of name recognition that most companies
: would kill for.

It just makes sense in the digital age to identify yourself by
your digital position. IMHO, Love has a wonderful format but makes
several mistakes.
The primary one is their identifier. "Love" is a word that keeps
their male numbers down. "Smooth" or "Jazz" is much more acceptable. It
may be a sad commentary on men...but its true.
The station had "fixed" a major error by properly identifying
themselves. A report to arbitron that they listen to "94" could be
credited to several stations in the area. A cite of "93.9" is far more
likely to be credited to WLVE.

On another note, you mention "Arrow 94" in West Palm Beach. Only
one station exists on that part of the band: "Oldies 94.3." I just
checked my stereo and confirmed that they're still running jingles that
say "Oldies 94.3." BTW, they used to be "Oldies 94..."

The only station in South Florida playing an "Arrow," that is
all-seventies format, is WBGG (Big 106..er, 105.9 if they were smart) in
Miami. They don't have to worry about little things like that...because
they have Howard Stern in the morning.

>occupies today. It was felt for technical reasons that channels
>had to be spaced 200 kHz apart to operate with full fidelity
>and maximum freedom from interference. Then it was decided, for

I'd like to add a few more observations to this thread. (I see began about two months ago, but I'm behind in my reading.)

I believe that the 0.2 MHz spacing, using odd numbers after the decimal point, dates back to 1941, when commercial FM broadcasting was first licensed in the 42-50 MHz band (although 42-43 MHz was reserved for noncommercial stations). There were a few stations with even numbers after the decimal point in the early 1940s, but I believe they were all older experimental licenses that had not yet been converted to commercial stations.

At that time stations in the same city could operate on frequencies only 0.4 MHz apart. Today, stations at the same location must be separated by 0.8 MHz. For example, in 1941 Chicago had commercial stations authorized on 44.7, 45.1, 45.9, 46.3, and 46.7. A 1942 list shows Detroit with four commercial FM's authorized, on 44.5, 44.9, 45.3, and 47.3.

This policy continued when FM's were moved into the 88-108 MHz band. When new frequencies were announced for the existing stations in 1945, the two Detroit stations (WLOU and WENA) were assigned 96.5 and 96.9; the two Los Angeles stations (KHJ-FM and KTLO) were assigned 99.7 and 100.1; the two Pittsburgh stations (KDKA-FM and WTNT) were assigned 94.1 and 94.5; and the two Rochester stations (WHEF and WHFM) were assigned 98.5 and 98.9.

The table of allocations in the 1947 Yearbook shows that the 0.4 MHz spacing was the norm, even for towns with only two stations. I know that in my hometown of Beckley WV, the two FM's operated briefly in 1946 on 100.7 and 101.1. Unfortunately for the 100.7

station (WJLS-FM), its transmitter was on a mountaintop 10 miles south of town, and reception in town was difficult. It solved the problem by moving to 96.3 and later 99.5.

The 0.4 MHz spacing may have resulted from the fact that chunks of the FM band had all Class A, Class B, or Class C stations back then. I'm not sure exactly when the 0.4 MHz spacing was abandoned. I believe that stations were using +/- 75 kHz deviation back then, but of course there were no subcarriers.

>One problem, can they stop (or reduce the frequence of) those
>announcements that they are a "California non-profit mutual-benefit
>corporation dedicated to the furtherment oif jazz music and the
>education of said same". I am tiring of those rapidly

Certainly the announcements can be annoying, but no less so than the
advertisements that are now absent from the broadcasts (maybe these
were deleted from the satellite feed of the former broadcast station).
Maybe the announcements are required by law, somehow, for the local
cable or satellite feeds, or are a necessary requirememt to
receive various types of corporate or nonprofit foundation support...

Anyway, it is really great to have them back.

Andy Tompson

[Moderator's Note: Yes it is great to have KJAZ on. It is a fine
station/format. Bill]

More on KHTX...

At 1:30 This Afternoon, 95.1 KFRG Afternoon host, Hopalong Cassidy announced on KFRG, KHTX, and KHTX-FM that, "The sale of KHits has gone thru! They will be leaving us in Country Music any minute now, so right NOW, come on down to 95.1FM. Just Down the dial. KHTX-AM & FM will be going away to do different things, so join us now! We thank you who have been listening to us on 97.5 FM the last couple of days, but the time has come. 97.5 is going away very soon. So tune the dial now to K-Frog 95.1 KFRG. 'Cause we're never going away..."

IMHO, It shows a little class on KHTX's part to give KFRG, a former direct competitor, the chance to solicit new listeners before KHTX changes format..

I would guess the more likely scenario was that the owner observed Mark and Brian's continued demise in their home town of Los Angeles, where they went from number one to I think number seven in the latest L.A. book. Of course this drop started when Howard Stern came to Los Angeles, where he now dominates morning drive. I would say that the owner of KEDG took a big chance bringing Mark and Brian to Las Vegas when Stern was already in that market. The real question is why did he think Mark and Brian had a chance against Stern in Vegas when they couldn't compete effectively against him in their home market.

(Copyright, Pittsburgh Post-Gazette. Reprinted here
by permission. Republication prohibited in any medium.)

``International Music from Carnegie Mellon,'' a locally produced, nationally distributed radio program returns next week to WQED-FM. This six-part weekly series features classical music with an emphasis on Latin American composers and musicians.
The repertoire spans three centuries of classical music, from the 18th to the 20th, and includes works by classical composers on both sides of the Atlantic, from well-known composers like Mozart, Haydn and Vivaldi to works by Alejandro Cardona, Leonardo Balada, Roberto Sierra, Heitor Villa-Lobos and Arturo Marquez.
Raul Cragg hosts the program and Mark Yacovone of WDUQ-FM produced the series.
The show is available in both English and Spanish: the English version goes out via satellite. The Spanish version is recorded on digital audio tape.
``International Music from Carnegie Mellon'' airs Tuesdays at 10 p.m.

This year's edition of WWSW-FM/AM's now-traditional holiday recording is out. ``Home for the Holidays III'' features a selection of seasonal music performed by local artists. This year's lineup includes past ``Home for the Holidays'' alumni: Johnny Angel and the Halos, Corbin/Hanner, Pete Hewlett, Jeff Jimerson, Pure Gold, Jimmy Sapienza, Lou Schreiber, Sputz, B.E. Taylor and Craig Zinger. Artists joining in this year include Leah Boni, Denise Graves, Donna Groom, The Jaggerz and Kathy Renda Mollica. There's also a contribution from Izzy Rivera, who spent 17 years in The Drifters. Rivera is still writing music and now lives in Apollo.
Sales of volumes I and 2 of ``Home'' raised more than $28,000. Proceeds from the recording go to the Salvation Army's Feed the Hungry Campaign. The CD/cassette is available at Giant Eagle stores.

HH-FM launches its annual fund raiser for the Make-A-Wish Foundation next week. WISH morning team Jack Bogut, Dan Dunlap and Hank Baughman will do the show live at the Westin William Penn lobby starting Monday through Dec. 23. They'll also be outside Saks Fifth Avenue weekday mornings and the station will broadcast on weekends from area shopping malls. They'll close out the campaign with a live Christmas Eve broadcast from 9 a.m. to noon.
Last year's drive raised over $765,000 for Make-A-Wish.

Radio People:

KDKA-TV's C.S. Keys is doing weather on the radio, too. He joined the WAMO-FM ``Breakfast Jam'' this week, with weather updates twice an hour on the morning show.

Jim Harris has been hired as general sales manager at WZPT-FM (The Point). Harris was vice president/general manager at WWKS-FM/WBVP-AM in Beaver Falls since 1991.

WTAE-AM talk host Phil Musick has published a collection of his writings. ``Pittsburgh Places, Pittsburgh People'' is an updated collection of Musick's Pittsburgh Press columns from the mid-'80s, which look at the city and its colorful characters, who hail from places high and low.

The paperback sells for $12.95 and was published by Musick's Ironist Press. It's available at most local book stores, including Barnes & Noble, Waldenbooks and B. Dalton.

I would recommend "Writing News for Broadcast" by Edward Bliss Jr. and
John M. Patterson. It's published by Columbia University Press and is
probably the most widely-used textbook for broadcast newswriting classes.
The ISBN is 0-231-04372-4.

Also look for "Broadcast Journalism, an Introduction to News Writing" by
Mark W. Hall. It's published by Communication Arts Books, Hastings House
Publishers. The ISBN is 8038-0782-1.

Elsewhere on this forum someone boasted that only 20% of their funding came from the CPB. Newt doesn't have the ABILITY to kill PBS -- he can only defund the CPB portion of the funding. That would cause some belt-tightening at the stations, but on the other hand, those of us who would contribute if they weren't already picking our pockets via the CPB might start contributing.

5709. NPR/CPB

Newsgroup: rec.radio.broadcasting
Date: 1994-12-13 19:37:03 UTC
From: "Michael Black...WEOS-FM" <BLACK@HWS.EDU>
Message-ID: <3ckt4v$gbe@vixen.cso.uiuc.edu>
Source record: 35956

I have been reading the NPR/CPB/"religous" debate for awhile and could no longer sit back and just read. As the GM of a very small NPR member (as well as PRI, the CPB money we receive is quite small but essential to our operation. In addition, I find it troubling that NPR is always labled "liberal". Compared to Rush? Yes. Compared to Pacifica? Hell, no. Many times NPR swings both ways, and tries to have balance, in many ways by presenting stories and views that are not heard in other circles. This Way Out, COunterspin, and other programs present even more information from different views, in addition to CBC & BBC programming that is offered by PRI. By the way, we air TWO and Fair' program, along with NPR, and PRI. Do we get complaints? Sure. We get complaints for carrying TWO. We get complaints when we preempt TWO for a sporting event. We get pro and con complaints on NPR stories. SO, who are you going to please?

As for Mr. Gingrich, he is acting more like a kid with a new toy, than a responsible leader. Has he talked with Sen. Stevens, a conservative and supporter of public broadcasting and the other concservatives who support the concept? It is amazing that the Newt wants to squash the money that brings you Elmo, Barney, The Car Guys, and other "popular" programs, as well as those that conservatives point to as a waste of money.

And on Religous Broadcast stations: This is one of my personal pet peeves. I consider myself a very religous person, but I think the stations are a waste of spectrum. I also disagree that the stations are not costing me money, even though I do not support it. The stations ARE costing me money, as they are getting the benefit of the tax laws, lower postage rates, and other benefits that technically do cost taxpayers money, and at that same time, allow some to abuse the principle of the laws to live lavish lifestyles. Think of where these tax benefits could be used: reduce the deficit, by more weapons, help on healthcare, repair infrastructure, give more money to public radio, whatever!

I think you will not get a clear agreement on any of these issues, but if CPB is "Zero'd out", the republicans are going contrary to what they are proposing: letting the tax dollars go farther, which is exactly what they want to happen. FOr years, Congress has allowed us to give $1 of our taxes to a campain fund. How about a box to write in what you want to spend a $1 of your taxes on? Public Broadcasting, Deficit Reduction, Newt's Presidential Campaign (yeah, scary , isn't it?), etc. could all be given an equal treatment in this regard. My few cents worth.

Michael Black
WEOS-FM

rrb@deja-vu.aiss.uiuc.edu writes:

:Freedom of speech? I am so glad you (as a conservative) see this as a
:freedom of speech issue. Funny, when Free Radio Berkeley and others
:who advocate micro-radio and pirate radio claim that there is a
:freedom of speech issue at stake, many on this group are very fast to
:jump up and yell that the is no right to broadcast.

There is a big difference between Freedom of Speech and what was being advocated there. Just because someone claims a Freedom of Speech issue doesn't mean that there is one. While I'll admit that there has been a relaxing of the laws governing broadcasting for better or worse, those exsisting stations have to play by the rules. Which is why you can't just plop a tower anywhere you want and start broadcasting, which is what Free Radio Berkley and others were advocating.

:What a bunch of two-faced, hypocritical hogwash!.. C'mon guys...
:either you want to see the market decide or you don't. If you are so
:upset and righteously indignant over the 14 cents you pay in taxes to
:support NPR,

14 cents? Where are you coming up with that figure? True, the total budget for CPB is $275 million, but you are not taking into account the other expenses put on the back of the taxpayers. In some areas it might be different, but in Wisconsin, the majority of NPR stations are owned by the University of Wisconsin Board of Regents. Who foots the bill? The TAXPAYERS!!! The same with the PBS television stations, with the exception of the two in Milwaukee (channels 10 & 36), which are owned by the Milwaukee Area Technical College, not affiliated with the U of Wis.

:then you should be equally indignant
:over the proliferation of right-wing pseudoChristian radio stations
:which monopolize huge segments of the airwaves and are given
:preferential treatment when it comes to repeaters because they
:allegdly are serving the public interest.

And are allegedly monopolizing huge segments of the airwaves! I am not a fan of low powered repeaters in any form, so we have an agreement on that issue.

:Here in Missouri, a Christian station in Camdenton, operates one
:full-power station which covers about a 50 mile circle, then operates
:somewhere between 9 and 12 translators with anywhere between 20 and
:200 watts.

Again I am in agreement with you on the repeater issue, but are the repeaters owned or operated by the station, or and independent entity?

When one was put up here in Green Bay, it had to be owned by a private party not associated with the main station. (This was back in the early '80s, so the rules might have changed since then.)

:But if someone in one of these translator-served towns wanted to place 20
:watts on the air to serve the area with local news and information,
:they would be denied the "First Amendment Right" to do so.

First, you are assuming that the First Ammendment covers operating a radio station, which it does not.

: If they went on the air anyway, they would be fined huge sums and would be
:told that they were interfering with the airwaves.

And justifiably so. In all areas of radio except CB, you have to have a liscense to operate a station.

: But if you are a NCE religious station, you can have the same signal and everyone :calls it First Amendment Rights.

Funny, that's the same reasoning that Howard Stern used when he got fined by the F.C.C. The First Ammendment. I guess it's all coming down to just who's ox is being gored, and now that it's NPR/PBS's turn, they and their followers don't like it.

: But it consumes very little of the tax burden and if we
:can tolerate single-issue politico-religious conglomerates to
:monopolize the airwaves then I think we can allow NPR to operate.

$275 million dollars could be spent better elswhere, (like I said not counting the tax dollars used to fund University-owned stations) than NPR/PBS. You still haven't come up with any facts that back your assumption that in your words "single-issue politico-religious conglomerates" are "monopolizing" the airwaves. Or is this still part of your ranting?

:The fact remains that many of these tele/radio evangelists are millionaires and :command billions in media, much (if not all) is tax :exempt. Many people support these organizations because they can :deduct them from their taxes.

Nobody is twisting their arms to support these ministries. If you don't like them, you don't have to give to them. It's that simple. Whether you like them or not, you HAVE to give to NPR/PBS, regardless of how much it is.

: Viewers/listeners also support their public TV and radio in the form of pledges. :Most public broadcasting derives very little government support.

I have said my piece on this (the hidden costs that you are not mentioning), I won't beat this dead horse.

:So if onegroup is allowed to buy and monopolize HUGE corporate
:empires (in this case media empires) which are not beholding to anyone
:but the operators of said media, and are not pouring water into the
:barrel, they are causing the supply of 'water' to become lower because
:they are allowed to operate with no input into the system.

I am glad YOU said it. This sounds exactly like NPR/PBS!

:I say lift the tax-exempt on all religious-run businesses, including
:any minister that uses the airwaves to beg for money. I also say that
:anyone who wants to get involved in the politics of this nation, and
:wants to use MY airwaves to do so, better pay the cost of admission..
:and that cost of admission is taxes.

Does this also include the "Rev." Jessie Jackson? Or Pastor Bill
Clinton? Or "Rev" Al Sharpton?

: I have to cough up more and more, why should these fat-cat ministers
make cash :off of the masses and not have to pay anything?

Once again, how about Sharpton, or Jessie Jackson who with the
exception of the CNN gig, hasn't had a private sector job since his
college days when he was spitting in the soup of white people when he was
a waiter. (Something that for once, he was honest enough to admit to.)

Precinct toilets stolen. Police have nothing to go on.

SRogMix105@aol.com writes:

>NYC Radio Waves 12/12

>WFAN has opened up a big can of worms - One of their regular callers, Eli Stra
>nd of Westchester, will get a chance to co-host a show in January. The
>problem--he is constantly complaining of racism in sports, even when it's not
>warranted. This announcement Thursday touched off a firestorm of calls, both
>pro and con, to the station. PD Mark Chernoff knew there would be some talk
>about this, but even he was a little surprised at all the calls to the
>all-sports station, which in the last few days has become the 'all-Eli' statio
>n. Not all the FAN personalities are happy about this--Midday host Russ
>Salzberg banned him a memorable on-air tirade a few months ago.

This discussion has also found its way over to WABC, and some of the
callers there who know of him and some of the hosts had more than one
comment about the trial period. It could set an interesting trend, and
one has to wonder if some of the well know callers such as John of Staten
Island and Frank of Queens and Hilly and Light will make an appearance on
WABC at some point.......and people think Grant can excite people!

>WFAN's Don Imus continues to receive alot of attention for his book "God's
>Other Son". The syndicated morning man was the subject of a People article
>last week, and his book is on the NY Times Best Seller list. An Ithaca, NY
>radio station just added Imus to their lineup and changed their calls to
>WIII, for Imus In Ithaca.

It will be interesting to see the progress Imus continues to make as the
political changes which started back in November take place in Washington.
He speaks with so many well known politicans from both sides of the isle,
and is a well known supporter of Bill Clinton. But he does have a lot
of influence in many regions, and it does not hurt to have a forum which
attracts a wide audience when seeking votes.

Look for more of Jeff Greenfield and Bob Dole calling in, and I think
we will see more of him in public.

>WABC's Bob Grant is getting his own syndicated talk show. Infinity will air a
>weekly version of Grant's show. WABC will also add Jim Hightower to it's
>lineup starting January 7th. All the controversy about his views have been
>good to his ratings--Arbitrends show a 30% increase this fall.

There is no doubt the talk powerhouse in the NYC area is WABC, and the hosts
and the program director have taken chances and stuck to their ideals and
made for EXCELLENT talk radio. You cannot agree with everything that Bob
or Jay or Lynn (especially Lynn!) says, but you cannot discount the
influence and the following the station has.

A show to watch for to grow even more is The James and Joel Show on Saturday and Sunday nights. These two are on the cutting edge of youth oriented, conservative radio, and offer a view at what the future of talk radio could be in some circles.

True DBS will probably happen. You can get Music Choice via RCA's
Digital Satellite System and a subscription to DirecTV. For listening
in cars, etc., there are still a lot of legal and technical hurdles to
overcome.

Music Choice [formerly Digital Cable Radio] provides digital quality
audio via cable. There are over 30 formats available plus cable movie
network simulcasts.

Hope this helps.

Ron Yuman
Manager of Operations
Music Choice

Moderators Note: Of course Ron fails to mention his direct-competitor,
DMX <Digital Music Express> which has more formats,and provides a DJ
remote which identifies the song/artst/CD you are listeneing to.
Both are nice, but can get boring since all they are are big CD
jukeboxes on shuffle-play. Bill]

These are NOT the fall numbers... These are simply the
August/September/October monthly. Gary Lycan in the OC register was
wrong..

The fall book will end on Wednesday, and we can expect numbers in about 3
weeks. By the way, Sept/Oct/Nov #'s are out but I don't have them in front
of me right now.....

I am putting together a business plan in attempt to raise capital for a new radio station. I would like to find some financial statements for other stations, preferably with a news format, to which I can can correlate some of my pro-formas. Can anyone identify publicly traded radio stations from whom I could get an annual report?

Thanks in advance,

Darrell Waters

:There are a lot of very talented on/off-air people working in
:broadcasting.
:Many of these people are under the age of 25!
:Those of us who are have the privledge of working with some very
:seasoned/experienced people. Let's all keep in touch!

Brian, I started in radio at age 16, running public affairs at KPOP in Sacramento.
I began doing Overnights at KWG-AM (oldies) in Stockton, CA when I was 19, got Mid-days on KYBB-FM (AC) In Stockton when I was 20 in 1988, and came to KOST in Los Angeles in 1989, where I was hired when I was 21, and began Overnights when I was 24, in 1991 I've been at KOST for 5 1/2 years and I am only 27. Yes, Virginia. There are some talented youngsters out there. (Me? I just got lucky.....)

> under 25 speak out!

I got drug into radio when I was 15...I read Superjock when I was 15 from our local Library. I did high school radio...my own pirate station...got busted by the FCC when I was 18 and turned the pirate station into a legal Cable FM station. I ran it for 3 years until I sold it and took a job in Texas as APD/MD.

Currently, I'm 7-Mid AT in Lincoln...looking to get back into programming. I'm 26 now...

Don Hayes <donhayes@delphi.com> writes:

>Wow, whats the story? I there any chance that Gene Burns will return? While
>I enjoy Jay, Gene takes the cake. Please, WOR, get rid of these liberal babes!

>From what I have been reading in the New York papers and from other
postings, Gene is gone and should be back on the air in a syndicated
program out of Florida some time later this Winter.

There has been nothing I have seen in any of the columins about who
or what will replace the show, Jay Sevren(sp) has been doing a great
job, and was and still is a frequent guest and contributor to The
Barry Gray Show.

I have noticed there is a trend on the station to have the guest hosts
filling in on the Burns and Gray programs be mostly women, such as Lisa
Marie, the former Lisa Silwa.

To me, the station has an uncertain future, and it is my hope nothing
happens to Barry Gray, who is the dean of talk radio in the overnight
and is a NY fixture. He is someone who would be a great addition over
at WABC, if there was room for him. They have a rock solid line-up,
and I would hate to see him just do fill-ins.

5727. Welcome To rec.radio.broadcasting/AIRWAVES

Newsgroup: rec.radio.broadcasting
Date: 1994-12-16 02:56:35 UTC
From: wdp@airwaves.com
Message-ID: <3cqvl3$6ng@vixen.cso.uiuc.edu>
Source record: 35982
Cross-posted to: rec.radio.broadcasting,rec.radio.info,rec.radio.noncomm,rec.radio.shortwave

Greetings Readers:

It is time to post a general overview of rec.radio.broadcasting and its companion email digest, AIRWAVES RADIO JOURNAL.

The AIRWAVES Radio Journal is a periodic email digest dedicated to discussions about all facets of domestic broadcast radio. Subscriptions to Airwaves are free, and available to anyone who is equipped with Internet (or Internet gatewayed) email service. More details on subscribing to AIRWAVES RADIO JOURNAL is included later in this file.

All articles in AIRWAVES are ported to and from the Usenet newsgroup rec.radio.broadcasting (r.r.b) which was founded in April of 1992, as a means to further discussion of topics pertaining to 'domestic broadcast radio'.

By *domestic*, we mean broadcasts which are intended, primarily,for reception in the same country/nation in which they originate. AIRWAVES and rrb, are international in scope, and although much of the traffic here is USA-based, the term 'domestic' should not be taken to imply 'USA' or even North American. Readers in other nations are encouraged to participate.

Rec.radio.broadcasting/AIRWAVES has evolved into a place where broadcast professionals, para-professionals, up-and-coming broadcast professionals and involved listeners come to discuss ideas, share insights and opinions and basically exchange information of interest among one-another. Often these groups lack any real insight into each other's world. One of the main goals of AIRWAVES/rec.radio.broadcasting is to act as a bridge between these different groups of radio-interested parties.

1) THE RADIO PROFESSIONAL. (S)he lives *inside* the walls of radio. While dependent upon the listener the Broadcast Professional (BP) is somewhat separated from the end user by virtue of his/her "point-to-multipoint" position. AIRWAVES offers the BP a glimpse into the real-world of the listener, unfiltered by consultants, ratings, trend-reports, trade pubs et-al. Sometimes that world is a little rougher than the broadcaster is used to, but that is the reality of 'the real world' sometimes. I do try to maintain a civilized environment, though, and filter out the most offensive brainless or off-topic posts (more on this below).

2) THE RADIO LISTENER. The listener is also in a similar (albeit inverse) position. The listener has relatively little actual input into radio programming. They often have only a vague idea of what makes a radio station tick. By communicating directly with broadcast professionals (and para-professionals) the listener gains some insight and understanding into the world of the broadcast professional.

3) THE WANNABE BROADCASTER. AIRWAVES/r.r.b gives those with a strong interest (but little or no experience) in the industry the chance to interact with, those who have succeeded in the business. We have seen many a positive interaction between a newbie and a veteran, and many have written me thanking me for contacts they have made via rrb/AIRWAVES. We also post resumes and 'help/positions wanted' ads for interested parties at no charge.

Some of the topics covered in rrb/AIRWAVES include...

1) Formats and programming.
2) Engineering & technical matters and interests.
3) DXing (long distance reception) on the standard broadcast bands.
4) Community broadcasting.
5) Pirate broadcasting (especially non-shortwave, domestic pirates).
6) Legislation affecting the industry, and its 'offspring' industries.
7) Technologies affecting the industry, and its 'offspring' industries.
8) General station information. Who is going on and off the air, and why.
9) Radio's historical and cultural significance.
10) Old-time and vintage radio programs and talent.
11) Radio's current and future trends.
12) Political and news coverage and its impact.
13) Job openings and help to those seeking work in the industry.
14) Information on equipment and techniques involved in transmission and reception of broadcast radio signals.
15) The International Scene and how broadcast radio is shaping up in the various nations of the world.
16) Gabfesting and all matters of general interest to those involved in, or interested in, the general subject of domestic radio broadcasting.

AIRWAVES/r.r.b is loosely moderated, as alluded to above.

My philosophy of moderation is to 'err on the side of permissiveness'. I do not believe in censorship and I never deny a post because I don't believe in the poster's opinions. I take great pains not to unduly restrict dialogue or the poster's right to express him/herself.

If there is doubt, I post. If I can assist, I do so. If I can redirect to someone who CAN assist, I do that. It is my privilege to be part of this group and part of the radio broadcasting community. Although I have final say over what gets in the group, I often confer with a group of trusted posters when I am unsure of what to do in a given situation. I bend over backwards not to abuse the position to which I have been entrusted. Also, if I do deny a post, and the poster writes me with convincing argument as to why it should have been posted, I will often reconsider, and post anyway.

Here are some of the posting/writing guidelines which I ask you to adhere to...

* If you post a question that is of potential interest to others in the group, ask that replies be posted, instead of emailed to you. We all would like access to the answers. If you do receive email replies, post a summary

to the group. This forum is only as good as its posters and readers. Keep the info flowing. An exception to this is when you are asking for very specific information which would not be of general interest, such as inquiries into specific area radio stations or employment information. However in most cases, you would be surprized how many people benefit from what you may think is of no interest to others.

* If you email an answer to a poster's question, send a copy to the group's submission address, articles@airwaves.com , so we can all learn from your knowledge. When in doubt... POST POST POST! :-).

* PLEASE edit quoted text to a minimum! Most users of this group are fairly regular readers and do not need, or want, the entire text of a recent article in every reply. Of course, if the thread is not current, more quoted text may be appropriate. Often quoted text is required to make sense out of your reply. Please use it, but use it sparingly. Use your brain (and your editor :->).

* If your message is basically a one or two line "Me Too" or "I disagree" post, consider emailing it to the poster. However if you go into some details as to WHY you agree or disagree, then please post it.

* If you are replying to an article in the Airwaves Radio Journal, simply use your mailer's reply feature, and again, edit the text to *ONLY* the article you are replying to, and include the article's name in the Subject field. Subjects of "Re: Airwaves Radio Journal" are confusing and may result in needless delays.

* If you post about a local radio station or personality, realize that most of the readers will know little or nothing about it. Offer a little background, like location, station format, type of music played etc.

* Last but not least, avoid flames and personal insults. AIRWAVES/rrb tries to maintain a reasonably high brain to B.S ratio. It is fine to disagree, but please stick to the issues and avoid personal flames. Broadcast Professionals are looking for information and idea exchange. Most of them have no time to wade through reams of stupidity to find the occasional gem. That is why we ask that if you *must* make personal attacks, do it in email.

Matters that may cause an article to be rejected, include...

* Articles which are not on (or reasonably near) the group's charter (domestic radio broadcasting and related subjects).

* Articles that are too long for submission as-is. We have a soft limit of 8000 bytes (8 kbytes) and a fairly hard llimit of 10,000 bytes (10kbytes) per article for the Digest. We will post longer files in the newsgroup, but all sites may not carry longer items.

* Articles which are merely multiple repetitions of an identical answer which has already been offered several times.

* Articles which contain 'miles' of quoted and multiple quoted text followed by a few lines or less of original text. Please edit quoted text to a minimum and try to adhere to the *50% rule*, that is 51 (or more) percent of original text to 49 (or less) of quoted text.

* Articles that solicit for funds or contain blatant commercial content.

* Articles which are unwarrantedly offensive, abusive or contentious for the sake of contention. Personal attacks and ridicule are considered such. Discussion, even argument, of issues and opinions are welcomed and encouraged. However personal attacks on individuals (no matter how justified you might feel they are) are not part of our charter.

How To Post your article...

1) Post via rec.radio.broadcasting as you would any other Usenet group. Your articles will find their way to AIRWAVES as well.

2) Email your article directly to articles@airwaves.com. Using other addresses to post will needlessly delay your article and may cause it to be lost entirely. You might consider installing an alias in your mailer for emailed articles, especially if you post lots of stuff. See the end of this file for all applicable addresses.

AIRWAVES/rrb maintains a Non-Solicitation Policy. Articles which appear to blatantly solicit funds from readers for a 'cause' or a 'project' are generally rejected.

However, I generally * DO * accept the following...

o Product reviews: ... provided they are objective and informative and contain little or no 'motivational' language. All inquiries must be directed to the poster or an address of the manufacturer/distributor.

o Personal items: Such as old time radio tapes, a specific piece or two of equipment etc. sold at a low, hobbyist price or offered for barter/trade.

o Announcements for workshops, conventions, radio related flea-markets, etc.

o Personal recommendations of a product/company that appear legitimate. Especially when it is in response to another poster's inquiry.

AIRWAVES RadioWatchers

AIRWAVES has a program called RadioWatchers, which is open to any readers who are interested. Basically RadioWatchers are volunteer staff reporters who write about the goings-on in their market or area. RadioWatchers are individuals who are either directly involved in their local market radio goings-on (i.e.employed at a station) or are otherwise interested and connected to the radio scene in their markets. RadioWatchers should be interested in telling the world about the local happenings in their area.

RadioWatchers are expected to maintain at least one posting per month, more as news warrants.

For a complete file on the RadioWatcher program, send email to radiowatcher@airwaves.com and tell us about yourself.

- Subscribing to, and unsubscribing from, AIRWAVES Radio Journal -

All subscription matters are handled automatically. To accomplish this, send email in the following format (EXACTLY)...

To: subscribe@airwaves.com
Subject: SUBSCRIBE

* OR *

To: subscribe@airwaves.com
Subject: UNSUBSCRIBE

<In either case the body of your message is ignored by the server>.

AIRWAVES/RRB ARCHIVES

Archives of past Airwaves Radio Journals are kept for retrieval via FTP, Gopher or via the World Wide Web. Below are the paths for these archives.

FTP - radio.aiss.uiuc.edu /misc/rec.radio.b-cast/

Gopher - radio.aiss.uiuc.edu 7070

W.W.W - http://radio.aiss.uiuc.edu/~rrb/

As of now the web page has no pictures, but it does contain a bunch of links related to radio, television, other media and a bunch of non-media links. More are always welcome.

AIRWAVES JOURNALS (and the previous incarnation as Internet Radio Journals) are stored in sub directories, each with their own index file. Our archive site also contains files from a couple of our other lists, as well as some interesting information not published in AIRWAVES/r.r.b. Most files are compressed, so if you are using FTP, use the binary mode to transfer. Our Web Site has many other radio/media and general links in addition to the archives for AIRWAVES publications. Do check it out. Let us know if you have any other interesting links for us.

I can answer some basic FTP/GOPHER/WWW questions, but please don't ask me to give a complete tutorial in these systems. If you are in doubt, try asking your system administrator, or posting to appropriate newsgroups.

My address is wdp@airwaves.com Use it for any list-related conversations.

If you would like to send a letter of appreciation to the administrator of the machine on which AIRWAVES is processed, posted and archived, send that to Lance Moxley at clm@uiuc.edu. He has allowed rrb/AIRWAVES to exist on his machine and has allocated disk space to our archives and web site. Lance is an important, albeit silent, partner in bringing this service to you. In addition Greg Gulik, sysadmin of World Wide Access in Chicago has been very supportive since the beginning of rec.radio.broadcasting. If you have a moment, drop him a line to thank him for his continuing efforts without which none of this would have ever been possible. Greg's address is greg@wwa.com.

Please don't send problem reports to either of these men, they are very busy. Send any problems to me and I will deal with them. That is why I am here <grin>.

-=*=- ENJOY THE GROUP! -=*=-

I hope you enjoy the group. Remember, it is only as good as its contributors. So don't be shy :-). If you have a question, or answer, even if you are not sure, post - post - post.

I am open to suggestions on how to improve this group. Send them via e-mail to wdp@airwaves.com.

Thanks to all who have, and continue to, participate. We now return you to your regularly scheduled newsgroup :-).

William Pfeiffer Moderator - rec.radio.broadcasting - Airwaves Radio Journal

---

WORLD WIDE ACCESS

If you are looking for a very good, T1-connected, open shell Unix net account, in Chicago (but reachable via telnet from anywhere) I heartily recommend contacting World Wide Access. Accounts start at $60.00 a year (that is $5.00 a month) for unlimited time on line, full news and mail, Unix shell, compilers, etc. and 5 megs of disk space. He also has realtime full access Internet accounts which are about $20.00 a month for all the above, plus FTP/Gopher/Telnet/IRC/world-wide-chat/World Wide Web, 10 megs of disk space and all the goodies. For information, send email to greg@wwa.com and mention AIRWAVES/rrb.

No money has changed hands for this announcement, nor am I affiliated with World Wide Access. I am just an appreciative account holder and net.friend.

5728. Boston Radio Watch (12-15-94)

Newsgroup: rec.radio.broadcasting
Date: 1994-12-17 04:26:45 UTC
From: nhmas@gauss.med.harvard.edu
Message-ID: <3ctpa5$gmd@vixen.cso.uiuc.edu>
Source record: 35983

* Almost 3-month old 70s hits WEGQ-93.7 will have a full-time DJ line-up
as well as a new PD in the house starting the first week of January.
The new PD is not so new to Boston. He's Peter Falconi who did time
at the old WVBF(now country WCLB) in the late 70s. He'll handle
PM drive as well. Other noteables include : former WBMX personalities
Stella Mars(middays) and Scott MacKay(AM drive). MacKay began his
morning gig right after ARS' take-over of 93.7 in early October...

* Brudnoy's return expected soon :

WBZ's talkshow host David Brudnoy who's been out since
end of October will return to his regular shift(7pm-MidNite)
starting on Thursday,January 5th...Brudnoy will resume his
show from his Back Bay apartment...

* Going to the beach....:

- Lisa Traxxler is out at CHR WXKS 107.9 as a late night jock(10pm-2a).
Weekend/fill-in 'Kid David' David Corey moves into her slot...

- Walter 'Little Walter' DeVenne, 28-year fixture on a Boston radio
scene[credits include WCGY(now WEGQ), WROR(now WBMX), WMEX(now WSSH)]
is out all-oldies WODS 103.3FM as a Satrday/Sunday night host of
"Little Walter's Time Machine". DeVenne's contract would've expired
at year's end. PD Rick Shockley picked another Boston vet Jim Sands
who's been doing weekend afternoon at 'ODS to take over weekend nights...

* Going to the beach....sort of :

- Steve Rivers gets kicked upstairs as a chief programming officer
at Pyramid while his PD post at CHR WXKS 107.9FM will be filled
by James Ivey,formerly with a Pyramid's station in Rochester...

- Legendary Boston Bruins play-by-play man Bob Wilson has officially
terminated his deal with American Radio Systems this week. This
means if NHL was to resume their season in the next couple weeks,
ARS has a right not ask Wilson back to do Bruins games on
all-business 5kw WBNW AM 590. 65-year old Wilson is said to be
seriously considering retirement at this point..That would be a
sad end to Wilson's great career in Boston. Bruins package moves
to 50kw WBZ AM 1030 starting next year. It's uncertain what 'BZs
plans are for the next Bruins' radio team...

* Back from the beach just to say hi....:

- Former 7-year WROR(now WBMX) personality Brooke Daniels will
substitue for vacationing Jerry Williams(10-12p) at All-talk WRKO

AM 680 during the week of 12/19....Daniels' most recent gig was
a syndicated WestwoodOne talkshow which was cancelled earlier
this summer...Could this be an audition for something more
permanent at WRKO? We shall see...

* Talk America in limitted supply....:

Greater Media's WMEX AM 1150 runs Talk America Radio Network
whenever it's not leasing time to Spanish broadcasters or
simulcasting its country+western sister station WBCS 96.9FM...
Best time to catch it on Sunday nights at Midnight...TalkAmerica
was last heard on WSSH AM 1510 but it was pulled off the air
in October when Noble sold the station to Denver-based Communicom.
Speaking of Communicom, they promise to unleash very high-quality
produced religious format at 1510 early in 1995...

* Quick Overview of 1994 :

Relatively quiet year as far FM was concerned. It seems like
everyone spent their time watching what will happen as the result of
2 new duopolies -- In June, Pyramid acquired WJMN-94.5FM for cool $22
million and paired it with its powerhouse CHR WXKS-107.9FM. Changes
to the on-air line-up and off-air management but the song remained
the same -- very bland CHurban; American Radio Systems
is still in the finishing stages of getting 70s hits WEGQ 93.7FM acquired
from Curt Gowdy for $12.5 mill. All new on-air and off-air talent here.

Off the air, WBCN, WZLX, WXKS, and WBOS all get hooked up to Internet.
WZLX goes one step further and adds a cool WWW site
at http://www.wzlx.com/wzlx

Only one format change on FM : ARS decided to flip 93.7's AOR to 70s
sound(calls are changed,too) in late September.
Just for the record : In 1993, we had 2 format changes on FM -- both
stations(105.7 and 96.9) flipped to country and western.

On the AM side it was a wacky year, indeed. ARS plays a shuffles with
its 2(or is 3?) stations : shifts all-sports,Imus and Celtics from
WEEI 590 to WHDH850. 850 drops WHDH calls in favor of WEEI. 590
adopts all-business with WBNW calls and local business talk from 9am
to 4pm while carrying Bloomberg's Radio rest of the time. WRKO-WHDH
consolidate their talk talent(some it is not so good,IMHO) and WRKO
ends up being the only full-time all-talk outlet in town...
WSSH 1510 gets sold by Noble to Communicom. Communicom promises
first-rate religious sound early in 1995...
WBZ 1030,#1 station in the market, adds sports flavor on weekend
afternoons but loses Patriots games to Infinity's AOR WBCN 104.1 in
1995...

Happy New Year!

-Mark

Greetings:

I have been told that there has been trouble connecting to our web site
using the the URL of http:///radio.aiss.uiuc.edu/~rrb .

The bug is that the trailing / has been ommitted in some of my mailings
about the site.

If you have the AIRWAVES web site on your web page, please be sure that
the URL is http://radio.aiss.uiuc.edu/~rrb/ .

NARA has an extensive list of CBSRMT tapes. Unfortunately, many of them are missing the end with the squeaking door, but all of the stories themselves are intact. If you aren't a member of NARA, you should be! Quite a catalog and good service. I have 10 of their tapes sitting on my desk right now. --Ken MacHarg

Greetings All, I have watched this thread for a while and for what it's worth

> Subject: Re: pseudoChristian stations and tax status (fwd)
> From: rrb@deja-vu.aiss.uiuc.edu (Bill P)
>

RANT MODE ON:

1) I feel that while I happen not to be christian, I support the RIGHT of others to propagate their beliefs in a non-violent manner. ie broadcasting is OK, but crusades are not. Inserts in the newspapers are OK, but public handouts are sort of borderline and the Hare Krishnas at the airport get mildly annoying. ;)

2) I feel that bona-fide religions should be exempt from taxes. I have seen firsthand the US Government attack small religions via the IRS, confiscating their property and money and destroying the lives of innocent people. A case comes to mind where an Amish farmer had his farm and possesions confiscated. The IRS later admitted having made a mistake. They gave him back the $2000 the sale of his assets netted, although it was far too little to allow him to buy back his property.

3) I feel that DONATIONS individuals make to churches should not be tax exempt. So if I choose to give $10,000 to my church, from my income, that's OK, but I still should have to pay tax on that income.

4) I think micro radio is great. I think we would benefit from a regulated, low power, class of FM. (AM antennas, being for the lower bands, are large and unwieldy) I would be glad to take this up as a seperate thread.

5) I happen to like PBS/NPR but I resent the money coming from my tax dollars. I find that ($$ given to worthy cause) = ($$ in taxes collected) * .02 where ($$ paid to politicians) = ($$ in taxes) * .98 I pay to support PBS because I like PBS, but I resent strongly the govt. collecting taxes from me to pay for it, which they squander on administration. I think we all need to stop feeding at the federal trough.

5733. Re: Roland DM-80 -- the GREATEST digital editor EVER!

Newsgroup: rec.radio.broadcasting
Date: 1994-12-17 04:26:55 UTC
From: caldwe33@futures.wharton.upenn.edu
Message-ID: <3ctpaf$gmt@vixen.cso.uiuc.edu>
Source record: 35988

We own the roland DM-80 system at Y100 in Philadelphia and think it's wonderful as well...

The DM 80 in my opinion is more powerful than the DSE-7000 (which I've used for a while)...the DSE-7000 IS however much easier for jocks to pick up and learn on. More or less a simple digital eight track that has some futher abilities.

Just last week I purchased the SAW (software audio workshop). For those of you who don't know...it's a piece of software that operates similar to pro-tool...and runs on Windows. Its cost: $600! Don't let the price fool you...SAW is a very powerful editing and multitrack tool. So far, if I had one to choose, I would pick SAW (even if the DM-80 cost the same).

For computer friendly people, SAW edits much more visually and is incredibly fast. Buy it with the CARD+ sound card and you can record and play back at the same time. In February the company says they'll be out with their 16 track version. You can download a demo version (actually pretty much the full version withou the ability to save edit lists!) by calling 702-435-7186.

One of the Ganett stations I do voicework for turned me onto the saw system and I didn't take them seriously because of the price. But once I checked it out I was very impressed...and I've used a few of the systems out there quite a bit. Drawbacks: need to pre-plan your fades when setting up your mix (can't do it on the fly with a fader board). So that takes a bit more up-front time...but after you set it up you don't find yourself screaming SH*T :58 seconds through an intricate promo you've tried to mix 14 times.

OK, enough babbling...would love to discuss other workstations with people over the i-net or by phone. If you have any questions about what I've mentioned, e-mail, post, or call me...I enjoy networking with people.

From: JWISHNER@murrow.mpr.org
Message-ID: <3ctpaf$gms@vixen.cso.uiuc.edu>
Source record: 35989

on a recent posting, Mhz (wouldn't Khz be more appropriate) commented on
what he called 'weird am dx happenings'...specifically, his minneapolis station being
received in finland. i work fminneapolis station on 13-30,
and we have gotten a few dx reports and qsl requests from over the pole.
13-30 is a fairly busy frequency in the u.s., but we seem to be in a good
location to send our signals north.

BTW, coming soon, interesting times for AM-DX-ers. the relocation of
several hundred existing stations to the extended AM band (1610-1700 Khz)
will make for interesting listening on that band as new stations sign on
during the next few years...and will clear up some of the clutter on the
existing AM band for better DX-ing.

most AM radios sold nowadays cover up to 1700 Khz. Manafacturers began
adding it four or five years ago. if you see a radio for sale that
stops at 1600, BEWARE! its no spring chicken.

Message-ID: <3ctpan$gn6@vixen.cso.uiuc.edu>
Source record: 35992

I have a brief question regarding AM bandwidth. I recently purchased a GE SuperRadio III, and was astonished to discover how good a strong AM station can sound in the "wide" bandwidth position. While the radio sounds better than most even in the "normal" position, I recall clearly that when I was a child in the '60s AM sounded better yet. My question is this: has the "normal" bandwidth that AM receivers use remained constant over the years, or has it narrowed somewhat?

Thanks--

Rob Spencer

Source record: 35994

Dom Imus is now on his way to the MidWest. He is getting married this Saturday to Ms Deidre Coleman somewhere in the area of Utah. He will be visiting his brother Fred in Santa Fe and then back at work on 1/3/95. That show will be simulcast on C-span and they will also have a camera shot of Fred Imus. In addition, many people are supposedly calling in that day, including President Bill Clinton, Senator Robert Dole and possible Representative Newt Gingrich, among others.

His typical show starts at 5:30am EST and runs until 10am. His studio is in New York City, at the Kaufman-Astoria Studios in Queens.

I met the I-Man at one of his book-signings - he was most friendly and signing books by the thousands. We had a brief chat about Dan Rather of WCBS-TV (who I met some weeks earlier). I waited almost 3 hours for my chance to meet him.

His last book signing on the East Coast was in Madison Connecticut and he said the line was 6 wide and a mile long, with some people waiting as much as 9 hours.

Regards,

Joe

Dear Colleagues,

This is serious business. I'm an experienced broadcaster looking for
work. People like Larry King, Pat Buchanan, and a crowd of WABC talk
hosts have taught me "the business," "the ropes," "The Dark Side of The
Force " if you want. Yes. Since then I've been working as a talk host
in North Florida, and am now ready to expand my career.

If you have heard of any job movement within your station, please keep me
in mind. I'm on the net most of the time, we can TALK/IRC or I can
email/fax/snail you my resume/tape--the usual...

Thanks for your time, I'll keep the bandwidth short,
Christian Brennan

It's nice to see everyone says it's official that KISS is staying in the direction it is now in...

All we did was take off the produyct which dupolicates airplay on HOT 97.. the rap and hip hop, so we dont compete with ourselves.

The NEW format at 98.7 will debut tomorrow, Friday, at 6 PM December 16...

It is NOT an adult AC but something different..

One thing.. the NEW format features music that is not on the air in New York Right now...

Its amazing the way some peopple hear some slower music and think that the format is changed....

5744. Distant full power TV station blasts local LPTV

Newsgroup: rec.radio.broadcasting
Date: 1994-12-17 04:27:22 UTC
From: ao944@yfn.ysu.edu
Message-ID: <3ctpba$go7@vixen.cso.uiuc.edu>
Source record: 35999

[Moderatir's Note: Please direct all replies to the poster since we
are not specifically a TV group. Thanks Bill]

I live about 4 or 5 miles from a new Low-Power TV station on VHF channel
11. They actually have some programming I would like to watch. But, there
is a problem.

I live about ten miles from the eastern (Michigan) side of lake Michigan.
On the other side of the lake, in Green Bay, Wisconsin, there is a full
power station on channel 11 (WLUK-TV). It is I would guess about 150 miles
away at least, but most days it still throws a pretty powerful signal
acroos the lake.

Unfortunately, it is my misfortune that from where I sit, the LPTV channel
11 and the Green Bay station are at almost precisely the same direction from
my home!

My question is this: It seems as though the station in Green Bay is throwing
a pretty powerful signal out in the direction of the lake. I can't imagine
that they consider any part of Michigan to be part of their primary
viewing area (except maybe a small slice of the Upper Peninsula), so why
on earth do they need to be sending such a strong signal in this direction?

More to the point: Is it POSSIBLE to make a transmitted TV signal weaker
in one specific direction, or is the pattern always roughly a circle?
(I know you can "pattern" an AM transmitter's signal, but am not sure about
TV). And if it IS possible, is there any chance that there is some way that
the Green Bay station could be convinced not to send such a powerful signal
in this direction? Again, keep in mind that anything sent in this
direction from Green Bay is hitting virtually nothing but open water until
it gets here, so you'd think they'd want to keep that power directed toward
the land areas where they might have viewers.

The interference is REALLY bad and it occurs probably 85% of the time.
When the conditions are not "right" for cross-lake signals, I get the local
station fairly clear (not perfect but reasonably viewable). But most of
the time the Green Bay station causes the picture to roll and break up,
and their audio comes in over the local station's audio. I just can't
understand why they need to be putting such a "hot" signal in this
direction!

Any comments or suggestions welcome!

Jack

5746. Question:Merchants pay?

Newsgroup: rec.radio.broadcasting
Date: 1994-12-17 04:27:24 UTC
From: naked@cyberspace.com
Message-ID: <3ctpbc$goe@vixen.cso.uiuc.edu>
Source record: 35851

As a musician/composer I'm in the unusual position of arguing for what would theoreticlly be more money for performances of my work. (The fact that it really isn't and how it realtes to broadcasting is food for another thread.)
The problem with the major performing rights organizations is that they have aquired so much power over merchants, restratuers, presenters and radio stations that can demand and recieve money and be unaccountable for the money they receive. If I'm a merchant and the nice man from ASCAP or BMI comes to see what station I'm playing in my store, notes that I'm playing KBLOTZ and says "you owe the fine composers on this station x dollars" As a merchant I say "Even if I agree that I owe these fine composers compensation for the performances coming from KBLOTZ, which has already paid a handsome sum for 'blanket licensing' before I pay I'd like to see a list of affiliates and their songs so I can be sure their actually being played in my store."
Guess what? The nice man from ASCAP says "I don't have to show you anything - pay now or we'll see you in court. Here's a long list of case citings that show that we've won 98% of the cases that end up in court. Pay us or pay your attorney."
The merchants pay because they don't want the hassle of going to court and pay the same rate if 1 affiliate is played or 1000.
As mister small time composer who gets on the air maybe five times a day nationwide, I'm not very likely to see any royalties. At the same time the performance rights collection policies have created an environment that makes arts festival presenters, clubs and any place that might be on the verge of presenting live music as a part of their business reluctant to participate. This makes the business of writing and performing music, much more difficult on the local level.
This tie in with broadcasting because I've heard of clubs being charged outrageus rates for having a radio in the kitchen. The composers should be paid for every performance (which they theoretically are) *not* for every listener, which is what BMI is essentially demanding.

[Moderator's Note: This is a repost of a great, thoughtful season-related article by one of our regular posters... Hope you like it. Bill]

There's a little anatomically-correct language included in this one. As you'll be able to see, it can't really be avoided. I hope the basic point will be more important than whatever feathers of propriety will be ruffled.

Back in 1965, Robert and Thomas Dunker of Gauntlet Press in Hermosa Beach, CA, (no connection to the modern-day GAUNTLET Magazine, BTW) began publishing an annual magazine called HORSESHIT ("The Offensive Review"). Inserted on page 11 of the first issue, amongst some primitively sexual humour, angry political satire and cartoons so surreal and biting that one suspects even the Berkeley Barb and the East Village Other would have rejected them, was the anonymous piece below:

SOME PEOPLE WHO MAKE VERY LITTLE NOISE.

*The pretty girl with deformed feet who sits at home with her aging parents and gets quietly drunk at night. Then waits until they have fallen asleep and cries and cries.
*The thirty-five year old fat woman whose husband won't take her anyplace and who pours out all her heart's love on her little dog, the only one in the world who loves her.
*The middle-aged man who looks up from his work and sees a pretty blonde teenager sitting close to her boyfriend in a car and remembers that he was always afraid of girls when he was young.
*The young married man whose wife is holding some unnamed grudge and won't sleep with him.
*The kid who was a star halfback on his small high school team and who was injured in his first college scrimmage but contines to play because he is afraid to tell the coach.
*The plain 31-year-old sales clerk who has a pair of newlyweds come into the store and keep looking at each other, while she waits with hungry hopeless eyes.

Of course, this describes a good part of the radio audience; those with such paralysing fears and sorrows about the world around them that they seem only able to relate to reality, or whatever little section of it they can, through US. I'm also certain that this describes a helluva lot of US, too; I'm willing to bet that at least a third of us are actually in this business because it allows us to make contact with millions of people at one time without having to look any of them straight in the eye.
I bring this up today because this is the time of year, the one month out of the twelve, where we pay lip service to the socially disadvantaged. We conduct God-only-knows-how-many local Toys for Tots campaigns, food drives

and bell ringings for the Salvation Army at every business center imaginable. We seem to play more songs about positive family relationships, reconciliation and peace on Earth between Thanksgiving and New Years Day than any other stretch of the calendar. We claim to shed a tear or two over the umpteenth local TV run this year of IT'S A WONDERFUL LIFE and A CHRISTMAS CAROL.
Question here is---why does it seem that on January 2 we begin thinking of these folks described above only when "Eleanor Rigby" pops up in the oldies rotation, if even then?

Surely it can't be because we can't effectively build a promotion like this around some other time of year---can it?

From: dancutrer@aol.com
Message-ID: <3ctpbk$gor@vixen.cso.uiuc.edu>
Source record: 35854

Clear Channel is probably the easiest and best; almost all their stations are news/talk. Of course, whether or not you're on an AM or FM, how much of your programming will be net/local, news/talk, and the market you're in are all much greater factors. You might also contact a radio station broker in the area where the station is projected for help; they'll want you as a potential client if the station doesn't work.
I can't emphasize enough: the best way to make a small fortune in broadcasting is to start with a large one.
Unless you're experienced in every area... from engineering to news to sales... talk very seriously to someone who's been in ownership before you leap.
Hey, it's not all bad. I tell folks I'm a recovering broadcaster. "When help and prayers, I can overcome my need to broadcast ever again..."
Keep me posted.

In article <3ckt5a$gc7@vixen.cso.uiuc.edu> detrolio@pegasus.rutgers.edu (David De Trolio) writes:

>There is no doubt the talk powerhouse in the NYC area is WABC, and the hosts
>and the program director have taken chances and stuck to their ideals and
>made for EXCELLENT talk radio. You cannot agree with everything that Bob
>or Jay or Lynn (especially Lynn!) says, but you cannot discount the
>influence and the following the station has.

In George Orwell's 1984, there is a scene where the characters take part in what is called (if I remember correctly) a "five-minute hate," during which the characters shout out their denunciations of Big Brother's enemies. WABC and its black counterpart, WLIB, always remind of that scene. The "enemies" on WLIB are whites, especially Jews, and on WABC -- particularly during the Bob Grant and Jay Diamond programs -- the "enemies" are the blacks, the immigrants, and the gays.

Too bad Joe Goebbels is dead. Program Director John Mainelli would've probably hired him. And given the political climate, he'd probably get great ratings.

Some rumblings and changes from Western New York state;

WHAM (1180) in Rochester has shaken up its late morning/
early afternoon schedule again. Steve Ruben, the Toronto lawyer
and former CFRB (Toronto) late evening host, has left the station,
and newspaper columnist Bob Lonsberry will take over the slot 5
days a week.
It's being portrayed as a voluntary decision on Ruben's part...
he's quoted as saying he was tired of commuting from Toronto,
which remained his home. But it is also well known that many
listeners were negative in their reaction to Ruben, partly because
he was a Canadian and made no move to become a resident of
the Rochester area. Sources within the station also have said that
management was somewhat disappointed with Ruben's on-air
performance...they expected to have fewer fireworks than former
host Jack Kinnicutt generated, but still hoped to have SOME en-
ergy in the daypart, and didn't get enough for their liking. (The
same perception is said to have caused CFRB's Gary Slaight to
bid Ruben farewell.) Ruben says he'll return to Toronto and his law
practice full time, though he won't rule out a return to radio at some
point in the future.
Lonsberry is not a very experienced radio performer, but is well
known locally and has filled in on a once-a-week basis on the
WHAM schedule. He was a contender to replace Kinnicutt but
was passed over in the summer because of his inexperience and
because he was told he was not conservative enough. (Lonsberry
is an outspoken opponent of gun control and a VERY intense
conservative, which will give you an idea of the orientation of the
station's management.) Now, WHAM is giving him a shot to prove
what he can do. There are reports that because he's a fulltime col-
umnist with the daily Gannett papers, and also does some commen-
tary work on the NBC-TV affiliate in Rochester, he'll be doing the
show essentially as a part-timer, for part-time pay. WHAM's only
full time air staffers are the morning show co-hosts, and the news-
room staffers, some of whom double as program talent in other
dayparts.
Truth in posting, requires me to say I've been doing a competing
program on WXXI-AM 1370 in Rochester since March 16, 1988.
I might close with the observation that in the almost 7 years I've been
doing late morning talk on WXXI-AM, WHAM has gone through a
full half-dozen hosts...the longest-lasting of which endured only 18
months. It's going to be interesting to see what happens next...

Meanwhile over in Buffalo, rumors continue to swirl around WGR
and its fate, but all concerned deny that the station is for sale, or

that major changes in the lineup are imminent. Poor performance in middays may force replacement of Rich Michaels early in the new year unless he can deliver better than a 5 share (his opposite number on WBEN is almost doubling that). He may already be hedging his bets by recording daily commentaries for air in his old market, Lansing, MI, where he was a popular morning personality in a full service format. And his old friend Chuck Finney, who brought him to Buffalo while serving as WGR's PD, is now a consultant and reportedly looking for the right place for his pal to land next. So he may well jump without having to be pushed.

But Tom Bauerle in AM drive has been a steady, solid performer, and Chuck Dickerson in afternoons and Art Wander at nights seem to be attracting both listeners and a decent amount of spot business. Bauerle is a friendly presence in morning drive, and Dickerson and Wander give their dayparts a lot of energy and attract a good number of young to middle aged male listeners, the kind talk stations want.

WGR overall is only a couple of share points behind WBEN-AM in the battle for news/talk dominance according to the summer book, and closer than that when it comes to 25-54 listeners. It's also a valuable promotional vehicle for the co-owned Buffalo Bisons AAA baseball team. Hard to imagine Robert Rich (whose family has a billion dollar fortune, and who could afford to carry the stations as a tax loss if he chose) bailing out when some fine tuning will probably set WGR on the right track. The Rich family has a history of staying with a business and product, and adjusting it, until it realizes its potential. They are not known for abandoning anything precipitously.

So while anything can happen in this business, the smart money is looking for them to adjust, rather than sell to a religious broadcaster as the rumor mill has it. If a sale does eventually take place the station will obviously be worth more, maybe 200% to 300% more, as a solid and profitable news/talker going to a major group broadcaster, than it would be to a religious group which would have to blow out all existing programming, eat the cost of broadcast rights for baseball and NHL hockey, and then have nothing but stick value at the start. (WGR doesn't even own its Hamburg transmitter site, shared with WWKB/1520. That real estate was owned by Capital Cities/ABC at least through 1986, and may or may not have been transferred to 'KB's subsequent owners, Price and Keymarket.)

Bob Smith, middays WXXI/1370 Rochester NY

5758. WOWO - The Latest

Newsgroup: rec.radio.broadcasting
Date: 1994-12-17 04:27:52 UTC
From: fybush@world.std.com
Message-ID: <3ctpc8$gqi@vixen.cso.uiuc.edu>
Source record: 35863

Here's the latest info as garnered from the FCC's AM Branch on
Wednesday, 12/14:

WOWO's application to cut back its power to 9.8 kw at night, and
pare back its directional pattern, has been assigned docket
number BP941118AB. It was submitted as a "minor change," meaning
no formal objections can be filed against it for now. The
Commission will keep its files open for informal objections
indefinitely. The FCC is not interested in hearing about WOWO's
programming this time around -- only about technical aspects.
In other words -- if you now listen to WOWO on skywave at night
and believe you will lose this signal if the modification is
granted, that's what you need to tell the Commission. The
Commission is also considering upgrading this to a major change
if they feel it's warranted. That would open the doors for
a formal petition to deny to be filed at some point in the
future. If you're familiar enough with the FCC's rules to know
what's major and what's minor and you believe the WOWO application
is truly major, this is the time to let the Commission know.

WLIB's application to add night service on 1190 khz with 30kw
has been assigned docket number BP941118AA. This *is* a major
change, and that means there's a window for filing formal
complaints against it (I am trying to determine when that
window closes, but there's certainly no time to waste).

These two applications would in tandem reshape the face of 1190 khz
in the east. At night now, everywhere east of about 85 degrees
west longitude gets a fairly clean signal from WOWO on 1190.
If the FCC approves both applications, the state of Indiana
and some adjacent areas of Ohio and Michigan would still have
night service from WOWO. WLIB's signal would provide night
service across southern New York state, parts of New Jersey,
and much of New England. But because WLIB would still have
to protect KEX out west and KGBS to the southwest, these
moves would create large areas in the Great Lakes and across
the south where the WOWO signal would be lost, but nothing
substantial would be gained. Perhaps some of the other 1190
daytimers such as WANN Annapolis MD, WGKA Atlanta, and others
might be granted some night power. In any case, a frequency
that's now a good strong clear channel at night would become
yet another regional channel.

The shame of it all is that there *are* other, far less
destructive ways for WLIB to get night power. There's still

a pending application for WLIB to add night service on 1200
kHz, city of license Yonkers NY. It's possible that with
some creative engineering (and given that Inner City now
owns WLIB *and* WOWO, that means creative engineering on
both parts), it might be possible to carve out a narrow
directional pattern for WLIB on 1190 that would give WLIB
a strong night signal from its transmitter in the NJ Meadowlands
out across to the target audiences in Manhattan and the Bronx.
And given that New York City already has more than a dozen
full-time AM licenses, Inner City has the opportunity to
buy one of those. (WKDM on 1380, with a good 5kw signal
from NJ across to NYC, recently had its proposed sale from
United Broadcasting to Arthur Liu denied).

In any case, whatever your stand on the WLIB matter and on
the clears in general, now that the relevant applications
have been filed and we see what ICBC really wants to do,
this is the time to act.

The relevant docket numbers again are:

WOWO: BP941118AB
WLIB: BP941118AA

Federal Communications Commission
Mass Media Bureau, AM Branch
1919 M Street NW
Washington DC 20554
202-418-2600

And if you'd like more information on saving the clears in general,
you can contact:

Since it became WTMI, per below.

> Actually the
> station has been playing classical music even longer than that. 93.1 was
> classical as far back as 1966 when it was WKAT-FM.

But not full-time, if I remember correctly. And their signal was hard
(no, impossible) to pick up in N. Miami Beach, where I lived at the
time (near Corky's). Anyway, WVCG (105.1 mHz), with a better signal, was
full-time classical 'til '67, when it was sold and the format changed.
Then it was WYOR for many years. I don't remember what it is now -- call or
format. I suspect it's Spanish. (Believe me, I tied to get KAT-FM, many
times, in the years after the demise of WVCG's classical music!)

In 1970, the purchase of WKAT-FM by SJR Communications was announced.
A college student, I was writing a radio column for two local weeklies at
the time. I guess they increased power by then, because I've been listening
ever since. They've increased power several times over the years. Though
I don't know where their transmitter is, I estimate that I'm now at
least teice as far away, because the station IS licensed to Miami.

In short (no, it's too late for that), even though ownership has changed
since then, it has been called WTMI since '70 or '71, and that's how
they count their history, as 24 years.

WXYC 89.3 FM, 152.2.22.81 Online
PRESS RELEASE
News - for immediate use

WXYC announces 24-hour real-time world-wide Internet simulcast

Now UNC's student radio can be heard world-wide! Already famous within its limited on-air signal range, WXYC now takes advantage of the Internet to send its broadcast world-wide. Listeners in Hong Kong, Johannesburg, Moscow and Guadalajara can now listen to the Chapel Hill station using public domain software that is readily available on the Internet. After weeks of careful testing, WXYC-Chapel Hill, the University of North Carolina at Chapel Hill's student radio station, officially announces commencement of 24-hour real-time Internet rebroadcast of its on-air programming.

The broadcast can be received by any Internet-connected Macintosh, model SE/30 or later, which is running System 7 or better. Internet-connected UNIX machines can also receive. The latest version of the client software for Mac, CU-SeeMe, is available via anonymous FTP from gated.cornell.edu in the /pub/video directory. Vat, the client software for multicast UNIX, is available via anonymous FTP from ftp.ee.lbl.gov.

WXYC's WWW home page <URL=http://sunsite.unc.edu/wxyc/> contains more details about connecting to the broadcast, as well as a deejay/specialty show schedule, other information about the station, net.broadcasting legal information, and links to other interesting sites.

WXYC rebroadcasts via UNC's SunSITE, a cooperative venture between UNC and Sun Microsystems, with additional support from Cisco Systems. UNC's SunSITE is a recognized innovator in Internet multimedia, WWW, and FTP services.

WXYC is a highly-acclaimed noncommercial-educational college station that serves UNC-Chapel Hill and surrounding areas. WXYC's around-the-clock format is eclectic music, with a smattering of specialty shows.

The rebroadcast effort was spearheaded by David McConville of SunSITE and Michael Shoffner of WXYC. The simulcast entered beta-testing phase on Nov. 7, 1994 and is now in full production. Load testing will proceed as additional listeners connect. SunSITE is currently looking for other sites interested in carrying a WXYC reflector.

Contact wxyc@sunsite.unc.edu or id@sunsite.unc.edu for more information.

Tonight talk1370@aol.com (Talk1370) Bob Smith spoke thusly:

} But I wonder something else...if WOWO is pulling in its pattern and
} cutting power further, does this mean KEX can spread out its night
} pattern and stop protecting it? Could KEX, which will be at least 2000

[...]

} either start a night service on the channel or spread out THEIR exis-
} ting pattern? KGBS' nighttime pattern on 1190 is godawful....
} Bob Smith, middays WXXI/1370 Rochester NY
}

Bob just got me thinking... and here is what I am thinking...

What I think is at stake here in the WOWO issue is more than the idea of *one* signal downgrading and the potential effect on co-channels upgrading etc. What is at stake in this matter is much more than a live, public-service-oriented flame thrower being reduced to a regional 'butane-lighter'. What is at stake here is more than who's ox is being gored or who will lose a signal and gain a signal.

What is at stake here is the principles of what it means to be a trustee of the public airwaves and what it means to buy, sell and operate radio properties in America in the late 20th century. There are precedents being set here, precedents that will forever change the face of what broadcasting really means.

Throughout the years, the FCC (under pressure from the NAB and others) has systematically weakened its once hard stance on the notion that broadcasting is a public service, in exchange for which the licensee was permitted to make money via commercial sales. Over the last decade or so, the commission has removed or weakened the safeguards and requirements intended to assure that broadcasting did not become merely (as Mark Roberts once stated) "A cash register connected to an antenna" and to assure that broadcasting did not fall into the hands of only a few.

Between Duopoly (I am still waiting for all that great programming that was supposed to happen when Duopoly was introduced), LMA's, relaxation of ownership quotas, removal on simulcast restrictions, removal of the 3-year rule and most recently... the allowance of totally unmanned radio stations has created a situation where radio is fast becoming just another speculative business devoid of any real community service. The Commission has opened the floodgates for "slum-lord radio" to begin.

At this point, it matters not whether you intend to service a community, in order to buy a radio station. It matters not whether you even are intending to *operate* said radio station. If you got the bucks, you can buy... just like going to the car dealer and picking out your favorite ride. You can drive it off a cliff for all the dealer cares, so long as you pay.

Enter the WOWO situation. Inner City buys this signal, half a continent away, and has no intent to operate it... not even for a day. ICBC buys this signal and for the express purpose of clearing the air for it to place a more profitable signal in New York City. It is intending to do this by reducing the reach of this radio signal, then selling it off to another corporation who will then operate it. There was a time when such a purchase would be a conflict of interest. Since ICBC owns and operates a *secondary* signal on the same frequency, the purchase of the *primary* signal with intent to downgrade it would have been a conflict of interest. Well not any more, fellow Americans...

The net result is that ICBC gets a major night time signal in the nation's largest city, a broadcast property with millions, and their cash outlay will be in the low six figures after selling the crippled WOWO off to the new owner. The area residents who have come to rely on WOWO, especially Western Ohio where a powerful public service voice is hard to find, will be left <so to speak> in the dark.

This is all legal. In fact the wonderful FCC has thrown out some 200 letters of protest to the sale because they did not meet the guidelines on how they were written. In other words, since normal people are not communications lawyers, and cannot (or had no idea that they would have to) hire a communications lawyer to petition their government for redress, have been summarily told to go to HELL by the FCC.

This is what totally frosts my shorts. The FCC bellows about how it is the guardian of the airwaves, it bellows about public service and community standards, yet it creates a climate where broadcast properties are bought and sold like cocaine or donuts or used cars with no concern what-so-ever about the intention of the buyer to serve the community, then it sets up criteria for public comment that allows it to summarily dismiss hundreds of comment letter because the senders did not follow legal-communications format in submitting. Yet the same FCC will take action on a single letter of complaint over alleged indecency on the part of some talk host, without regard to whether the letter is up to FCC format guidelines.

It will also take swift and grandiose action against some twirp who signs a 10 watt signal on the air without a license because he feels (however correctly or incorrectly) that he is serving a community need (even if it is only his friends and neighbors). Oh that little pimple-faced pirate will be found, shut down and fined a kings ransom for his actions, but when hundreds of people protest a major act of piracy, the acquisition and partial dismantlement of a dominant signal

by a secondary signal in order to enrich themselves at the expense of <perhaps> millions who will lose a valued service... then you had better follow the letter of the law and dot your *i's* and cross your *t's* and have a communications lawyer draw up your letter and have it sent registered mail etc etc. Is this what is meant by 'petitioning your government for redress'? Thomas Jefferson would be spinning in his grave.

I tell ya, the actions of the FCC are making the words of Stephen Dunifer sound better every day. I have never had much use for his idea of letting a thousand transmitters bloom... but with the way the FCC has allowed, promoted and fostered the absolute corruption of the broadcasting industry in this great nation you gotta wonder who is the pirate and who is the patriot.

I have nothing against the use of the broadcast spectrum for making money. Just like I have no problem with a landlord making a profit from renting out apartments in a building (s)he owns. That is fine and that is fair use. But I do have a problem with slum-lords who put nothing into a property, ignore the needs and requests of the tenants, then proceed to bleed its tenants for all they re worth, only to sell it in the nick of time to another crook a few notches down the food chain for further bleeding. The worst part is that in the broadcasting business there are only so many 'properties' in a given area. When one of the magnitude of WOWO is allowed to be ripped off and public comment flushed down the proverbial crapper over technicalities, just so a millionaire can become even more of a millionaire, I get a little ticked off.

Problem is, that if the WOWO thing is allowed to go ahead and all the comments from real citizens are thrown in the waste basket, this will set a precedent. This will set the stage for other *secondary* stations buying and crippling *dominant* stations so they can get a night signal in their city. That *IS* the WOWO problem, friends.

Even if you live well out of WOWO's signal area, even if you could not care less about it, even if you see it as a way to get *local* signals serving *Local* people on the air (something I support, BTW) you must look at the fact that once the FCC has allowed this bit of piracy and rape of the general public's right to petition for redress, it is then open season on this sort of thing. You can look forward to other stations scraping the money together to buy a dominant station, cripple it and resell it in a <pardon the pun> New York Minute without ever operating it, without ever serving anyone but themselves.

So while some church-lady with no life is scribbling a note to the FCC about Howard Stern saying *penis* on the air, and getting action taken, even as some well-intentioned, but misguided soul is broadcasting from his basement on a souped-up Ramsey-FM10 kit, hundreds of concerned, affected citizens with a stake in a major decision that will forever effect the face of broadcasting, are getting brushed off without a care.

Is this the FCC you want? Is this the sort of actions that befit the agency that is in charge of regulating the airwaves and supposedly doing so for the public good? This is much bigger than WOWO, this is much bigger that WLIB, this is a potential turning point in what it means to be a broadcaster. A turning point much uglier than it appears on the surface, much more nefarious than Duopoly, LMA, 80-90, and all the other erosions of what was once a very viable and well engineered regulation of the limited spectrum we call radio.

I dont know exactly what to do about it, but I feel it is time to say enuff's enuff! When will we wake up and see that we are being sold out at the FCC level. Even those hard liners who insist that "radio is nothing but a business" have to see what is at stake here. People who have the idea that they have the right to petition the government for redress had better realize that that redress includes hiring a lawyer to draw up your petition.

Stop the WOWO insanity! Your station could be next. I ask that any communications lawyers reading this group (and we know there are several who do) to please contact Scot Fybush or Peter George and help us get the legal stuff settled so that this thing can be challenged at the level that the FCC insists it be done.

Thanks for reading.

Bill

> a few years ago.

He's still in SF on KITS 105.3 doing a morning show.

This is the same Alex Bennett who did morning drive at Top 40 KILT, Houston, in the mid-sixties, under the name, "James Bond." At the height of the Bond craze, he effected an English accent, had an assistant, "Moneypenny," and had jingles that referred to him as ".008."

By late 1966, when the Bond craze started to wane, he moved to nights, and began a talk show, using the name Alex Bennett (real name: Bennett Gordon Schwartzman). Billed as "the man you love to hate," he had a very successful talk show run on KILT before moving on.

> My question is this: has the "normal" bandwidth that AM receivers use
> remained constant over the years, or has it narrowed somewhat?

The audio response of AM "standard" broadcasts are bandwidth restricted to just about 10KHZ on the high end. This was not true years ago when engineers prided themselves on having audio response that was flat out to 15Khz or higher! Frequency response of AM broadcast was not restricted untill the adoption of NRSC-1 and 2 (National Radio Standards Comittee) by the FCC a few years ago. This restricts the audio bandwith. Because the sidebands, or how wide an AM signal is depends on the highest frequency that is broadcast, the higher frequencies will be "wider" on the air. Since higher frequencies are wider, they take up more space on the dial and will interfere more easily with other stations. It is most easy to hear high hats, cymbals, and "S" sounds in speech from an adjacent station because that is the "widest part" of the broadcast in AM modulation. This bandwidth restriction was done to limit interference between stations on the AM band.

One of the other parts of the NRSC for AM radio was that broadcasters added pre-emphasis (alot of treble) to the audio. This is also done on FM broadcasting. When the treble is turned down in the radio (de-emphasised) some of the backround noise, static and other junk go down as well. Unfortuntely, older AM radios do not have the needed de-emphasis and the audio on the AM band can tend to sound harsh.

Hope the explanation helps...Happy Holidays...Joe.

I definitely agree from my listening that AM radios back in the 1960s generally had a wider frequency response than today's radios. And judging from comments from folks a little older than I am, the response must have been even better in back in the 1930s on some radios such as those by H. H. Scott.

Radio manufacturers say that the narrower response is necessary because of the increasingly crowded AM band. For digital tuning radios, another reason may be that there is less chance that a narrow band radio will stop on an adjacent frequency to a strong signal when scanning.

It seems that AM sounds especially bad on some component stereo systems. I once measured the response of what I think is a typical AM radio and found it was down a couple of dB at 3 kHz and essentially gone by 5 kHz.

Rob the AM radio bandwith has narrowed quite a bit. Most radios have only
about 6Khz total IF bandwith. That comes to about 3Khz high end audio. The
GE SuperRadio III has a nice wide IF but it could be wider. The problem as
you have noticed is that at night in the wide mode adjacent channel mixing
causes quite an annoying 10 Khz tone.

I'm SURE I heard of a case where the Gap lost for playing radio
stations in their stores. The article I read (maybe I can find it when I
get to work, it MAY have been in Perry's Broadcasting & The Law) told of
some exemption for a consumer receiver driving no more than four speakers
that were not "built in" and the total floor area was something line 400
square feet or less. That allowed for the radio in the kitchen, the
radio in the barber shop, etc. I did a quick look thru the US Supreme
Court decisions at ftp.cwru.edu, but didn't see it there. The case MAY
have been from before they were archiving the decisions. I'll see if I
can remember to look up what I have when I get to work. Meanhwile,
ANYONE have details on this case?
Regarding live music performances... I'm on the staff of the
California Traditional Music Society's Summer Solstice Music and Dance
Festival. The contract with musicians states that all music performed is
to either be in the public domain or written by the performer. Anyone
wanting to do public performances of music without paying some licensing
organization could do similarly.

This brings up the question of whether ASCAP/BMI should be regulated by the F.C.C. and Congress. Essentially they are attempting to collect fees from licensed public broadcast USERS (listeners) and that area of the law is regulated by federal statute.

HERE IS A REMINDER OF THE FINE CHRISTMAS PROGRAMMING SCHEDULED FOR THIS COMING WEEK. WE TRUST YOU WILL ENJOY THESE SPECIAL TRANSMISSIONS --HCJB

Festival of Christmas Programming
HCJB--The Voice of the Andes

The English Language Service of HCJB, the Voice of the Andes is proud to present a "Festival of Christmas Programs" for the Christmas holiday and the end of the year. Join us for these fine special programs. Frequencies are provided at the end of this listing. Best wishes to you and yours for a blessed Christmas.

Monday, December 19 through Friday, December 23--"Morning in The Mountains", plenty of good Christmas music, plus "The Best of Christmas", a series on the background and celebration of Christmas music, produced in New Zealand. Host is Allen Graham with newsman Len Kinzel.
12:00 and 16:00 UTC (7 and 11 A. M. EST) to the Americas

Monday, December 19--"Christmas Connection", reflections on the meaning of Christmas by people from all walks of life around the world. Host is Steve Allen.
8:00 UTC to Europe
10:30 UTC to South Pacific and Asia
17:30 UTC to Europe and the Andean Region
1:30 & 5:30 UTC (Tues) (8:30 P.M. and 12:30 A. M. EST) to Americas

Tuesday, December 20--"The Good Shepherd", the story of Eliezer, one of the original shepherds who witnessed the miracle of Christ's birth, and his grandson, Reuben. This drama handles the age old question of how could a loving God allow cruelty and suffering. Hosted by Doug Oldham.
7:30 UTC to Europe
10:00 UTC to South Pacific and Asia
17:00 UTC to Europe and the Andean Region
1:00 and 5:00 UTC (Wed) (8 P. M. and 12 A.M. EST) to Americas

Wednesday, December 21--"The HCJB Story", the story of the birth of HCJB on Christmas Day, 1931. Interviews with HCJB founder Clarence Jones. Hosted by John Beck.
8:00 UTC to Europe
10:30 UTC to South Pacific and Asia

17:30 UTC to Europe and the Andean Region
1:30 and 5:30 UTC (Thurs) (8:30 P.M. and 12 A. M. EST) to Americas

Thursday, December 22--"Christmas Around the World", A lively look at Christmas customs in many different countries, plus good seasonal music.
8:00 UTC to Europe
10:30 UTC to South Pacific and Asia
17:30 UTC to Europe and the Andean Region
1:30 and 5:30 UTC (Fri) (8:30 P.M. and 12 A. M. EST) to Americas

Friday, December 23--"Studio 9 Christmas Special", Curt Cole and Ralph Kurtenbach serve as your radio guides for an hour of Christmas...Ecuadorian style. Head with us to the Christmas markets of Quito and enjoy Christmas music with a Latin flair.

7:30 UTC to Europe
10:00 UTC to South Pacific and Asia
17:00 UTC to Europe and the Andean Region
1:00 and 5:00 UTC (Sat) (8:00 P.M. and 12 A. M. EST) to Americas

Saturday, December 24--a youthful look at Christmas on Solstice. Teenagers talk about Christmas and play their kind of Christmas music on this program from Australia.
9:00 UTC to South Pacific and Asia
18:00 UTC to Europe and the Andean Region
2:30 & 6:00 (Sunday) UTC (9:30 PM & 1 AM EST) to the Americas

Saturday, December 24--Charles Dicken's "A Christmas Carol", Orson Welles narrates, and Lionel Barrymore stars as Ebenezer Scrooge in this version of the Christmas classic first broadcast in 1939.
7:30 UTC to Europe
10:00 UTC to South Pacific and Asia
17:00 UTC to Europe and the Andean Region
1:00 and 5:00 UTC (Sun) (8:00 P.M. and 12 A. M. EST) to Americas

Sunday, December 25--"The Messiah" by G. F. Handel. HCJB's traditional Christmas morning broadcast of this immortal classic glorifying in majestic music the birth and life of Jesus Christ.
12:00 UTC (7 A. M. EST) to Americas

Sunday, December 25--"Christmas Comes to Pleasant Hill", Set at the turn of the century, this drama traces the consternation of a quaint town when its most unlovable citizen is forced to take in a young girl orphaned by the death of her father.

7:30 UTC to Europe
10:00 UTC to South Pacific and Asia
17:00 UTC to Europe and the Andean Region
1:00 and 5:00 UTC (Mon) (8:00 P.M. and 12 A. M. EST) to Americas

Sunday, December 25--"The Other Sheep", a Christmas musical Cantata first aired on HCJB on December 23, 1956 on "The Back Home Hour", a forerunner to today's program "HCJB Today".
2:30 UTC (9:30 EST) to Americas
7:00 UTC to Europe
8:30 UTC to the South Pacific and Asia

Tuesday, December 27--"El Mundo Futuro", our weekly science program takes a break from the scientific and celebrates listeners who have written from around the world. Allen Graham hosts.
8:00 UTC to Europe
10:30 UTC to South Pacific and Asia
17:30 UTC to Europe and the Andean Region
1:30 and 5:30 (Wednesday) UTC (8:30 P. M. and 12:30 A. M. EST) to the Americas

Friday, December 30--"Studio 9 Year End Review", a fast paced look at the people and events making news in Latin America during 1994. Curt Cole is host.
7:30 UTC to Europe
10:00 UTC to South Pacific and Asia
17:00 UTC to Europe and the Andean Region
1:00 and 5:00 UTC (Sat) (8:00 P.M. and 12 A. M. EST) to Americas

Saturday, December 31--"DX Party Line Special", a wonderful 35 minutes looking at the delightful interval signals used by the major international Christian shortwave radio stations. What are those songs, where did they come from? Hosts are Rich and Lisa McVicar.
7:30 UTC to Europe
10:00 UTC to South Pacific and Asia
17:00 UTC to Europe and the Andean Region
1:00 and 5:00 UTC (Sat) (8:00 P.M. and 12 A. M. EST) to Americas

Be on the look out for Christmas music and special features on many of HCJB's other programs including the drama Unshackled, and the musical programs Afterglow, Afterglow Classics, Sounds of Joy, Joy International, On Track, and many others. Check your HCJB schedule for regular days and times.

HCJB - THE VOICE OF THE ANDES - QUITO, ECUADOR

HCJB is a major international Christian shortwave radio
station
broadcasting from Quito, Ecuador in South America. Thanks for
listening to The Voice of the Andes.

ENGLISH FREQUENCY SCHEDULE : Updated 25 October 1994 with
changes
effective 1 November 1994 at 1800
UTC

AMERICAS:

0030-0430 UTC on 9745 and 12005 kHz
0430-0500 UTC on 12005 kHz

Irelands Latest News on RTE's Satellites

Radio Telefis Eireann (RTE), Ireland's national broadcasting organisation, provides a number of services by telephone and satellite for the benefit of Irish People, and those with the spirit of Ireland in their heart, but living outside the country.

The entire Radio 1 channel is broadcast live to Europe on the Astra 1b satellite. It is on an audio frequency of the VH-1 television channel (Channel 22) at 7.56 MHz. (When Radio 1 is off air, RET's popular music channel 2FM is broadcast from 00.50 to 06.30)

In North America RTE provides three-and-a-half hours of programming daily to the World Radio Network's 24 hour service on the Galaxy 5 satellite on the WTBS television channel (Channel 6).

"Satellite transmission cannot yet be picked up on mobile equipment such as transistors or car radios", says Wesley Boyd, RTE's Director of Broadcasting Developments. "A satellite dish is required by the services are being offered free of charge to cable networks and local radio stations'.

In addition to the sattellite services RTE also provides concise News & Sports telephone bulletins which are updated several times a day from Dublin. The numbers are:

USA 1-900-420-2411 for News &
1-900-420-2412 for Sports

Britain 0839-111-301 for News &
0839-111-302 for Sports.

RTE in North America

Some RTE Radio programmes are now available by satellite in the United States and Canada. The programmes are carried as part of a 24-hour English language news service of he World Radio Network (WRN). They are available on an audio channel of the WTBS Television service on the Galaxy 5 satellite at an audio frequency of 6.8 MHz. (This satellite also gives coverage to some parts of Central & South America.) On the WRN service the following RTE Programmes are carried live each day:

0700-0800 (EDT) News
1700-1900 (EDT) Both Sides Now and Late Date (music and chat with News & Sports at 1800)
1930-2000 (EDT) News (deferred from 1330)

In addtion the 1300 (EDT) news bulletins are carried live on Saturday & Sunday. There are variations in live programme content at weekends e.g.

Ceili House & Failte Isteach replace Both Sides Now on Saturday.

Homes equipped with satellite dishes should be able to receive the WRN Service.

Please advise your local radio station that all the RTE programmes mentioned above can be relayed free of charge on application to Broadcasting Developments, RTE, Dublin 4. The entire WRN service is available free of charge to cable networks on application to World Radio Network, 408 The Strand, London WC2R ONE. Telephone (44) 71 304 4343. Fax (44) 71 304 43473

5779. The NEW 98.7 KISS WRKS New York

Newsgroup: rec.radio.broadcasting
Date: 1994-12-18 06:51:26 UTC
From: mikeradio@aol.com
Message-ID: <3d0m5e$441@vixen.cso.uiuc.edu>
Source record: 35884

At 6 PM this evening 98.7 KISS FM WRKS in New York changed format. Keeping with the station's strong heritage as a leader in the urban community, the station is going from now until January 1st with a Christmas present to listeners:

THE 12 DAYS OF KISSMAS... NOTHING BUT CLASSIC SOUL

The station is playing classic soul from the Spinner, Marvin Gaye and many many other groups that have played a HUGE part in New York radio, yet is absent from the airwaves.

On January 1st the new permanent format for KISS will debut:

THE NEW 98.7 KISS FM... Smooth R&B and Classic Soul

Joining the music mix will be the smooth urban music also absent from New York radio.

The station will be targeting the upper end sophisticated female.

The stations that will be hurt mostly will be WBLS (although they have veered away from a "smooth" urban sound, due to the long heritage they have, theyu are still perceived to be playing this music) and WCBS FM (oldies- #1 in NY)

Vinny Brown, the old KISS PD remains in place. Steve Smith and myself are overseeing the programming changes and making sure everything is going smooth.

The station does sound amazing. If you are in the listening area, I would love to hear a your unbiased opinions.

Thanks

Mike/QHT/KISS

Howard Stern is a hero even in the movies!
I just returned from the movies where I saw
"Disclosure". In this movie, Howard Stern's
name was mentioned twice. It turns out in the
movie that our hero may have been the reason
that the character played by Michael Douglas
won a legal mediation pertaining to a case
where he was sexually harassed by his female
boss.

One of the lawyers said that they [the company]
was probably afraid of hearing about the case
on The Howard Stern show.

Howard's mention grabbed some loud applause at the movie showing.

I am a very Old Talk Host, Just changed to a new station. It Tee's me off when I listen to these National Shows and hear calls from everywhere. All I get is a little old lady from Lake Oswego, Or.
Now here is my Champion Idea. My station has a 800 number. See I have this vision of me the local hero with all these talk hosts calling me from all over the U.S. The PD saying "God this Dimmitt is good!" Man look at all the contacts he has. My Show airs weekdays between 2PM and 3:30. My Crack Producer is named Bill, call him at 1-800-636-1011 during the Show and we can talk Tell Portland about yourself your show, why it is the best in your City. My Listeners will be impressed. They believe anything! And I'll look like a Super guy with all these talk host friends! Then I could call your show and tell your listeners what a great guy you are and how much your loved here in Portland.
Perhaps Maybe just a show one day on Talk Radio with a number of Talk Hosts calling. Am not sure but there has to be a way to use these 800 numbers, Any ideas?

Message-ID: <3d0m5u$44r@vixen.cso.uiuc.edu>
Source record: 35890

Hello All!!!

Has anyone heard WBLI 106.1 lately? They recently upgraded to 50,000 watts. They can be heard from Manhattan to Montauk and up to Hartford, Ct. Their mornig show with hosts Steve Harper & Ken Rhodes has been sounding really good. They have also been getting a whole bunch of celebrity interviews. They have had on Mariah Carey, Jon Secada, Amy Grant, Al Roker, Katie Segal, Stone Phillips, Jane Pauly, Henry Winkler, Julio Iglesias, Susan Powter, plus tons more. And they are promoting at least 2 celebrties per week for upcoming morning shows. They also do tons of helpful tips segments which fit their demo of 25-44 females perfectly.
I have spoken to Steve & Kens Producer Bill Fisher. He seems very nice. He explained to me how hard he works to get the interviews. He must be doing one hell of a job. You can call him if you want at WBLI between 9a-5p M-F at (718)895-9310, or you can reach him via E-Mail at WBLI1061FM@AOL.com. BLI had been dropping in ratings lately. But they have started to climb back up again and now they have a new P.D., Stefan Rybak. This past book, the y were #1 25-44 females, and #2 12+. Their morning show was #2 in the market.
All NY Radio is weird. Everyone is trying new stuff. You really never know what you'll hear next. Happy Holidays to all!!!

In article <3ctpc8$gqi@vixen.cso.uiuc.edu>, fybush@world.std.com (Scott D Fybush) writes:

(re WOWO changes)

The changes at WOWO will admittedly not affect Western NY listeners, for whom WHAM on adjoining 1180 blocks it out at night at least until you're well past Buffalo on the west and Syracuse on the east (and a lower power 1200 kHz outlet in Syracuse clobbers it in Onondaga County as well). And the fact that all the 1190 signals will be screened away from this area will probably marginally help WHAM and the Syracuse local from now on.
But I wonder something else...if WOWO is pulling in its pattern and cutting power further, does this mean KEX can spread out its night pattern and stop protecting it? Could KEX, which will be at least 2000 miles from any of these stations and now the only fulltime Class 1 station on the channel, now go non-directional or close to it, and be heard in the east for the first time in probably a half-century? Or, will someone else in a Midwestern market, or perhaps KGBS in Dallas, either start a night service on the channel or spread out THEIR exis-ting pattern? KGBS' nighttime pattern on 1190 is godawful....
Bob Smith, middays WXXI/1370 Rochester NY

5787. WOWO is *bigger* than WOWO

I'd like to offer a different view about the WOWO situation and at the same time express a different philosophy about regulation of radio in the 90s. Moderator William Pfeiffer wrote:

>Throughout the years, the FCC [...] has systematically weakened
>its once hard stance on the notion that broadcasting is a
>public service, in exchange for which the licensee was
>permitted to make money via commercial sales. Over the last

I've never owned a station, but the owner's perspective might be this: Most radio stations in recent years have not made money via commercial sales; they have lost money. Many radio stations compete against dozens of other signals in the same market. Features we have relied upon radio to provide, such as weather, news, and music, are now available from the Weather Channel, CNN, the Nashville Network, and MTV. Stations are forced to appeal to increasingly narrowly-defined audiences and sometimes must be content with a 3% share of the listening audience. An advertiser who wants to reach a majority of the persons in a market via radio might have to buy spots on very many stations.

Much of the supposed public interest regulation of radio broadcasting hasn't necessarily given the public what it wants. The FCC has required public affairs programs which broadcasters know most people don't want to listen to, and that's why they tend to be heard at 5:30 a.m. Sunday. Stations have been encouraged to devote a certain percentage of their programming to news, but many listeners aren't interested in what is going on in the world (and is it the government's role to force-feed them?). Anyway, there's a news/talk station in most markets, plus CNN and newspapers, and they exist because of market demands, not government regulations. One of the supposed public interest regulations today is the equirement that stations interview and hire employees on the basis of skin color.

>What is at stake here is the principles of what it means to be
>a trustee of the public airwaves and what it means to buy,
>sell and operate radio properties in America in the late 20th

What are "public airwaves"? Some people use the term to refer to naturally occurring pathways upon which radio and TV signals travel. These, of course, do not exist. Broadcasters buy transmitters and connect them to antennas and send out electromagnetic radiation, which can travel though air or a vacuum. Who is to say that these signals then belong to the public? The local newspaper puts its racks on public sidewalks

and its delivery trucks use public streets, but I don't claim ownership of the newspaper.

The usual justification for broadcast regulation is the scarcity of frequencies. That is, anyone can start a newspaper anywhere, but to start a radio or TV station there has to be a frequency available. But today there are usually only one or two newspapers in large cities, yet there are more radio frequencies available than there are profitable stations. Thankfully, the First Amendment prevents the establishment of a Federal Newspaper Commission to require newspapers to operate in the public interest.

>Between Duopoly (I am still waiting for all that great
>programming that was supposed to happen when Duopoly was
>introduced), LMA's, relaxation of ownership quotas, removal on
>simulcast restrictions, removal of the 3-year rule and most
>recently... the allowance of totally unmanned radio stations

I believe the FCC is allowing so-called "duopolies" because it recognizes that an advertising medium that reaches one or two percent of the listening audience is barely a mass medium. To compete with television stations, cable, and newspapers, a radio station needs to deliver a larger audience to the advertiser than it can when it is one of forty signals on the dial. And the increased efficiency and productivity that results when two or three transmitters are fed programming by one company increases the chance that a profit can occur.

I would suggest that just as we don't expect every restaurant or bank in town to have a different owner, there is no reason to expect that every dial position on the radio must have a different owner, especially when there are so many signals. The proposal to allow unattended operation will unfortunately result in fewer employment opportunities, but the reality is that modern technology has led to similar changes in every industry. The economics of radio broadcasting today make it necessary.

>The net result is that ICBC gets a major night time signal in
>the nation's largest city [...]. The area residents who have
>come to rely on WOWO, especially Western Ohio where a powerful
>public service voice is hard to find, will be left <so to

I have not seen convincing evidence that a sizable population distant from Fort Wayne relies upon WOWO for unique public service programming. I suspect many of us are sad to see the demise of a station we have enjoyed listening to over the years. I certainly am. I'm also disappointed that 1530 in Cincinnati is no longer WCKY, and I regretted the disappearance of calls like KHJ, WKYC, WNBC, WNEW, and WSAZ from the AM band. But I know that times change and that God did not ordain that Fort Wayne, Indiana, should have a 50,000-watt radio station. I do

believe the breaking up of the clear channels has probably been a mistake. If WLIB could be made a dominant station on 1190 by further reducing WOWO's nighttime signal, why not?

->Moderator William Pfeiffer wrote:
->
-> >Throughout the years, the FCC [...] has systematically weakened
-> >its once hard stance on the notion that broadcasting is a

->I've never owned a station, but the owner's perspective might be
->this:

While I welcome dissent and disagreement, it weakens the argument when you open with I am not a member of the affected group, but Ill attempt to speak for them anyway.

->Most radio stations in recent years have not made money
->via commercial sales;

I dispute the assertion that *most* radio stations are not making money. If that were true, then there would be a lot more bankrupt radil stations. If a radio station is not making money (meaning they are actually losing money, not merely that they are not making *enough* to satisfy some owners) then it means that they are doing something wrong. The reasons for that can be numerous, but in many cases it is the result of programmers who would rather follow all the other stations in the market than to stand out and be counted. When there are 5 or 6 stations in a 20 station market, all trying some variation on AC or Hot COuntry, there are going to be some losers at that game.

->Features we have relied upon radio to provide, such as weather,
->news, and music, are now available from the Weather Channel,
->CNN, the Nashville Network, and MTV.

This is true, but radio remains the only mass medium which one can consume while engaged in another activity, therefore radio will always have a meaningful place in the entertainment/information world until they succede in implanting video receivers in our skulls <grin>. You can listen to the audio of TV while doing other things, but that is not fully consuming the medium. Also, the mobile audience is captive to radio as its only means of entertainment and information.

-> Stations are forced to
->appeal to increasingly narrowly-defined audiences and sometimes

->must be content with a 3% share of the listening audience.

Stations are *choosing* to appeal to narrower audences in an attempt
to be unique while following the crowd. Legendary stations like WGN,
WCCO, WJR, WSB, WBZ KFI KOA etc have always maintained a critical edge
in their markets because they chose not to narrowcast, but to remain
full-service radio stations. While the johnnie-come-lately fad
formats gained and lost, these stations retain high levels of
credibility over the long haul. Sure they may dip a point or two as
some new mega-hit station rolls out with a big promotion, but
when the dust settles, they are still top dog.

->advertiser who wants to reach a majority of the persons in a
->market via radio might have to buy spots on very many stations.

There is that might word again. Again, Jeff, that all depends on whether they
want to reach the fickle fad crowd or the loyal listeners group who are most
likely to be loyal customers too.

->Much of the supposed public interest regulation of radio
->broadcasting hasn't necessarily given the public what it wants.

Agreed, but it has often given the public more of what it *needs* than those
stations which are operated for the fastest turnover buck.

->The FCC has required public affairs programs which broadcasters
->know most people don't want to listen to, and that's why they
->tend to be heard at 5:30 a.m. Sunday.

I am not talking about the mandatory public affairs stuff. I am talking about
real public service radio. Live, local, responsive radio that tries
to meet the needs of its community. Besides the lion's share of the
Sunday morning Pub Affairs stuff is TV, where airtime is much more of
a poremium.

Stations have been
->encouraged to devote a certain percentage of their programming
->to news, but many listeners aren't interested in what is going
->on in the world ...

Now HERE is a very telling comment. People who .. aren't interested in
what is going on in the world.. In that case, who needs news, information,
service... Lets just have more Metalica, Garth Brooks and Kenny Loggins (no
insult intended to any of these artists). Well Jeff, after that line I am
tempted to not bother discussing this further. But why not?...

->(and is it the government's role to force-feed them?).

How do you resopond to a statement like this? Is Jeff responding to
MY post or just parroting some party line? Where in my post, or ANY
of my posts for that matter, have I suggested that it is governments
job to force feed anyone?

It IS the alleged function of the FCC to regulate the airwaves in the public interest, convenience and nessesity. And that was the point of the article you are proporting to respond to, Jeff. C'mon now let's stay on topic Jeff..

->Anyway, there's a news/talk station in most markets,
->plus CNN and newspapers, and they exist because of market
->demands, not government regulations.

Jeff, since you are so opposed to government regulations (so am I, frankly) would you support the notion of getting the FCC totally out of the regulatory business as it applies to broadcast radio (and why not TV as well?)? Would you support the abolishment of all the content restrictions on radio including the antiquated and ludicrous <IMHO> indecency regulations? I mean if it is the market and soley the market that should be the governer of the radio spectrum, then lets truly open it up and say that any language is acceptible on the air.

After all, isnt it the market that should decide, Jeff? If Howard Stern is #1 by saying penis on the air, then we should let hm say whatever he pleases as long as he is obviously pleasing his markets by being the #1 or nearly #1 rated show? I mean how many people's lives can you prove to have been ruined by hearing the word *fuck* over a radio speaker? How many have been scarred for live over the utterance of the word *penis*. Franky how many people have been ruined by hearing ANY of the forbidden words?

So while you are telling me that there is no force but market force to be heeded, then you must also agree that it is anti-market to censor Stern <who I could not give care less about, personally> when he is the #1 rated show in his market. Right?

->One of the supposed public interest regulations today is the equirement that
->stations interview and hire employees on the basis of skin color.

No, Jeff, you have your regulations mixed up again.. That is the EEO (Equal Employment Opportunity) regulations, it has nothing to do with public service. And it applies to most places of employment, not just radio. And you are still not addressing my article, Jeff.

<moderator continues>
-> >What is at stake here is the principles of what it means to be
-> >a trustee of the public airwaves and what it means to buy,
-> >sell and operate radio properties in America in the late 20th century .....

->What are "public airwaves"?

Jeff, it is always best to research your topic before posting 100 line missives. The entire notion of broadcasting in this nation is and has always been the notion that the airwaves upon which stations operate are the property of the people. This is why you can use a scanner, radar detector, and other receivers. While the ECPA has chisled some of that away (Cell Phones, encrypted signals etc) the idea is still allegedly that the FCC overseas the broadcast spectrum in the public trust and interest.

Perhape we should just admit that the romantic notion of airwaves belonging to the people is an empty slogan. Maybe it is time to just make official that which is obviously already the case, that the airwaves are the property of the highest bidder. Forget about the charade of public comment. It is a lie anyway. If only communications lawyers or those with the education of said lawyers can petition the FCC on a matter of great importance, or else have their petitions tossed out on technicalities, then there is no public comment. It is a farse.

->Who is to say that these signals then belong to the public?

The communications act of 1934 for one. With the exception of the ECPA (Electronic Communications Privacy Act) which was pushed through by Cellular companies and cable companies to make it a felony to monitor their channels, and to decode encrypted channels. It has been the underpinning by which al broadcasting has occured in this country.

->The usual justification for broadcast regulation is the scarcity
->of frequencies. That is, anyone can start a newspaper anywhere,
->but to start a radio or TV station there has to be a frequency
->available. But today there are usually only one or two
->newspapers in large cities, yet there are more radio frequencies
->available than there are profitable stations.

But there are usually only one (in some rare cases two) news radio stations in that city too, Jeff. Radio is more than news, it is entertainment too. As for there being more stations than *profitable* stations, I agree. Many areas are overrun with sound-alike format clones and stations that would rather scrap it out with 5 others doing basically the same thing than to try something new.

->Thankfully, the
->First Amendment prevents the establishment of a Federal
->Newspaper Commission to require newspapers to operate in the
->public interest.

There are content restrictions on newspapers too, Jeff. If the New York Times printed a front page (or any page) of a nude couple engaged in sexual activity, and/or proclaimed some profane headline, it would not be permitted to do that.

But this is not a newspaper discussion, jeff, it is about radio and let's keep it on radio...

-> >Between Duopoly (I am still waiting for all that great
-> >programming that was supposed to happen when Duopoly was
-> >introduced), LMA's, relaxation of ownership quotas, removal on
-> >simulcast restrictions, removal of the 3-year rule and most
-> >recently... the allowance of totally unmanned radio stations
->
->I believe the FCC is allowing so-called "duopolies" because it
->recognizes that an advertising medium that reaches one or two
->percent of the listening audience is barely a mass medium.

Duopoly, whatever its stated goal, has resulted in the concentration of major media holdings in the hands of fewer and fewer companies. It has not resulted in improved programming (as some touted in the beginning) it has merely enriched the entrenched interestsand created major cities (such as Boston) whose desireable stations are all in the hands of 3 or 4 conglomerates.

->I would suggest that just as we don't expect every restaurant or
->bank in town to have a different owner, there is no reason to
->expect that every dial position on the radio must have a
->different owner,

Well didnt you say above that anybody can start a newspaper...
Well anyone can also start a restaraunt, or food store too. Again, apples and oranges,, Jeff. Besides if there is more competition, the products in those restaraungts get cheaper and better or they go bust. Competition in media makes corporations work harder for the audience. Less competition makes media complacent. I am in favor of more competition in restaraunts, banks and radio stations, Jeff.

->proposal to allow unattended operation will unfortunately result
->in fewer employment opportunities, but the reality is that
->modern technology has led to similar changes in every industry.

Yes we need more robots and fewer humans in all industries, Jeff. How will you feel when YOUR job is replaced by one?

->The economics of radio broadcasting today make it necessary.

Broadcasting is not a food-stamp business, Jeff. Well run stations make money. Radio needs more people, not more computerized jukeboxes. Radio needs creative new ideas, bold new strategies, not more unattended reruns of Jim Bohannon or Bruce Williams. If your station is non profitable, you need to look to new, innovative ideas. The last thing you need is to plug into a satellite and go home. Nobody makes money like that.

There are tons and tons of talented, optimistic, hard working people who would kill for a chance to make a difference at a station. These people will work cheap (partially because of the lack of entry-level positions). A local station here is running on all volunteer help! It sounds pretty good too. A hell of a lot better than a comuter-run jukebox or a satellite feed.

So if your station is operating marginally, dont give up, get out there and find these bright young people and give them a shot. What can it hurt, I mean if you are in the food-stamp line anywat and feel that your only hope is unattended robot operation, what can you lose?

->If WLIB could be made a dominant station on 1190 by
->further reducing WOWO's nighttime signal, why not?

But they wont, Jeff. 1190 will just become another trashed out regional channel. WLIB will have to protect WOWO, KEX, and the Dallas station. They will essentially have 30,000 watts beamed over the

ocean.

-> The area residents who have
-> >come to rely on WOWO, especially Western Ohio where a powerful
-> >public service voice is hard to find, will be left <so to
->
->I have not seen convincing evidence that a sizable population
->distant from Fort Wayne relies upon WOWO for unique public
->service programming.

Then you have not been reading this thread, Jeff. But by some of your comments, that does not surprise me. But as I said over and over in the post you claim to be replying to... it is not so much the demise of WOWO that is so upsetting to me. It is the apparent demise of the concept that radio (and TV for that matter) broadcasting is in any way considered to be in the public interest. It is the glaring disregard of the FCC for those 200+ people who took pen and paper (or keyboard and printer) in hand and mailed (not email, postal mail) the FCC to express their dismay at this action, and they were tossed in the trash because they didnt adhere to some unknown official format. The damage that does to an already apathetic public who is sadly resigned to accept whatever is handed down to them by the government. Who doesn't vote because they believe their vote is meaningless. Well this FCC move has reinforced the notion that their vote is meaningless.

I am dismayed because it is becoming abundantly clear that the FCC cares more about Howard Stern uttering the word *penis* on the air than they do with preserving some semblance of the notion that we, the people, are the owners of the airwaves and the FCC is but the custodian. I am dismayed because people like you, Jeff, fail to see the travisty that these actions and similar ones commit to the ideals on which broadcasting (and society) has been based for all these years. People like you, Jeff, who see nothing beyond the bottom line, who think that anything is fine as long as it massages the profits.

->I suspect many of us are sad to see the
->demise of a station we have enjoyed listening to over the years.
->I certainly am.

Frankly, Jeff, I could not care less about the frequency of 1190. I could not care less if WOWO lives or dies. I cannot hear them here anyway and even when I could, they were never more than a DX catch for me. What I do care about is what the WOWO deal signifies to the future of the medium, that anyone can do anything they damned well please as long as they have the money to buy the pot. That public comment is a sick joke, that the notion of public ownership is an empty shell of a concept long ago gutted of any teeth. That the trend we have been seeing in the industry is not an illusion, it is reality. Radio *IS* a *Cash Register Connected To An Antenna*. Except for brave and courageous programmers like Larry Wert of WLUP, Don Imus, Steve Dahl, Tom Leykis, Bob Lassiter, Rush Limbaugh, Howard Stern, and others who push the envelope, radio is fast becoming a wasteland of automation, satellite jukeboxes,

boring talk shows and commercials for Gold Bond, Hooked On Phoincs and Ovaltine.

Jeff, please understand that these things have effects farther reaching than whether WOWO is alive dead or castrated. It is a matter of concern for all who love the broadcasting ideals we have in the USA.

Bill

5790. Re: WOWO is *bigger* than WOWO

Source record: 35895

In article <3d0m4d$42v@vixen.cso.uiuc.edu>, rrb@deja-vu.aiss.uiuc.edu (AIRWAVES E-PUBLISHING) writes:

(on WOWO and larger issues)

Bill...in theory I am with you. However, I feel one added issue needs to be placed in the equation. That is, what use are the clear channel services we want to protect, making of their privilege? And are they making enough use of that privilege, by providing unique and otherwise unavailable programming, to justify its continuance?
If we want to talk about a WBZ bringing you thoughtful issue discussion at night via David Brudnoy, or the Yankee broadcasts over WABC, or Harry Caray and the Cubs over WGN, the Grand Old Opry on WSM, or the wild Chicago-style talk of WLS (just to name a few), those are services worth protecting. Or maybe you respond to the western talk radio flamethrowers like KFI, or KGO, or KFBK...each of them is largely local and individual, even at times idiosyncratic. One thing you can say is, they all bring the city where they originate, in touch with a far wider audience, and bring listeners from 1000 miles around in touch with them. You may not like or agree with everything you hear, maybe not with anything, but you're getting something special that your local stations won't offer.
In an earlier time, it would have been the unique popular musical tastes of each region as brought to you by personality music stations like WCFL, or the old WLS, or (dragging one from my own resume) WKBW. The point is, it was (and at many clear channel stations, still is) original programming, that put listeners all over the country in touch with something unique.
I don't know what WOWO was doing with its nighttime signal these days (one of our local sports-talk motormouths on neighboring WHAM blows it out for a 75 mile radius around my home). If it was doing something original, unique and of special service to Midwestern listeners, then this is a deep loss and it should be resisted. If it was just using its 50,000 watts to relay Bruce Williams or Gil Gross or some other syndicated show that we can all pick up at 5 different places on the dial wherever we are, who cares?
What we really should be basing our protection of the clear channel stations on, is one question...are they providing original programming that serves their community of license and at least potentially, a wider geographical audience at night? If they're putting material originating in their own studios or produced by their own remote production team on the air for more than half their nighttime schedule between sunset and midnight local time, then by all means, protect them. But make that a condition for retaining 1-A or 1-B status. (The only exception I'd make

isn't really an exception at all...a network key station that's originating programming for itself AND for regional and/or national syndication at
the same time.) If they're just relaying someone else's syndicated product or satellite feed, make them make room for someone else who WILL program something original.
Interestingly enough, whatever the merits of WOWO's nighttime efforts, WLIB will actually provide a different kind of nighttime service to its audience than they are currently getting. I don't always find what they say on the air to be personally palatable...but they do offer the only
news/talk service in New York (at least the only such service in the English language) that pays special attention to the needs and concerns of the black and hispanic communities. Other full time talkers on the air in NYC either ignore or insult them. (Just try to listen to Bob Grant and you'll know what I am saying.) They plan to go with that format around the clock, and they will be doing something unique, local and (one hopes) worthwhile for about 3,000,000 potential listeners in their service area. I'm not sure WOWO could say that any more.
Do I approve of the way WLIB will get its nighttime service? NO. It points to real flaws in the system, and WLIB should have been encouraged to find another way. But is the actual result all that bad, especially if it provides a service that is wanted by a large and badly underserved segment of the nation's largest market? Or does it simply encourage us to ask whether a 1-A or 1-B allocation is worth protecting for its own sake, or whether it ought to be expected to justify itself on the basis of providing a valuable and unduplicated program service to a wide area?
I don't have a definitive answer to this question. But if the FCC is implicitly re-evaluating its policy on the clears, we ought to include in the mix the consideration of the issue that led to their creation in the first place. The idea was locked into the law back in 1927 that some stations would be allowed high power around the clock with a wide service area. In return, they would be expected to provide a more extensive and ambitious programming service, AND ORIGINATE more of their own programming than the low to medium power local outlets which had fewer programming requirements and restrictions. Clear channel status was initially earned 60 or more years ago by those stations that proved they were willing to invest in providing such a service. Maybe it's not a bad idea to revive that expectation now.
Bob Smith, WXXI/1370 Rochester NY

[Ideas about the value of clears deleted]

} Interestingly enough, whatever the merits of WOWO's nighttime
} efforts, WLIB will actually provide a different kind of nighttime service

[Agreed on the point of WLIB being a unique and valuable voice for
NYC's African-American community]

} Do I approve of the way WLIB will get its nighttime service? NO.
} It points to real flaws in the system, and WLIB should have been
} encouraged to find another way.

Here is my main, and really my only point of passion. I wont
reiterate my rant in reply to Jeff560@aol.com, exceptto state that the
way this case is being handles is an atrocity and an afront to the
notion that the public ownes the airwaves.

WLIB could be granted a waiver to operate a direcional signal on 1190
without destroying WOWO. They could easily get 1000, 2500 or even
5000 directional watts and cover their area well.

As readers to this forum know, I believe in local radio. I would
never stand in the way of a WLIB to get full-time status, but not by
purchacing a dominant station, NOT TO OPERATE IT, just to downpower
it. That is just plain wrong.

And the FCC's dismissal of 200 letters of protest without even
considsering them is criminal in my opinion and damages my respect for
them greatly and perhaps irreparibly.

And I agree with you, Bob about having to justify the high powered
signal. However this WOWO mess has severely damaged my faith that any
such intelligent solution will be promoted.

Bill

Message-ID: <3d5cjl$ns8@vixen.cso.uiuc.edu>
Source record: 35898

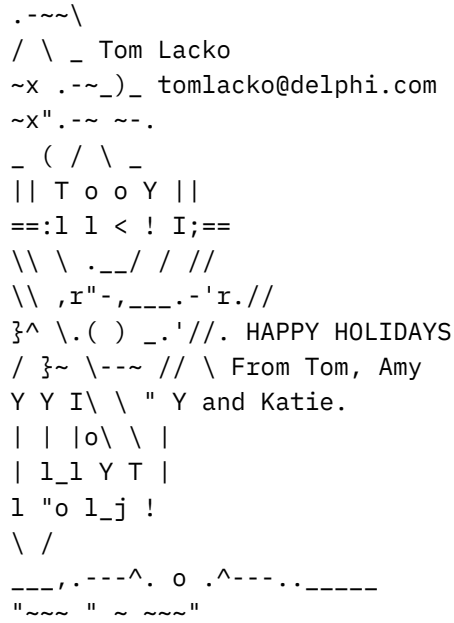
Imagine being off the air for 6 days this time of year!
That's the problem WARX (Oldies format) had this past week. The station is not located in the immediate D.C. area, it is licensed to Hagerstown, MD. But it's 50,000 watt signal on FM 106.9 easily stretches 40-plus miles southeast towards D.C. and can be picked up in the suburbs without much difficulty.
On Friday, December 9, the station went off the air at approximately 3:30 p.m. Station engineers went to the transmitter site located on South Mountain in Frederick County and began working on the problem immediately. But it wasn't until Saturday morning that the exact cause of the problem was found. Two bullet holes were discovered in a cable that sends the stations signal from the radio base to the transmitter. The station was off the air until Thursday, December 15, at 6:00 p.m. The engineers were able to get replacement parts rather fast but an ice covered tower greeted the workers on Tuesday and Wednesday mornings, adding to the delay.
A reward for whoever fired the bullets is now out. Station management speculate that either a bored hunter or some other vandal attempted to shoot at the beacon lights on the tower and missed, but struck the cable instead.
Incidentally, WARX was the last station I worked at a few years ago back when they had their Easy Hits format.

EZ Communications, based locally in Fairfax, VA., announced last week the formation of a subsidiary to develop an emerging technology that enables radio stations to transmit text as well as audio signals to specially equipped PCs. Michael Rau the current senior VP of science and technology for NAB will join EZ Communications and head the subsidiary.
The new technology won't be ready until some time in 1996. When the finished product is available, advertisers will be able to give more details and specifics on their products using the stations subcarrier to transmit the text based information. Currently EZ is working on developing standards and special software for the product.
EZ has properties in 7 markets, 17 stations total. EZ no longer owns any stations here in the metro D.C. area. At one time EZ owned what is now know as WJFK FM 106.7, but EZ sold that property to Infinity several years ago.

WAMU FM 88.5 (News/Talk/NPR) host Derek McGinty will begin doing some TV work for WETA channel 26. McGinty will become the host of TV's "HERE & NOW" in late January. McGinty's radio show airs live on WAMU at noon weekdays and is repeated at 8 p.m.

This has been an incredibly great year for me. The highlight
was becoming a Dad for the first time this summer after 10 great
years of marriage to the same woman. In short, I have a wonderful
family, my health, a job and a new home with a radio in EVERY room!
What more could a guy ask for?

Happy Holidays to you. If you're working on the air anywhere,
I wish you nothing but double digit ratings in 1995!



5794. Chicago Radio Watch: 12/17/94

Christmas time in radioland: It appears that this group had been put on the not so nice list.

Brant Miller, long time Chicago radio personality at WLS-AM 890 and WLS-FM 94.7 had been handling mornings at WTMX 101.9 for the past 16 months. Miller's last day will be December 23 as the station turns to a new morning team in an attempt to boost ratings. Jim Patterson and Carl Faulkenberry arrive January 9 with a two year contract in hand. Jim and Carl were most recently at Nashville's WKDF.

Ted Lauterbach, a true radio veteran of Chicago radio is in the news again. Earlier this year, Lauterbach was promoted to co- host WMAQ's nightly sports huddle program. Chris Cross (that's what he claims his name is) had been shifted to a news talk magazine show in the afternoons and Ted took over his seat for part of the nightly talk show. However, when MAQ dropped the news magazine, Cross reassumed his role in the huddle. Ted returned to the midnight to 5 am news shift. The station switched to a news service overnights and promptly switched Ted to the unemployed line.

It's official: As noted during the last update, Denise Jordan Walker was unable to resolve contract differences and has left WNUA (95.5) Loni Taylor starts middays at the station Monday. Taylor had been working part time at WLIT before shifting to Houston's KODA middays.

Now, this group appears to have been put on the nice list:

Eric Marenghi who has operated under the aliases Eric Stallone (Chicago's WPNT) and Eric Taylor (Milwaukee's WTMJ) is leaving his post of morning news anchor for the position of news director at KRLD-AM in Dallas.

Fan of Johnny Von? The night time talker at WLS-FM was granted a two year contract extension at the station.

Dean Richards, former morning host at WNUA received a gift; Sunday host of talk show at WGN from 1-4 starting in January.

Elroy Smith, Program director at WGCI since February 1992 has added the job of Operations Director at WGCI-AM to the mantle.

Enjoy the holidays; gifts can be sent to me at ......

slarnold@hollywood.cinenet.net (Stephen L.. Arnold) writes:

>This brings up the question of whether ASCAP/BMI should be regulated by
>the F.C.C. and Congress. Essentially they are attempting to collect fees
>from licensed public broadcast USERS (listeners) and that area of the law
>is regulated by federal statute.

Are movie and production companies regulated? When a television station (or network) airs a movie, it pays substantial fees to the company that produced it--for each and every showing. As an individual, you can go down to your local video store and buy a laserdisc of a movie for $24 just like you can buy a CD at a record store for $12. But to broadcast that movie or to play that CD on the air requires fees to be paid.

Whether or not a station is "licensed" has nothing to do with the fact that it needs to pay for the programming it presents. And the last thing we need is government regulation of our entertainment.

In my personal opinion (I cannot speak for my employer), I would find it very unlikely for a CNNRadio anchor to report the Microsoft/Vatican story as serious news. I'm pretty sure the story was run as a lighthearted way to end a newscast (a "kicker"), rather than an outrageous error in news judgement. CNNRadio anchors are top notch journalists. They know their stuff... and they all know about the internet. Your newsgroup posting only paraphased the story.
I'm sure the actual script made it clear to the listener that the story wasn't serious and was identified as an example of some of the humor floating around on the internet. Again, this is my personal opinion. CNN employees are not allowed to speak for the company.

Merry Christmas & Happy New Year!

One of my winter quarter classes I'll be teaching is Broadcast News
Practices. In order to "spice" up my lectures, etc. I was wondering
if anybody had some anecdotes (past or present experience) about:

1) working in a newsroom (radio or TV)
2) working with a combined radio/TV newsroom
3) comparing broadcast newsrooms with print newsrooms

Serious replies about news practices or philosophies will be appreciated
also. Let me hear from all sorts of positions. Thanks.

From: bfomarks@ubvms.cc.buffalo.edu
Message-ID: <3d5ckh$nto@vixen.cso.uiuc.edu>
Source record: 35912

This is in response to Bob Smith's recent posting on Talk Radio in Western New York. Bob, I remember you from the days when you were the morning news anchor at WBEN in Buffalo. It was interesting to read about the changes at WHAM. Every once in a while, I pull in WHAM here in Buffalo, though I haven't done so recently. Perhaps you can tell me if a long-time talk show host at WHAM, Alan Harris, is still there? It seems they moved him from middays to evenings several years ago when they hired Jack Kinnecutt.

I especially enjoyed your take on the WGR situation. I have personally boycotted the Rich Michaels show for about a year now. I can honestly say I've only heard him in announcements promoting his show. With his numbers falling, perhaps there are others like me. I thought he made a fool of himself, appearing at a George Pataki campaign rally where he applauded and cheered as if he were a Pataki campaign worker (which I'm sure he considered himself). Maybe I come from the old school, but I think radio people need to separate their personal politics from their professional duties. I certainly do!

Finally, in response to the person who wanted to know more about Leslie Michaels. I hate to put labels on people, but I would describe her politics as liberal. She worked at WGR Radio for a time several years ago. WGR ran her national show for a while, but apparently WWKB in Buffalo is now doing so. I may be wrong here, but I believe the show airs nationally at 10pm Eastern Time. Personally, I didn't care for her local show on WGR. She seems to have toned down her act for the national show, though I haven't heard it since WGR dropped her to bring back the legendary John Otto several months ago.

Jeff560 (jeff560@aol.com) wrote:

: this: Most radio stations in recent years have not made money
: via commercial sales; they have lost money.

This is not the fault of the medium, the nighttime patterns, or any fewer people in the audience -- it's a function of the fact that many stations changed hands at the height of the price run-up, and now they're saddled with huge debts to pay off.

They romantically looked at cutting costs here and there and raising prices and then came nose-to-nose with reality: they bought at the height of the market, not the bottom; there is nowhere to go but down.

: but many listeners aren't interested in what is going
: on in the world....

The success of all-news stations, often at the very tops in their markets, disproves that statement. I also note how many morning shows have news, weather, and traffic in them. Obviously somebody likes this stuff or stations wouldn't be devoting the most lucrative part of their day to them.

: What are "public airwaves"? Some people use the term to refer
: to naturally occurring pathways upon which radio and TV signals
: travel. These, of course, do not exist.

There is an entire set of case law resting on the concept of public airwaves. Broadcasters are trustees. They don't own the airwaves, except in the recent blasphemous auctioning of nationwide licenses in the 2-way parts of the spectrum.

5809. WOWO is *bigger* than WOWO

Newsgroup: rec.radio.broadcasting
Date: 1994-12-20 01:39:37 UTC
From: jeff560@aol.com
Message-ID: <3d5ckp$ntv@vixen.cso.uiuc.edu>
Source record: 35914

In a recent discussion, moderator William Pfeiffer and Jeff Miller wrote lines beginning with their initials....

WP>I dispute the assertion that *most* radio stations are not
WP>making money. If that were true, then there would be a lot
WP>more bankrupt radil stations.

An article in _Broadcasting and Cable_ not long ago reported that the majority of radio stations had lost money the previous year. I presume the article was based on information released by the FCC. The article also reported statistics on AM/FMs, AM stand-alones, and FM stand-alones, but I don't recall the details, except that of course the majority of stand-alone AMs lost money. I believe the year in question was 1993, but it could have been 1992.

WP>If a radio station is not making money [...] then it means
WP>that they are doing something wrong. The reasons for that

Bill, are you really saying that any radio station will be profitable if properly managed? Surely there are or have been some daytimers, some stations with poor signals, some stations with large DA's on rented land, which are destined to fail. A market might be unable to support 40 restaurants, and similarly it might be unable to support 40 radio stations.

JM>Stations are forced to appeal to increasingly narrowly-
JM>defined audiences and sometimes must be content with a 3%
JM>share of the listening audience.

WP>Stations are *choosing* to appeal to narrower audences in an
WP>attempt to be unique while following the crowd. Legendary
WP>stations like WGN, WCCO, WJR, WSB, WBZ KFI KOA etc have

C'mon, Bill! Everyone knows most radio stations nowadays have to go to niche programming. There can only be one or two successful full-service stations in most cities.

JM>Much of the supposed public interest regulation of radio
JM>broadcasting hasn't necessarily given the public what it
JM>wants.

WP>Agreed, but it has often given the public more of what it
WP>*needs* than those stations which are operated for the

Thank you, government officials, for deciding what I need!

WP>People who .. aren't interested in what is going on in the
WP>world.. In that case, who needs news, information,
WP>service... Lets just have more Metalica, Garth Brooks and
WP>Kenny Loggins (no insult intended to any of these artists).

Bill, my favorite local station is all news. I regret seeing
radio turned into a jukebox, but let's face it many young people
just want to hear music and with some formats news is a
tune-out. Should the FCC discourage stations from appealing to
the tastes of its listeners?

JM>One of the supposed public interest regulations today is the
JM>equirement that stations interview and hire employees on the
JM>basis of skin color.

WP>No, Jeff, you have your regulations mixed up again.. That is
WP>the EEO (Equal Employment Opportunity) regulations, it has
WP>nothing to do with public service. And it applies to most
WP>places of employment, not just radio. And you are still not

Bill, I didn't mention the FCC. I was commenting on government
regulation of the broadcast industry in general; all government
regulation is supposedly in the public interest. However, I
believe that broadcasting is currently under tighter EEOC
regulations than most industries.

WP>The entire notion of broadcasting in this nation is and has
WP>always been the notion that the airwaves upon which stations
WP>operate are the property of the people. This is why you can

Bill, I still feel the phrase "airwaves upon which stations
operate" is misleading because it implies something which does
not exist. The concept that the public owns electromagnetic
radiation from transmitters (presumably including CB
transmitters, navigation beacons, and transponders in space) is
becoming outdated now that the FCC is auctioning off certain
frequencies and some in Congress want to charge broadcasters
spectrum use fees.

JM>Thankfully, the First Amendment prevents the establishment of
JM>a Federal Newspaper Commission to require newspapers to
JM>operate in the public interest.

WP>If the New York Times printed a front page (or any page) of a
WP>nude couple engaged in sexual activity, and/or proclaimed
WP>some profane headline, it would not be permitted to do that.

Agreed there are obscenity statutes, but I don't think the
Supreme Court would let Congress impose a fairness doctrine on
newspapers or count the pages devoted to advertising before
letting a newspaper continue to publish. (My copy of this
article was cut off at about this point.)

Regards,
Jeff Miller jeff560@aol.com

>the air for it to place a more profitable signal in New York City.

How long ago was it (in this forum, no less) that we were decrying the over-crowding of the airwaves with drop-in signals that were degrading both the AM and the FM Bands? The fact is that there really ARE too many stations on the air. Besides the fact that the sheer number of stations have spread an available pie very thin, the clutter on AM makes almost everything that is not a completely local signal unlistenable.

So now the FCC has decided that it is no longer a Bad Thing for some of those stations to effectively (if not actually) go away. But what is the reaction (of someone who used to complain about the overcrowding, no less)?

It cannot be had both ways. Either there are too many stations jammed onto the airwaves or there are not. The concept of buying up stations in order to turn them off is not new. It is the marketplace mechanism to weed out the excess. The alternative would be for the FCC to tap certain station licensees on the shoulder and ask for their authorization back.

Yes, there will be more than one situation where someone feels wronged or shortchanged in the public service department. But such has been the case throughout radio history. Citizens groups have protested many license transfers, but the FCC has quite rightly pointed out that no one can be forced to operate an unprofitable business--even if a group of people feels left high and dry.

The AM band is hanging by a thread as it is. It is inevitable that some thinning will occur. The manner and nature of that thinning will be of some discomfort to someone, somewhere. Sorry 'bout that. But you cannot run stations on thin air. If a signal cannot support itself, then it is just a matter of time before it is put out of its misery.

>The net result is that ICBC gets a major night time signal in the
>nation's largest city, a broadcast property with millions, and their
>cash outlay will be in the low six figures after selling the crippled
>WOWO off to the new owner. The area residents who have come to rely
>on WOWO, especially Western Ohio where a powerful public service voice
>is hard to find, will be left <so to speak> in the dark.

But don't you see the questions begging to be asked here? If the station in its current form is profitable, why is it being sold? If it is not profitable, then how can you expect to enslave the current owner in the

continuance of unprofitable service? Just because the residents "need" the station is not sufficient cause to perpetuate a loss. I don't know about you, but I don't work for free. How can you expect broadcasters to continue to subsidize an operation--even if listeners "have come to rely" on it?

>I tell ya, the actions of the FCC are making the words of Stephen
>Dunifer sound better every day.

What? A bunch of crappy, mutually interfering stations with juvenile (to put it kindly) content, run by a bunch of immature post-adolescents who talk about "rights", but have not a clue regarding "responsibility" sounding better every day?

Tell me it isn't so.

>Stop the WOWO insanity! Your station could be next.

If a station is so marginal that turning it off (or crippling it) makes economic sense, what more is there to say? If it is just taking up space keeping some really money-making station from reaching full potential, let it go. Until and unless you are prepared to go for government funded and operated radio (ANOTHER way the government can waste our money!), you are going to have to let the free market make the appropriate adjustments.

Remember--you cannot force anyone to provide even a "public service" for free.

Wrongo,

I've lived in Newfane, Lockport (Niagara County) and now live in
Buffalo. I have been able to receive WOWO fine on wide-band, stereo
receivers. It is also quite strong throughout the rest of the state
I've found (never tried in Rochester though).

Happenings in the #40 market:

*As a bit of an addendum to the Arbitrends recently posted,Alan Pergament's column Saturday in the Buffalo News went into how sports talk is doing. For WGR(NewsRadio 55),it's a double-edged sword: Chuck Dickerson(aka The Coach)'s 2-7pm show(with the last hour spent with Art Wander)is second behind WYRK in 12+ and fifth in the 25-54 demo-putting it ahead of WBEN,the Bills flagship (which,during the same time,runs Limbaugh,Buffalo's Evening News and Dr.Dean Edell). His share is twice as high as what 'GR got in the fall of '93.However, Art Wander(who's on from 6-11pm)hasn't been helped by Dickerson:'GR's 6th 12+ and 8th 25-54;during the same time,'BEN is 2nd 12+ and 5th 25-54.
In 25-54 overall,'GR is 6th(slightly ahead of last year)and 'BEN is 7th; in 12+,'GR is 5th(not 4th,as Perg noted-though,in part,he is correct;the 4th ranked station is of the combined AM/FM stations)and 'BEN is 2nd.

*CKEY(FM 101 The Planet)is helping out for the holidays. Tomorrow,when the Planet holds its State of Independence show(with The Wrench,Stoneface and other groups performing and local boys made good the Goo Goo Dolls co-hosting)at Nietzsche's,the first 300 people who donate anything(new clothes, toys,or non-perishable food)will get a 25-song cassette featuring tracks from groups that have been played on the State of Independence radio show,as well as from other bands.

*Also in the holiday mood was WKSE(KIss 98.5),which held Kissmas Bash '94 at the Connecticut Street Armory. Freedy Johnston and the Barenaked Ladies performed,as did the local group Them Jazzbeards(a late addition for Sheryl Crow,who was scheduled but wasn't able to make it due to emergency surgery; however,everyone who attended(it was a sellout,BTW)got a cassette of her album Tuesday Night Music Club). "Beverly Hills,90210" 's Jamie Walters was co-host for the event,which also had a casino for the night. Proceeds go the group One at A Time(which,I believe,helps women & children).

*Last night,WUFX(103.3 the Fox)broadcast the final show of Aerosmith's concert tour from the group's hometown of Boston,Mass.

*About the Bills:Seems everyone is talking about the sad state of affairs for the squad-even Business First's Fifth Coast column. This week's edition noted that "one caller said on WGR that the Bills don't even deserve to be called players anymore. He said they should be called 'mutts' because they played like dogs.",asking "What's wrong with these people? Don't they have lives of their own?" It did give credit to WBEN's Dave Kerner,noting that he was "the only voice of sanity in this orgy of bandwagon jumping" and discussing what happened after the Minnesota game calmly,which prompted a caller to rip into him for not having the requsite sense of outrage. Kerner hung up on him.(Were I in Kerner's shoes,BTW,I'd have also done what Tom Leykis does...drop what I call THE BOMB. That caller sounds like a WGR

refugee. :))

TTYL...and happy holidays,all!

NYC Radio Waves 12/18

First up - Latest NYC Arbitrends-

Mon-Sun 6A-12MID 12+

STATION Aug-Sept-Oct Sept-Oct-Nov (Logo/Format)

WLTW-FM 5.0 4.9 (Soft Rock)
WCBS-FM 4.6 4.6 (Oldies)
WQHT-FM 4.5 4.6 (Hot 97/Urban CHR)
WPLJ-FM 4.3 4.3 (A/C)
WABC-AM 3.9 4.1 (Talk)
WHTZ-FM 4.4 4.1 (Z-100/Modern CHR)
WBLS-FM 4.0 3.9 (Urban A/C)
WQCD-FM 3.5 3.9 (CD 101.9/NAC)
WSKQ-FM 3.9 3.8 (Super Q/Spanish)
WRKS-FM 3.8 3.8 (Kiss-FM/Urban)
WINS-AM 3.9 3.7 (News)
WMXV-FM 3.7 3.5 (Mix 105/A/C)

The shakeout from the Emmis takeover of KISS-FM continues--
Former Kiss-FM AM Driver Wendy Williams has migrated to PM Drive, along with DJ Red Alert on Hot 97. Deborah Rath moves from overnights to middays, and former PM Driver Paco Lopez goes to overnights. On the Kiss side of things, Ken Webb has been reunited with Jeff Foxx on the KISS-FM Wake-up Club. Webb was doing overnights on Kiss since he and Foxx were bounced off AM Drive in the summer. The station is promoting the 12 days of Kiss-mas, playing classic urban gold, leading up to the "New KISS-FM' on January 1st.
The first shot in the Urban A/C war has been fired by WBLS, calling KISS-FM a "plantation" station in on-air promos. That has alot of people talking.

Q104.3 celebrates their first anniversary as a 'pure rock' station, and station officials are saying they are pleased with the first year. WAXQ reports ad sales running 10% above projections. Ratings hover around the 2 mark. Randy Bomgarten, station VP/GM, says they feel it will take 3 or 4 years for their format to hit stride.

Congratulations to WFAN's Don Imus, who married Deidre Coleman Saturday. The I-Man will return to the airwaves on January 3rd and his show will be on C-SPAN from 6-10am. BTW, Imus gave his approval to the WBLS "Plantation" campaign on-air Tuesday 12/13.

Note the new address for me on America Online. I'm dropping the Scott Rogers (my air name) and SRogMix105/SRogRadio from my account after Christmas.

Happy Holidays to all--

Tripp Rogers (my real name)

Format notes and changes for central Missouri and eastern Missouri, based on listening during trips to Columbia and St. Louis this week:
KCVO (Camdenton) adds a translator for the Columbia area, based across the Missouri River in Prairie Home. K248AA broadcasts at 97.5 mHz, is probably on the KMIZ-TV tower, giving it a rimshot-style presence in Columbia (signal always there, considerable multipath in spots, some picket-fencing, too).
KCVO also is back on its Blue Springs (eastern Kansas City) translator at 97.3 mHz.
KDHX (88.1, St. Louis), making shifts in its schedule, now participant in CPB's "Healthy Station" project. Last year, KOPN in Columbia changed to an adult-alternative format as a result of its involvement as a "Healthy Station" participant. KDHX changes so far appear less drastic.
KFAV (99.9, Warrenton), now "classic hits" (classic rock with CHR-style presentation), slogan still "V-100," now a USA radio network affiliate, continues to be exurban rimshot of suburban St. Charles County.
KLOU (103.3, St. Louis), changed slogan from "Clue 103" to "Oldies 103," undoubtedly in reaction to the rapid rise of KIHT ("K-Hits," 96.3) and its 70s-oldies format.
KSTL (690, St. Louis), changed from southern gospel and German music to fulltime Black gospel.
KTXY (106.9, Jefferson City), transitioning to hot AC, slogan still "Y-107," rumors persist in Columbia that 106.9 will go country and the hot AC format will move to what is now KZMO-FM (94.1, California) after an A-to-C2 upgrade.
WFXB (101.1, East St. Louis), changed from "The Fox" to "The River," with calls WVRV. Format is hard to categorize; I've settled on "adult-alternative classic rock."
WKBQ (1380, St. Louis), continues to simulcast WKBQ-FM (104.1, Jerseyville, Illinois rimshot) 100%. This contradicts a recent line item in the M Street Journal.
****
Formats St. Louis has that Kansas City doesn't have:
New jazz, modern rock, 70s oldies, soul oldies, local all-sports, adult alternative (sort of), modern/CHR hybrid.
Instead, to St. Louis' two country stations, Kansas City has five. No wonder I feel like I live in an radio feedlot.
****
KCVO's list of translators is as follows (I heard the roll call...and, yes, Scott, I taped it!):
K201AA Bolivar
K207AY St. Robert (Fort Leonard Wood area)
K208BO Warsaw (Truman Lake area)
K209AP Sedalia

K211AC Jefferson City
K213AG Rolla
K225AB Knob Noster (Warrensburg area)
K247AB Blue Springs (eastern KC)
K248AA Prairie Home (Boonville/Columbia)
I sat through three hours of "contemporary Christian" programming to
hear this. Listening to that stuff reminded me most of the worst, most
bland early-80s adult-contemporary station you can imagine.
Yecccccccch.
****
Dumb things I heard on the air:
Newscaster on WVRV, about St. Louis' 1994 murder count, "I don't know if
that number has changed; I haven't checked the news wires since 6 o'clock."
He said this at 9:45 am.
Announcer on KFAV, "And V-100 color weather radar shows a temperature of
32 degrees." Yeah, but what's it like OUTSIDE?
(I'm also waiting for STEREO weather radar....)

Jeff. I am astounded I didn't know this bit of history! Do you know the date
the FCC imposed .8 mHz between nearby stations? In fact, I believe present
day radios can handle .4 mHz quite well, allowing room for more stations.

I did not comment on the legal relation between broadcasters and BMI/ASCAP. I did suggest that when an outside agency such as ASCAP/BMI attempts to collect payment for use of public broadcasts, that is subject under existing law to regulation by the F.C.C. and Congress.

The point is that license fee's are payable only at the point of use by the broadcaster. The user (this is the public) owns the airwaves held in trust by the Congress and the user's rights are protected by the F.C.C. . Everyone has a right to receive public broadcast. You can not charge for receiving public broadcast performances. The ownership of the broadcast is held by the station. Any use of copyright material is by the broadcaster, not the receiver. Cable companies must pay broadcasters for rebroadcast of their programs. Merchants are listeners and supporters of public broadcast through paid advertising. To charge a merchant for listening to public broadcasts runs directly contrary to law and business sense.

ASCAP/BMI should be brought before the F.C.C. and Congress to explain their activity. At the very least, they are interfering with a public access right.

CNN Brian (cnnbrian@aol.com) wrote:
: In my personal opinion (I cannot speak for my employer), I would find it
: very unlikely for a CNNRadio anchor to report the Microsoft/Vatican story
: as serious news.

Me, too. That's why it was such a shock! This wasn't a small market
happy-talk 11-o'clock TV news broadcast and farm report. This was CNN!

: I'm pretty sure the story was run as a lighthearted way
: to end a newscast (a "kicker"), rather than an outrageous error in news
: judgement.

As a print journalist myself, I think I recognize a "kicker" when I hear
one. There was nothing in the story to suggest that.

: CNNRadio anchors are top notch journalists. They know their
: stuff... and they all know about the internet. Your newsgroup posting
: only paraphased the story.

Yes, I said that it was a paraphrase.

It caught me off guard. If I'd known it was coming, I'd have taped it!
<g> But to my recollection, it was described merely as a rumor on the
Internet. The word "joke" was not used. That's what horrified me! I
stand by my observation.

: I'm sure the actual script made it clear to the listener that the story
: wasn't serious and was identified as an example of some of the humor
: floating around on the internet.

Not to my recollection. Did anyone else hear it out there? Is an official
CNN transcript available? I'd love to see in in print or onscreen!

: Again, this is my personal opinion. CNN
: employees are not allowed to speak for the company.

: NOTE: Viewers can send their comments and questions about CNN Programming
: to the CNN Public Information Department's E-Mail address:

Hi everyone.

For Los Angeles RAD'ers, I just heard on the radio that KOST 103.5FM
will be carrying the show here. "Disney's Wonderful World of Christmas"
will air Saturday night (Christmas eve) from 6-9 pm, and then again
Sunday morning (Christmas) from 6-9 am.

So get those VCR's rolling!

[Article crossposted from rec.arts.disney]
[Author was Ed Sterrett]
[Posted on 16 Dec 1994 07:58:07 GMT]

Does anyone here know anything about this Christmas special?
Nobody on rec.arts.disney knew much else about it, other than
what you see below. In particular, I was hoping to find out
what network, maybe even a list of stations?

Thanks!
-Brian

Holiday Radio Special to Air Worldwide

Programming "shoppers" from the world of radio were out early this
year, looking for sounds of the season to fill their holiday
airwaves. "Disney's Wonderful World of Christmas" was the
perfect "gift" nearly 300 stations were looking for.

Stations from New York, Los Angeles,Boston, Chicago,
Philadelphia, Washington, D.C., Denver, St. Louis, Miami and San
Francisco, as well as Armed Forces Radio and the BBC will be airing
the new three-hour radio special to be broadcast during the 1994
Christmas season. Over 80 stations are airing the show more
than once. James Earl Jones, who provided the regal voice of Mufasa
in Disney's hit movie, The Lion King, will host the special. The
show combines best-loved holiday music with magical memories from
the Disney archives, holiday recollections from well-known
personalities, performances by Walt Disney World's renowned musical
talents, as well as an "international Christmas celebration" shared
by Walt Disney World Cast Members. The special is being distributed
by ABC Radio Networks and Walt Disney World.

Walt Disney World hopes the show will become a holiday tradition
and plans to expand the show by one hour each year until it becomes
a six-hour block. An award-winning production team has been
assembled for the program. Ben Manilla, a well-known figure in the
radio industry, is producing along with Tom Daren of Walt Disney
World. Writer and journalist James Wynbrandt is serving as writer
for the special.

5831. Question: Radio Broadcast List on Internet?

Newsgroup: rec.radio.broadcasting
Date: 1994-12-20 23:18:52 UTC
From: Paul Knobel <freedomc@teleport.com>
Message-ID: <3d7oos$fhs@vixen.cso.uiuc.edu>
Source record: 35936

Does anyone know of how I can obtain the latest list of licensed broadcast stations and frequencies and addresses, etc. other than by paying top dollar to Broadcasting? As a DX'r, I used to get Vane Joes's publications under publisher Howard W. Sams & Co., but those are no longer avail.

Also, is there a radio DX club around?

Thanks.

Paul Knobel
Salem, Oregon

freedomc@teleport.com

P.P.S. How about the location of Bill Corsair, once of WCAU radio latenight and later of WTIC-TV Hartford talkshow?

[Modertator's Note: Try M-Street it is about $40.00 and has most of the important stuff that Brioadcasting has, in a more readable and easily handlable format. They are in NYC under the name M-Street Corporation. Bill]

5832. In Praise of Barry Farber

Those who have caught my fire-breathing rebel act in this 'group will probably be shocked by this, but here goes:

I LIKE BARRY FARBER.

Not only is he the only talker on the right wing I actually enjoy listening to, he is the last actual honest-to-God CONSERVATIVE left on the airwaves. And this is for one simple reason---Farber, in his own terminology, consciously refuses to be nasty. He is capable of communicating the conservative viewpoint without finding it necessary to denude those of us on the opposite side of the political ledger of our identity as Americans. He does not try to belittle me before presenting what he believes to be the correct, and often opposing, approach to a given societal issue.

In any debate, it is always more effective to be the respectful grandfather who respects your dissent while advising against its conclusion than to be the shrill blowhard at the other end of the bar who demands that you take his side to prove you're worthy of being considered a part of the human race. The radio dial is littered with examples of the latter, and there are only three nationally-distributed examples of the former (Jack Ellery, Jim Hightower and Farber) I can think of at the moment. There just does not exist an issue-oriented talker on American radio today who cannot learn a thing or two about the fine art of respectful debate from Barry Farber.

We have in Atlanta an interesting assignment. Non-commercial WABE (the Atlanta Board of Education) operates on 90.1, but for years there were bad dead spots around town. Recently, they have been allowed to also simulcast on 107.9, and the dead spots appear to have gone.

I don't know how often this kind of coverage solution has been allowed, but it seems to be a great answer here.

Well, Steve Perry is coming to Toledo for a concert and all the local stations are advertising for it. The Ad for the concert was done by some company if Chicago I believe and they have messed up!! :(

Somewhere in the promo it says: "Steve Perry Live at the May-Sonic theatre!!". Funny this is it is pronounced Masonic (muh-sonic) It wouldn't be so bad if the voice guy only said it once but he says it about three or four times.

Along the same lines, I can foresee a way to possibly make radio
interactive, too.

I've seen how program selection on DirectTV (or was it DSS) works, and
it's similar to how you would scan a TV listing in the paper. Select
a time, scan the channels, see whats on, position the cursor box, hit
a button, do some fiddly bits behind the scenes with accounting if it's
pay-per-view, and bingo!

I just read where Digital Equipment is rolling out a bundled video server technology for video-on-demand with easy access on both ends for the operator and the customer. (Digital _kills_ when it comes to making processors faster, the first consumer available 1 BIP (that's billions of instructions per second) chip... but I digress...)

So, if you can use a menu system to pick what satellite programs you want at your pizza dish (sorry, direct broadcast whatizts dish). And video on demand is being test marketed, can radio programming on demand be far behind?

Sit down at your TV (because the interface would probably start out in a similar manner as video-on-demand) pick what musical selections you'd like... (Hmmm, start with a few new Sting songs, retro a Police tune, then pick three random selections from the Techno 80's column, etc, etc, etc...) Hit GO, and start schmoozing, or whatever. Want to play some full CDs at the office tomorrow? Not a problem, pick em now, choose the target receiver to be that ISDN capable office workstation/phone/answering machine/ pencil sharpener. Get to the office, dial your access code, and viola. Can Uncle Bill come up with a cassette sized receiver to put into walkmans so his megasat network can be backward compatible? Probably, if you put a Windows99-RadioNet sticker on it.

I could prattle on, but you get the point...

The technology to make it capable is here now.

Will it happen soon? Depends on if it get's backed by someone that can pay off the appropriate officials to cut through the quagmire of bureaucracy that it's going to entail with licensing, fees, etc.

What happens then?

5837. Gary Burbank, and Syndication

In a previous article, rspencer@netcom.com (Rob Spencer) says:

>
>>From the 12-7-94 _Los Angeles Times_:
>
>
>Big-band station KGRB-AM (900) has switched over to a "contemporary
>standards format", paired with nighttime NBC talk programming. Besides
>playing the music of such artists as Harry Connick, Jr., Frank Sinatra,
>Tony Bennett and Barbra Streisand during the day, the station now
>features a live simulcast of Larry King's CNN TV show at 6 p.m., and talk
>programs hosted by Jim Bohannon at 10 p.m. and Bruce Williams at 1 a.m.
>Big-band music is still heard from 7-10 p.m. The station, which since

This station isn't too bad, if you like this kind of music and talk. (I do)
I welcome Bruce Williams back to LA, although I wish they would put him
on at a more *decent* hour. (He's also on weekends at 10 p.m.)

>the changeover two weeks ago has been calling itself AM-90 NBC, hopes to
>change its call letters to KNBC-AM. The station has also petitioned the
>FCC for a power increase.

How much can they get, since this is on a Mexican clear channel? (I
remember picking up XEWW from Mexico City on 900 kHz once back in
1978 . . .)

5840. Will the last radio broadcaster please turn out the light

Newsgroup: rec.radio.broadcasting
Date: 1994-12-20 23:19:13 UTC
From: jerryt@touchmap.com
Message-ID: <3d7oph$fk1@vixen.cso.uiuc.edu>
Source record: 35945

Every months or so, we pack up the RV and set off across the country. Usually the destination is Las Vegas, either for Comdex or for the NAB, but sometimes its to see a client, a friend or a blackjack dealer.

Its therapeutic. We drive night and day. The states fall away, one after another. One of us sleeps, the other one drives.

We think, and plan and create. And I listen, on headphones, to the radio. We've done this for fifteen years. In 1980, I'd come back with a sense of the pulse of the country. I'd hear regionalism, and real people talking about real things that were important to them.

But today, all I hear are radiobots. Stations with machines that load and play CDs with juke box changers and machines that spew digitized nondescript and noncommittal liner cards.

And I grieve over what has happened to this industry, this profession, this art call commercial radio broadcasting. What has happened is no secret.

Its evident in the cabs of every truck we see parked in the truck stops. There are cassette machines, CD players and CB radios, video players. video games and TV sets. The truck stops rent VHS movies and books on tape.

You can return them at the next truck stop farther down the line. In the truck stops, the weather channel from the TV on the wall drowns out the country station on the PA speakers. A video monitor shows load pickup information brought in on a 1 foot data dish.

No one listens intently for the news anymore. It flashes by, never ceasing on the silent radio panels on the truckstop wall. There is no reason for radio. Its value as an entertainment medium usurped by pictures, its importance for news dissemination co-opted by data channels, it retreats to playing music for those few who don't already have music and there are less of those with each passing month.

When Drake Chenault muzzled the jocks in the 60s, the joke was that radio would be reduced to doing cab calls. In the 90s, Bud Paxton is quoted in Broadcasting as being bullish on radio. But bullish in a very strange way. "Buy spectrum," says Paxton.

Radio was once a proud pedigreed business. Stations like KFI and WLW were parts of families. Their signals were a part of the infrastructure of the country.

Farmers woke up to WGN and WOWO. WSB's building was as much a bedrock of Atlanta as its signal. In my lifetime I have seen that change, and now we are preparing to look at the radio dial the way a butcher looks at a side of beef.

Give me a half a pound...off the low end. And wrap it up well. I may not be able to use it for a while.

Jerry Trowbridge JerryT@touchmap.com

[Moderator's Note: I am afraid the last broadcaster has stood up... then left the building... Bill]

Leslie is part of Major Talk (formerly Daynet). Other Major Talk hosts include Alan Colmes, Barry Farber (both originating at studios leased from ABC Radio in NYC) and others. Barry's show is the only one cleared in NYC (on WMCA-570).

Leslie used to do an evening show on the old WNWS-790 Miami.

From: airworks@aol.com
Message-ID: <3d7oq4$flt@vixen.cso.uiuc.edu>
Source record: 35800

Word is that WNEW will soon revamp it's air schedule, cutting out one air shift and adding time to all shifts except for Scott Muni's PM drive. Mid-day guy Dennis Elsas will go back to doing weekends and Carol Miller who is currently on 10-2 at night will do 10-3 mid-days.
Seems a shame, I've always thought Dennis was one of their best jocks. Well, I guess this will give him more time for his voice-over work. No word on the reasoning behind this change. I would suspect the usual increase ratings-- reduce cost motive, though management seems to forget that these goals can be in conflict. It's hard to stay sharp in that fifth hour on the air.

Friends of mine that manage or own broadcast stations believe the government should not interfere with their rights to use the spectrum. They want not content regulation. But, at the same time, they want interference protection from other who might want to use the spectrum to "speak out".

By the way, Ted Stevens might support Public Broadcasting as much of Alaska has only one signal to hear. And it is a Public Radio signal.

5847. Ron & Ron Network - Dec. 20 show bombshell

Newsgroup: rec.radio.broadcasting

Today on the Ron & Ron Show, Ron Bennington made a bombshell
announcement (his term, BTW).
Ron announced that his partner, Ron Diaz, would be taking time
off from the show due to his wife Debbie's illness. Ronny B. announced
that Debbie Diaz had been diagnosed with AIDS.
Ron went on to explain that this had been discovered around a
year and a half ago, and that they had kept it secret until now, to
protect the privacy of the Diaz' and their family.
Bennington went on to explain that Ron D. had been tested
six (I think) times since the discovery, and his tests have always come
back as HIV-negative.
Ronny B. further explained that, as many of their listeners
have realized over the past few months, this was the reason for the
sometimes ususual behavior of the two radio hosts.
Everyone on the show was surprised and stunned by the announcement.
The show will continue, but Ron Diaz will remain at home with his wife
for the forseeable future.

For those interested, cards and letters of support may be sent to:

In the December issue of Esquire there is a short article that is as
follows:

Girls! Girls! Girls!

The Lesbian in the Rye?

Fans of the
literary stylings of Howard Stern should rejoice:The author is already plotting his next book. This time around, Stern, whose recent memoir, Private Parts, was a huge best seller, might change Genres and write a novel about-what else?-lesbians. "The book's still untitled, and the plot is vague," says a publishing insider. "But it's about babes doing it with babes. It's in really bad taste. Vintage Stern." Not unless there's scratch and sniff.

----does anyone else have any more info on
this????

: (re WOWO changes)

1190 in the Midwest (or at least the western part of it) is hashed-up
rather severely. There is KGBS in Dallas with its 12-tower nighttime
pattern; KFEZ in Kansas City with a mighty 250 watts pumping from six
flood-damaged towers; KBCO in Boulder with some flea-power nighttime
non-directional PSSA; I'm sure I've missed a few others.

While sympathetic to the cause, I still think it is doomed to failure. I
was flamed rather severely for saying this once before, and I don't have
the time this week to engage in a flame war, but I just don't think there's
much of a legal ground on which to fight this.

Something I am hoping to investigate this week is the fact that the FRC
apparently did not even designate clear channels until 1929 or 1930 or so.
Radio stations shifted frequencies several times during the late 1920s.
The first such shift resulted in NO clear channels; most had seven or eight
stations on them, geographically well distributed. I'd like to know why
that plan went out the window, other than the obvious (pictures of someone
with livestock, etc.)

Regarding the FCC: well, that's a whole 'nother post. All I'll say is
that it bears out one of my sayings, "free enterprise is great until it
works."

Hi! I've seen a number of such announcements here in recent months. Maybe a check of the archives will be helpful. Then there are a number of Usenet newsgroups: Stern, Limbaugh, Imus, etc.

Will these three help? -- one TV station and two syndicated radio shows...

CHANNEL 7 (WSVN - Fox/CNN) in Miami can be reached at news07a@aol.com and on Prodigy.

COMPUTER AMERICA PROGRAM SCHEDULE. The January schedule for Craig Crossman's Computer America and Sound Bytes is now available FREE via e-mail. Computer America is heard Sundays from 3 to 6 P.M. EST on the Business Radio Network (BRN). Sound Bytes is heard in South Florida on WJNO, AM1230 and AM1330, Sunday evenings. Send an e-mail note (no message or subject required) to computer.america@reply.net. Your schedule will arrive in your e-mail mailbox within minutes!
NOTE: Craig also has forums on AOL and CompuServe.

BIZ-TALK NATIONAL PROGRAM SCHEDULE! The Biz-Talk schedule for December 12th through the 22nd is retrievable via e-mail. Send an e-mail note to news.rosetti@reply.net. No message or subject is required. The schedule will arrive in your e-mail mailbox within minutes! Biz-Talk is a nationally-syndicated radio program heard weeknights from 9:05 to 10 P.M. on 295 affiliates of the Independent Broadcasters Network. A local edition of Biz-Talk is also heard in south Florida, from 9 to 11 P.M. weeknights on WWNN (980 kHz).
NOTE: Hope to have a January schedule available soon.

The last two are excerpts from my e-zine. NEW ON THE INTERNET is now retrievable via e-mail. Send an e-mail note to new.on.the.net@reply.net. No message or subject is required. NEW ON THE INTERNET will arrive in your e-mail mailbox within minutes! Issue #4 will be ready in late December.

Oh, it's certainly nothing new... With Internet access being so cheap,
and anyone with a modem being able to get online, all it takes is for one
employee at the station to login with his modem, and the station can hype
that they "ARE ON THE INTERNET!!!" TV stations, networks, radio
stations, even advertisers in magazines everywhere are on Internet now.

Here in Austin, there's at least one radio station and one TV station
that are-so-hip-and-with-it-cuz-they-are-on-internet. It's not a bad
thing, but it's not anything new either...

5858. North San Diego Radio Watchers Dec. 21

Newsgroup: rec.radio.broadcasting
Date: 1994-12-22 19:04:28 UTC
From: ChrisCarm@aol.com
Message-ID: <3dcijs$7e3@vixen.cso.uiuc.edu>
Source record: 35813

North San Diego Radio Watchers: Dec. 21, 1994

KKOS (95.5, 3.8kw) co-sponsored at free train ride from Oceanside to downtown San Diego on Dec. 18. The 45-mile ride was in part to get food for Brother Benno's Shelter in Oceanside; and so North County Transit could show off there new commuter train, "Coaster." Two packed trains took nearly 5,000 people to watch the annual San Diego harbor parade.

Correction to the San Diego County radio log: KFMB (760) is 5kw days, 50kw DA-2 N. The daytime signal is at 5kw to protect 740, KBRT, Avalon (10kw, DA-D). At sunset, the 50kw switch is thrown at KFMB when KBRT signs off. [Prior to sunset, KCBS San Francisco, can be heard under KBRT!]

Mr. KFI has been hosting "Mr. KFI on Computers" for the past four weeks on Sunday from 5 a.m. to 7 a.m. His normal shows are Saturday and Sunday from 6 p.m. to 9 p.m. Hanging out with Mr. KFI on Saturday was blues guitarist, Cory Stevens, from Texas Flood. Cory played a couple of acoustics sets during the 8 p.m. hour. Mr. KFI's Minon support telephone line is also active at 213.368.6787.

Does anyone have information on the magazine, "Talkers?" Please post or e-mail me.

With the correction of KFMB, and the addition of KCBQ-FM [due to an oversight on my part] the San Diego Radio Log has been updated again. For a complete list, please e-mail me.

5859. WOWO

Newsgroup: rec.radio.broadcasting
Date: 1994-12-22 19:04:30 UTC
From: Randy Meyer <rmeyer@CapAccess.org>
Message-ID: <3dciju$7e8@vixen.cso.uiuc.edu>
Source record: 35814

The WOWO discussion has started to evolve into a discussion into the larger state of radio today. I'm not sure how many of the people making inferences are familiar with WOWO or have ever even dx'ed it, but having worked there for most of the 1980's I just wanted to set the record straight on a couple of points:

1. WOWO, with the exception of a Saturday night oldies show, hasn't used any long-form satellite delivered programming since roughly 1987. (They do use CBS hourly newscasts, nights and on weekends. The only other remotely similar programming is Colts football and Indiana and Purdue basketball/football).

2. The station's ratings, while they aren't the 25 share of 1982, are respectable in 1994. Over the years, Price Communications was responsible for a number of monumentally stupid programming decisions, but the radio station is not the huge failure some writers have indicated and ratings have noticeably improved in the past couple of years.

3. While it has varied from year to year, the station has had a positive cash flow for practically its entire life. WOWO was the first station Price purchased in 1982. From that point, it was used as the cash cow to help finance the buying binge Price went on in the mid-eighties as station prices skyrocketed. Price seldom returned much money into the operation, but WOWO WAS and IS profitable.

4. WOWO has been and still is, one of the most community-involved radio stations in the midwest.

I doubt that the new situation with Pathfinder operating WOWO will change any of these facts. In fact, they will likely care more about the station and its heritage than Price ever did. (But the LMAing of competitive, self-sustaining stations like this is a good example of how far off track FCC rulings have become).

The emmasculation of WOWO's signal still is wrong for a number of reasons (which is off the topic for this particilar note) Pathfinder would be thrilled to pay the extra pennies for the "real" WOWO.

I recently wrote about 0.4 MHz spacing between FM stations in the same city, and Jeremy D. Lansman (JDL@alaska.net) wrote:

>Jeff. I am astounded I didn't know this bit of history! Do you >know the date the FCC imposed .8 mHz between nearby stations? In

I'm not sure, but it could have been 1947. That's when most FM stations moved to their current frequencies.

So I believe the 0.4 MHz spacing of co-located FM stations existed during the 42-50 MHz band and then only in 1946 and part of 1947 in the 88-108 MHz band.

Incidentally, WDRC contributed articles on the history of FM broadcasting for Broadcasting Yearbooks during the late 1930s (and possibly early 1940s). If anyone out there happens to have those Yearbooks and would be willing to send me a copy of any of those articles, I would really appreciate it! I would try to send you something interesting in return.

I agree that ASCAP/BMI should not be allowed to charge license fees for radio broadcasts played in places of business. The merchant, after all, has no control over what the broadcaster chooses to play and therefore no control over whether copyrighted material is played.

Also, as you pointed out, the broadcaster has already paid ASCAP and BMI through the nose for a license to broadcast their music TO THE PUBLIC, regardless of whether that public be at home, in their cars, or in somebody's place of business. To then turn around and charge listeners a fee that has already been paid by the broadcaster is just plain wrong.

The law, by the way, disagrees. ASCAP/BMI can apparently charge whatever they want, as many times as pleases them, for the use of their music.

Where would the music industry be without radio stations to promote their products?

There's nothing public about the music. It is privately owned, and ASCAP,
BMI, and SESAC are hired by the composers, on an individual basis, to
ensure that commercial use of their music is paid for. Merchants playing
radios for their patrons is commercial use (or re-use). If merchants do
not like it, they can play talk radio, subscribe to muzak, hire their own
songwriters, or not use any music. They benefit from the music, financially,
because it creates a more pleasing environment for their patrons.

>The point is that license fee's are payable only at the point of use by
>the broadcaster.

Where's that written? The composer owns the music, and is due payment for
any commercial use. That's the law.

>ASCAP/BMI should be brought before the F.C.C. and Congress to explain
>their activity. At the very least, they are interfering with a public
>access right.

Heh, I don't think so.

Performance rights organizations are already regulated - poorly! There is
a huge difference between regulating the way royalties are collected and
distributed and regulating programming content.
Much of what BMI/ASCAP doe is enshrined in copyright law and will take an
investigation and overhaul by congress if anyreal equitable changes are made.
I won't hold my breath - they've got great lobbiests and they have lots
of money from all those merchants who pay up rather than go to court.
But in my mind demanding payment from merchants who have radios playing
commercial braodcasts in thier stores sounds alot like double dipping.
The station is already paying for the performance, through hefty "blanket
licensing" fees (payed to ASCAP/BMI and allegedly the writer.) I think
it's unfair, and I'm a songwriter!

: [Moderator's Note: This thread started not as a flame over whether
: the composer should be paid but about whether business should be
: charged for the use of publicly broadcast programming, since the
: broadcaster is already being charged. Can we stick to that subject
: please? Thanks Bill]

The point is we as a broadcastrer pay ASCAP and BMI fees for using the music in the operation of our business. We have not paid for the business owner to use the music we broadcast in the operation of their business. If they want to use our boradcast in their store that's fine by us but they too must pay ASCAP and BMI because they are getting the direct bennifit of the music being played in their store. If they don't like paying ASCAP fees then I suggest they contact a background music company that will provide music and handle the royalty fees for them.

Did I miss something here? Do 'kickers' have different rules than other
stories? It shouldn't matter whether it was 'lighthearted' or not - the
story was simply not true and should be obvious to anyone. Someone in
Atlanta screwed up, if this was aired during a newscast - or did I
change over to Comedy Central by accident?

>I'm sure the actual script made it clear to the listener that the story
>wasn't serious and was identified as an example of some of the humor

You should have stayed with it. Memory is now 70 min record time, 8 hour
internal hard disk, 16 hours on screen. Features have also increased, with
a free software update every six months and optional hardware add-ons.
Price, however, went way down.

I use mine for network tv promos, radio spots, and general commercial
business. Productivity and profitabiliy have increased... but more
important, the clients are blown away by the edits I can make.

5872. Digital Work Stations [was Roland DM-80]

Newsgroup: rec.radio.broadcasting
Date: 1994-12-22 19:05:05 UTC
From: SDRadio@aol.com
Message-ID: <3dcil1$7go@vixen.cso.uiuc.edu>
Source record: 35827

It seems that there is a lot of buzz about digital audio workstations on the net these days so I thought I would chime in:

For the past 6 years, I've used the Pacific Recorders' ADX system to do dialog editing for feature films, Made-for-TV movies and TV series. In addition, I've used it to cut trailers and commercials and I don't think there is any better system out there! I worked in Los Angeles until recently moving to North County San Diego.

I was lucky (or unlucky depending on how you look at it) to be involved with DAW's when they first came out and I got a chance to check out most of them.

The DSE-7000 was cool for about week. It ran out of memory and I ran out of patience for its limited features.

Using the Korg was like walking on a windy day in Chicago--one step forward, two steps back. Can you believe it actually takes three steps in a special "mode" just to move a sound from track 1 to track 2?

The Roland is a toy just like their old drum machines. The faders on the mixing surface are so small you can hardly see them let alone use them. There's something about a controller built out of plastic that makes me think "cheap!"

I tried the Fostex Foundation 2000 at the AES Show in San Francisco this year and the salesman said he couldn't show me the "revolutionary digital mixer" because it was so buggy there was only one guy that knew how to work around all the glitches.

"Slow Tools" speaks for itself. If you have a year to learn it and a day to cut each 30-second spot, then Slow Tools is the DAW for you.

Under pressure and under the wire, I've never come up short with a product using the ADX. I suppose that's because PR&E designed their system for professionals. Although "intuitive" is an overused, abused and misused descriptive term when referring to DAW's, the ADX does some of your thinking for you--that is my definition of "intuitive." The graphics are very logical and most functions require only touching one button. Moving a sound from track to track is a matter of selecting the sound and dragging to the desired track. What could be more intuitive?

And to the guy that says these things don't make you any faster...you're probably using the wrong system. I was doubling my product output within the first month with the ADX. And my product wasn't "close enough" like it was with analog, it was at worst "close to perfection."

I'd be interested in hearing from anybody who has entered the DAW world and is happy or unhappy with their current situation.

-Steve

Nope, you're thinking of Dennis O'Mara of Shadow Traffic (ex-WJLK-FM Asbury Park, as am I). Denis McNamara, as I posted earlier, works for PolyGram and is doing well.

5877. FM allocations - New York City

Newsgroup: rec.radio.broadcasting
Date: 1994-12-22 19:05:18 UTC
From: jeff560@aol.com
Message-ID: <3dcile$7hk@vixen.cso.uiuc.edu>
Source record: 35832

The following is a history of FM assignments in New York I compiled. It shows the 0.4 MHz spacing between FM stations which existed in the original 42-50 MHz band and in the 88-108 MHz band in 1946-47.

Here is how the 42-50 MHz band looked toward the end of the band's existence:

42.1 WNYE
43.1 W2XMN/WFMN
43.9 WNYC-FM
44.7 W47NY (WGYN)
45.1 W2XWG (W51NY, WEAF-FM)
45.5 W55NY (WFGG)
45.9 W2XQR (W59NY, WQXQ)
46.3 W63NY (WHNF)
46.7 W67NY (WABC-FM)
47.1 W71NY (WOR-FM, WBAM)
47.5 W75NY (WABF)
49.5 W95NJ (WAAW)
49.9 W99NY CP Frequency Broadcasting Co.

The original 1945 proposed 88-108 MHz assignments were as follows: 96.9 WBAM, 97.3 WABC-FM, 97.7 WEAF-FM, 98.1 WNYC-FM, 98.5 WABF, 99.3 WHNF, 99.7 WFGG, 100.1 WGYN, 100.5 WQXQ, 100.9 WFMN. A second 1945 proposal was as follows: 94.5 WNYC-FM, 95.7 WAAW, 96.1 WGYN, 96.5 WBAM, 96.9 WABC-FM, 97.3 WEAF-FM, 97.7 WQXQ, 98.5 WABF, 98.9 WFMN, 99.3 WHNF, 99.7 WFGG.

The actual 88-108 MHz frequencies in use in 1946-47 were as follows:

91.7 WNYE
92.1 W2XMN/WFMN
95.3 WNYC-FM
95.7 WAAW (WAAT-FM)
96.1 WGYN
96.5 WBAM
96.9 WABC-FM (WCBS-FM)
97.3 WEAF-FM (WNBC-FM)
97.7 WQXQ
98.1 WGYN
98.5 WABF
98.9 WFMN
99.3 WHNF (WMGM)
99.7 WFGG (WGHF)

During the 1946-47 period, some of the stations continued to operate simultaneously in the 42-50 MHz band. (In fact, some used both bands in 1948, and Armstrong's W2XMN continued in both bands beyond 1948.)

The next list shows the allocation scheme which went into effect in 1947 (and which continues today). It appears there was no single date on which stations changed frequencies, as there was for the AM band in 1941. Stations generally were off the air for extended periods in order to make the necessary adjustments.

88.3 WBGO
89.1 WNYU and WFDU
89.9 WKCR
90.7 WFUV
91.5 WNYE
92.3 WMCA-FM (WHOM-FM, WKTU, WXRK)
93.1 W2XMN (KE2XCC, WPAT-FM)
93.9 WNYC-FM
94.7 WAAT-FM (WNTA-FM, WFME)
95.5 WJZ-FM (WABC-FM, WPLJ)
96.3 WQXQ (WQXR-FM, WQXR)
97.1 WNBC-FM (WRCA-FM, WNBC-FM, WNWS-FM, WYNY, WQHT)
97.9 WGYN (WEVD-FM, WEVD, WSKQ-FM)
98.7 WBAM (WOR-FM, WXLO, WRKS)
99.5 WABF (WBAI)
100.3 WMGM-FM, WNJR-FM, WFHA, WVNJ-FM, WHTZ)
101.1 WCBS-FM
101.9 WGHF (WBFM, WPIX-FM, WQCD)
102.7 WNJR-FM (WNEW-FM)
103.5 WPAT-FM (WTFM, WAPP, WYNY)
104.3 WFDR (WNCN, WQIV, WNCN, WAXQ)
105.1 WWRL-FM (WRFM, WMXV)
105.9 WHBI (WNWK)
106.7 WRVR (WKHK, WLTW)
107.5 WLIB-FM (WBLS)

If anyone sees any omitted calls or other errors in the above list, please let me know.

Jeff Miller jeff560@aol.com

5878. National FM radio station list?

Newsgroup: rec.radio.broadcasting

I need to find a list of all FM music radio stations in the U.S. with addresses and phone numbers. Does anybody know of any such list on line? I found a few web pages, but they only pertain to stations hooked up to the internet.

Is there a radio industry home page?

I've tried the web, gopher and a telnet search....but no dice.

Any ideas or suggestions would be appreciated.

Thanks,

Scott Smith (aka Viro)

>-Bill Sobel (BSOBEL@aol.com)
>

I still have my HD414's also (might even have the box). The foam pads
deteriorated early on, and at the time I inquired, Sennheiser wanted
close to the price of the phones for a set of new pads. I ended up
using Radio Shack generic "large" headphone pads, which don't fit
as well, are thinner, but still enable use of the "open-aire" 414's.
Hard to find 2000 ohm headsets anymore.

Couple of things. First off, does anyone know of stations that air radio advertorials (informercials) I know of WPGC/DC and WEVD/NY and that's it. I've produced some informercials and need to find a list of stations for either a cash deal or P.I. Some of my clients have products that will fit in well with music radio formats who wish to make some money during weekends or other down times...

Secondly, I, (Roberta Gale) am filling in for the morning show on my ld station, WMMS/Cleveland from Dec. 26 to the 30th. I've been in talk radio for the past 4 years, but it will be fun to get back to playing some rock....anyway, If you need someone for fill-in for either "hot" talk radio (I hate that term but I don't know what else to call non-old-fart talk radio) or a personality intensive morning or afternoon music show, let me know. Post me a note to my attention, Roberta Gale, my address is DSO@clark.net. I'll be glad to give you info or even send an aircheck. If you've never heard of me, I've been in radio 14 years, and have worked at KRQ/Tucson, KNEW/San Francisco, KNST/Tucson, WMMS/Cleveland, Power 99/Atlanta, Power 96/Miami, B104/Baltimore, WCBM/Baltimore, New Jersey 101.5, and I most recently co-hosted a humourous/topical talk show on the Westwood One/Mutual radio network with another woman. Hope to hear from you soon....

5883. An introduction

Newsgroup: rec.radio.broadcasting
Date: 1994-12-22 19:05:41 UTC
From: Matt.Francis@admin.utas.edu.au
Message-ID: <3dcim5$7j4@vixen.cso.uiuc.edu>
Source record: 35838

Being a new subscriber to Airwaves I'm taking up the invite to send an introduction and a bit of a rave about the radio scene here in Hobart, Tasmania.

I currently work in the media office at the University of Tasmania, in Hobart, the capital city of Australia's island state. My background though is in radio news, and I sometimes step in to fill the breeech at a local FM commercial station when one of their full-timers is sick or on holidays. Despite branching out in a wider public relations field, I still have great affection for radio and its people and may one day (I hope) return on a full time basis.

A bit about our local market: Tasmania has a population approaching half a million, spread over three areas - the 'south', including Hobart (180,000 pop.), the 'north' which centres on Launceston (80,000 pop.) and the 'north-west' which includes the towns of Devonport and Burnie (about 20,000 pop. each). Our rugged west coast, mostly mining mining and fishing, is sparsely populated - the biggest town is Queenstown (1,500 pop and declining).

Naturally, most radio activity is centred in Hobart, being the capital city.

We have three commercial stations - two FM, and one AM. The FM stations are TTT-FM 100.9 mHz, and HO-FM on 101.7 mHz.

TTT was Hobart's first commercial FM station and arrived in town with a blast in the middle of 1990. HO-FM was an AM station, around for as long as anyone can remember, and switched to FM also in 1990. TTT is what you'd call a 'classic rock' station I guess, while HO-FM is just about all things to all people with a mix of strong personalities ('Cook and Moore') for breakfast, a bit of news, and music from the 60s, 70s, 80s and 90s.

Our lone commercial AM station is 7TAB and is the classic tale of a once-mighty AM station gone to the dogs - literally. It's now owned by the TAB (hence the callsign) - the people who run horse racing, greyhounds and anything else you can lay a bet on. 7TAB was once known as 7HT which in its heyday during the 60s, 70s and early 80s was *the* station in Hobart. An amazing array of talent around OZ has at some stage worked at 7HT. The rot set in during the 80s when the station took on horse racing, fiddled with formats ranging from 'Classic Hits' to 'NewsTalk' before eventually falling over and just following the horses around the track.

I got my start at 7HT as a fresh faced 'cadet' journalist in 1988 as it was just starting to fade. (Pure coincidence of course!) They had 7 journalists in the newsroom then providing a first-class news service - now, there's just one guy between 6am and midday. I wonder how many other

news people have fought to keep their few minutes of the hour way in front of the competition's product only to watch the rest of the radio station fall apart around them. It's a depressing & frustrating experience.

Most of the audience, and clout, in town is taken by one of the networks run by the ABC - the Australian Broadcasting Corporation, our national taxpayer-funded radio and TV institution. And, it offers an array of programming that only taxpayer funded organisations can - at least five different networks at last count. (The subject of a Senate inquiry at the moment, various ABC staff have bemoaned the lack of funding which apparently plagues the organisation - nationally, they get more than $500 million a year. One Aussie dollar = 0.75 US cents. Their gripes tend to fall on the deaf ears of those of us who have worked for commerical stations.) Here's a quick summary:

7ZR, 936AM: the 'metropolitan' station - local news, talk, sport, music etc. Wins all the ratings, its personalities are omnipresent in the daily lives of listeners (ie over-exposed for the rest of us) and very much a part of the Hobart way of life.
7RN, 585AM: 'Radio National', serious, very serious news & talk and the meaning of life etc. Despite almost non-existent ratings, is quite influential and boasts top quality programming. Appeals to the cultured intellectuals, or those who like to think they are!
7PB 729AM: the 'Parliamentary & News Network' - a recent innovation, offering 24-hour news and information, or live broadcasts of parliamentary sessions - one for the information and politics junkies only.
ABC Classic FM, 93.9 FM: part of a national network of stations offering classical and other fine music with a devoted following
Triple J, 92.9 FM: the so-called 'youth' station, networked nationally, and prides itself on playing 'new' music and songs with lots of naughty words that the opposition can't and won't play. A rising star, although at times borders on the self-congratulatory. (it's OK to use the *f* word, and others, on the ABC because they're not subjected to the same kind of content restraints as commercial broadcasters.)

Hope this gives a feel for the radio business 'down under' down under.
Happy holidays everyone.

Matt.

The KHTX story gets interesting......

KHTX-AM (590) returned to the air this past week with new calls (KSZZ), a new moniker (La Super Zeta), and a new format (surprise, Spanish something).
However, KHTX-FM (97.5) is still off the air. Radio & Records reported that they may come back as RELIGIOUS! Contradicting every rumor to date. Initial scuttlebutt said Spanish Country (Banda), and that would make more sense than religion. Let's do the math. Big Hispanic Population & No Local Spanish FM = GIANT POTENTIAL! If they went Spanish, I'll predict that within 6 months, they would have a 7 share and be in the top 3 in Riverside/San Bernardino. If not, I'll be VERY surprised.....

I'm the owner of the FM CP for Jewett, NY, a 6kw class A on 97.9 mHz.
Jewett is a small town located between the ski towns of Hunter and Windham
in Greene County, a weekender area for NYC area professionals.

I am looking to build this station during in1995 and am interested in
finding out if any broadcaster would be into doing an LMA with me.

Contact me here and I'll fill you in on the details of the station

Carmine.

I used to listen to Leslie Marshall every night from 2-4AM (I was doing a paper route) on 970 WFLA in Tampa. I believe she is syndicated out of New York, not Chicago. This was about a year ago so I'm not sure if she is on WFLA. Her schtick is pretty simple, she's a bleeding heart liberal. She wines a lot about various social ills, especially related to women. She has lots of callers and she tends to lose the arguments with them. She has "low-profile" guests (mayors, social workers, wardens, democratic national committee staffers, congressional staffers, etc.) She tends to talk to her engineer a lot.

Heard something this afternoon on the tail end of the ABC Information Network newscast -

Apparently there are reports that EFM Media founder Edward F. McLaughlin, the man who plucked Rush Limbaugh from a KFBK local talk show and brought him to the national audience, is trying to get outgoing New York governor Mario Cuomo to do a talk show.

The report was a short one... no details beyond the above. Anyone else have more information on this?

Mike

Being away from work for a while, I've missed parts. However, I had to respond to this...

In article <3ckt4v$gbe@vixen.cso.uiuc.edu>, "Michael Black...WEOS-FM" <BLACK@HWS.EDU> wrote:

> letting the tax dollars go farther, which is exactly what they want to happen.
> FOr years, Congress has allowed us to give $1 of our taxes to a campain fund.
> How about a box to write in what you want to spend a $1 of your taxes on?
> Public Broadcasting, Deficit Reduction, Newt's Presidential Campaign (yeah,
> scary , isn't it?), etc. could all be given an equal treatment in this regard.
> My few cents worth.

My question: why put it on a tax form? People who want to support public broadcasting ought to do it without having to be nudged by the IRS. That way, more of the money will go to public broadcasting, instead of it being "administered" by the govt.

With that said, I'm going to step out of this thread. I think all the points have been brought out and we're starting to repeat ourselves....

Good point. And as stations have been bid up in price, only the most
mainstream, conservative companies seem to be able to leverage the cash
to buy them, making the free flow of information into more of a trickle.
And yet, there are those who would want to shut down NPR, Pacifica, and
such. I hope this is just an odd little blip in our public consciousness
-- I'd hate to think we're headed for fascism, yet it certainly looks
that way.

A group of swell, students are currently in the process of starting
up a much needed radio station in the college town of Logan, Ut. Being one
of the heads of this project, I was wondering about how royalties work and
how much it costs to air one song, on average, and what an average rock
station might pay in royalties per month. Out of all the details that we
do have worked out, this one escapes us. Also, how do we obtain permission
from the companies to play thier CD's, recieve promotional copies and play
CD's that we currently own? I've heard speak of "royalties" but found
so little about the system, and whether it may tip our expenses too far.
All informnation on this regard would be well recieved, via this
newsgroup or even better on email.

Somebody just sent me a fantastic cassette filled with song parodies
such as "Mayberry Rap", done by former Philadelphia dj Rick Rumble.
I've tracked his movements from Philadelphia to San Diego to New
Orleans, but the last word I found was in October, 1994 that Rumble
was being dropped by his New Orleans station (WEZB I think).
Has he resurfaced elsewhere?
Thanks in advance.

I'm in the process of compiling a list of soccer broadcasts that are available on radio (regular broadcast and SW) and Satellite. While it would be helpful to all to post, please also e-mail me at Philsoc@aol.com to make sure I don't miss any postings.
I'm aware of BBC's Saturday broadcasts (by the way, a special Monday broadcast is set for Dec. 26 (I believe it starts at 12:15 ET)
I know Deutsche Welle and REE (Spain) also provide commentary, but I need the specific info (freq. day, time, etc.)
I'd also like input from fans of APSL, USISL, NPSL, CISL clubs who are aware of regular radio broadcasts of their games (need station call letters, freq., and how often; i.e. every game, raod games, etc.) I'm not looking for future plans, unless they are already set in stone.
Also regarding satellite broadcasts in specific...anyone who has the new RCA mini-dish system, please let me know how much, if any soccer is available there.
Thanks,
and Happy Holidays...
Phil :)

Yes it is true that AM bandwidths and transmission bandwidths were broader in the 60's.

However the FCC persued a course of quantity being better than quality. As interference from too many stations increased the receiver manufacturers responded with narrower bandwidth receivers.

In the 60's receivers were about 8 KHz wide with a gentle roll-off to 15 KHz by the late seventies the radios were reduced in bandwidth to 3 KHz or less with very hard, steep, and awful sounding filters. In part the G. E. SuperRadio sounds so good because it has no brickwall filter but a more gentle "Haystack" response and in the wide mode it is close to that old 8 KHz response.

In this overcrowded AM band, where every channel is maxed out, we must live with the physics that for every Hertz that broadcasters exceed the 10 KHz bandwidth the receiver manufactures must decrease the bandwidth by the same ammount. Therefore if the broadcasters want to broadcast 15 KHz we will get 5 KHz radios and at 12 KHz we get 8 KHz radios. 10 KHz is the magic number where we get the most bandwidth in the receiver. It must be understoon that the NRSC and broadcasters only applied a 10 KHz response to get wider radios to the market. The wider bandwidth receivers you see on the market are a result of the NRSC's efforts.

5902. Stauffer Broadcast Properties for Sale

Newsgroup: rec.radio.broadcasting
Date: 1994-12-22 19:06:37 UTC
From: transvox@interstate.net
Message-ID: <3dcint$7n9@vixen.cso.uiuc.edu>
Source record: 35757

One of the country's few remaining newspaper-radio-TV combinations
will break up because of an acquisition that becomes final in two
months.
Morris Communications of Augusta, Georgia plans to close on its
purchase of Stauffer Communications of Topeka, Kansas on February 28.
The Kansas City Business Journal on Dec. 16 quoted Stauffer
president Frank Shepherd as saying Morris will not actively seek
buyers for Stauffer's radio and TV stations until the Stauffer sale closes.
Stauffer owns the Topeka Capital-Journal and WIBW-AM/FM/TV in Topeka,
as well as KMIZ-TV in Columbia, Mo.; KGNC-AM/FM in Amarillo, Texas; and
other TV stations in Wyoming and California.
The Business Journal quotes Shepherd, "Realistically you have up to
three years to find a buyer" once the clock starts ticking from the FCC's
cross-ownership rules.
One broker contacted by the Business Journal, Jim Blackburn of
Alexandria, Virginia, said, "I haven't heard anything about who might be
interested in those stations."
Stauffer also runs the Kansas City Royals baseball network, and other
radio networks. Morris is paying $283 million for Stauffer.
WIBW(AM) is a news/talk station at 580 kHz that shares time with
Kansas State University's KKSU. WIBW-FM is a satellite-fed country station
at 97.3 mHz. WIBW-TV is a CBS affiliate on channel 13. KMIZ-TV is an ABC
affiliate on channel 17. KGNC(AM) is a farm/talk station on 710 kHz (I
believe 10 kw-D, 5 kW-N, DA-2); I don't have data readily at hand on
Stauffer's Amarillo FM (it may not be KGNC-FM).
It is not known whether the radio/TV combination will be broken up in
Topeka as well. My sources in that market tell me that WIBW-TV is a highly
profitable station, with profit margins approaching 30 per cent. However,
it might be difficult to sell WIBW(AM) because it's off the air five hours
every weekday afternoon to make room for KKSU.

The Greaseman radio approach is very stylized. I find that his biggest fans are generally other radio people. Most of them agree he's exceptionally talented, but not very mass appeal.

By the same token (since you made a reference to him), a lot of those same radio people don't seem to like Howard Stern. Couldn't tell you how much of that was based on all the wrong reasons, such as jealousy and resentment. If someone didn't like him because it just wasn't for them, that'd be one thing, but that doesn't seem to be the case.

To Mark and everyone else following Western NY radio...

First, I didn't think anyone remembered me from my days
at WBEN except myself and the ghost of Jim McLaughlin, but
I'm the same guy...and as to Allan Harris, he is still at WHAM
doing afternoon and evening news, an hour of late night talk
from 10 to 11 pm, and a Saturday morning show. (Makes for a
hell of a short turnaround and little sleep Friday night.) He
actually was the strongest competition I've faced in the midday
talk slot here in Rochester, especially for 25-54s, but he was
far too moderate in his views for WHAM management. So
ideology prevailed over Arbitrons and good business sense, and
exiled him to late nights. Allan's a class act and a strong per-
former (not to mention a genuinely nice guy) and he deserves
better.
The agenda of WHAM's management and ownership is
unmistakeable as soon as the non-partisan (and still popular)
morning show ends...and it has helped them drop from a 15
to a 9.6 share in a little over a year. However, I don't think that
matters to them as long as they raise enough revenue from
mornings and the evening news block to make the nut, and so
far they're still doing that...but I KNOW some accounts and
agencies are avoiding them because they don't want to be per-
ceived as endorsing radical views. Stations with the same
numbers in the Rochester market are outbilling WHAM by over
a million dollars annually. Personally, in their shoes I'd offer
a little more balance in the lineup just on grounds of offering
more interesting radio, and you'd better believe I'd do it in a
Western New York minute if I knew it would make me an ex-
tra million a year. But just from a selfish perspective I hope
they don't...they have no idea how much they're helping me...
Bob Smith, middays WXXI/1370 Rochester NY

Yeah, it takes a lot of grit to stay in this business...and developing a taste for Spam and Mac & Cheese, eh?

I started at KIOA/940AM when I was 19 and did grunt work/weekends then moved cross-town to KDMG/103.3FM and worked for three different PDs during almost 5 different formats, eventually landing latenights. That station was sold and I went to KIOA/93.3FM for a short gig and back to the guys who bought the other station, now KFMG/103.3FM...now I'm nearly 27 and an APD/MD.

Yet, I still get a craving for Spam now and then. Yeah, this biz is worth doing, but it's almost a disease there's no cure for 'cept doing it, eh?

John Higdon <john@bovine.ati.com> writes:

>It cannot be had both ways. Either there are too many stations jammed onto
>the airwaves or there are not. The concept of buying up stations in order
>to turn them off is not new. It is the marketplace mechanism to weed out
>the excess. The alternative would be for the FCC to tap certain station
>licensees on the shoulder and ask for their authorization back.

And we saw how THAT worked back in 1927, didn't we? :-) John's argument is in general a good one...but I don't think it holds water in the case of WOWO. ICBC isn't buying WOWO in order to turn it off completely, or to clean up the AM band (unlike, say, WINS' attempt to clean up 1010 by buying and shutting down KBIS Little Rock and WRNJ-1000 in NJ). What ICBC's plan would do is to make 1190 more crowded in the east. To recap, 1190 in the east right now consists of WOWO, with 50 kw nulled completely to the west, but with a strong signal everywhere to the east. It's a lot like 1160 out west, with KSL dominant at night. If ICBC's application is approved, 1190 in the east would look like this:

WOWO Fort Wayne - 9800 watts, nulled to NY, Portland OR, and Dallas
WLIB New York - 30000 watts, nulled to Fort Wayne and Dallas

And that's just the tip of the iceberg. With WOWO's dominance gone at night, it's a pretty safe bet that large 1190 daytimers like WANN Annapolis MD and WGKA Atlanta GA will look for significant night power. And the little 1190s, the 1000-watt daytimers in places like Cobleskill NY and Bluefield VA, are more than likely in line to get a few hundred watts at night as well. Want to hear what THAT mess will sound like? Just hit up 1200 in the east, or 1190 in the midwest some night. Just one more local channel.

So opposing the WOWO deal is completely consistent with supporting a situation like the WINS-KBIS-WRNJ deal. ICBC's application will add to, not take away from, the noise on the AM dial, especially for listeners between Fort Wayne and NYC, in the mutual nulls of WOWO and WLIB.

>The AM band is hanging by a thread as it is. It is inevitable that some
>thinning will occur. The manner and nature of that thinning will be of some
>discomfort to someone, somewhere. Sorry 'bout that. But you cannot run
>stations on thin air. If a signal cannot support itself, then it is just a
>matter of time before it is put out of its misery.

Again, true in general. But again, this case is sui generis. WOWO-AM was, as I understand it, quite profitable. There's a reason Bob Price held on to WOWO longer than any of the other stations in his group. There's

also a reason he insisted on selling it to ICBC when he sold -- and that's because of Price's personal friendship with ICBC's owners. They made a handshake deal years ago that ICBC would get the first shot at WOWO when Price wanted to sell. Remarkably enough for this business, this particular deal has more behind it that money -- and less as well, when you consider that ICBC ends up with a 50/30kw NY AM for the cost of engineering fees, legal fees, and the small difference between the price ICBC paid for the unmodified WOWO and the price Pathfinder will pay for the castrated WOWO.

By the way, a contract exists, should it be needed, for Pathfinder to buy WOWO unmodified from ICBC. Clearly Pathfinder believes it can run the full 50/50kw WOWO profitably, and with good reason. You have to work hard *not* to make a profit on a station with the kind of signal, programming, and listener recognition WOWO enjoys. The thing about ICBC is, they don't care about making a profit from WOWO. The whole deal is to create a full-time AM in New York City without having to pay full stick value for same.

>If a station is so marginal that turning it off (or crippling it) makes
>economic sense, what more is there to say? If it is just taking up space
>keeping some really money-making station from reaching full potential, let
>it go. Until and unless you are prepared to go for government funded and
>operated radio (ANOTHER way the government can waste our money!), you are
>going to have to let the free market make the appropriate adjustments.

Again, agreed in general -- until you hit a case as egregious as this one...especially when there are other options. As has been noted many times, WLIB still has a pending application for night operation on 1200, COL Yonkers NY. I still believe it's possible, with a cooperative WOWO (and now that ICBC owns WOWO, that's a given), to engineer night power for WLIB on 1190, from the current site, with a concentrated pattern across to Manhattan and Queens, then out over LI and the ocean. WOWO could keep on doing what it's been doing, WLIB would get its NYC coverage at night, and ICBC could then sell WOWO to an operator interested in WOWO for more than its dial position. And if that's no good, well, let the fair market rule. Stick value for a NYC full-time AM right now appears to be about 10 million dollars at the low end. Let ICBC do what anyone else who wants a full-time AM in NYC would have to do -- make an offer on a station like WKDM-1380 or WZRC-1480.

Hmm, there are "newspapers", sold right out of newsracks on the
street (at least here in LA) that feature nudes on the front
cover, and x-rated material inside.

Big Bob Smith had this to say..

: But I wonder something else...if WOWO is pulling in its pattern and
:cutting power further, does this mean KEX can spread out its night
:pattern and stop protecting it? Could KEX, which will be at least 2000
:miles from any of these stations and now the only fulltime Class 1
:station on the channel, now go non-directional or close to it, and be
:heard in the east for the first time in probably a half-century?

Probably not. There is also an 1190 in the Greater LA area, KORG, which is

licensed to Anaheim. (Digging M-Street directory out from under wife's
homework....) These are the stats:
10kw-D/1.3kw-N DA-2
(app 35kw-D/1.3kw-N DA-2)

They have a 5 tower array in the Chino Hills north of Anaheim and the like
along the 57 freeway. They can be heard in much of Los Angeles county as
well but are sometimes spotty.
Formatically, it's a REAL melting pot. They are time-brokered.
During the weekdays, they run Asian programming. Weeknights, (most of the
time) it is a simulcast with sister Adult CHR KEZY (95.9)
Weekends can be quite interesting, live talk one hour and Spanish hits the
next.
They used to run the BBC World Service on Sunday nights.(Which I LOVED on
my way to work to play Michael Bolton records..)
Realistically, this station doesn't serve any purpose, other than to
collect the checks from the people buying the airtime. WIN Communications,
who own KORG, could do much better than this. They can't possibly be that
destitute to have to resort to Time Brokerage. Go satellite, do BBC 24
hours, do something creative (Hey, There's a thought in radio!).

For radio listeners in the Pacific Northwest, KOMO Radio (AM-1000) will carry the Disney "Wonderful World of Christmas" special from 6-9 p.m. (PST) Christmas Eve, and repeat it noon-3pm Christmas Day.

KOMO will also run 12 hours of classic Christmas radio shows throughout the holiday weekend: Burns and Allen, Jack Benny, the Lone Ranger, etc....and will broadcast "A Christmas Carol" with Lionel Barrymore at 9pm Christmas Eve.

Happy Holidays!

Hello all:

I am going to take a much needed haitus from my daily chores of moderating this group for the week between Christmas and New Years.

I will return to active status on Jan 2 1995. Please hold your submissions until then. I will try to log in before then but I am not promising anything. We arehaving family in from out of town and I will be dealing with that.

I am recovering fairly well from my accident and my mother was released from the hospital on Friday and she went to the local country dance on Wednesday <yay mom>. She is walking with a cane.

Again, thanks for all your letters and cards over our accident. Mom was quite touched that perfect strangers sent to her.

See ya next year..

Bill

Someone was asking about Annalisa, formerly with CR WZLX and, very briefly,
with WBOS....[By the way, when she was axed from 'ZLX in March 1993
the morning shift was filled by their current PM drive man, Chuck Nowlin
for about 4 months until "Captain Ken" Shelton took over the morning
show in late July 1993.]

Currently, she's on irregular schedule(varies from week to week) as
a part-timer at AOR WHJY 94.1FM in East Providence,RI.

I believe Anne Cody and Chuck Nowlin are the only 2 full-timers
left over from pre-Infinity regime....List of former 'ZLX personalities:
Bill Smith,Jeff Gonzer, Annalisa, Liz Solar, Greg Madden, late John
Popovich....Did I miss anyone?

Regards,

-Mark

5922. Buffalo/Toronto Radio Watch(12/23)

Newsgroup: rec.radio.broadcasting
Date: 1994-12-24 04:23:51 UTC
From: ag365@freenet.buffalo.edu
Message-ID: <3dg7on$3d1@vixen.cso.uiuc.edu>
Source record: 35776

Happenings in the #40 market:

*Three of WGR's air personalities made news this week.

First,Chuck Dickerson("The Coach")became a target of Bills head coach Marv Levy during the latter's show on the Empire Sports Network(a regional sports channel)Monday night. Levy said that most of the players regarded him as a buffoon,and that what he did as a member of the coaching staff of the Bills was destructive-for that matter,wherever he coached,according to him. Dickerson held an improptu news conference during his show Tuesday to rebut the charges. In regards to the buffoon charge:"Why did he fire me? He hired me,and he kept me for 5 years. I was a buffoon for 5 years?" On the matter of what was done while on staff at the Bills:"He's the last guy in the world that wants to go to the media with anything...He tells you nothing,he says nothing and he hew-haws around. He was very pointed in his comments with me, so I must have hit a nerve." Callers backed Dickerson,while the players sided with Levy. Recall that this isn't the first time that someone in the Bills front office has gone after someone in the media. Many years ago,GM Bill Polian,in a tirade directed at a few media members-but most directly at Art Wander,then doing sports talk on WGKT(now WWWS;it was satellite oldies,then went hard rock/metal as WXBX-Rebel Radio 14X before switching to business)-told them to "get out of town." Polian did,they didn't. He's now GM of the Carolina Panthers.
Second,Rich Michaels(the midday motormouth)organized a carol-singing at a Williamsville school(the town has come under fire for a religion policy instituted in the schools). For all his promotion,it only drew 200 sustained-although he said,at the peak,about 400 were there-if only for a few minutes. I tell you,it does warm the cockles of my heart...:> He said this was intended to show you can have fun during the holidays(or something to that effect). Be honest,Rich...it was only intended to make you look good and get ratings. I was born at night,but it wasn't _last_ night. :) BTW,Channel 7 was the only one that gave you any sort of coverage-about 7 minutes into the newscasts at 5 & 6pm,Channel 4 put you at the _END_ of the 6pm news,and Channel 2 didn't put you on at ALL-instead,they ran stories on what the policy actually does.
Another note:Today,he FINALLY brought up the fact,which was noted here weeks ago,that he was doing commentaries in another market. He didn't say which one,but he did say that it paid him $1,000/month. Michaels claimed he ended it because he wasn't going to be PC. Two letters,Rich:BS. Sure you did. I think-but can't prove-that there's more to this that meets the eye.
Finally,Tom Bauerle had some sage advice for a person who called his show on Tuesday,when a Wal-Mart stroe on Amherst was robbed(which hit home for me,as my brother was working in the store at the time). The caller was with his children in his apartment,and asked Bauerle what to do. Tom,remembering what former Jimmy Griffin once advised us to do in a snowstorm years ago, told him to grab a six-pack and stay inside. As the Buffalo News' Buzz column

noted,"Yeah,that's what we need-not just a terrifed man sheltering his kids, a terrified,_boozing_dad sheltering his kids."

*Twelve stations are sponsoring individual sites at next Saturday's First Night Buffalo,a drug-&-alcohol-free celebration. Here they are:

-WGR:dance at the Buffalo & Erie Co.Public Library
-WUFO:jazz & blues at Fleet Bank downtown
-WECK:barbershop quartet/puppet theater at Main Place Mall
-WBUF:comedy & kazoos at the YWCA Auditorium
-WBLK:lip-synching at the Convention Center
-WJYE:kid stuff,also at the Conv.Center
-WKSE:The Box(the other music channel)Video Dance Party at the Erie Comm. College Atrium
-CKEY(FM 101 The Planet):McCarthyizm & Wisdom of Children at the Conv.Center
-WDCX:Christian groups at the Buffalo Christian Center
-WGRF:Party Squad & ball drop at the Niagara Mohawk building
-WMJQ:athletics at the ECC City field house
-WHTT:50s & 60s music at the M & T atrium
-WYRK:country at the Conv.Center
(Special note to Mark Shneyder & Scott Fybush:if you're at First Night Boston, you just might see what's happening here,as NYNEX is hooking up all sites in its service area.)

*I fouled up the Fox liner in my last report-it's at the end.

*Finally,I'd like to thank ANYONE who's corresponded with me this year: WBFO's David Benders,Mark Scott & Mark Wozniak,WXXI's Bob Smith,WJYE's Ben Bass,WHTT's Tom Schuh,97 Rock's Darren McKee,Eric Anderson Zych at the Univ. of Rochester,Scott Fybush,Ed Janik,Mark Roberts,Tom Leykis,plus others. I took on the job of doing this because I felt-even more now than then-that Alan Pergament of the Buffalo Lose(oops,News)treated radio like the bastard stepchild you never see. It's not easy,but I do my best. Thanx again!
Next up:1994 in Review and the Muckonis.

See you in 1995 and TTYL...!

C.K.G.

WJRR-101.1 Cocoa Beach FL (JRR=Just Ron & Ron, Just Rock N Roll) has
various shirts and hats for sale. The ad is on the back of their bumper
sticker,
available from their plush office in the Maitland FL office park. Check your
M Street Directory for the address. I was incensed for a second because
everything's around $15 but then as I exited the building where Paxson's
WWNZ/WWZN(wprd actually)/WJRR/WMGF are housed, I remembered
that familiar chant "a radio station is a business, and businesses try to make
money." WWKA Orlando has a whole bunch of T Shirts for sale on display
in their front lobby, but most are of country music artists.
WDHA Dover NJ always has a few TShirts/sweatshirts/gym shorts available.

Also the "Stix Tipz" column in "DecalcoMania" sometimes mentions
stations with T Shirts. Although Stickers were the original focus of the column,
all promotional items can be reported to the column. If you would like
a sample of DecalcoMania, send me email. The club publication covers
all radio-related collectibles, including airchecks and jingles.

I'm happy to hear that some of these old shows are being broadcast
again. It got me to thinking, though, that the time period involved for
most of these shows is about 7 years, usually 1941 to 1948. And *that*
got me to thinking that Dan Rather has been doing the CBS Evening News
longer than there's been a Golden Age of Radio.

Subject: Will the last radio broadcaster please turn out the light

Jerry Trowbridge sent out via the super-highway:

>Radio was once a proud pedigreed business. Stations like KFI and
>WLW were parts of families. Their signals were a part of the
>infrastructure of the country.

I'm going to disagree with the above statement: in southern California, KFI is part of many families. The standards they set are paramount, and looked at by others. The same goes for KABC, Los Angeles -- and now KLAX, Long Beach. Nationwide, the sounds of KSL, Salt Lake; KOMA, Oklahoma City; KFAB, Omaha; WIBW, Topeka, and even tiny KFRM, Salina, Kans., are still the institutions built over the years.

Jerry, the fifth estate is changing, and there will be fallout. Who would program a radio station ten years ago for children? Now, Radio AHHS is available [I believe] in over 70-percent of the country. Who would program for an Asian audience ten years ago? Nitch programming will save many stations from being listed as silent broadcasters in the trade journals.

Maybe it's because I have a location for good radio, but I still witness it in cross country travels. The domain of radio is moving, and moving along it is. In twenty years perhaps I too will complain about the state of "analog radio."

I'm proud to contribute to the emerging medium of radio. It's something I believe in, and it's something I'm proud of.

'TWAS THE NIGHT BEFORE CHRISTMAS, 1994
as heard on "Harris In The Morning" on DC-101, 12/22/94
==========

Twas the night before Christmas, And at the White House
Not a creature was stirring, Not even a mouse
When on Pennsylvania Avenue, there arose such a clatter
The whole Secret Service went to see what was the matter
There were tourists and homeless and protesters to boot
And a guy giving the White House a 21-gun salute
Hillary and Bill ran down to the lawn
And Chelsea brought Socks, who did nothing but yawn
The Vice President showed up with Tipper, his spouse
And Al asked, "Who's that on the roof of the White House?"
Every eyeball looked up to see a man with big sneakers
Who shouted, "There's nothing to fear, I'm Gingrich The
Speaker!"
"Remember last month when the voters were pissed?
That's why you're marked naughty not nice on my list!"
"On Thurmond, On Dole, On D'Amato, On Jesse
Not Jackson, but Helms, oh, it's gonna get messy!"
He looked down the chimney with its great roaring fire
And shouted, "Take that Stephanapoulos, and poor Dee Dee
Myers!"
Then he whipped out his contract with the whole USA
While Hillary ran off to a schoolroom to pray
But Bill climbed the roof and yelled out, "Not so fast!
We can work this all out with a friend from the past!"
Then what to their wondering eyes should appear
But a man who could show up and make everything clear
He'd traveled the world making peace in foreign lands
And now he made Bill and St. Newt both shake hands
He made them sit down and just talk for awhile
As the jolly peacemaker watched them with a smile
They both agreed to work together and harder
As they turned to say thanks and goodbye to Santa Carter
He said, "What's important is the people, that's all."
Then he left in his sleigh to end the strike in baseball
As his reindeer started flying, he turned to declare
"Merry Christmas to all, from the ex-President who cares!!"

5936. HELP: Looking for Old Radio Program

Newsgroup: rec.radio.broadcasting
Date: 1994-12-24 04:24:07 UTC
From: "J. Bergman" <jayb99@delphi.com>
Message-ID: <3dg7p7$3ea@vixen.cso.uiuc.edu>
Source record: 35790

Does anyone remember either of these two old radio programs?:

1) "QUIET PLEASE" - on the Mutual Network; on air approximately 1947;
narrated by Ernest Chapel.

2) "IT PAYS TO BE IGNORANT" - comedy show; on air approximately
1945-47.

If anyone remembers either of these two programs, or knows how to get ahold of
any recordings of either show, please post or e-mail me
(JayB99@Delphi.com). I'd appreciate any help or leads you might be
able to provide!!

Thanks,
Jay

5937. Another Satellite Oldies Station

Newsgroup: rec.radio.broadcasting
Date: 1994-12-24 04:24:08 UTC
From: transvox@interstate.net
Message-ID: <3dg7p8$3ed@vixen.cso.uiuc.edu>
Source record: 35792

Yet another 80-90 drop-in that consists of a satellite receiver plugged into a transmitter has gone on the air in the Topeka market.

KQTP, "Oldies 102.9," began broadcasting today (Dec. 22). It is the second new station on the air in the Kansas capital city this year.

KWIC, "Quick 99," began in April with a part-time all-news format (!) and oldies from the Satellite Music Network during off-peak periods and weekend hours.

KQTP is licensed to St. Marys, about halfway between Manhattan and Topeka. The station's legal ID is, "KQTP -- St. Marys, Lawrence, and Topeka." The station is operating on a class C2 (50,000-watt) allocation.

The M Street Directory lists the station as co-owned with KTPK(FM) in Topeka; however, the station's ID calls it a "Sunrise Broadcasting station," which is not the corporate name of KTPK's owner.

Also expected on the air in the Topeka market is a station at 92.5, owned by Kansas City's Bott Broadcasting. Bott owns KCCV-FM at 92.3 in Olathe, Kansas and KAYX(FM) at 92.5 in Richmond, Missouri, simulcasting a contemporary gospel format as "Life 92 FM." It is expected that the Topeka-area station will also relay this programming.

Source record: 35793

A more polished, professional sound can be delivered by satellite. For a modest fee, in addition to giving up a couple of minutes of commercial time per hour, a station can have a live staff, 24 hours a day. Virtually no sacrifice is made to local programming, since a network's clock has provision for numerous local options for the station. To really make it work well, the local station should not view a satellite service as an opportunity to turn on the switch and walk away but to use the network as a programming partner for it's local service.
Good luck with your paper,

Jerry

>From what I understand a new Shepherd movie will be out soon.
The Man himself is supposedly now living in Florida and is
active among the ham radio set.

Audio cassettes of Shep reading some of his stories are available from
Dorset Audio, A Division of Marboro Books Corp., 120 Fifth Avenue, New
York, NY 10011.

Shepherd's Pie (six cassettes in all)

Slice One
Red Ryder Nails The Cleveland Street Kid

Slice Two
Wanda Hickey's Night Of Golden Memories
And Other Disasters

Slice Three
Ludlow Kissel And The Dago Bomb That Struck Back
and Little Orphan Annie Or The Counterfeit Secret Circle Member

Slice Four
Leopold Doppler And The Great Orpheum Gravy Boat Riot

Slice Five
Ollie Hopnoodle's Haven Of Bliss

Slice Six
County Fair

His books include: In God We Trust, All Others Pay Cash;
Wanda Hickey's Night of Golden Memories And Other Disasters;
The Phantom Of The Open Hearth; A Fistful of Fig Newtons; and
A Ferarri In The Bedroom. Shep also made at least four LP
recordings that I know of (one is him reading selected works
of Robert Service.)

Needless to say, I grew up listening to Shepherd and greatly miss him.

I too would also be eternally grateful if someone would post information where other Shepherd tapes might be obtained.

Excelsior You Fat Heads!

In Liberation,

Roy

I'm not sure where Jean Shepard is right now, but a few weeks ago I did hear a Chicago station running a very funny spot for Cub Foods, a Minnesota-based supermarket chain. If it wasn't J.S. doing the spot, it was a damn fine imitation of him. Ran just before Thanksgiving and it was about all of the different types of turkey--and turkey buyers--there are at Cub stores.

Also--this time of year TV shows his flick, "A Christmas Story"--has his V/O narration--very funny "family" flick.

Some questions about the effects of technology/Automation and
broadcasting quality/success. Please post replies..

1. Are there any stations, automated outside of breakfast,
that have ever received a #1 book?
2. Have there been any automated stations moving back to
mostly live and received a significantly improved book as
a result?
3. Are we slowly killing our medium using automation
technology - turning radio listeners away from our product
and towards other more fulfilling forms of entertainment?

In a previous article, lancebkost@aol.com (LanceBKOST) says:
>
>[...] There is also an 1190 in the Greater LA area, KORG, which is
>licensed to Anaheim. [...]
>Formatically, it's a REAL melting pot. They are time-brokered.
>During the weekdays, they run Asian programming. Weeknights, (most of the
>time) it is a simulcast with sister Adult CHR KEZY (95.9)
>Weekends can be quite interesting, live talk one hour and Spanish hits the
>next.

I remember when these stations were KEZY AM and FM, both playing rock music in the early 80's. They played guitar-oriented AOR on the AM, and the "softer" AOR ballads on FM. Their slogan: "KEZY: FM Kicks Back, AM Kicks Ass"!

>Realistically, this station doesn't serve any purpose, other than to
>collect the checks from the people buying the airtime. WIN Communications,
>who own KORG, could do much better than this. They can't possibly be that
>destitute to have to resort to Time Brokerage. Go satellite, do BBC 24
>hours, do something creative (Hey, There's a thought in radio!).

I'm not *that* down on the time brokered stations, as they do potentially allow access to the airwaves for certain types of ethnic or special interest programs/formats that probably would not warrant an entire station. (And, I bet they would serve the communities better than any so-called "free" radio station, at least because of signal quality)

I think KIEV-870 and KMAX-107.1, here in Los Angeles, are better run, and have better programming in general than KORG, though.

>airwaves. Broadcasters are trustees. They don't own the airwaves, except
>in the recent blasphemous auctioning of nationwide licenses in the 2-way
>parts of the spectrum.

Many years ago, in an IRS case, it was determined by a Federal Appeals Court that for all practical purposes, a broadcast license is property (in spite of what the Communications Act says). Thus, money spent on a lawyer in pursuit of a broadcast license is considered contribution to capital.

You can bet I didn't like that. It means I have to pay more taxes!

Reed Hundt is hinting at selling broadcast spectrum. Watch out.

Scott D Fybush (fybush@world.std.com) wrote:
: And we saw how THAT worked back in 1927, didn't we? :-) John's argument
: is in general a good one...but I don't think it holds water in the case
: of WOWO. ICBC isn't buying WOWO in order to turn it off completely, or
: to clean up the AM band (unlike, say, WINS' attempt to clean up 1010 by
: buying and shutting down KBIS Little Rock and WRNJ-1000 in NJ). What ICBC's

Not to change the subject too much, but did KBIS Little Rock really go off the air? I have heard it -- very recently, in fact, both from Atlanta and from somewhere between Atlanta and St. Louis, with the call sign KSYG (the "signal") playing satellite talk with IDs from Little Rock on 1010 KHz.

: And that's just the tip of the iceberg. With WOWO's dominance gone at
: night, it's a pretty safe bet that large 1190 daytimers like WANN
: Annapolis MD and WGKA Atlanta GA will look for significant night power.

WGKA Atlanta is not a "large" 1190 daytimer. Their 10 KW signal is reduced to 2.5 KW during critical hours, i.e., from sunrise to two hours after sunrise, and from two hours before sunset to sunset in Atlanta. This is to protect WOWO, which puts in a very strong signal in Atlanta even during most of those hours -- enough to cause significant interference to WGKA in the northern suburbs.

And WGKA is, except for three hours from 1 pm to 4 pm, entirely on tape and automated. They probably have fewer than 5 employees, and their entire broadcast day (except for some time on Sundays) is recorded classical music. It would be very nice, of course, if WGKA could get a nighttime signal (notwithstanding the fact that I don't live in Atlanta anymore), since there is no other commercial classical service in Georgia, and the owner of that station has indicated that he would be willing to go on at night -- provided that he could do it with enough power to make it worthwhile (e.g., none of that 5-watt business, like WJIB). Also, WGKA has only one tower, and probably could not afford to buy more land to put up more towers to null out New York, Ft. Wayne, Dallas, Portland, etc., etc.

So my guess is that, while I think WGKA may be more deserving of a nighttime signal on 1190 than WLIB (and Atlanta certainly has a dearth of AM signals at night that can reach any of the northern suburbs), it is unlikely (though not impossible) that WGKA will get a full-time signal if the WOWO/WLIB signal debacle comes to pass.

Of course, if WGKA's owner had enough money to buy WOWO to shut down the signal, and then sell the station for nearly what he paid for it (so as to get his nighttime signal for free, like WLIB), I don't doubt that he

probably would have done it, too. Even I would have done that if I thought I could get a nighttime signal for free, or just for a few month's interest on the money to buy and resell WOWO.

I don't know if this helps the folks who are trying to save WOWO, but it is worth a mention. On Friday, December 23rd, from 7-12 (not sure exact time), WOWO is going to broadcast phone calls from listeners to send holiday greetings to relatives and friends in the Eastern US holiday greetings. Might be a good time to get an idea of what parts of the country are listening to WOWO based on the locality of the people calling in.

My response to: William Pfeiffer - Moderator/Editor

Your writings cause me significant emotional response. This thread is quite interesting. I love it when people rail at FCC policy.

I suspect you really want radio to be the way it was in 1940. A few stations, national nets, big audiences.

Things have changed, and will continue to change. So what? So, I do not think you are clear about what you want. I doubt you really want a return to the time when you could twist the dial at night and hear the same NBC program from LA, Denver, Chicago and New York. (I actually remember hearing that at night as a kid in Missouri.)

So, I suggest, instead, thinking about how you would like mass media to work in the digital age. I think we need to be concerned about diversity, access, and concentration of control of outlets by a few entities.

By the way, don't you think it strange that the FCC under Democratic leadership is advancing a more "business oriented" policy? I wonder about what difference we can find between Democrats and Republicans.

Mark, I trust you'll share the results of your research with us.
Meantime, information I have on hand indicates that when the 550-1350
broadcast band was opened up on May 15, 1923, it was intended that
each frequency between 550 and 1040 would have only one station or
share-time pair, or two stations on opposite ends of the country.

I have several station lists from the 1920s in the form of text
files. I'm pasting in a 6/30/25 list, but just showing stations
below 1080 kHz. It indicates that the plan apparently was adhered
to. However, I don't have any idea when the term "clear channel"
first came into use.

>Newspaper Commission to require newspapers to operate in the
>public interest.
......

I differ with the above. Scarcity should be measured in terms of the demand
for channels to transmit on, not economic viability. If more people want to
broadcast than the spectrum can "support", then spectrum is scarce.

If licenses were not required to broadast, you would hear "casual"
broadcasters, political party stations, full time advertising stations, etc.
I.e., far more variety.

>>Between Duopoly (I am still waiting for all that great
>>programming that was supposed to happen when Duopoly was
>>introduced), LMA's, relaxation of ownership quotas, removal on
>>simulcast restrictions, removal of the 3-year rule and most
>>recently... the allowance of totally unmanned radio stations

Spectrum scarcity is inversly proportional to the bandwidth one entity is
allowed to "own". Multiple stations owned by one entity results in whatever
FCC rules allow and the owner desires.

5952. alt.fan.greaseman FAQ

Cross-posted to: alt.fan.greaseman,rec.radio.broadcasting,alt.answers,rec.answers,news.answers

Archive-name: greaseman-faq

The Greaseman is a radio personality on the Infinity Broadcasting network. He broadcasts from Los Angeles to New York City, Washington, Atlanta, Philadelphia, and San Jose. He is known for his bits and song parodies. He also has his own vocabulary which he uses to avoid trouble with the FCC. Before, he broadcast out of DC on DC/101 where he competed and beat Howard Stern on a consistant basis. The Greaseman is on by himself most of the time, though sometimes you hear his producer, Bill Scanlan cackling in the background.

Q: What is the Greaseman's real name?

A: Doug Tracht. He prefers to keep his radio life and his personal life separate. His radio name is Nino Greasemaneli.

Q: Why does Howard Stern hate the Greaseman so much?

A: Howard worked for DC/101 until he got fired. When the Greaseman was hired to take Howie's place he not only held on to Howie's audience but increased it. Then when Howard syndicated in DC he competed with the Grease until the Grease moved to Infinity where they now are co-workers for the Broadcasting Giant. Now, mentions of the Greaseman on the Howard Stern show appears to be just an act in part of Stern.

Q: Which one was the Grease in the Village People?

A: He was not really in the Village People. But in the bit, he was the construction worker.

Q: What is this Bingo that the Grease dislikes so much?

A: The Greaseman's college nick name... Ask him about it.

Q: How can I get in touch with him?

A: Call him between 1730 and 2200 EST at 1-800-544-9294 and 1-213-850-0986 (FAX) and BTW do not address him as "dude".

Q: What bits does the Greaseman do?

A: Fudgeman- Fudgeman and his chicken assistant throbin
save the world from deviant behavior
Back in time with an uzi-
the Grease uses the equipment in the radio
studio to return to key moments in history

with his uzi
Carlos the International Terrorist-
Episodes of running into the famed and heavily
armed terrorist, Carlos
Medical Man- Stories about when Nino was the pompous
Dr. Greasemaneli
Bet the Bomb Bays-
Try to stump the Grease, but if you don't, you best
drop them pants....
Sgt. Fury- the Grease relives his time in Viet
Deliverance 101-
a class in which the Grease analyzes the movie
Deliverance.
Clinton- a look at how life would be if the Grease and
Clint Eastwood got a knock on the head and decided
to live alternative lifestyles
Law Man- the Grease tells about life as a law man
Big Dick Brannigan-
the Grease tells about his flashback to his past
life as a private dick
Emperor Tocasfacius-
the Grease tells about his flashback to his past
life as a ruler of the Holy Roman Empire
Irving Greasemanawitz-
the Grease tells about his flashback to his past
life as the first Yiddish Lawman
Wheel Chair Warrior-
Super Hero fights for the rights of the handicapped
West Virginia- Greaseman shows his respect for the people of WVA
My Daddy- Description of how Oscar Greasemaneli gets into trouble
Ugly Women- Recounts of how The Grease and his daddy picked up
and enjoyed ingus with ugly women
Good Ship Grease-
stories about how the Grease spends his lesiure time
in his boat.
South of the border-
stories about how the Grease spent time in Mexico
Toe Monster- The dreaded Toe Monster is exposed for trying to
eat the Greaseman's toes
Blastapiece Theatre-
stories told by Sly Stalone
Sylvester Stalone sings the classics-
Sylvester Stalone sings the classics.
Rag Nad- stories about Grease's half space alien love child
Six Minute Workout-
A unique workout for men
Baby talk- Conversations with the unborn
The Greaseman Quiz (formerly the morning quiz)-
Watch out Alex Trebek, here comes the Greaseman
Hobo-doo-ga-ga Handbook-

Methods to which recieve ingus.
Damien- The Grease has occasion to run into the "dark master"
while he is trying to perform his duties.

Q: What is the alarm that is sometimes heard in the background when the
Greaseman talks?

A: The Geeze alarm. This goes off when the greaseman starts geezing.

Q: What other gigs did Grease do on the radio?

A: Like any other up-and-coming DJ, Grease worked at other stations in
other markets to develop his unique style. They include:

Washington DC (WRC-AM 980) 1974 - 1976
Jacksonville, Florida (WAPE) 1976 - 1981
Washington DC (WWDC-FM 101.1) 1981-1993

Q: Did he always leave on good terms?

In almost all cases, yes. The one notable exception was WRC, when
management decided his morning personality wasn't quite right, and gave
him a choice between dropping the "Greaseman" character and leaving.
Grease chose the latter. If you ask about it today, he will joke about
the time he was collecting unemployment insurance in DC and would "stay
up to watch the moon rise and CURSE THE NIGHT!" although I'm sure at the
time it was somewhat unsettling.

Although he left Florida voluntarily to take the better offer at DC-101,
he did offend some bible-belt types during his stay. The Florida gig
was important to developing the Grease as a "god-fearing, truck-driving
redneck," though. The Florida station has since gone to religious music
("From Grease to Grace" was their motto for a while). Their loss.

Q: Are there any good biographies or other comprehensive stories about
the Greaseman?

A: Grease is a very private person, and spent a number of years in DC
before finally consenting to an in-depth story about him in the
Washington Post Magazine Fall 1987. It's a good resource to summarize
his past gigs and overall life story. Also the Washingtonian Magazine
did an article on him in the January of 1993 in commemeration of his
departure from DC.

Grease also appeared on the Larry King Show (early to mid-80's) to talk
about morning radio in general. The only down side was that he was
teamed with a "Morning Zoo" DJ as a co-interviewee, a format that has
become annoyingly ubiquitous on the radio landscape. Transcripts may be
available (don't know how to get them, sorry). This is the old
Mutual show that ran all night (Grease probably got up early to do it :-),
and not the current CNN TV talk show.

Q: Are there any albums or compilations of Grease bits?

A: There was a 4-part "Best of Grease" compilation, available on cassettes. These became unavailable shortly before he left DC-101. They are now prized collectors items and can only be obtained from private owners. Part of Grease's popularity on a national basis before he went into syndication (and hence part of the motivation for this newsgroup) was the creation and exchange of bootleg tapes among an extended network of fans. Some of his best work has never been republished (although you can occasionally talk him into doing them again on his current show).

Q: Did Grease ever serve in the military?

A: Like John Wayne, Grease has a deep and abiding respect for everyone who serves in uniform, but never served himself. During the Vietnam war, he was attending Ithaca College in New York, and his draft number never came up.

Q: But Grease did serve as a policeman?

A: Yes, he did. While working at his gig in Florida, he worked as a reserve police officer on the night shift. Morning staffers would be jolted out of their bleary-eyed state by the sight of Grease doing his show in full uniform with a 44 Magnum strapped to his belt.

Q: Is Greaseman a bigot/homophobe?

A: Certainly not. Like the program "In Living Color" or even rec.humor.funny, Grease parodies what's funny in everyone, and winds up defusing hatred as a result. Grease respects all of his fans, and wishes well even those who don't like him.

Q: But there was that "Martin Luther King, Jr." incident in DC?

A: Yes, sometimes there's a fine line between parody and cruelty, and Grease crossed the line only once during his otherwise unmarred broadcasting career spanning over 2 decades.

Sometime in the late 80's, he was noting the passing of Martin Luther King Jr.'s birthday (which had then only recently become a national holiday). Grease said something about "killing 4 more and getting rest of the week off." Grease was suspended, and apologized for the incident on an "Editorial Rebuttal" on WRC-TV in DC.

Haven't the rest of you made mistakes or are you all perfect?

Q: What does AMF mean?

A: Adios my friend.

Q: What is the "Bit without an Ending?"

A: When Grease was working in Florida, he would be prevented from getting a good day's sleep after his morning gig by thoughtless model-airplane enthusiasts who would buzz their models outside his window.

Grease came up with a revenge skit with a model plane of his own that would shoot the others out of the sky. The plane became posessed by Damien and started chasing after him. Grease then got too deep into this bit without a way out (and tried to incorporate this into the bit). After fumbling with the sound-effects, and trying a foray South of the Border, and then calling in Big-Dick Brannigan, he finally gave up groping for a punch line. Grease can usually be counted on to do some of the most impressive ad-libbing and improvisation on the radio today, but at that time his talents failed him. The bit originally aired in the Fall of 1982 from WWDC FM Washington, DC/101.

It's considered a classic, and is on Vol. 1 of the "Best of Grease" tapes. He owns the rights to all his bits, and may rerun it on his current show from time to time.

Q: What stations carry the Greaseman?

A: City Station Time
==== ======= ====
Washington DC 106.7 WJFK 1900-2300
Baltimore MD 1300 WJFK 1900-2300
New York NY 92.3 WXRK 1800-2200
Philadelphia PA 94.1 WYSP 1800-2200
Los Angeles CA 95.5 KLOS 2300-0000
Atlanta GA 92.9 WZGC 0600-1000

Q: I like what I have read so far, but the Greaseman is not currently in my city. Is there another way I can get hold of this zanyness?

A: Sure there is, there is currently a Greaseman Web server at http://absolut.gmu.edu/greaseman/ where you can listen

5953. FAQ: Old Time Radio (OTR) Newsletter

Newsgroup: rec.radio.broadcasting

Frequently Asked Questions (FAQ) File for OTR
The Old-Time Radio Newsletter
(FAQ Edited by Lou Genco (lgenco@crl.com))

Last Modified Sat 12-24-1994
---------------------

Copies of this FAQ are distributed monthly to rec.answers and other
newsgroups, and are on file at bloom-picayune.mit.edu in the file
/pub/usenet-by-group/news.answers/radio/old-time-faq. Updates may
occur more frequently than the normal distribution schedule. The most
current version is available by anonymous FTP from ftp.crl.com,
directory: users/ro/lgenco. See FAQ for more info on ftp and WWW
access.

---------------------

Table of contents:

Q1. What is "OTR"?
Q2. You haven't mentioned OTR music, why not?
Q3. Where can I buy recordings of old radio shows?
Q4. Which vendors have (lower prices) (higher quality) (faster
response)?
Q5. Are OTR shows rebroadcast? If so, where and when?
Q6. I remember a great show called (x). When was it aired?
Q7. Are there any books about OTR?
Q8. Does anybody trade tapes of OTR shows?
Q9. What's this stuff about Copyright?
Q10. How can I get my local radio station to broadcast OTR
programming?
Q11. I have some old transcriptions and tapes, how can I make them
sound better?
Q12. Are there any OTR clubs near me?
Q13. I have some OTR tapes of the same program, but their dates are
different. Why?
Q14. Is there anywhere I can get a complete listing of all the
episodes in a serial?
Q15. Is there anywhere I can get a written synopsis of the themes of
OTR programs?
Q16. Is there a World Wide Web page (URL) or FTP address that I can
```

access for more info?
Q17. How do I subscribe to the OTR electronic newsletter?
Q18. Can I get archived copies of old issues of the OTR newsletter?
Q19. What is the best way to archive OTR programs?
Q20. My old reels squeak. Why does this happen, and can I fix it?
Q21. Where can I find more information about antique radios?

Q1. What is "OTR"?
A1. OTR is an abbreviation for "Old Time Radio", a term loosely applied to radio programs broadcast from the dawn of broadcasting to the early 1950's. Alternate names are "radio nostalgia", "golden age radio", etc. Usually this applies to radio drama, mystery stories, comedy and adventures.

Q2. You haven't mentioned OTR music, why not?
A2. There was a good deal of "big band" and other music broadcast during this era. For some reason, there seems to be more current interest in the dramas rather than in the music. There is no restriction to discussing OTR music in the OTR Newsletter.

Q3. Where can I buy recordings of old radio shows?
A3. There are several individuals and companies willing to sell tapes of OTR programs. A partial list can be obtained from the OTR WWW page or FTP address listed later.

Q4. Which vendors have (lower prices) (higher quality) (faster response)?
A4. Prices, quality and service differ somewhat among all vendors. Check with other subscribers to the OTR newsletter to learn of their experiences, then check with potential vendors.

Audio quality is an important consideration when purchasing recorded tapes. As yet, there is no "standardized" description of sound quality. Jim Widner and other OTR collectors have suggested various metrics to describe the quality of OTR recordings. Discussion of these standardized descriptors is ongoing, and is summarized at the archive site, FTP sites and WWW sites.

Q5. Are OTR shows rebroadcast? If so, where and when?
A5. Yes, several AM and FM radio stations and three satellite feeds rebroadcast OTR. Check the OTR WWW page or FTP site for current info. If you learn of other sources, leave a note!

Julian A. Smith (jsmith@blues.epas.utoronto.ca), Frank Passage (passage@pluto.dss.com) and Bill Pfeiffer left the following information:

For AM listening, try the brand-new National Radio Club's _AM Radio Log, 15th Edition: Complete Listing of U.S. and Canada AM Radio Stations_ (Mannsville, N.Y.: NRC, 1994). All AM stations carrying things

like "Old Time Radio" are listed with the format code NOS (Nostalgia), and there are lots of other codes. [Order from NRC Publications, Box 164, Mannsville NY 13661-0164 USA. Price range: $20.00]

For FM listening, I'd suggest Bruce F. Elving's _FM Atlas_ (Esko, MN: FM Atlas Pub., 1993). Alongside lists, this has _maps_ of your area and its stations as well. [Order from Bruce Elving, PO Box 336, Esko MN 55733-0336. Price Range: $11.00 + approx $1.00 s/h]

The M Street Radio Directory, M Street at 800-248-4242 or +1 212 473 4668 voice, or +1 212 473 4626 fax. The address is M Street Corp., 304 Park Ave S Floor 7, New York, NY 10010 USA. costs $29.95 + p/h,

Q6. I remember a great show called (x). When was it aired?
A6. Check with subscribers to OTR newsletter, or look through the program database (WWW or FTP). Also see answer A14 below.

Q7. Are there any books about OTR?
A7. Yes, there are several books related to OTR. See the WWW page or FTP site for a list of some of them.

Jim Widner left this address for a bookstore specializing in OTR books:

Rainy Day Books
P.O. Box 775
Fitswilliam, NH 03447
(603)585-3448

Bob Crump reminded us that most good used book stores will do a nationwide search for a title, if given enough time. Henry Brugsch <henry@g0gku.demon.co.uk> related a good experience with the following on-line bookstore:

Acorn Books
acornbks@netcom.com

Q8. Does anybody trade tapes of OTR shows?
A8. Yes. Check with subscribers to the OTR newsletter. We hope to get a database of private traders as well. Leave a note in the OTR newsletter if you want to be listed in this database.

In addition, some subscribers are providing "round robin" tape exchanges, in which "master copies" of cassettes or reels are mailed from subscriber to subscriber, and enventually returned to the originator.

Q9. What's this stuff about Copyright?
A9. The copyrights on most OTR shows have expired. A few copyrights

have been renewed. Examples of the latter include The Shadow and some of Arch Oboler's productions.

Q10. How can I get my local radio station to broadcast OTR programming?
A10. Call the station and tell them of the many people who like to listen to OTR. Suggest this programming will increase listenership and help buy things from their advertisers.

Q11. I have some old transcriptions and tapes, how can I make them sound better?
A11. You might try using a good equalizer and/or digital signal processing unit (DSP) between the playback and recording devices. Some people have mentioned that the Radio Shack DSP unit does a fair job. There are also other, more expensive DSP units available from Ham radio stores and audio stores. Some subscribers have attested to the efficacy of the Timewave brand of DSP units.

Randy Riddle (Rriddle@aol.com) left this information:

There's a firm that sells archival quality turntables
and sound processing units that can dramatically
improve old recordings. Their sound processing unit
runs around $300.

Audio 78 Archival Supplies
PO Box 187
San Anselmo, CA 94979
415-457-7878

Henry Brugsch <henry@g0gku.demon.co.uk> left this information about Digital Audio Format (DAT):

The dat-heads mailing list maintain an archive of all
their material at the following site:
ftp.atd.ucar.edu. Log on with the usual anonymous
then, your routine password. head on over to
/pub/dat-heads/ You will find a wealth of info up
there. All the digests to the current day, and mike
faqs, as well as market postings on equipment. Highly
recommendable for anyone to get their feet wet in this
media. Happy taping

Q12. Are there any OTR clubs near me?
A12. Check the club listing in the WWW page. We will add clubs as they become known to us.

Q13. I have some OTR tapes of the same program, but their dates are different. Why?
A13. Sometimes broadcasts are dated according to their original broadcast date, and sometimes according to a date on which they have been rebroadcast. For instance, the Armed Forces Radio Service rebroadcast many Mutual Radio transcriptions at a later

date. Your tape may be of one of these later dates. Alternately, somebody might have made a mistypopgoof.

Q14. Is there any place where I can get a complete listing of all the episodes in a particular program serial?
A14. Some of the larger vendors / collectors may have this data. If you find such a publicly available source, we can make it available in the Internet OTR file repository.

Some of the OTR Newsletter subscribers have contributed Program Logs for several well-known series. The logs are available at my FTP/WWW site.

Jay Hickerson maintains several logs and lists, as well as -Hello Again-, an OTR newsletter. Jay is the author of -The Ultimate History of Network Radio Programming and Guide to All Circulating Shows- (last supplemented in Oct 94). Jay's address is:

Jay Hickerson
Box 4321
Hamden, CT 06514
(203) 248-2887 FAX (203) 281-1322

Q15. Is there any place where I can get a written synopsis of the themes of OTR programs?
A15. Again, some vendors include this information with their catalogs. If you would like to contribute your interpretations of the themes, send them to the OTR newsletter for inclusion in one of our databases.

Jim Widner has contributed some synopses / introductions to various programs. They are on file at my WWW/FTP site.

Q16. Is there a World Wide Web page (URL) or FTP address that I can access for more info?
A16. Yes, there are two WWW sites, as well as two anonymous FTP addresses and a Gopher. The two WWW sites are independent, and contain different information, but each can be accessed from the other. The FTP directories each contain different files & information. My FTP site holds OTR station lists, catalogs / libraries, bibliography, the most recent FAQ, etc. The Airwaves FTP site holds archived copies of the OTR digests as well as other files relating to -Airwaves- and rec.radio.broadcasting.

(1) My site:

World Wide Web URL:
ftp://ftp.crl.com/users/ro/lgenco/otr.html

FTP:
Anonymous FTP to ftp.crl.com
directory: users/ro/lgenco

(2) AIRWAVES E-Publishing's Site:

FTP:
Anonymous FTP to radio.aiss.uiuc.edu,
directory: misc/rec.radio.b-cast/OTR.

GOPHER:
gopher radio.aiss.uiuc.edu 7070
(select "OTR")

World Wide Web URL:
http://radio.aiss.uiuc.edu/~rrb

For subscribers without normal FTP access, there is a (presently experimental) FTP-by-mail server. For more information, send email in -exactly- this format:
To: lgenco@crl.com
Subject: Request otrhelp
(the body of the message is ignored)

Q17. How do I (un)subscribe to the OTR electronic newsletter?
A17. To subscribe, send email
To: otr-request@airwaves.com
Subject: SUBSCRIBE

To unsubscribe, send email
To: otr-request@airwaves.com
Subject: UNSUBSCRIBE

(The body of the message is ignored in both cases)

Q18. Can I get archived copies of old issues of the OTR newsletter?
A18. Yes. The OTR Digests and Index are updated three times a week, and are accessible through the WWW pages mentioned above, or from the AIRWAVES anonymous FTP site mentioned above.

Q19. What is the best way to archive OTR programs?
A19. The most popular way seems to be reel-reel tapes, using each of the four tracks to record monophonically. Cassettes are generally fine for portability / ease of use / exchange, but they suffer from several problems when used as a long-term storage medium. The Hi-Fi VHS tape is gaining in popularity because of its six-hour storage capability and relatively robust mechanical construction.

Some subscribers have mentioned TalkingBook tape recorders as a possible archival method. These recorders operate at 15/16 ips (half the speed of a standard cassette recorder), and can operate in 4-track mode, thus giving up to 6 hours of play time on a standard 90 minute cassette.

Don Coco (djc@crl.com) left the following information about sources for Talking Book type equipment:

The American Printing House For The Blind
1839 Frankfort Ave.
Louisville, Kentucky 40206
Tel. (502) 895-2405

Sells Braille and recorded books, 4 track recorders which record
at 15/16 IPS, and other products of interested to Visually
Impaired persons. Price of 4 track recorder around $175

I.R.T.I.
1411 West El Camino Real
Mountainview, Ca. 94040
Tel. (415) 961-3161 or (800) 322-4784
Sells all including Radio's, TV's with SAP, Reading Machines,
Computers ETC.

Conrad Trautmann (CONRADTRAUT@delphi.com) left this note in
response to a query about finding used reel-reel machines:

You can also call Harris/Allied used equipment
division at 1-800-622-0022 or call Radio World
magazine at 703-998-7600 for subscription
information. Radio World is an industry trade and has
used equipment listings in the classifieds once a
month.

Q20. My old reels squeak. Why does this happen, and can I fix it?
A20. There are at least two causes for "squeaky reels" on a
reel-reel tape recorder. (1) The tape edge may be rubbing
against the rim of a distorted take-up reel, or (2) the oxide
may be sticking to your erase (or other) heads. If the former,
the least frustrating alternative is probably a new take-up
reel. If the latter, Fred Korb left this note:

If you have any squeaky reels that you would like
to recover, I will be glad to send you more
information on how to do it. Just send me a
stamped self addressed # 10 envelope and I will
respond. Send your request to: Fred Korb, c/o
Oldtime Radio Collectors and Traders Society, 725
Cardigan Court, Naperville, Illinois 60565-1202.
I am willing to help you preserve the sounds of
radio days gone by.

[Editor's note: I tried Fred's method. Although temporary, it
does indeed work! I'd recommend it for those squeaky tapes that
you wish to re-record onto newer reels. Much less tedious than
manually holding a cotton swab soaked in tape head lubricant
against the tape!]

Q21. Where can I find more information about restoring antique radios?
A21. An excellent place for discussions about antique radios,
phonographs and accessories is the rec.antiques.radio+phono
newsgroup, created by Bill Robie.
